Mr. President, if the experience after World War I is any criterion, this farmer is 1,000 percent right. What happened all through that vast farming area after World War I? The price of wheat dropped and dropped and dropped, until in the city of Bismarck, N. Dak., it got down to 19 cents a bushel. Wheat dropped from $2.50 to 19 cents a bushel. In Fargo, N. Dak., it was 24 cents a bushel. I myself sold some at that price. What about farm machinery? What about the other things the farmers had to buy? Did they drop in price? No, Mr. President, they did not. I repeat, Mr. President, this farmer is absolutely and everlastingly right.

I have spoken of farm machinery. Let us for a moment reflect on what happened to the price of machinery the farmer had to use. When I came to Washington, I went to the Department of Agriculture to ascertain whether the price of farm machinery had decreased at that time. I found that it had not. The manufacturers had turned out just enough to supply the demand at that time, and the price remained as it had been. At the time I made the inquiry, I placed in the RECORD the index figures supplied by the Department of Agriculture.

This farmer goes on to say, in his letter:

> So I think someone from the Government should give the farmers an explanation of how much a farmer should take a loss on, in this falling market. They think they know everything. They know nothing.

Mr. President, I do not blame this farmer at all for saying that, because only a few months ago Government agents were regulating the farmers from the time they got up in the morning until the time they went to bed at night. Government agents were regulating and regulating and regulating the farmers. The farmer who writes this letter evidently is one of the farmers who had that kind of experience, and who found it was not very profitable.

Mr. President, that experience does not only apply to farming. For instance, I know a banker who, after World War I, had the finest gilt-edged securities imaginable. One day a bank examiner walked in. What happened? Oh, Mr. President, it is all of the same pattern. The bank examiner walked into that little bank and said, "You have got to sell some of these bonds." The banker said, "Why should I sell them? Aren't they good?" The bank examiner replied, "They are 'blue chips.' It does not make any difference; you have got to buy bonds from South American countries." The record of the investigation shows that J. P. Morgan & Co., of New York, had made a deal for South American bonds, that the banker protested repeatedly, but finally had to buy bonds of the Republic of Brazil, if it may be called a republic. He paid par for those Brazilian bonds. Later, when I was in the bank, he showed me the bonds, which were then worth 17 cents on the dollar. When Mr. Krabbenhoft, a farmer, says in his letter, "the Government knows everything; they think that they know everything, but they know nothing," he is perhaps thinking exactly along the same lines as that banker who was almost wrecked by being compelled to take South American securities.

Mr. Krabbenhoft concludes as follows:

> Well, BILL, after I write this letter I may feel better. Be glad to hear from you.
>
> Yours truly,
>
> ERHARDT KRABBENHOFT.

I confess it made me feel better to have him write to me, because in this great country of ours people may say pretty much what they please and what they think, and, if they wish, they may have it read on the floor of the United States Senate.

I have another letter. I do not wish to chide my Republican colleagues about the tax bill that was considered at the recent session, and I am not going to chide them, but I do want to call something to their attention in view of the letter I am about to read. I will read the entire letter:

> HAZEN, N. DAK., *February 7, 1948.*
>
> The Honorable WILLIAM LANGER,
> *Senator from North Dakota,*
> *Washington, D. C.*
>
> DEAR SIR: Please act on the problem of the American teacher. Each year they face low salaries, unequipped, cold, and crowded schools, and the faces of innocent children who do not realize the wrong that is being done to them.
>
> Americans do suffer from lack of educational expenditures. More is spent for luxury than for education. "Let's save a nickel and waste a dime," has been the policy in American education. School boards for the very greed of money hold costs of their schools to the very minimum as required by law as a method of reducing taxes.
>
> Teachers love their profession, but the future looks dark. Like myself, teachers with families question whether it is wise to continue our work in education. A teacher's family has to live as any other family.
>
> Sincerely,
>
> DONALD J. HUESERS,
> *Principal, Hazen High School.*

What does the record show? There has been much talk in the Senate about educating children and about Federal aid to schools, but when the test comes, just as it now comes in connection with the measure dealing with the St. Lawrence seaway, the two situations are similar. The last five Presidents, including President Truman, have endorsed the St. Lawrence seaway. President Truman is asking for it now. It was also endorsed by Theodore Roosevelt when he was Governor of New York, which makes a total of six Presidents who have endorsed the project. Each of those six Presidents has likewise endorsed Federal education, which still awaits action.

The record shows that during World War II over 600,000 boys were rejected by the Army and Navy because of lack of education. An effort was made to obtain Federal aid for schools 2 years ago, but the measure was killed on the floor of the Senate. The young man whose letter I have just read, who has a family, wants to know what is going to be done about the matter. I am waiting to see what is going to be done about the St. Lawrence seaway, which, as I have said, has been endorsed by six Presidents.

Power companies do not like the seaway. I can tell Senators about the power companies. When I became Governor of the State of North Dakota, the State was paying from 7 to 9 cents per kilowatt-hour for current with which to light the Governor's mansion, the capitol, and the penitentiary. We were building a new capitol, which was to have four elevators. The light and power plant was owned by Mr. Insull, of Chicago. I called in the manager, Mr. Blackstone. I wanted to know what it would cost us to operate the four elevators. He stated it would cost $5,000 a year for each of the elevators. I called in three well-known experts in the field of electrical power, Mr. Roush, of the State Agricultural College of North Dakota; Mr. Irving Levin, of the University of North Dakota; and Mr. John Severson, who runs the mill and elevator at Grand Forks, which is owned by the State. Mr. Severson is the electrical engineer in charge. Those three experts were called before the industrial commission of the State, composed of the Governor, the attorney general, and the commissioner of agriculture and labor. The manager of the Insull plant was also summoned. We said to the three men, "We want you to make an investigation to determine what North Dakota actually should pay for light and power, and we want you to turn all the engineering data over to Mr. Insull's manager, Mr. Blackstone." At the end of 3 weeks they reported that if, instead of the State of North Dakota paying 7 to 9 cents per kilowatt-hour, it were to pay three-quarters of 1 cent per kilowatt-hour, the public utility would still be making a great deal of money. The engineering data were turned over to Mr. Insull's representatives, and the commission set a day on which they were asked to appear before us for the purpose of showing what, if anything, was wrong with the figures. What happened? They returned with two lawyers, who said, "If you proceed, as you have threatened to do, to have the State build its own light plant, we are going to enjoin you, because we have a franchise in Bismarck, N. Dak." They said further, "If you violate the injunction, you will be arrested and brought into the Federal court."

I said to them, "My friends, I have been arrested and tried so often that being arrested once more means nothing to me." We hired the Pillsbury Engineering Co., of Minneapolis, Minn. We paid them $10,000. They drew our plans. On the day on which the bids were to be let the power company appeared before the Commission and said, "If you will include a training school at Mandan, we will furnish the light and power for 1 cent." I will say, Mr. President, that we agreed and accepted the contract for 1 cent instead of paying the amount we had previously paid. We made them sign a 10-year contract, and the people of North Dakota, by that little transaction, saved $40,000 a year for a period of 10 years, or $400,000. That was the experience we had in one town in North Dakota. I might add that we had almost the same experience at Fargo and at Grand Forks.

Yet, Mr. President, coming back to the matter of REA, if the bill which I introduced, providing for $1,000,000,000 for REA, had been passed, it would not have cost the taxpayers one single penny, because, as is well known, the farmers and cooperatives pay back every nickel. What is granted them is a loan; it is not a gift. In the testimony of Mr. Wickard it is shown that of all the hundreds of cooperatives to whom loans have been made, only one has defaulted. The testimony shows that of the millions of dollars due at the present time, $17,000,000 has been paid in on principal and interest before it has become due.

Yet it is said that the Republican Party is pledged to economy. What in heaven's name has that to do with REA, Mr. President? The money is loaned for the purpose of building REA lines to the farmers, and the farmers pay back every nickel.

Only recently I heard the distinguished chairman of the Senate Committee on Foreign Relations [Mr. VANDENBERG] say he was in favor of sending $60,000,000 to China. We sent it to them, and we sent them, Mr. President, approximately $20,000,000 more a month. But when it comes to fighting the power trust it is different. Do not give the farmers light and power, for heaven's sake, because perhaps 2 or 3 years from now some private power company will be able to supply them and thereby put more profit into the company's treasury.

I have another letter which was received this morning from Cavalier, N. Dak., dated February 9, 1948. It reads as follows:

Senator LANGER,
Washington, D. C.

DEAR SIR: We already had 5 months of winter and no work here in North Dakota. My husband applied for his social security about 3 months ago but we haven't heard a word. We have six children at home, all going to school except the youngest, and we have four who have finished their schooling. One of those four is married, one in the United States Navy, the other two are working, one in an office, the other on a high-line job.

Now we never received aid of any sort such as WPA and we aren't asking for aid now, but we really believe we are entitled to the social-security payments. My husband is a mason or cement worker, a brick- and block-layer, and we have no stock to depend on. We rent a house. If you fellows are as anxious to take care of Americans as the Europeans you should have less red tape in government. My husband fought in World War I. We never asked for social security before, but now we really need it. Are we or aren't we getting it?

Yours truly,

MRS. G. ERLENDSON.

I do not think the writer of the letter would have any objection to having her name put into the RECORD.

Mr. President, when the Senate was discussing the $4,000,000,000 loan or gift to England, I offered an amendment providing that the $4,000,000,000 be applied for education and schools in this country. My amendment was rejected, but before the vote was taken I told the Senate what happens in Canada. In Canada a child is paid for going to school, $5 in the grades, $8 in high school. I remember the snickering on the part of some Senators who heard that statement when I made it. I seemed to hear them say, "The idea of paying a child to go to school."

Mr. President, I have previously spoken of two residents of Bismarck, N. Dak. On the south side of the tracks lives the family of the late Mr. George Gieger. Living next to me is the wealthiest man in the State. He does not have a chick nor a child. He goes to Florida or California or some other balmy place every winter. Mr. Gieger's family, which lives on the south side of the tracks, is composed of Mrs. Gieger and her boys. There were five of them. Mr. Gieger worked in the hotel as a porter or elevator man. His health was bad. Yet, that man had to buy schoolbooks for his children. He had to buy their clothes. He could not take trips to any warm climate in winter. When the war broke out what happened? His five boys enlisted in the Army and fought to protect the property of the millionaire. Why should not that millionaire have contributed, through payment of taxes, as is done in Canada, to help pay for the schooling of such boys as Mrs. Gieger's, who were later in life to fight to preserve America and fight to preserve my property, and the property of my neighbor? One of the boys was killed in the war. Mr. Gieger's widow wrote me and asked whether she could not be given the money which it would cost to bring back the body of her son, because the family was poor and destitute.

Mr. President, what happened to the $4,000,000,000 England received from us? I call attention to what was stated in an editorial published in the Washington Times-Herald, which said that within 4 weeks after England received that money her Labor Government was using part of it to pay English boys and girls to go to school, just as is now being done in Canada.

Mr. President, it may be that living on the Canadian side of the border makes a difference in a man's viewpoint. There is located on the border a Peace Park, composed of thousands of acres. It is located on the boundary line between Canada and the United States. Every year a celebration is held there. We boast that the United States is the greatest country on earth. If two farmers, one from Canada and one from the United States, meet at that celebration, they will talk things over. The farmer from the United States will ask, "How are things in Canada?" The farmer from Canada will ask, "How are things in the United States?" As they talk they will discover that during the drought, when the people on both sides of the border needed money, and needed food, both Governments loaned money for seed and feed. The two farmers who are conversing were granted loans, and were obliged to give notes and security for the loans. What happened? When the drought was over Canada said, "We will cancel the feed and seed loans. Those farmers were poor. They mortgaged everything they had. We will cancel the loans." What did the United States do? We give our money away freely to the people of other countries, but we said to our farmer who had borrowed money, "You have got to pay, and you must pay with interest at 6 percent." Our Government is doing that today. It did the same yesterday, the day before yesterday, a week ago, a month ago—ever since 1929. In many cases the interest amounts to twice as much as the principal.

Mr. President, last week I submitted to the Department of Agriculture for its consideration a bill which would provide that in the case of an individual who had borrowed from the Government to buy seed and feed, for example, a widow who had just enough money to keep body and soul together, the Government would waive its claim. Yesterday I received from the Department of Agriculture an adverse report, which means only one thing, that they will continue to require the repayment of every single nickel of the money borrowed, even though it will mean that the widow will be put out on the street or forced to go on relief.

Again, Mr. President, when farmers or businessmen from Canada and North Dakota meet in that Peace Park, they may discuss the matter of pensions. A Canadian will say, "I am receiving an old-age pension." A man from the United States will say, "I also am receiving an old-age pension." They talk further, and the man from the United States discovers that the Canadian does not have to mortgage his house, he does not have to give a deed to the welfare board, he does not have to surrender his insurance policy, in order to receive the pension, because in Canada, as in 11 States in America, such aid can be secured without giving up everything the individual possesses.

I took this particular matter up with the Social Security Board, and they said that in the other States in this country, aside from the 11 States I referred to, a man must give a deed to his little home, he must surrender his little four or five hundred dollar or six hundred dollar insurance policy, in order to receive aid, and I cited a case in Moffitt, N. Dak., where the Government officials even took the wedding ring off the finger of a widow, and at another place they took the last cow the man had. One might

just as well talk to the moon, Mr. President, as to endeavor to secure a change in our Government policy. I am entirely satisfied, however, that in both the cases I have mentioned, one involving an old-age pension and the other the cancellation of a seed loan, the Government officials could use discretion in behalf of poor people, and could legally afford help to those in very needy circumstances, and I am satisfied that it is unnecessary to have the two bills I have submitted to cover the situation passed.

The impression seems to have spread in some quarters that we have so much money in this country that we could shovel it out to other countries; that we ought to get down on our knees and beg Winston Churchill and other foreigners to please take it from us. Yet this morning I received a letter from Cannonball, N. Dak., as follows:

MY DEAR SENATOR: Received your letter tonight, and I am very sorry I was too late in stopping the land bill in the United States Senate. I am taking your advice and writing CHARLES ROBERTSON tonight. Maybe he can help. I think if you talked the matter over with him it would help the Standing Rock Indians very much. If the bill would read that a tribe could buy this land with tribal funds it would help a lot here in keeping the cattle grazing units together.

The relief money for this reservation has not arrived yet. If it does not get here before 4 to 6 weeks we will have to ask the Red Cross to help. We are having a very hard and cold winter out here this year.

Thanking you, Senator, for all past favors. Best wishes to Mrs. Langer and the girls.

Yours truly,

JOSEPH WICKS.

Mr. President, 6 weeks ago I stood on the floor of the Senate and called attention first of all to the plight of the Navajo Indians in Mexico, and showed that they were starving. I called the attention of the Senate to the Indians near Los Angeles, Calif., and showed that they were destitute. A week later I stood at my desk and told about the suffering of the Indians in North and South Dakota and Montana. A meeting was held, and finally the Bureau of Indian Affairs pledged $10,000. Week after week went by, and there was one telephone conversation after another. The people of North Dakota were desperate. The commercial clubs got busy and raised food and clothing through charity, and kept thousands of those people alive.

I repeat what I said at the time I voted against the $597,000,000 to hand, not to the people of France or Italy or Austria, but to their governments, governments which may not give those people a nickel of it, governments which by the time they get this money may be overwhelmingly communistic. I repeat today what I said then, that I am not in favor of sending money abroad until we make a survey to find out how much we need here to take care of our schools, our roads, our aged, our Indians, nearly half a million Puerto Ricans in New York who are absolutely poor, and 400,000 Mexicans in California who, under the great United Nations Charter, the purpose of which was said to be to wipe out forever any distinction because of race, creed, color, language, or sex, are deprived of public schools in certain places and in other places are segregated. I called attention to the situation of the Japanese in the western part of the country, some of whose grandfathers had been citizens of this country, and the kind of treatment they were receiving.

Speaking of roads and public buildings, I ask Senators who are so anxious to give away our resources if they know how much Philip Fleming asked for. He asked for $75,000,000,000 over a 15-year period.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks an article which appeared in the McLean County Independent, published at Garrison, N. Dak. It is in two parts, and I ask that both parts be printed in the RECORD.

The PRESIDING OFFICER (Mr. HOLLAND in the chair). Is there objection to the request of the Senator from North Dakota?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the McLean County Independent of August 14, 1947]

PROPOSED ST. LAWRENCE SEAWAY PROJECT WOULD GREATLY BENEFIT FARMERS OF NORTH DAKOTA

(This is the first of two special articles to appear in the Independent on the St. Lawrence seaway project.—The Editor.)

Construction of the St. Lawrence seaway project would save the farmers of North Dakota millions of dollars in shipping charges of their grain and livestock products, Senator WILLIAM LANGER said in Washington this week. He forecast Senate passage of the bill at the next session of Congress.

A long-time advocate of the project, Senator LANGER is coauthor of the bill pending in the Senate to authorize construction of the seaway jointly by the Governments of the United States and Canada. It calls for deepening certain parts of the channel of the St. Lawrence River to permit oceangoing ships to sail inland as far west as Duluth, Minn. It would also provide for the development and public ownership of the tremendous power resources of the river for the benefit of the people.

RAILROAD AND POWER TRUST OPPOSED

"I think we have a very good chance of getting the bill passed by the Senate at the next session," Senator LANGER declared. "It was reported favorably on a 9-to-4 vote of the Senate Foreign Relations Committee just before we adjourned. North Dakota farmers would save from 5 to 8 cents a bushel in shipping their wheat by an all-water route through the Great Lakes to the Atlantic seaboard and then to all parts of the world.

"Of course, we're not going to get the bill approved by the Senate without a fight. Just mention the St. Lawrence project here in Washington and you stir up the worst hornet's nest of lobbyists that you ever saw. The railroads and the Power Trust have blocked this project for years, and you can bet your bottom dollar that their high-priced propagandists will be out in full force to kill it again when it reaches the floor of the Senate."

CITES BOXCAR SHORTAGE

Pointing out that North Dakota farmers and elevator men are again gravely concerned about the shortage of boxcars for moving the 1947 crop to market, Senator LANGER asserted that the situation would not be nearly as acute if the St. Lawrence project had been built and put into operation for shipments of grain and other bulk cargo. Thousands of additional boxcars could be made available to the Middle West by the elimination of the freight haul by rail which is now necessary.

With the seaway in operation, elevators at Garrison, Bottineau, Rugby, Linton, and other North Dakota points would load wheat on cars for a short rail haul to the head of the Great Lakes at Duluth. There it could be loaded in bulk on steamers bound for Europe, South America, or ports in other parts of the world, or it could move by an all-water route to the big mills at Buffalo, to Boston, New York, and other Atlantic ports, without a break in cargo, and at greatly reduced handling costs.

PROJECT SELF-LIQUIDATING

Under provisions of the new bill introduced at the recent session of Congress, the St. Lawrence project would be entirely self-liquidating. Construction costs would be repaid out of revenues received from the sale of electric power and from tolls on shipping going through the seaway.

The St. Lawrence seaway project has had the backing of every President since Woodrow Wilson. President Truman urged that it be built when he addressed the Canadian Parliament at Ottawa several weeks ago. Former President Herbert Hoover has been a staunch supporter of the project ever since he was Secretary of Commerce, and reiterated that support in recent testimony before the Senate Foreign Relations Committee.

ENDORSED BY NONPARTISAN LEAGUE

The project is backed by the Nonpartisan League in North Dakota and by many other farm organizations throughout the country. Twenty-three State governments have officially endorsed it. Members of the Cabinet, the Secretaries of Agriculture, Commerce, State, and War, and other leaders in public life agree that the project would be of incalculable benefit to the whole country.

It has the support also of the overwhelming majority of the 40,000,000 people in the States which would be most directly affected by the seaway—the Middle West, the Great Lakes region, and the industrial areas of Pennsylvania, New York, and New England. Most of the unions of the A. F. of L. and the CIO are in favor of the project and it has been endorsed in the platforms of both the Republican and Democratic Parties.

BLOCKED BY LOBBYISTS

"In view of this widespread public support, it is nothing short of amazing that a handful of selfish men have been able to delay the construction of this great project all these years," Senator LANGER declared.

He charged that "the most powerful lobby in Washington," representing eastern railroads, the Power Trust, and coal interests had "ganged up" to defeat the project, and that millions of dollars had been spent in a highly organized campaign of misrepresentation and propaganda to protect the interest of the banker-controlled rail and electric power monopolies.

"Meanwhile, the people have been gouged on high freight rates and high power costs. Part of those profits are used to pay the salary of the highest-priced lobbyists in the Nation's Capital at the rate of $65,000 a year."

BENEFITS EXCEED COSTS

One of the principal arguments advanced by opponents of the project is that it will cost too much, but Senator LANGER refuted this argument by pointing out that the project would pay for itself many times over in lower freight rates and low-cost power.

He said that the United States share of the cost of completing the project would be no more than what we could pay for the construction of three first-class battleships; that at the most it would not be over $300,000,000. This would be a hundred million

dollars less than the United States recently loaned to Greece and Turkey, and the cost of the seaway would be only a fraction of the billions of dollars spent on lend-lease and other aid to foreign countries. Half the costs of developing the seaway would be borne by the Canadian Government.

[From the McLean County Independent of August 28, 1947]

ST. LAWRENCE WATERWAY WOULD OPEN NEW WORLD MARKETS FOR NORTH DAKOTA FARMERS

(This is the second and last in a series of two special articles to appear in the McLean County Independent on the St. Lawrence seaway project.—The Editor.)

The St. Lawrence seaway project would open new world markets and give the farmers of North Dakota and other Middle Western States a powerful weapon dealing with the problem of farm surpluses, according to Senator WILLIAM LANGER, one of the sponsors of the bill now pending in the United States Senate to provide for construction of the project.

"The day is coming, and perhaps before we know it," Senator LANGER said, "when farm surpluses start piling up again like we had before the war to knock down the price of farm products. We are going to have to depend more and more upon export markets. And foreign countries will buy more of our products if we can lower the price to them by cutting the cost of transportation with an all-water route to the sea."

SEAWAY 90 PERCENT COMPLETE

The Senator said that construction of the St. Lawrence seaway would permit ocean-going ships to sail from the Atlantic through the Great Lakes as far inland as Duluth, Minn.

He pointed out that 90 percent of the 2,400-mile seaway is already completed.

"Nobody has to build a new set of lakes or dig a new river. They are already there. All we have to do is to take advantage of them. The main work that remains to be done is to deepen and clear out a 46-mile stretch in the International Rapids section of the St. Lawrence River, do some dredging in other parts of the river, build several new locks and canals, two dams, and a power plant."

The eastern railroads, power companies, and coal-mining interests that have been fighting the project and have delayed its construction for many years, base their opposition on three major points. They say that it would cost too much; that it isn't needed; that it would ruin the railroads.

It is Senator LANGER's contention that the costs would not be excessive, that the Canadian Government would pay half the cost, and that the benefits of the project to the people of the Middle West would far outweigh the construction costs. As to the need for the project, he commented as follows:

DEVELOP UNITED STATES RESOURCES

"If this country is to continue to grow and prosper and to remain the most powerful nation on earth, we must develop our natural, God-given resources to the utmost. That's why I have so wholeheartedly supported the program for developing the Missouri River and to get appropriations for building Garrison Dam and similar projects.

"The St. Lawrence seaway will give us low-cost transportation and low-cost power. It will open the heart of our country—the richest part of our Nation, the breadbasket, the arsenal, and the workshop of the world—open it up to trade and commerce with all nations of the globe."

RAILROAD FACILITIES INADEQUATE

"The opposition tells you that we don't need this project. Certainly there can be no doubt in your mind on that score, now that we are face to face again with a critical shortage of boxcars for moving out our 1947 crop to market, and when our farmers are going to be forced to pile thousands of bushels of grain on the ground again because the railroads are unable to provide sufficient boxcars.

"The blunt truth is that the country has outgrown its present transportation system. Before the war the railroads were equipped to handle a volume of business that goes with a national income of around $70,000,000,000. But now, our national income is soaring around the $175,000,000,000 mark. Monroe Johnson, the head of the Office of Defense Transportation, tells me that it will be 10 years before we catch up on boxcar production.

"The railroads are just not equipped to handle our present hauling job. We not only need the seaway to relieve them of some of our bulk cargo, but we need to spend millions upon millions of dollars on new railroad facilities and equipment. To me, the argument that we don't need the seaway is just plain silly in the face of the current break-down in our transportation facilities."

Opponents of the seaway claim that the project would cost over a billion dollars of which the United States and Canada would each pay half. Estimates of the United States Corps of Engineers indicate that the project would cost less than half that, and under the terms of the bill now pending in Congress, all construction costs would be repaid from tolls on shipping and from the sale of electric power.

The Senator deplored the narrow sectional interests which have been stirred up by high-powered lobbyists in an effort to block the project. Big seaport cities like New York, Boston, and New Orleans, for example, have fought the project on the grounds that it would constitute a raid on the Federal Treasury and that it would cost too much. Senator LANGER branded that reasoning line as "short-sighted, narrow, and selfish."

UNITED STATES BUILT HARBORS

"The people of North Dakota and the other States of the Middle West have paid their taxes to help finance the improvements of the harbors at New York and Boston. The United States spent one hundred and twenty-three million on New York harbor; $87,000,000 to make a seaport out of Philadelphia, which is 100 miles inland; $26,000,000 to improve the harbor of Houston, Tex., nineteen million on Boston harbor, eighteen million on the harbor at Baltimore.

"Our farmers and business people in the West paid a good big thumping proportion of the $500,000,000 spent on the Panama Canal—which was built primarily for the benefit of the Atlantic and Gulf coast cities. We didn't complain about that, but when the West wants to spend a small fraction of what these port cities got, for the purpose of developing the St. Lawrence seaway, the howl goes up that we would be raiding the Treasury."

PREDICTS SENATE PASSAGE

Senator LANGER said he was confident that the Senate would approve the St. Lawrence project at the next session, despite all the efforts of the railway and power company lobby to delay the project still further.

Hearings have also been started before the Public Works Committee of the House, and a special subcommittee is planning to make a first-hand investigation of the project during the summer recess.

"The sooner we build the project, the better," he declared. "It will open new markets for our products, help us get rid of our farm surpluses, and maintain farm prosperity. It means low-cost transportation for agriculture and low-cost power for homes and industry. It means new jobs, new industry, new opportunities, and better living for our people. The whole Nation will benefit from this great project."

Mr. LANGER. Mr. President, I have before me the official statements of governors and other public men, including representative citizens of New York State. I ask unanimous consent to have printed at this point in my remarks not what those men said but their names. Every one of them was in favor of the St. Lawrence waterway treaty. I simply wish to list their names.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Charles E. Hughes, Governor of New York, 1907–10; Associate Justice of the Supreme Court of the United States, 1910–16; Secretary of State, 1921–25; Chief Justice of the United States, 1930–41.

Theodore Roosevelt, Governor of New York, 1899–1901; President of the United States, 1901–9.

Alfred E. Smith, Governor of New York, 1919–21, 1923–29.

Franklin D. Roosevelt, Governor of New York, 1929–33; President of the United States, 1933–45.

Herbert H. Lehman, Lieutenant Governor of New York, 1929–33; Governor of New York, 1933–43; Director General, UNRRA, 1944–45.

Thomas E. Dewey, Governor of New York since 1943.

ROBERT F. WAGNER, member of New York Assembly, 1905–19, Lieutenant Governor of New York, 1914; justice, Supreme Court of New York, 1919–26; United States Senator from New York since 1927.

Henry L. Stimson, Secretary of State, 1929–33; Secretary of War, 1940–45.

James A. Farley, Postmaster General, 1933–40.

John J. Bennett, attorney general of the State of New York, 1931–42; corporation counsel of the city of New York, 1945–46; deputy mayor since 1946.

Harold B. Johnson, editor and publisher, Watertown Daily Times.

Delos M. Cosgrove, trustee and vice chairman of the Power Authority of the State of New York, 1931–34.

Benjamin F. Feinberg, majority leader of the New York State Senate.

John M. Carmody, Rural Electrification Administrator, 1936–39; Federal Works Agency, 1939–41; member, United States Maritime Commission, 1941–46.

Rhoda Fox Graves, chairman, committee on agriculture, New York State Senate.

Vincent R. Corrou, mayor of Utica, N. Y., prior to election to New York State Senate in 1944.

Rear Admiral George H. Rock, United States Navy, retired, head of Webb Institute of Naval Architecture, 1932–46.

Francis D. Culkin, Representative from New York in the House, 1929–43.

Joseph A. Gavagan, Representative from New York in the House, 1929–43; justice of the Supreme Court of the State of New York since 1943.

Fiorello H. LaGuardia, Representative from New York in the House, 1917–21; 1923–33; mayor of the city of New York, 1934–45.

Bertrand H. Snell, Representative from New York in the House, 1915–39; former minority leader of the House.

Jacob S. Potofsky, general president, Amalgamated Clothing Workers of America.

A. A. Berle, Jr., Assistant Secretary of State, 1938–44; Ambassador to Brazil, 1945–46.

William L. Lawyer, president of the Watertown Building and Construction Trades Council, American Federation of Labor.

James C. Bonbright, professor of finance, Columbia University since 1927; trustee of the Power Authority of the State of New York, 1931–46; vice chairman, 1934–39; chairman, 1939–46.

Frank Augsbury, former president and owner of the Algonquin Paper Corp. of Ogdensburg, N. Y.

Walter Lippmann, editor and author.

Robert P. Patterson, judge, United States District Court, Southern District of New York, 1930; judge, United States Circuit Court of Appeals, 1939–40; Under Secretary of War, 1940–45; Secretary of War since 1945.

Mr. LANGER. In all fairness to Mr. Patterson, I wish to say that when he made this statement he was a judge in the United States District Court for the Southern District of New York. He afterward became Secretary of War. When he made the statement he was a judge.

Edward J. Noble, chairman of the board, American Broadcasting Co.

Charles Poletti, justice of the supreme court of the State of New York, 1938; Lieutenant Governor, 1939–42; acting Governor, December 1942.

Hugh Thompson, regional director, CIO, Buffalo-Niagara Frontier, western New York State.

Franklin R. Little, Jr., editor, Ogdensburg Journal, Ogdensburg, N. Y.

Maurice P. Davison, commissioner, department of water supply, gas, and electricity, New York City, 1934–36; trustee, Power Authority of the State of New York, 1939–47.

Lt. Col. William T. Field, engineer, of Watertown, N. Y.

Frederick F. Umhey, executive secretary, International Ladies' Garment Workers, AFL, New York, N. Y.

Dr. Rollin A. Newton, mayor of Massena; C. Leland Wood, city manager, Watertown; William F. Doige, member, New York State Assembly; Edward B. Crosby, member, executive committee, National Seaway Council; Lt. Col. William T. Field, engineer, Watertown; Franklin R. Little, editor and publisher, Ogdensburg Journal; W. Allen Newell, manufacturer, Ogdensburg; Clarence F. Hall, businessman, Clayton; Hugh Burns, president, Ogdensburg Chamber of Commerce; Dr. Eugene G. Bewkes, president, St. Lawrence University; Allan P. Sill, member, New York State Assembly; John C. Tullock, former collector, Port of Ogdensburg.

Edward J. Noble, Under-Secretary of Commerce, 1939–40; chairman of the board, American Broadcasting Co..

Herbert Bayard Swope, member, executive committee, Columbia Broadcasting System; former executive editor, New York World.

James P. Warburg, banker, former vice chairman of the board, Bank of the Manhattan Co.

David Sarnoff, president, Radio Corporation of America; chairman of the board, National Broadcasting Co.

Charles Maltby, vice president, Lincoln Bank & Trust Co., Syracuse, N. Y.

Edward C. Lindeman, professor, New York School of Social Work, Columbia University.

David Dubinsky, president, International Ladies' Garment Workers Union.

Charles William Tausig, manufacturer, author.

Franklin K. Lane, member, Interstate Commerce Commission, 1905–13; Secretary of the Interior, 1913–20.

Warren G. Harding, President of the United States, 1919–23.

Calvin Coolidge, President of the United States, 1923–29.

Herbert Hoover, President of the United States, 1929–33.

Franklin D. Roosevelt, President of the United States, 1933–45.

Harry S. Truman, President of the United States.

Cordell Hull, Secretary of State, 1933–45.

Harry A. Slattery, Under Secretary of the Interior, 1938–39; Rural Electrification Administrator, 1939–44.

Leo T. Crowley, Chairman, Federal Deposit Insurance Corporation, 1934–45.

Department of Agriculture.

Jesse H. Jones, Chairman, Reconstruction Finance Corporation, 1933–39; Secretary of Commerce, 1940–45.

Henry L. Stimson, Secretary of State, 1929–33; Secretary of War, 1940–45.

United States Maritime Commission.

Federal Power Commission.

Joint Chiefs of Staff.

Department of the Interior.

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks the debate which I had with Mr. Thomas J. McGrath, executive director of the National St. Lawrence Project Conference, he being opposed to the St. Lawrence waterway and I being for it. The debate was held in June 1947 at Chicago, over radio station WGN, on the program "Your Right To Say It."

There being no objection, the debate was ordered to be printed in the RECORD, as follows:

DO WE NEED THE PROPOSED ST. LAWRENCE WATERWAY PROJECT?

Affirmative: Senator WILLIAM LANGER, Republican, from the State of North Dakota.

Negative: Mr. Thomas J. McGrath, executive director of the National St. Lawrence Project Conference.

Announcer WARD QUAAL. Your Right To Say It is WGN's debate program devoted to public issues that shape the lives of Americans. No scripts are required on these programs and there is absolutely no censorship. Dr. William S. Stokes, professor of political science at the University of Wisconsin, and director and moderator of Your Right To Say It, now tells us the topic of tonight's controversy.

Dr. WILLIAM S. STOKES. Good evening, ladies and gentlemen, this evening in the last debate of Your Right To Say It's current series, Senator WILLIAM LANGER faces Mr. Thomas J. McGrath in a debate on the issue: Do we need the proposed St. Lawrence waterway project? The plan to create a power development in the international rapids section of the St. Lawrence River to be used equally by Canada and the United States has been debated for decades. Nothing has ever come of the project, but Senator LANGER, here with us tonight, has introduced legislation to start the plan moving once again. Now each of the two debaters will have 6 minutes for an introductory argument, then 2 minutes for rebuttal, after which I am going to throw the meeting open as usual to the questions of our studio audience.

And now for the affirmative of the issue: Do we need the proposed St. Lawrence waterway project? Your Right To Say It takes pleasure in presenting the Republican Senator from North Dakota, the Honorable WILLIAM LANGER. Senator LANGER.

Senator LANGER. Thank you, Dr. Stokes. Good evening neighbors and friends. Most of you are familiar with and favor the St. Lawrence waterway project. Tonight I ask, Why hasn't it been built a long time ago? When you stop to think of all the benefits, all the good reasons why this project should be built, it is, indeed, strange that we have permitted a small handful of selfish, money-hungry men to block it. To block the favorable recommendations of Presidents Wilson, Harding, Coolidge, Hoover, Roosevelt, and now Truman. These ex-Presidents and present President, Republicans and Democrats alike, have all recommended that it should be built.

Someday we are going to deepen and improve the channel of the St. Lawrence River to connect the Great Lakes and the Atlantic Ocean. Thus we will open up the richest part of our country, the bread basket, the workshop, the arsenal of the world, to trade and commerce with all the nations of the globe. It will give us the all-water route to the sea and the cheapest form of transportation known. Ocean steamers will sail inland as far west as Duluth, Minn. Ninety percent of this waterway is already completed. Nobody has to build another set of lakes; no one has to dig a new river. The main work left which we have to do is to deepen a 46-mile channel in the St. Lawrence River, and build a few additional dams, locks, and canals.

The river will be harnessed to generate a tremendous block of hydroelectric power to electrify farms and turn the wheels of industry in New York, in New England, and in fact all over the eastern part of this Nation. This power plant will have an output equal to the entire TVA system in 1944.

There you have the story of the St. Lawrence project in a nutshell. Cheap transportation, low-cost power and it should also give you a clue as to whom is fighting this project and why. The eastern railroads, controlled by the New York bankers; the coal operators, the power trusts—these are the special-privileged groups that have ganged up on the American people to block the construction of this project. This is the unholy alliance that has spent its money in a highly organized campaign of misrepresentation and lying propaganda to defeat the will of the people, to strangle competition, and to protect the money-controlled transportation and public-utilities monopoly. Of course, the people never see this combine at work. It operates in the dark behind the scenes. It works through a lot of front organizations secretly subsidized with Power Trust and railroad money. One of these front organizations is the so-called St. Lawrence Project Conference.

But the power companies and the railroads were not always against this project. No, back in 1920, they were all for it. It was so good that they tried to grab it off for themselves. Three big companies: The Aluminum Corp. of America, the General Electric Co., and the du Pont Co. organized what they called the Frontier Corp. and tried to buy up the power rights on the St. Lawrence River but the grab didn't come off. The people of New York State rose up in protest and blocked the deal. That's when the railroad and power companies started fighting the project.

I am not going into the cost of it now except to say it wouldn't cost any more than the building of three huge battleships, roughly, $210,000,000, and that is about half the money we loaned to Greece and Turkey. In addition to that, Canada will pay $145,000,000 in addition to the $132,000,000 they have already spent.

Now, I want to say finally during these moments allotted to me that the railroads are doing the very best they can, but the blunt truth is that the country has outgrown its present transportation system. The St. Lawrence seaway is desperately needed to handle the terrific expansion in our foreign trade. We need it for national defense. We need it to provide low-cost power for industrial expansion at a saving of $20,000,000 annually in power costs. I know the people of the Middle West want this power project built. It will pay for itself many times over in benefits to the American people. They agree with Franklin Roosevelt when he said, "I know of no single project of this nature more important to this country's future in peace or war," and with the testimony of ex-President Hoover, who last week again gave his unqualified support at the hearings.

Dr. STOKES. Thank you, Senator LANGER. For the negative of the issue, "Do We Need the Proposed St. Lawrence Waterway Project?" Your Right To Say It is honored to

introduce Mr. Thomas J. McGrath, executive director of the National St. Lawrence Project Conference. Mr. McGrath.

Mr. THOMAS J. MCGRATH. Ladies and gentlemen, members of the radio audience, in answer to the question that is propounded tonight, I would say emphatically "No." We do not need the project, we should not have it, especially at the present high cost of construction, at a time when, notwithstanding efforts to reduce our tax burdens, we are committing ourselves to large but unpredictable outlays to rehabilitate the rest of the world and keep the increase of communism from destroying democracy as a way of life.

It is easy to indulge in a lot of accusations and generalities such as the Senator has. You have heard these points raised no doubt on many previous occasions. The economic features of the St. Lawrence waterway have been so thoroughly discussed during the past 25 years that it would seem to be of greater interest and perhaps of equal importance if I should speak of some of the recently developed procedural phases of it. This is not to say that the economic phases do not continue to be of major importance, but I believe if good governmental practice is to be followed and a statesmanlike disposal of the matter is to be made, we may well leave these features for a review of the most recent element that has been injected into the discussion of the matter which is the contention of the proponents that the project can be made self-liquidating. I think such a thing may prove to be a hoax.

An agreement with Canada first took legislative form as a treaty in 1932, when it was rejected by the Senate. Until very recent years the project was supported and advertised as a great toll-free waterway for the commerce of the world that would reflect advantages way beyond the cost necessary to provide and maintain and operate it. Many of the alleged benefits disappear in the light of close scrutiny. In order to give it the semblance of a businesslike enterprise the proponents now say it is to be made self-liquidating by charging tolls. When ratifying legislation was introduced in 1945, it contained a new provision which authorized and directed the President to investigate the feasibility of making the waterway self-liquidating by the imposition of tolls on foreign commerce. This, however, was to be done during the course of construction or even after it was completed.

It seemed so unwise and unbusinesslike to embark upon a program involving the expenditure of nearly a billion dollars without having the subject of tolls settled with greater certainty, that after the present session of Congress convened the sponsors came back with another and slightly different version of the so-called self-liquidating bill. So in the pending legislation now before Congress it is provided that before the agreement becomes effective the President shall obtain satisfactory assurance that Canada agrees to the principle of making the project self-liquidating. It further provides that during the period of construction the President is authorized and directed to negotiate a further agreement with Canada to fix the rates of charges for the use of the navigation facilities. Now this provision in the legislation is being heralded as the accomplishment of the long-cherished desire to take the project out of the realm of controversy, making it self-liquidating and hence a sounder enterprise. Canada has agreed to the imposition of tolls in principle, subject, however, and I quote: "To the conclusion of satisfactory arrangements between the two governments implementing this principle."

There is so much uncertainty about the quantity of tonnage that will be subjected to tolls and the character of traffic on which they will be imposed and the amount of revenue that will be received that nobody can with any assurance forecast the consummation of a satisfactory agreement between Canada and the United States. To illustrate, a witness before one of the committees in Congress just last week said this: "From our point of view at present the whole question of tolls is in a most nebulous state. We have not been able to find anyone as yet who seems to know much of anything about them, upon whom they would be imposed, how much they should be, and a dozen more pertinent inquiries, answers to which are needed to answer this question satisfactorily." I wholeheartedly agree with that description of the situation.

Now, the Republican Party gained control of our Federal legislative machinery, in part, at least, because it has promised to take the Government out of business. Its representatives in Congress should at the same time put some business into Government and in spending the taxpayers' money be sure they are not buying a pig in a poke. This whole proposition is unbusinesslike. When it was first presented in 1941 it contained provisions for settling our rights of navigation to the Great Lakes Basin; it contained provisions for allocating the flow of water at Niagara for power purposes; it contained a provision for settling the dispute that has long existed in this area with respect to the divergence of water into the Chicago Drainage Canal. They have all been taken out of this by the United States Congress without any agreement with Canada. I say we should start over again and the State Department should conclude an agreement that encompasses what we propose to do and then let us consider it on its merits.

Dr. STOKES. Thank you, Mr. McGrath. Our two debaters are now ready to go into the rebuttals, and I again present to you Senator WILLIAM LANGER, of North Dakota, who has his 2 minutes. Senator LANGER.

Senator LANGER. Mr. McGrath has given two points. He says, first, we don't need all this power, and, second, he says that it may not be self-liquidating. Where have we heard, "We don't need this power"? Oh, yes; when we first built Grand Coulee Dam out over the Columbia River, but today the Pacific Northwest is crying for more power. That plant at Grand Coulee isn't big enough. Three new generators are being erected. Perhaps Mr. McGrath can also explain why it is if we don't need and can't use the power that will be developed by the St. Lawrence project, that New York and New England right today are importing power from Canada. I wish Mr. McGrath had taken the trouble to tell us what would have happened in the last war, how many more American boys would have lost their lives, how much longer the war would have dragged out, if we had not had this production of power from Grand Coulee Dam and Hoover and TVA. It was only because we have that power that we were able to develop the atomic bomb.

And now, my friends, what about this matter of liquidation? I quote from Senator VANDENBERG, chairman of the Foreign Relations Committee, the man who introduced this bill upon the Senate floor. "This resolution," he said, "proposes to make the St. Lawrence seaway and power project as a whole self-supporting and self-liquidating both in its power and its navigation phases. That policy is in line with the general desire of Congress and the people to balance the national budget and place the development of national resources on a self-sustaining basis. It is similar to tolls charged by the Panama Canal, the Manchester ship canal, Suez Canal, and the Kiel Canal. They have all had tolls for the purpose of meeting their cost."

Dr. STOKES. Thank you, Senator LANGER. For the negative rebuttal on the issue, "Do we need the proposed St. Lawrence waterway project?" Mr. Thomas McGrath now has his 2 minutes. Mr. McGrath.

Mr. MCGRATH. Senator LANGER emphasizes the need for power. Time does not permit my going into a detailed debate on the question, but I again repeat that we do not need this project as a whole, which includes both power and navigation, particularly in the light of present costs. The costs cited by Senator LANGER and frequently referred to by proponents of the measure are based upon those which existed in 1939 and 1940, when this project was first presented. There has been an increase in those costs since that time of 65 percent. You all know about the increases. Those figures as to costs merely include the cost of construction in the International Rapids. They don't include the cost of improvement of the harbors throughout the country nor do they include interest during the course of construction and a lot of other things.

Now, with respect to liquidation. I think it is self-evident that, no matter what Senator VANDENBERG may have said his hopes were, that when you say we will negotiate during the course of construction an agreement for liquidating the cost of the property, you have not agreed upon a formula for liquidating.

The Senator speaks of the possibility of great ocean liners coming into the ports of Duluth, Chicago, and elsewhere. Of course, that is a very enticing, glamorous sort of thing to envision, but I call your attention to the fact that on May 8 last there were published in the CONGRESSIONAL RECORD answers to 32 letters sent out to shipowners of the United States asking whether or not they would use the St. Lawrence waterway, and, with the exception of one owner, none of them said they expected to use it, and they didn't think it was an economic feasibility.

Now, reference has been made here to opposition, and I have heard it repeatedly and answered it repeatedly, and every investigation has disclosed that there is not one cent of money behind this proposition contributed by the power companies, the railroads, the coal people, the shippers on the lakes and oceans. Interior chambers of commerce, 263 of them, all over this United States, with members in every State, support this movement. They have done it without remission since 1941, and they continue to do so.

Dr. STOKES. Thank you, Mr. McGrath. Our studio audience is now eager and ready to enter this debate and I recognize the first question.

Question. "Senator LANGER, you speak of Duluth, Minn., as a western terminus; what about Chicago? Please discuss this and will this waterway really get to Duluth with its ships or is this merely a hope?"

Senator LANGER. It will interest you to know that in this morning's Chicago Tribune Col. Robert R. McCormick for the first time came out in favor of the St. Lawrence waterway. For the first time this great newspaper has said that the city of Chicago no matter what the cost, no matter how much money they spend within reason, would profit tremendously by the building of this seaway.

Question. "Senator LANGER, your figures of $210,000,000 plus Canada's contribution does not coincide with Mr. McGrath's statement of the cost being $1,000,000,000. Which is correct?"

Senator LANGER. I have here the testimony given before the Senate committee. The cost to the United States is $210,000,000, which as I said before, is about half what we loaned Greece and Turkey. Canada pays $145,000,000 in addition to the $132,000,000 she has already spent on the Welland Canal and other parts of the project. The State of New York will pay about a hundred million for the construction of a power plant. These costs are by the Army engineers and are based on 1939–40 prices and of course costs are much higher today, but we are not building at today's high prices. It will take from 5 to 7 years to complete the project and by then prices will have leveled down.

Mr. MCGRATH. I have before me a table which sets out the costs as stated by the Army engineers on the 1939–40 prices which shows that at that time the estimate was $310,000,000. If you increase that by 64 percent which was the amount of the increased costs as published by the Engineering News Record on December 31, 1946, you bring it up to $508,000,000 for the United States. Interest during construction would amount to about $40,000,000. That excludes the estimate of the cost of deepening the channels to enter the harbors and it also excludes the cost to localities to improve their war facilities. When the United States pays about $6,500,000 for those projects, Canada doesn't pay quite half of it, it adds up in round numbers to about a billion dollars.

Question. "Mr. McGrath, topography permitting, why not build a canal from Duluth to St. Paul and deepen the channel of the Mississippi down to New Orleans and thereby we will have an all-American deep waterway and have more perfect flood control and we won't have the Union Jack flying over it but the American flag?"

Mr. MCGRATH. I don't know that that project has ever been engineered, but certainly, if the costs were anything comparable, it would be highly preferable to do that very thing.

Question. "Senator LANGER, you say most people favor this waterway. When did the American people have an opportunity to express their opinion?"

Senator LANGER. The American people haven't had an opportunity, but we get letters on every important project, so the average Congressman or the average Senator can figure out by the number of letters he gets about the number of people that are in favor of the different projects.

Question. "Mr. McGrath, don't you think that we could fight communism by increasing labor and cheapen purchasing power by building the waterway instead of investing in foreign countries and possibly not realizing business results?"

Mr. MCGRATH. I don't think that is the answer to our problem. So far as increasing employment is concerned, it would have exactly the opposite effect. It would put thousands of railroad men out of business because of diversion of tonnage from the railroads. It would put thousands of miners out of work because of the importation of foreign coal.

Senator LANGER. I just want to say, you know it is very strange whenever they can't say anything else about a subject they don't like they say it is communism, communism.

Question. "Senator LANGER, the St. Lawrence River lies entirely within the boundary of Canada. Does the provisions of the treaty state that only Canadian labor, Canadian materials, and Canadian engineers may be used on the Canadian side?"

Senator LANGER. I want to call your attention to the speech of Senator VANDENBERG at the time this was introduced. He goes into that in the greatest detail and shows that this development will be subject to a treaty by a commission which will be appointed from the American angle by President Truman, where all the rights you mention will be protected.

Mr. MCGRATH. You haven't answered the lady's question. The treaty itself says the work will be performed by the respective countries in their own territory, which clearly implies they will have their own people do it.

Senator LANGER. Naturally—and America will have her own people do what is to be done in the American part of the river.

Question. "Mr. McGrath, who is to administer the project if and when it is completed, and what, if any, controls will the United States Government retain over the operation of the project?"

Mr. MCGRATH. So far as the electrical features of the project are concerned, they will be turned over to the State of New York upon repayment to the United States of the money it puts into the power phase of the project, and after that it becomes the property of the State of New York. The navigation features will be administered by a joint commission appointed by the President in part and by the Premier of Canada for the other part.

Question. "Senator LANGER, there are many comparable projects that have first been discussed and later materialized, to mention a few, the Panama Canal in 1906, Boulder Dam and TVA in our generation. They proved feasible and profitable. Let's not let the project die for lack of effort, but push on."

Senator LANGER. I agree with you 100 percent.

Dr. STOKES. Now, I wonder if I might interpose a question, gentlemen, one particularly to Senator LANGER. A point was raised by your opponent, Senator LANGER, with respect to the method of self-liquidating. Do you favor tolls as a means of paying for the project?

Senator LANGER. Yes; I do. Quoting again from Senator VANDENBERG, he says that since the St. Lawrence seaway is international, to be used by the vessels of all nations, the principle of charging tolls to defray expenses is in line with this established tradition.

Mr. MCGRATH. I will be glad to answer that by reading from the treaty or the agreement. It is in section 3, which says, "During the period of construction the President is authorized and directed to negotiate a further agreement with the Government of Canada under the provision of the boundary waters treaty of 1909 defining the rates and charges to be levied for the deep-waterway facilities. Now, I submit to you if that is any conclusive arrangement with the Canadian Government for the establishing of tolls——

Senator LANGER. He left out the most important point—it states it shall not be more than $1.25 a short ton. There is a limitation on it.

Dr. STOKES. Gentlemen, our time is running out. Before closing, however, I should like to have each one of you debaters give us a final summary of your stand in this debate; taking only 30 seconds, please. Senator LANGER, for the affirmative, first.

Senator LANGER. It costs the people of New York City better than 6 cents per kilowatt hour for the first 40 at present power company rates. One-fifth of New York farmers are still without electricity. We are in favor of having electricity in every home in the United States. These women are entitled not to have to turn the cream separator, not to have their children study by lamplight, but they are entitled to have electricity and refrigerators in their homes.

Mr. MCGRATH. Reference has been made to the opposition on the part of the great interests, as Senator LANGER describes them, and I want to call attention to the fact that the railroad labor unions, the mine workers' union, the longshoremen's union, the maritime unions, those who man the lake vessels are all opposed to it. I want to say further with reference to the question of power for New York, why should we in the rest of the United States, particularly you people in the Middle West, spend the taxpayers' money to build a great big power unit and turn it over to the State of New York to increase their industrial facilities, and perhaps attract from this area to the northern parts of New York industries which might otherwise remain here.

Dr. STOKES. Thank you, gentlemen.

Now I would like to say we are most pleased to have with us in our studio tonight a man whose loyal support has been an inspiration to all of us on this program, Mr. Frank P. Schreiber, manager of WGN. Mr. Schreiber.

Mr. FRANK P. SCHREIBER. Thank you, Dr. Stokes. Your Right to Say It will recess for the summer months but it will return to the air next fall as one of the Midwest's outstanding public-service programs. Tonight concludes the seventieth consecutive broadcast of Your Right To Say It. WGN has presented 140 of America's most prominent and intelligent leaders in debates of issues that are vital to all of us. You listeners have responded with thousands of letters of appreciation and suggestions. WGN thanks you and hopes you will be with us next fall when the 1948 series of Your Right To Say It begins.

And now a word of thanks to Dr. William S. Stokes, our moderator, to Mr. Ward Quaal, the director, and to all those on WGN who have worked so hard to make this a distinctive public-service program.

Announcer QUAAL. Thank you very much, Mr. Schreiber.

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point as a part of my remarks a statement appearing in the Standard, published at Maddock, N. Dak. The article was prepared by the North Dakota Farmers' Union.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ST. LAWRENCE: RIVER TO RICHES

Power is being wasted. Enough power to light up 5,000,000 homes, to keep 30 *Queen Elizabeth* ocean liners running continuously across the Atlantic, to equal the energy released by 5,000,000 tons of coal yearly.

Water is being wasted. Enough water to transform Duluth, Minn., into an Atlantic coast port, to save millions yearly in the cost of wheat shipments alone.

This waste continues—but not because of the cost involved in stopping the waste. The cost would be only a little more than a navy yard bill for two modern battleships. It would probably not equal what we now propose to give to Greece.

It continues because in a century which has already lasted nearly a half century, American democracy has not been strong enough to overcome the greed of private interests and the narrow sectional greed of private interests and the narrow sectionalism of our representatives in Washington.

BILL FILLS NEED

In Washington a bill is ready to go before Congress which would stop this waste. It would tap the St. Lawrence River for hydroelectric power which New York and the New England States desperately need to assure continued normal growth and for the additional cheap transport facilities the whole country equally needs.

Underlying this bill are principles which provide for joint United States-Canadian development of the St. Lawrence seaway and power project. The principles have been approved by every President since Taft.

The first joint American-Canadian commission was formed during the Taft administration to investigate seaway possibilities of international development of the great St. Lawrence River, the Mississippi of our northern border.

Time and again the project has been brought up before Congress in various forms. It has had the support not only of the executive branch of the Government, but of the United States Army and the United States Navy, of farmers, industrialists, of Republicans and Democrats, and country people and city people.

ALMOST ENACTED ONCE

The project was approved by a vote of the majority of the Senate in 1934. The vote was 49 to 43. Because in this instance, the proposal was brought up in the form of a treaty, majority will was thwarted because treaties must be approved by a two-thirds vote.

The proposal has been reworked since that time so that it no longer needs a two-thirds vote. A simple majority in both Houses of Congress is all that is needed.

The House Committee on Rivers and Harbors in 1941 heard evidence pro and con covering 2,285 pages of transcript. They approved the project, 17 to 8. It was incorporated into the rivers and harbors bill on November 21, 1941, but before action could be taken on it Hitler and Hirohito diverted our attention elsewhere.

During the war nothing was done on it even though a completed seaway would have meant that we could have built warships on the Great Lakes, far from the Atlantic coast which was threatened by submarines. Nothing was done even though we needed power so badly that we spent hundreds of millions of dollars on an aluminum plant in Canada, and fed power from New York City to another aluminum plant which was on the banks of the St. Lawrence.

ANOTHER HEARING LAST YEAR

The Senate Committee on Foreign Relations had a full-scale hearing on the bill last year. Again there was committee approval by a vote of 14 to 8. The vote was taken on June 5, 1946, but nothing was done about it during the last months of the congressional session. There is now a new Senate Committee on Foreign Relations and we will have a new hearing on the bill.

The same bottlenecks which have plugged the project for about 40 years are still here. Senator ARTHUR VANDENBERG (Republican, Michigan) has referred the project back to the State Department to renegotiate with the Canadian Government so that an amendment can be made on the issue of charging tolls for use of the seaway.

There are scores of rivers in the United States which were made navigable and are kept navigable by Government money on which no tolls are charged. Among these are the Harlem Canal in New York, and the seaway at Houston, Tex., which made the city a Gulf port.

Of course we charge tolls for use of the Panama Canal. Senator VANDENBERG says that the bill will have a better chance in the economy-minded Congress if the seaway as well as the hydroelectric portions of the bill pay for themselves. He may be right.

But privately, VANDENBERG, and also Senator GEORGE AIKEN (Republican, Vermont), who has been a consistent supporter of the project since he came to Washington, both have expressed fear that the project will be held up again for more time because of the pressure of other business.

"Other business" will include agreements on development of atomic power, questions in Greece and Turkey, problems of keeping democracy working all over the world. Congress' other business is an impressive task. But their business should not let Congress forego a project which would develop God-given resources of all the people. St. Lawrence is in the tradition of Grand Coulee and Norris Dams, TVA, public highways, public education, public mails, and public works generally.

St. Lawrence means something for all Americans:

To the North Dakota farmer it is cheaper transit for his produce, cheaper purchase price for his tools, cheaper electric current for his home.

To the Midwest exporter, it is the chance to ship by all-water route direct to Europe at less cost, frequently, than rail transport to an Atlantic coast port alone.

To the New York housewife or industrialist it is electric current delivered to a city at low cost or power for the industrialist which he hasn't got.

To labor it is a frontier of new jobs for the development of new products.

St. Lawrence is no longer merely a river. It is not merely a project. It is a chance to give more abundant life to the many.

Mr. LANGER. Mr. President, I should like to read a little of this article to those who may be opposed to the St. Lawrence waterway. The article is entitled "St. Lawrence: River to Riches":

Power is being wasted. Enough power to light up 5,000,000 homes, to keep 30 *Queen Elizabeth* ocean liners running continuously across the Atlantic, to equal the energy released by 5,000,000 tons of coal yearly.

Water is being wasted. Enough water to transform Duluth, Minn., into an Atlantic coast port, to save millions yearly in the cost of wheat shipments alone.

This waste continues, but not because of the cost involved in stopping the waste. The cost would be only a little more than a navy-yard bill for two modern battleships. It would probably not equal what we now propose to give to Greece.

It continues because in a century which has already lasted nearly a half century, American democracy has not been strong enough to overcome the greed of private interests and the narrow sectional greed of private interests and the narrow sectionalism of our representatives in Washington.

I shall not read any more of that letter, because anyone who is interested can read it himself.

Mr. President, when this matter was before the committee, Mr. Elmer Cart, director of traffic of the North Dakota Farmers Union, testified on February 20, 1946. Mr. Cart for years was one of our three railroad commissioners and public service commissioners. Two years ago he was a candidate for Governor of North Dakota on the Republican ticket in the primary. He was born in North Dakota, and he is an outstanding citizen and expert. His testimony is so valuable that I wish to read it:

My name is Elmer W. Cart. I am testifying on behalf of the National Farmers Union with offices at Denver, Colo., and the North Dakota Farmers Union with State office at Jamestown, N. Dak. I am regularly employed by the North Dakota Farmers Union as director of traffic and have held this position since the department was created in 1944.

Prior to that time I was a member of the North Dakota Public Service Commission for 6 years and for approximately 2 years during the war I was employed by the Office of Defense Transportation in their district office at Bismarck. I am also a registered practitioner before the Interstate Commerce Commission.

The North Dakota Farmers Union had a membership of 30,573 farm families at the close of its fiscal year, September 30, 1945—

Mr. President, I may add that now the membership is approximately 40,000—

and the National Farmers Union a total membership of 450,000.

I understand that today it is nearer 700,000.

The membership figures given for North Dakota are included in the membership figures given for the national organization.

The Farmers Union is very much in favor of the Great Lakes-St. Lawrence development program as set forth in House Document No. 153, Seventy-seventh Congress, first session, approval of this program being provided for in Senate Joint Resolution 104.

While our principal interest will be in water transportation, we are also much interested in the power development on that portion of the St. Lawrence River which forms the international boundary because of the large amount of power that will be available to the industrial Northeast.

The harnessing of presently wasted water power will add to our national wealth and create cheap energy for industrial and domestic use in the Northeastern States. This will stimulate both the manufacture and consumption of consumer goods and aid in furnishing employment and better living conditions to a large number of people. Those of us who live in the north-central part of the Nation will benefit from having available goods manufactured with cheap power. The State of North Dakota during the 5-year period 1941 to 1945, inclusive, produced an average of 326,000,000 bushels of grain each year. Wheat is the principal crop, averaging 155,000,000 bushels each of these years, followed by oats, 74,000,000 bushels, barley 59,000,000 bushels, corn 28,000,000 bushels, and flax 10,000,000 bushels. The States of South Dakota, Nebraska, Iowa, Minnesota, Wisconsin, and the eastern part of Colorado, Wyoming, and Montana also produce large quantities of agricultural products.

With the development of deep-water transportation from Duluth, Milwaukee, Chicago, and other cities on the Great Lakes, the landlocked territory of the north-central part of the Nation—Rugby, N. Dak., being the geographical center of the North American Continent—will be greatly benefited by having deep-water ports operating 7 to 7½ months each year.

Using the Interstate Commerce Commission formula of 3.6 water miles to 1 rail mile for rate-making purposes places the States of Minnesota, Wisconsin, Illinois, Iowa, Nebraska, South Dakota, North Dakota, and the eastern part of Montana, Wyoming, and Colorado much closer to deep-water transportation than they are today, as the following illustrations show.

Mr. President, I hope the Senators from the States I have named will very carefully read what this expert has to say:

Bismarck, N. Dak.—

And I repeat that the statistics as to Bismarck apply with equal force to the rest of North Dakota and to Nebraska, South Dakota, Illinois, Iowa, Minnesota, Wisconsin, and the eastern portions of Wyoming, Montana, and Colorado. In my opinion what Mr. Cart says is absolutely irrefutable:

Bismarck, N. Dak., is 1,609 railroad miles from New York City and 446 from Duluth, Minn. The distance by water from New York to Liverpool, England, is approximately 3,400 miles and the rail miles of 1,609 equated to water miles is 5,792, making a total of 9,192 water miles on the route all rail to New York and water beyond. The distance by water from Duluth to Liverpool, England, over the Great Lakes-St. Lawrence seaway and ocean is approximately 4,600 miles and the rail miles of 446 equated to water miles is 1,605, making a total of 6,205, a saving of 2,987 water miles, or 829 railroad miles over the Great Lakes-St. Lawrence seaway, compared with the present rail and water route by New York City.

Mr. President, that is unanswerable. I read further:

The rail miles from Aberdeen, S. Dak., to New York City is 1,465 and to Duluth, Minn., 364, using the same method previously used we obtain a saving of 933 rail miles for Aberdeen, S. Dak.

Mr. President, I ask the particular attention of the distinguished Senator from Nebraska [Mr. WHERRY] as I read this portion of Mr. Cart's testimony:

The rail miles from Lincoln, Nebr., to New York City are 1,403 and 526 from Chicago, Ill., using the same formula, a saving of 574 rail miles is obtained for Lincoln, Nebr.

It will readily be seen that if the pending measure becomes a law and the project is completed, it will effect a saving to the farmers of Nebraska of an average of 574 rail miles in shipments of grain. On wheat shipped from the western part of Nebraska, that would represent roughly a saving of about 6½ to 7 cents a bushel.

The rail miles from Des Moines, Iowa, to New York City are 1,215, and 337 from Chicago, Ill. Applying the formula previously used results in a saving of 572 rail miles for Des Moines.

The illustrations previously given could be used with other foreign and domestic points of origins and destinations, and substantially the same results would be obtained. The benefits of the seaway would extend west and south from Lake Superior and Lake Michigan ports to approximately one-half of the distance to the Pacific Ocean and Gulf of Mexico. Also domestic shipments to and from ports such as Boston, Mass., and Portland, Maine, could be made more economically than by the present methods of all rail or rail, lake, barge where the shipment would have to be transferred from one type of carrier to another with additional cost for each transfer.

Mr. President, I may say, in conclusion, that every 2 years, beginning in 1925, the Legislature of the State of North Dakota has appropriated $2,000 for the purpose of educating the rank and file of the people all over the country to the benefits of building the St. Lawrence seaway. The appropriation was made every 2 years in the amount of $2,000, with the exception of 1933, the year of the drought, when it was reduced to $1,000.

The people of my State are vitally interested in the passage of the pending measure. We believe it would be a good thing for the entire United States. We believe it would make our great country more prosperous and happier. We believe it would help millions of farmers to obtain cheaper light and power. We believe it would aid navigation. I say frankly that I have voted for every single one of the projects similar to this, no matter where located. I even voted for the one in the State of Florida, which by no stretch of the imagination could ever be of benefit to the farmers of North Dakota as individuals, though it would help the United States as a whole. I believe in bringing ocean liners into the interior of our country just as far as we can possibly bring them.

Mr. President, I believe in the development of Alaska. I was one of the first to introduce a bill to provide statehood for Alaska. I also introduced a bill to provide statehood for Puerto Rico, because I believed that that great and beautiful island should become one of the States of the Union. I am well aware of the fact that a committee which visited Puerto Rico did not find that conditions there suited them exactly, but, judging by what I observed on trips with delegations representing the Government, and on the trips I took by myself, both in Puerto Rico and Alaska, I am satisfied that both those countries should be admitted as States of the Union. I would express no preference as to which one of them should be admitted first, except to say that perhaps, since I am better acquainted with the people of Alaska, I hope Alaska will be the first to be admitted as a State.

Finally, Mr. President, I may say to Senators who have not given as much study to the matter of the St. Lawrence waterway as have some of us who have been vitally interested in it, as I was, first as attorney general of our State, and then as Governor, and as I am interested in it now, as United States Senator, I hope they will take time to investigate the matter thoroughly. I am confident that, no matter how they may feel about the measure at the present time, if they will delve into it fully and completely and give it their earnest consideration, some Senators now opposed to the measure will change their minds.

Mr. MORSE. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. MOORE in the chair). Does the Senator from North Dakota yield to the Senator from Oregon?

Mr. LANGER. I yield.

Mr. MORSE. Mr. President, I do not wish to make a lengthy speech on my own time in support of the St. Lawrence waterway project, but I should like to have the RECORD show this afternoon that I share the conclusions reached by the distinguished Senator from North Dakota in regard to the advisability of constructing that project. I share in his conclusions because I think the preponderance of evidence in the record of this matter to date shows very clearly that the project should be constructed from the standpoint of the transportation needs of the country and from the standpoint of developing the power resources of the country.

I point out to some of my friends in the Senate who have sectional interests to serve that, no matter how much they protest the lack of such interests, it is very interesting to note, and it cannot be denied, that for the most part the opposition to the St. Lawrence waterway stems from sectional economic interest and motivation. I say to those friends of mine in the Senate who are taking that position that after all, the great problem which I think faces America as far as the preservation of our economy is concerned, is the problem of an ever-expanding economy. That is why it has been and will continue to be my purpose to support great projects like the one now under consideration, wherever they may be located, as the Senator from North Dakota says, be they in Florida, in Mississippi, in Louisiana, or in the Great Lakes area, or whether they be the great projects of the West, which I think clearly are needed in order to promote an expanding economy of the country in the interest of all the people.

I part company with my friends in the Senate on any issue with respect to which they would elevate to primary importance a sectional interest as against the interests of the country as a whole. Having listened carefully to the arguments and having read carefully the statements that have been made for the RECORD in connection with the pending measure, I have reached the conclusion that the weight of the evidence supports the proponents of the St. Lawrence seaway project. Hence, for the first time I am pleased to announce this afternoon my position on this issue, and to state what my vote will be. It will be a vote for the project, for the reasons I have mentioned.

Mr. LANGER. Mr. President, I thank the distinguished Senator from Oregon. Knowing his record, knowing the fine progressive, liberal viewpoint he has on public questions, I was certain long before his announcement today that he would favor the St. Lawrence seaway and would vote for it. The fact that he has now publicly announced his intention of supporting the joint resolution providing for its construction only makes it clearer in my mind that the Republican Party has among its members in the Senate a man who is leading the way, holding up the torch to Senators on this side of the aisle who are going to be written down in the history of our country as men who placed the public welfare above sectional interests. In my opinion, the statement made by my distinguished colleague from Oregon will resound not only along the western coast of the United States, but among liberals everywhere, whether in New York or in Boston, whether in Portland, Maine, or in Lincoln, Nebr. All liberals will take heart when a man like the Senator from Oregon says, "I have studied the matter, and I have come to the conclusion that the St. Lawrence seaway should be built." In so doing, the distinguished Senator alines himself with Theodore Roosevelt, Warren G. Harding, Calvin Coolidge, Franklin D. Roosevelt, and other Presidents who have declared themselves in favor of the project.

On behalf of the people of North Dakota, particularly the shippers of grain and livestock, men and women upon the hills and plains and in the valleys of my State, I wish to publicly thank the distinguished Senator from Oregon, even though I know the project proposed may not particularly benefit his own State, for joining with the people of my State and of the neighboring States of Montana and South Dakota and Minnesota, in an effort to obtain justice at the hands of this great body, of which we have the honor of being Members.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. LANGER. I yield to the Senator. I yield him the floor.

Mr. MORSE. I merely wish to say to my good friend from North Dakota that his generosity of compliment embarrasses me, but I am very glad to assure him that the junior Senator from Oregon intends to continue to stand shoulder to shoulder with him within the Republican Party in support of liberal causes.

AMENDMENT TO REVISED STATUTES—CORRECTION IN ENROLLMENT OF A BILL

The PRESIDING OFFICER laid before the Senate House Concurrent Resolution 148, which was read by the Chief Clerk, as follows:

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H. R. 3778), to amend section 30 of the Revised Statutes of the

United States (U. S. C., title 2, sec. 25), the Clerk of the House is authorized and directed to make the following corrections:

Strike out in lines 4 and 5, page 1 of the engrossed bill, the words "so as to read as follows" and insert in lieu thereof "by adding at the end thereof the following"; on page 1, line 6, strike out "SEC. 30."; and on page 2, lines 9 and 13, strike out the quotation marks.

Mr. WHERRY. Mr. President, I move the adoption of the concurrent resolution.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to.

EIGHTY-NINTH ANNIVERSARY OF THE ADMISSION OF OREGON TO THE UNION

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point as part of my remarks a brief statement which I have released today commemorating the eighty-ninth birthday of the great State of Oregon.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

It was on February 14, 1859, that Oregon was admitted into the Union with its present boundaries. The history of its admission into the Union is a most interesting one because it depicts so clearly the great characteristic of the people of Oregon to think for themselves as individuals.

Maybe that is because of the Missouri tradition which flowed through the veins of so many of the pioneers who settled in Oregon. Dr. Dan E. Clark, professor of history at the University of Oregon, tells us in one of his writings that beginning in 1841 the "on to Oregon" movement spread throughout the upper Mississippi Valley. It was in that year that some 70 pioneers left Independence, Mo., for home and fortune in the Golden West.

History records that some 30 of them blazed the Oregon Trail to the Willamette Valley and the others took the lower fork at Soda Springs and made their contribution to the pioneer traditions of California. The 1841 migration pioneers to Oregon was followed by increasing numbers of others, including the great migration of 1843 when nearly 1,000 people traveled by the then deep-rutted Oregon Trail to Oregon

Professor Clark tells us that by 1852 some 15,000 pioneers had settled in Oregon. Their treks enriched the legends and the history of the Great West and their indomitable spirit memorialized every mile of the rugged and dangerous Oregon Trail. Their struggles assured a breed of men and women in Oregon who would possess the characteristics of selflessness, great spiritual faith, and love of personal liberty protected by democratic government. Hence it is not surprising to read in the history of Oregon that a majority of the very independent people born from the loins of fearless, pioneer stock had to be convinced that their best interests lay in joining the Union.

The early proposals for Oregon's statehood were voted down three times by the people of the Oregon Territory, but in 1857 a majority of the people had become convinced that their best economic, social, and political future was to be found in statehood, so they approved the calling of a constitutional convention, which met at Salem, Oreg. The work of this convention produced a constitution of sound representative government which was ratified by the people.

Typically characteristic of what one would expect of the pioneers of the West, the people of Oregon did not wait for congressional action upon their request for statehood. They proceeded upon the basis of the view that once they ratified their own constitution there would be no question as to their eligibility to receive the thirty-third star in the field of blue on the national flag.

A great leader of the Oregon Territory, John Whiteaker was elected Governor of the newborn State which had yet to be christened by Congress. However, on February 14, 1859, Congress greatly strengthened the Union by admitting Oregon into the national family of States. If I were to permit myself to yield to State pride—and the temptation is certainly a strong one—I would pay honor at great length in these remarks about Oregon's eighty-ninth birthday to that other group of historic pioneers and explorers who first pressed upon the soil of Oregon the footprints of the white man. We are told that as early as 1543 Spanish mariners first saw the rugged beauties of the Oregon coastline. Such names as Ferrelo (1543), Sir Francis Drake (1579), Vizcaino (1603), Perez (1774), Heceta (1775), James Cook (1778), and John Meares (1788) were all explorers and mariners who sailed along the Oregon coast.

Clark tells us it was in 1788 that Capt. Robert Gray piloted his ship, *Lady Washington*, into Tillamook Bay and left an authentic record for history that at least in that year white men landed, possibly for the first time, on Oregon soil. It was the same Capt. Robert Gray who in 1791 and 1792 sailed along the Oregon coast in his ship the *Columbia*, and finally in May 1792 into the mouth of one of the greatest natural resources of the Pacific Northwest, a river which he named the Columbia in honor of his ship.

Anyone who is entrusted with the high honor and the privilege of serving the public interests of the people of Oregon in the Senate of the United States is tempted to trespass upon the time of the Senate on the occasion of his State's birthday in paying tribute to the great history and traditions of the State. However, I appreciate that the proprieties and good taste in view of the work of the day which faces the Senate justifies my tarrying but a moment longer in paying these official respects to the history of my State.

Carved out of the rugged but yet fertile and alpine beauty of the Northwest by men and women of our pioneer era who matched the ruggedness, fertility, and beauty of the country they came to settle, Oregon has ever been both a testing ground and proving ground for the immutable principles of democratic government. There, from the beginning of its Territorial days through the debate over statehood to the present, the Oregon people have exemplified democracy in action. There, the principles and the guaranties of the Constitution have been put into practice. There, political machines and political corruption have never been permitted to take root. In Oregon, throughout its history, equality of all persons before the law has characterized Oregon's government by law. Its people have maintained inviolate the constitutional conception and guaranty that each individual is entitled to equal protection of the law and equality of opportunity for the pursuit of life, liberty, and happiness under our representative government of their people.

It is interesting to note that in these days in February when we pay such high tribute to the memory of Abraham Lincoln that it was on September 27, 1849, Lincoln sent his now historic letter to a member of President Taylor's administration refusing appointment to the governorship of the new Oregon Territory which became a Territory on August 14, 1848. What differences in the pages of Oregon and national history would have been written if Lincoln had accepted that appointment whets the imagination. I will not venture upon that imaginative field in this statement. But I would point out that the ruggedness of Lincoln, the selflessness of Lincoln, the spiritual faith of Lincoln, the humanity and brotherly love of Lincoln, yes the great abiding faith of Lincoln in the ability of freemen to govern themselves also typify the people of Oregon from the days of the early explorers and pioneers to the present generation. In the short span of 89 years of history of my State it has made a great record in ever supporting and defending our country and its ideals. I am sure that on its eighty-ninth birthday the entire Nation honors my State.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

RECESS TO TUESDAY

Mr. WHERRY. Mr. President, it appearing that the work of the Senate has been concluded for this afternoon, I move that the Senate recess until Tuesday next at noon.

The motion was agreed to; and (at 1 o'clock and 48 minutes p. m.) the Senate took a recess until Tuesday, February 17, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 13 (legislative day of February 2), 1948:

UNITED NATIONS

Coert du Bois, of California, Foreign Service officer, retired, to be the representative of the United States of America on the Good Offices Committee of the Security Council of the United Nations on Indonesia.

SECURITIES AND EXCHANGE COMMISSION

Paul R. Rowen, of Massachusetts, to be a member of the Securities and Exchange Commission for the term expiring June 5, 1950.

NATIONAL MEDIATION BOARD

John Thad Scott, Jr., of Texas, to be a member of the National Mediation Board for the term expiring February 1, 1951.

UNITED STATES PUBLIC HEALTH SERVICE

Leonard A. Scheele, of Michigan, to be Surgeon General of the United States Public Health Service for a term of 4 years.

The following-named candidates for appointment and promotion in the Regular Corps of the Public Health Service:

To be senior assistant veterinarian (equivalent to the Army rank of captain), effective date of acceptance:

James H. Steele

Senior surgeon to be temporary medical director (equivalent to the Army rank of colonel):

Walter E. Doyle

Assistant surgeons to be temporary senior assistant surgeons (equivalent to the Army rank of captain):

Milton J. Miller

Robert H. Dysinger

Senior assistant veterinarian to be temporary veterinarian (equivalent to the Army rank of major):

James H. Steele

The following-named candidates for appointment in the Regular Corps of the Public Health Service:

To be senior assistant surgeons (equivalent to the Army rank of captain), effective date of acceptance:

David D. LeGrand	Arthur H. Maybay
Wayland J. Hayes, Jr.	James A. Salmons
Gerald R. Clark	

To be assistant surgeons (equivalent to the Army rank of first lieutenant), effective date of acceptance:

David S. Citron	Ray W. Goens
Leon T. Atlas	Eugene A. Vaccaro
Albert V. Myatt	Stuart H. Martel
John C. Wrye III	Maurice W. Peterson
Raymond G. Halvorson	Harry E. Halden III
James R. Green	Clarence A. Velat
Harrison F. Wood	Howard W. Halfman
Carroll D. Savage	John P. Lombardi
Charles Sherter	Charles L. A. Wehr
Carl R. Reed	Herbert Wieder

IN THE NAVY

The following-named officers for appointment in the Supply Corps of the Navy in the grades hereinafter stated:

LIEUTENANT COMMANDER

Edward C. Sockerson

LIEUTENANTS

William R. May
George S. Rawson

LIEUTENANT (JUNIOR GRADE)

Howard D. McPike

ENSIGNS

Alan J. Frankel
Calvin D. Landis
Roger M. Wilsie

Morrison D. Ismond (naval ROTC) to be an ensign in the Navy from the 4th day of June 1948.

John D. Shaw (naval ROTC) to be an ensign in the Navy from the 4th day of June 1948, in lieu of appointment as ensign in the Civil Engineer Corps of the Navy as previously nominated.

William F. Cecil (civilian college graduate) to be an ensign in the Supply Corps of the Navy.

Ernst A. Wolfram, Jr. (civilian college graduate) to be a lieutenant (junior grade) in the Chaplain Corps of the Navy.

The following-named to be ensigns in the Nurse Corps of the Navy:

Marguerite Asci	Arlene B. Cressman
Anna M. Belaire	Josephine L. Croftchik
Ruth M. Bowers	Constance R. Esposito
Marian J. Bricker	Alice C. Fogarty
Catherine P. Clarke	Yoshiko Tanigawa
Theresa T. Clarke	

The following-named officers to the grades indicated in the Medical Corps of the Navy:

COMMANDER

John J. Brown

LIEUTENANT COMMANDER

William L. Roberts

LIEUTENANT

Thomas D. Yocum

LIEUTENANTS (JUNIOR GRADE)

Charles E. Boonstra	Thomas W. Stewart
Elbert C. Brinning, Jr.	Louis Sussman
John W. Howard	Richard K. Williams
John H. Liles, Jr.	

The following-named officer to the grade indicated in the Medical Service Corps of the Navy:

LIEUTENANT

Bernard G. Platt

POSTMASTERS

The following-named persons to be postmasters:

ALASKA

Ruth C. Hutchins, Annette, Alaska. Office became Presidential October 1, 1947.

ARIZONA

Ollie A. Caldwell, Gila Bend, Ariz., in place of F. A. Rhodes, resigned.

Lillie M. McEntire, Higley, Ariz., in place of M. E. Owen, retired.

CALIFORNIA

Lloyette Osborne, Earlimart, Calif., in place of H. O. Adams, resigned.

COLORADO

Phillip W. Hanning, Jr., Boulder, Colo., in place of P. B. Paddock, deceased.

CONNECTICUT

Thomas F. Honan, Gaylordsville, Conn., in place of E. A. Honan, retired.

GEORGIA

Thomas R. Davenport, Buchanan, Ga., in place of H. S. McCalman, resigned.

Victor H. Tomlinson, Fort Valley, Ga., in place of J. H. Jones, resigned.

IDAHO

George E. Johnson, Headquarters, Idaho, in place of D. E. Springer, resigned.

Arthur B. Peck, Lava Hot Springs, Idaho, in place of I. J. Peck, resigned.

ILLINOIS

Louis Sloter, Crescent City, Ill., in place of Gerd Willms, transferred.

Glen W. Seaton, Glen Carbon, Ill., in place of Myrtle Wilkison, resigned.

Russell M. Shoaf, Homer, Ill., in place of O. P. Dickson, deceased.

Russell E. Snyder, Hull, Ill., in place of F. S. Sprague, resigned.

C. Lincoln Guernsey, Mechanicsburg, Ill., in place of O. M. Elliott, transferred.

INDIANA

John L. Turner, Winchester, Ind., in place of J. L. Wall, resigned.

IOWA

John M. McNiel, Batavia, Iowa, in place of W. S. Olexa, resigned.

Charles W. Crees, Bayard, Iowa, in place of O. V. Stevens, resigned.

Paul Davis, Dunlap, Iowa, in place of J. P. Burke, deceased.

KANSAS

Albert H. Sauvain, Agenda, Kans. Office became Presidential July 1, 1945.

Reginald E. Snapp, Belleville, Kans., in place of L. A. Johnson, resigned.

Alice I. Van Sickle, Cedar Point, Kans., in place of Jack Van Sickle, deceased.

Francis K. Darr, Centralia, Kans., in place of C. E. Drumm, deceased.

Arnold C. Kettler, Deerfield, Kans., in place of E. R. Eyman, transferred.

Ellen McEnulty, Denton, Kans., in place of B. O. Shupe, transferred.

Ethel S. Watson, Elsmore, Kans., in place of C. R. Braden, retired.

Harlen C. Atkinson, Goodland, Kans., in place of H. E. Elder, resigned.

Howard L. Hanson, Hepler, Kans., in place of W. P. Armstrong, transferred.

James F. Lambert, Inman, Kans., in place of A. W. Balzer, transferred.

Allyan H. Beers, Jennings, Kans., in place of Edward Tacha, deceased.

Buford L. Emmele, Kiowa, Kans., in place of W. S. Harris, resigned.

Beatrice H. Hovell, Langdon, Kans. Office became Presidential July 1, 1945.

Abe W. Fox, Larned, Kans., in place of Lottie Victor, resigned.

Wilmer G. Boothe, Lehigh, Kans., in place of O. F. Grothe, deceased.

William P. Helwig, Jr., Macksville, Kans., in place of F. E. Westgate, resigned.

Faye G. Mullikin, Montezuma, Kans., in place of B. W. Wherritt, transferred.

Cleal M. Harrison, Oakley, Kans., in place of N. D. Zeigler, transferred.

Roy B. Volz, Powhattan, Kans., in place of B. M. Smith, resigned.

Gail L. Hohman, Randolph, Kans., in place of J. L. Larson, resigned.

Raymond J. Laudick, Spearville, Kans., in place of N. W. Shean, transferred.

Wayne W. Mueller, Sylvan Grove, Kans., in place of W. J. Dehler, transferred.

Eugene H. Riggle, Thayer, Kans., in place of A. L. Hastings, transferred.

LOUISIANA

Charles D. Block, Slidell, La., in place of E. S. Jemison, deceased.

MICHIGAN

Gerald D. Swanson, Bear Lake, Mich., in place of H. P. Snyder, transferred.

Roland F. Duff, Buckley, Mich., in place of W. W. Plank, retired.

Archie W. Visnaw, Cedarville, Mich., in place of Edwin Dutcher, resigned.

Arthur F. Newman, De Witt, Mich., in place of V. W. Halterman, resigned.

Leo B. Francisco, East Lansing, Mich., in place of E. E. Young, removed.

Richard L. Price, East Tawas, Mich., in place of C. A. Bigelow, deceased.

Stewart A. Welch, Johannesburg, Mich., in place of V. G. Welch, retired.

Emerson E. Dufina, Mackinac Island, Mich., in place of Paul Doud, resigned.

Otto F. Wormsbacher, Mount Clement, Mich., in place of J. C. Bannow, deceased.

Charles L. Kaltenbach, New Haven, Mich., in place of C. J. Tessman, resigned.

Charles J. Bal, Norway, Mich., in place of Elizebeth Treiber, retired.

Russell C. Scott, Pittsford, Mich., in place of F. B. Wadsworth, retired.

Vester E. Mock, Springport, Mich., in place of L. L. Peterson, transferred.

August L. Babel, Traverse City, Mich., in place of A. S. Friedrich, resigned.

William H. Mullins, Trout Lake, Mich. Office became Presidential July 1, 1947.

MINNESOTA

Alban D. Bertrand, Sleepy Eye, Minn., in place of George Glotzbach, resigned.

MISSISSIPPI

William H. Baldwin, Natchez, Miss., in place of H. W. Wilson, resigned.

MISSOURI

Cleatus F. Henson, Bell City, Mo., in place of A. J. Henson, retired.

Eugene H. Davison, Elkland, Mo., in place of I. F. Davison, retired.

NEBRASKA

Irvan S. Renie, Arapahoe, Nebr., in place of A. A. Anderson, transferred.

Donald K. Burklund, Brule, Nebr., in place of E. E. Kampfe, resigned.

Edward J. Pepperl, Burchard, Nebr., in place of A. M. Hart, resigned.

Wayne L. Patras, Clearwater, Nebr., in place of R. E. Flowers, transferred.

John P. Davis, Crawford, Nebr., in place of G. J. Scott, resigned.

M. Belle Bouck, Palmyra, Nebr., in place of M. A. Foreman, deceased.

Fahy E. Wadkins, Phillips, Nebr., in place of J. W. Spencer, retired.

Calvin Joseph Olk, Pilger, Nebr., in place of O. A. Pilger, transferred.

Alice M. Asher, Pleasanton, Nebr. Office became Presidential July 1, 1945.

Mae M. Lovell, Potter, Nebr., in place of W. M. Goding, resigned.

Hattie A. Pateidl, Snyder, Nebr., in place of Joseph Kounovsky, retired.

Charles V. Brokaw, Uehling, Nebr., in place of Catherine Honey, retired.

Margaret Linhart, Verdel, Nebr., in place of W. N. McClintock, transferred.

NEW MEXICO

Alorie V. Young, Hollywood, N. Mex., in place of E. E. Miller, resigned.

NORTH CAROLINA

Ben B. Jaynes, Autryville, N. C., in place of M. V. Jaynes, removed.

Lacy E. Price, Cliffside, N. C., in place of R. A. Love, Jr., resigned.

OHIO

Ralph W. Stitsworth, Jamestown, Ohio, in place of H. C. Lieurance, retired.

Forest L. Ayers, Murray City, Ohio, in place of F. E. Surgen, resigned.

OKLAHOMA

James W. Chalfant, Cheyenne, Okla., in place of W. H. Mouser, resigned.

Joel F. Halliday, Eldorado, Okla., in place of E. B. Minich, retired.

Wily S. Bird, Fort Cobb, Okla., in place of E. C. Hoops, resigned.

Gertrude E. Locke, Panama, Okla., in place of Myrtle Whiteaker, resigned.

Lowell V. Doke, Pocasset, Okla., in place of W. H. Roysden, transferred.

Orville E. Marlatt, Ringwood, Okla., in place of S. T. McNutt, transferred.

Hughell F. Legg, Spencer, Okla. Office became Presidential July 1, 1915.

John R. Redwine, Jr., Spiro, Okla., in place of J. R. Redwine, Jr. Incumbent's commission expired June 23, 1942.

Treal A. McPherson, Thackerville, Okla., in place of W. T. Dunsworth, deceased.

Rex L. Wall, Willow, Okla., in place of D. C. Allsup, transferred.

OREGON

Quincy E. Smith, Idanha, Oreg., in place of L. H. Haseman, resigned.

George T. Benson, John Day, Oreg., in place of O. L. Dickens, resigned.

SOUTH CAROLINA

James D. Watson, Blaney, S. C., in place of J. T. Ross, retired.

Gertrude F. Foster, Whitney, S. C., in place of W. H. Bishop, resigned.

SOUTH DAKOTA

Ruby Frederick, Rosebud, S. Dak., in place of T. L. Dam, resigned.

John C Miller, Volga, S. Dak., in place of V. M. Dalthorp, retired.

Leroy Patrick Clare, Wakonda, S. Dak., in place of C. J. LaBarge, deceased.

TEXAS

Robert L. Phinney, Austin, Tex., in place of R. E. Lee, resigned.

Grace G. Sanderlin, Camp Wood, Tex., in place of J. T. Gray, retired.

Andrew J. Dennis, Moran, Tex., in place of Cicero Harper, retired.

H. L. Riddle, Ovalo, Tex., in place of Neeta Shaw, retired.

Mark L. Hodges, Paris, Tex., in place of T. W. Russell, deceased.

Ambrose W. Caufield, Phillips, Tex., in place of A. O. Pickens, removed.

Edna A. Sutherlin, Selman City, Tex., in place of R. A. Crawford, transferred.

VIRGINIA

Nellie S. Wilkinson, Bon Air, Va., in place of J. A. Powers, retired.

Gordon B. Cartwright, King George, Va., in place of U. S. Staples, retired.

WASHINGTON

Melvin S. Jones, Cheney, Wash., in place of Alex Huse, deceased.

WISCONSIN

Lloyd H. Bovee, Bancroft, Wis., in place of F. G. Hutchinson, transferred.

Herbert H. Hilgendorf, Burnett, Wis., in place of L. W. F. Dehne, retired.

William J. Peterman, Cecil, Wis., in place of W. H. Meyer, deceased.

Sheldon E. Cantlon, Ettrick, Wis., in place of L. P. Sheehy, transferred.

Rudolph C. Trauba, Greenville, Wis. Office became Presidential July 1, 1945.

Harry M. Harms, Platteville, Wis., in place of J. O. Luce, transferred.

HOUSE OF REPRESENTATIVES

MONDAY, FEBRUARY 16, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most merciful and compassionate Father, Thou who dost graciously harken to Thy children, again we come into Thy presence and invoke Thy blessing. We ask not an escape from work and even worry, which at times takes a heavy toll, but for the spirit of resolution that we may carry forward those measures that make for a strong and contented country. From all problems do Thou dispel the shadows of uncertainty, that we may convince our people of devotion that makes men and women true patriots. May the will for peace prevail and once more lead the heart of our Nation beside still waters and in pastures green and lasting. Nourish us with all goodness and make us to love that which Thou dost commend. In the name of our glorified Saviour. Amen.

The Journal of the proceedings of Thursday, February 12, 1948, was read and approved.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Miller, one of his secretaries, who also informed the House that on February 10, 1948, the President approved and signed a bill of the House of the following title:

H. R. 1826. An act making it a petty offense to enter any national-forest land while it is closed to the public.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 148. Concurrent resolution authorizing the Clerk of the House, in the enrollment of the bill H. R. 3778, to make certain corrections.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1583. An act to provide for the conveyance to the State of Maryland, for the use of the University of Maryland, of the northern portion of a parcel of land previously constituting a part of the campus of the university and previously conveyed by the State of Maryland to the United States for the use of the Bureau of Mines.

CALENDAR WEDNESDAY

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday of this week be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

FLOOD CONTROL IN CALIFORNIA

Mr. WELCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, revise and extend my remarks, and include therein a letter addressed to me by Maj. Gen. R. C. Crawford, Acting Chief of the United States Army Engineers.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WELCH. Mr. Speaker, there is a critical shortage of both water and power in California. After one of the longest droughts in the history of the State, rain has begun to fall. The normal rainy season in California is from October until April. Turbulent floods often follow this limited period of rainfall. Flood control is our only salvation.

This letter refers to the Cherry Valley Reservoir in the Tuolumne River Basin. The area directly benefited by this project has a population of several thousand, while that indirectly affected has in excess of 100,000. This project will meet with the approval of the great international seaport city of San Francisco and the Modesto and Turlock irrigation district.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, D. C., February 11, 1948.

Hon. RICHARD J. WELCH,
House of Representatives,
Washington, D. C.

DEAR MR. WELCH: Reference is made to your recent telephone conversation with General Wheeler concerning plans for the construction of the Cherry Valley Reservoir in the Tuolumne River Basin, Calif.

Pursuant to specific authorization from Congress, the district engineer at Sacramento made an investigation of the San Joaquin River and tributaries, California, in the interest of flood control and allied water uses. In that report he recommended construction of the Jacksonville Reservoir on Tuolumne River in the interest of flood control. In connection with the review of that report by the Board of Engineers for Rivers and Harbors, representatives of the city and county of San Francisco and the Modesto and Turlock irrigation districts appeared before the Board and discussed their plans for further development of the Tuolumne River as a source of water supply for the city and county of San Francisco and the Modesto and Turlock irrigation districts. At that time it was brought out that ultimately the city and county of San Francisco and the Modesto and Turlock irrigation districts plan to enlarge the existing Don Pedro Reservoir and that the proposed Jacksonville Reservoir would lie within the reservoir area of the new Don Pedro Reservoir. Accordingly, the Board of Engineers for Rivers and Harbors modified the plan proposed by the district engineer. The Chief of Engineers, in his report printed as Flood Control Committee Document No. 2, Seventy-eighth Congress, second session, recommended "that in lieu of the construction of the proposed Jacksonville Reservoir, an expenditure to the extent justified by proportionate benefits for flood control estimated at $5,800,000 for the equivalent of 320,000 acre-feet in Jacksonville Reservoir be authorized toward the first cost of the proposed new Don Pedro Reservoir or other suitable reservoir in the Tuolumne River Basin provided that local interests construct, maintain, and operate the dams and reservoirs, allocate storage for flood control, and agree to operate such storage in accordance with the rules and regulations prescribed by the Secretary of War."

The plan of improvement for flood control and other purposes on the lower San

Joaquin River and tributaries, including Tuolumne and Stanislaus Rivers, in accordance with the recommendation of the Chief of Engineers in Flood Control Committee Document No. 2, Seventy-eighth Congress, second session, was approved in the 1944 Flood Control Act and there was authorized for appropriation $8,000,000 for the initiation and partial accomplishment of that plan.

Local interests comprising the city and County of San Francisco and the Modesto and Turlock irrigation districts plan to provide flood control initially by constructing the Cherry Valley Reservoir on Cherry River, a tributary of the Tuolumne River, and by coordinating the operation of this reservoir with the operation of the city's existing Eleanor Lake and Hetch Hetchy Reservoirs on Eleanor Creek and Tuolumne River, respectively, with the irrigation district's existing Don Pedro Reservoir on Tuolumne River. Since the Cherry Creek Reservoir is in the Tuolumne River Basin, Federal participation in the interest of flood control in that reservoir is authorized pursuant to the 1944 Flood Control Act, as it constitutes a suitable reservoir for flood-control purposes in the Tuolumne River Basin and will materially advance the date upon which effective flood-control storage can be provided in this basin.

Among the areas which will be given protection by the Cherry Valley Reservoir will be the military installations in the Stockton area, particularly the naval depot on Rough and Ready Island and some of the suburban developments adjacent to Stockton. The area directly benefited has a population of several thousand while that indirectly affected is around 100,000. In addition to the flood-control benefits from the project which will greatly exceed their cost, for which Federal participation is authorized, the Cherry Valley Reservoir will also provide local interests with urgently needed irrigation and domestic water supply, the cost of which will be borne by local interests.

I trust that the information contained in the paragraphs above is sufficient for your present purposes. If additional data are required, I will be pleased to furnish all that is available upon receipt of your further request.

Sincerely yours,

R. C. CRAWFORD,
Major General, Acting Chief of Engineers.

EXTENSION OF REMARKS

Mr. HESELTON asked and was granted permission to extend his remarks in the RECORD in two instances.

SPECIAL ORDERS GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 20 minutes on all days in which there are sessions of the House this week, after the expiration of the legislative business and any other special orders.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE FUEL-OIL SITUATION

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, on Saturday afternoon I received a telegram signed by David Bruce, Assistant Secretary of Commerce. It contained 501 words, but boiled down, it said, "No; we won't do anything about the export program."

This morning I received a wire from a supplier in Pittsfield, Mass., saying that he will get no more oil for the remainder of the month after February 18. He said the conditions after February 18 will be serious and he must make plans to meet the situation now.

He then asks, "Advise us what you can do to divert fuel oil to us."

This morning Secretary Krug was before the House Committee on Interstate and Foreign Commerce and discussed this inability to cut these exports further. I do not know whether they need kerosene or residual oil in Pittsfield. At any rate, it adds up to 107½ barrels of some type of fuel oil to take them through this month. It appears that our Government has licensed and probably the exporters have sent 1,262 barrels of kerosene to Tahiti; that our Government has licensed the export of 7,500 barrels of gas, oil, and distillate fuel to the Fiji Islands. Mr. Krug intimated that this was because they made copra, and copra helps to make oleomargarine, which will probably be of some interest to my friends from the Midwest.

I suggest there is altogether too much confusion. Perhaps some of us could enlist the sympathy of the governments of the Fiji Islands and Tahiti so that they will make no further requests until spring. In any event, we would receive no colder a reception than the one given to us by our own Government.

EXTENSION OF REMARKS

Mr. ARNOLD asked and was given permission to extend his remarks in the RECORD and include a magazine article.

Mr. MACY asked and was granted permission to extend his remarks in the RECORD and insert the excellent remarks of Hon. JOSEPH W. MARTIN, JR., at the National Republican Club last Thursday evening.

Mr. ANDERSON of California asked and was granted permission to extend his remarks in two instances and in each to include a newspaper article.

Mr. BRAMBLETT asked and was granted permission to extend his remarks in the RECORD and include an editorial by Mr. Allen Griffin, owner and publisher of the Monterey Herald on universal military training.

SYNTHETIC MOTOR FUEL

Mr. JOHNSON of Illinois. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. JOHNSON of Illinois. Mr. Speaker, today I am introducing a bill to transfer the alcohol plant at Muscatine, Iowa, from the Surplus Property Board to the Department of Agriculture. We are becoming desperately short of liquid motor fuels, as well as very short of petroleum fuel, both for heating purposes and for power of all kinds.

Our regional laboratory at Peoria, Ill., has done some fine research in developing liquid motor fuel from waste farm products. The laboratory at Peoria has demonstrated with a small pilot plant that there can be derived 90 gallons of high-grade liquid motor fuel from a ton of corn cobs. Among the uses desired for the Muscatine plant is to demonstrate practical operation on a commercial scale, the findings in research at the Peoria laboratory, and from other research sources, of the use of waste and surplus farm products in synthetic liquid motor fuels.

The northern regional agricultural laboratory at Peoria has been collaborating and assisting others in the research processing of coal into liquid motor fuel.

This bill, if enacted into law, insures immediate sources of supply of industrial alcohol for synthetic rubber, if needed in any emergency.

Test-tube research results are usually proven in a small pilot plant. It then becomes necessary to prove practical economic results in a commercial size plant.

The Muscatine plant is ideal for that.

EXTENSION OF REMARKS

Mr. DAVIS of Wisconsin asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. WOODRUFF asked and was given permission to extend his remarks in the RECORD and include a newspaper article from this morning's Post.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD and include an editorial by Mark Sullivan.

Mr. McGREGOR asked and was given permission to extend his remarks in the Appendix of the RECORD.

Mr. BENNETT of Missouri asked and was given permission to extend his remarks in the RECORD and include a speech he made last week in Bangor, Maine.

LET US SAVE NEARLY A BILLION DOLLARS FOR THE TAXPAYERS OF THE UNITED STATES

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, according to the information obtained from the Department of State, it is proposed under the Marshall plan to export nearly 2,000,000,000 pounds of tobacco at a cost of $911,100,000. The total value of tobacco exports under the plan for the first 15 months will be $262,500,000.

Back in 1940 a bill was passed to place an embargo on exports of tobacco seed. This was the most vicious trade barrier ever erected in the history of our country. This legislation was passed when Cordell Hull, from the tobacco State of Tennessee, was Secretary of State and when Henry Wallace was Secretary of Agriculture. While the League of Women Voters and other groups were hearing about the wonders of the reciprocal

trade treaties and the good-neighbor policy, this most vicious embargo was erected along with some other special privilege embargo legislation.

The question is, Are we as a Congress justified in voting $1, $1,000,000, or $1,000,000,000 of the United States taxpayers' money for tobacco exports under the Marshall plan at the very time we have an embargo on tobacco seed so that other countries cannot raise their own tobacco? Would it not make more sense and be more economically sound to furnish the tobacco seed and let these countries raise their own tobacco?

The repeal of this embargo legislation is of particular importance at this time, especially in view of the Marshall plan and the proposed Herter approach to the Marshall plan. For that reason on February 4, 1948, I introduced the following bill:

A bill to repeal the act of June 5, 1940, entitled "An act to prohibit the exportation of tobacco seed and plants, except for experimental purposes"

Be it enacted, etc., That the act of June 5, 1940 (Public, No. 543, 76th Cong.) entitled "an act to prohibit the exportation of tobacco seed and plants, except for experimental purposes," is hereby repealed.

When we have a Federal tax on yearly incomes of $600, it should be apparent that we should not be using money to give away tobacco—a luxury and not a necessity—to other peoples. We surely should at least remove the embargo on the seed so they could grow their own luxury items if they so desire. Without any argument as to whether or not it is advisable to ship any tobacco, it is ridiculous to keep the present embargo on the seed. The administrators of the Marshall plan should at least be in a position to furnish the seed where and when it is needed. The tobacco seed embargo is not in conformity with the motive of the Friendship Train. It is contrary to the good-neighbor policy, to reciprocity, and is most assuredly contrary to the position of the United States on foreign trade in previous administrations. The Australian embargo on sheep producing a certain kind of wool and the Russian embargo on sable breeding animal exports are the only similar embargoes in operation.

THE THIRTIETH ANNIVERSARY OF LITHUANIA'S INDEPENDENCE

Mr. JONKMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. JONKMAN. Mr. Speaker, the thirtieth anniversary of Lithuania's independence cannot help but draw the sympathetic consideration of every freedom-loving American. As I understand it, the United States still recognizes Lithuania as an independent nation whose deprivation of this independence is only temporary. The irony of her situation is tragic to the extreme.

On February 10, 1940, addressing the American Youth Congress, the biggest friend the Soviet Union ever had in the United States said of her:

The Soviet Union, as everybody who has the courage to face the facts knows, is run by a dictatorship as absolute as any other dictatorship in the world.

According to reliable reports, "Independent Lithuania" is run by this dictator in so ruthless a manner that it beggars description. According to these reports, Lithuania has been the victim of this dictator not only in loss of independence, not only in loss of freedom of speech, freedom of press, freedom of worship, and similar inherent human rights, but she has been made the victim of mass liquidation and mass deportation to Russian concentration camps—which means slow liquidation—on a scale constituting genocide such as has probably not been surpassed in the history of nations. In December of 1946 the General Assembly of the United Nations declared genocide to be an international crime.

It would seem that one of the first responsibilities of the General Assembly of the United Nations is to investigate the above-named reports and charges against the Soviet Union. If they are not true the facts should be known. If, on the other hand, they are true, investigators on the spot should be able to establish this fact and bring the Soviet Union at least to the bar of public opinion with such appropriate action as the circumstances may warrant.

If the Soviet Union, as has been her practice, refuses a commission of the United Nations to make such investigation in Lithuania, then the secondary evidence at hand should be resorted to and a case made of it. Such a proceeding on secondary evidence could not meet with sound or serious objection from the Soviet Union, and would constitute a basic right of the Lithuanian people under the above report.

The above-named conduct of the Soviet Union toward Lithuania is a gross violation of the Atlantic Charter and the Charter of the United Nations, and cries to high heaven for relief.

The American people cannot help but be behind such action for relief.

EXTENSION OF REMARKS

Mr. MILLER of Connecticut asked and was given permission to extend his remarks in the RECORD and include an address by the gentleman from Connecticut [Mr. LODGE] before the Hartford (Conn.) Women's Republican Club on Lincoln's Birthday.

Mr. REED of New York asked and was given permission to extend his remarks in the Appendix of the RECORD in four instances and include certain extraneous matter.

Mr. REED of New York asked and was given permission to extend his remarks in the RECORD and include an article by Frank R. Kent, appearing in the Evening Star of February 13, 1948.

ADDITIONAL ALLOWANCES FOR MILITARY AND NAVAL PERSONNEL

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include an explanation of a bill I am introducing today.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. REED of New York. Mr. Speaker, I have today introduced a bill granting additional allowances for military and naval personnel as to overseas service.

The bill would exempt from Federal income tax compensation received prior to January 1, 1949, for active service as a commissioned officer in the military or naval forces of the United States during World War II; and in the case of a citizen or resident of the United States, such compensation received as a commissioned officer in the military forces of any of the United Nations during the war. This relief would be applicable to taxable years in which 10 months or more of such service is performed on sea duty or overseas—outside the States of the Union and the District of Columbia.

All income tax liability attributable to active service pay of all enlisted men was canceled outright for all of the war years by the Revenue Act of 1945. This cancellation extends through December 31, 1948. All liability of commissioned officers attributable to such pay received during the taxable years 1943 through 1948 was canceled in respect of so much of such service pay as does not exceed $1,500.

While the Revenue Act of 1945 provided that the tax attributable to service pay could be deferred and paid in 12 equal quarterly installments, the payment of such tax is causing considerable hardship among military men in their adjustment to civilian life. There are some cases where the people who performed such service are engaged in completing their education which was interrupted during the war, or in adjusting themselves in their business, or profession, or jobs for whom the liability which is outstanding constitutes a real hardship. Though the amount of the liability may seem comparatively small in most such cases, still it may be a material burden for them under their circumstances.

For these reasons I believe that all such liability for all of the war years and through December 31, 1948, should be canceled in the case of those who served on sea duty or overseas for taxable years in which 10 months or more of such service is performed on sea duty or overseas—outside the States of the Union and the District of Columbia.

EXTENSION OF REMARKS

Mr. REED of New York asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter from the clerk of the Senate of the State of New York with a resolution passed by that body in connection with the community property tax.

NATIONAL SERVICE LIFE INSURANCE AND UNITED STATES GOVERNMENT LIFE INSURANCE

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. REED of New York. Mr. Speaker, I am today introducing a bill to exempt from the Federal estate tax proceeds of national service life insurance and United States Government life insurance.

The bill would provide that there shall not be included in the gross estate for the purpose of the Federal estate tax amounts receivable by the executor or any other beneficiary as national service life insurance or United States Government life insurancce under policies upon the lives of members of the armed forces of the United States.

The laws establishing this insurance provide that such proceeds shall be exempt from all taxation. Section 22, Public, 242, Sixty-eighth Congress, first session, Forty-third Statutes 607, 613, as amended by Public, No. 262, Seventy-fourth Congress, first session, Forty-ninth Statutes 607, 609; and Public, No. 801, Seventy-sixth Congress, third session, Fifty-fourth Statutes 974.

However, in construing this provision the United States Supreme Court in 1939 held that it applies only to income and property taxes. The Court said that since the estate tax is not a tax on the property but only on the transfer of such property the exemption does not apply to the estate tax. *United States Trust Co. of New York* v. *Helvering* (307 U. S. 57).

I believe that it was the intent of the Congress to exempt from all Federal taxes, including the Federal estate tax, the proceeds of national service life insurance and United States Government life insurance provided for the members of its armed forces. This bill specifically exempts from the Federal estate tax the proceeds of such policies in the case of those servicemen dying after December 6, 1941.

These men and women, most of them in the prime of their lives, joined the armed forces in behalf of their country and died in its service. There should not be a penalty for making this sacrifice.

EXTENSION OF REMARKS

Mr. MERROW asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article by W. Stuart Symington, Secretary of the Air Force, entitled "We've Scuttled Our Air Defenses."

SPECIAL ORDER GRANTED

Mr. MERROW. Mr. Speaker, I ask unanimous consent that on February 24, after disposition of all business on the Speaker's desk and at the conclusion of any special orders heretofore entered, I may be permitted to address the House for 1 hour.

The SPEAKER. Is there objection to the request of the gentleman from New Hampshire?

There was no objection.

EXTENSION OF REMARKS

Mr. BRADLEY asked and was given permission to extend his remarks in the Appendix of the RECORD and include an address made before the biennial convention of the Retired Officers Association.

Mr. McDOWELL asked and was given permission to extend his remarks in the RECORD and include an article from the New York Times.

Mr. COLE of Missouri asked and was given permission to extend his remarks in the RECORD and include a broadcast entitled "Communism," by Jack Beall.

Mr. LECOMPTE asked and was given permission to extend his remarks in the Appendix of the RECORD and include a set of resolutions adopted by the Fifth District of the American Legion in Iowa.

Mr. WOODRUFF asked and was given permission to extend his remarks in the RECORD and include a statement by John Middlekamp of the Automobile Manufacturers Association to the Senate Banking and Currency Committee.

ANNIVERSARY OF THE INDEPENDENCE OF LITHUANIA

Mr. JACKSON of California. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. JACKSON of California. Mr. Speaker, as was so ably pointed out by the gentleman from Michigan [Mr. JONKMAN], today is the thirtieth anniversary of the independence of Lithuania.

Mr. Speaker, it is in some respects a day of sad remembrance for the thousands of Lithuanian-Americans here in the United States—men and women of industry, thrift, and ability. Their homeland lies behind the curtain, and the fate of their short-lived Republic has, for this short moment, at least, become the fate of the other lands and peoples who have disappeared into the limbo of totalitarianism.

However, this country does not recognize the legitimacy of the new Lithuanian regime, and rightfully so. The sell-out of the Baltic States to the ambition of Soviet conquest is a sad blot upon the character of fair play, and to lend ourselves to recognition of force as an instrumentality of international negotiation would be to deny our own national birthright.

Lithuania will live again, proudly and honorably, as a member of the family of nations. A present despair will be crowned by eventual liberation if all men of good will keep alive the flame of hope and the dream of human dignity.

Hail, Lithuania.

SPECIAL ORDER GRANTED

Mr. LARCADE. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore entered, I may be permitted to address the House for 1 hour.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

EXTENSION OF REMARKS

Mr. LARCADE asked and was given permission to extend his remarks in the RECORD and include an address delivered by Joseph C. Grew, former Ambassador to Japan, before the conference of United States mayors.

Mr. BLAND asked and was given permission to extend his remarks in the RECORD on the subject of the American merchant marine.

Mr. WORLEY asked and was given permission to extend his remarks in the RECORD.

Mr. DEANE asked and was given permission to extend his remarks in the RECORD.

Mr. FISHER asked and was given permission to extend his remarks in the RECORD and include a radio interview with J. Edgar Hoover.

Mr. DAVIS of Georgia asked and was given permission to extend his remarks in the RECORD and include a digest of veterans' laws.

CIVIL RIGHTS

Mr. DORN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and include a resolution adopted by the House of Representatives of the State of South Carolina.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN. Mr. Speaker, I hold in my hand today a resolution adopted by the House of Representatives of the State of South Carolina. This is one of the most patriotic resolutions I have received in a long time. It was sponsored by a former lieutenant colonel, the Honorable G. P. Collison, with whom I served in the South Carolina House of Representatives, and who was also a tank commander in the northern European campaign. This resolution places this so-called civil-rights controversy on a very, very high plane. He goes on to state that the very first step in a police state is to get control—and I hope the gentleman from New York is listening—of your local elections, your local law enforcement, and your local employment. That is the very first step that a police state desires. That is the first step in having a gestapo in Washington, and the very first people who will suffer will be the minorities for which this type of legislation is proposed.

Mr. Speaker, I hope we will reject all this type of legislation coming before this body and keep the American people free of a future Buchenwald or Dachau.

The resolution referred to follows:

Resolution memorializing the National Congress of the United States to seriously consider and oppose national legislation relating to the FEPC antisegregation and antilynching legislation, so as to continue to vest these important matters solely under the jurisdiction of the States

Whereas there is certain proposed legislation pending before the United States Congress, or probably soon to be so pending; and,

Whereas such proposed legislation is in the form of the Fair Employment Practice Act, proposed antisegregation legislation, and proposed antilynching legislation; and

Whereas the enactment of such proposed legislation will strike at the fundamental constitutional principles that a State shall prescribe all remedies and all forums for the adjudication of all matters not granted under the United States Constitution to the Federal Government by the people of the various States; and

Whereas it is fundamentally the law of this land that the Government of the United States is a Government of limited powers; and

Whereas the very first and last steps in a would-be police or totalitarian state is to strip the constituent elements of such state of all powers and to place unwarrantedly such powers in the hands of a strong Federal Government; and

Whereas the enactment of such proposed legislation into Federal laws further concentrates unwarranted powers in the Federal Government; and

Whereas such course is dangerous for the very reason that such will eventually destroy the jurisdiction, powers, and authority of the various States and therefore the people; and

Whereas further it is the minorities in a police or totalitarian state who suffer the most, due to the fact that constituent political elements thereof, or constituent republics thereof, have been stripped of all power; and

Whereas it is felt that the various States of this American Union can far better pass laws that would be much more beneficial to its people in regard to the proposed legislation: Now, therefore, be it

Resolved by the house of representatives, That the proposed legislation above referred to is not only sectional in its purpose, but that the enactment of such into law will not only be inimical to the South but to the Nation as a whole.

That such proposed legislation is unconstitutional and un-American in that it would give to making the Federal Government all powerful and would destroy the checks and balances of the people, which they have, and which are necessary for them to have, in order to prevent a too powerful bureaucratic government from undermining the fundamental principles of Americanism.

That the enactment of such legislation into law when carried to its logical conclusion will destroy the rights and privileges of the minorities of this land, so that those who now clamor for the passage of such legislation will no doubt be its victims tomorrow.

That any bill or bills providing for the enactment of such proposed legislation be killed in the outset in order that we might not gamble with the future of America.

That a copy of this resolution be directed to the following: The President of the United States Senate, the Speaker of the House of Representatives, the two United States Senators from South Carolina, to the six Representatives in the United States Congress from South Carolina.

REMEDY FOR THE MILK SHORTAGE

Mr. POAGE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. POAGE. Mr. Speaker, I read from an editorial appearing in the St. Louis Post-Dispatch of February 12:

The American Public Health Association recently asked repeal of the penalties on margarine, citing that with vitamins added, margarine is as good a food as butter. Two doctors in the Illinois College of Medicine at Chicago reported last week on controlled experiments testing the effect on two sets of children, one given butter and the other margarine. In the Journal of the American Medical Association, these doctors said:

"The children in the margarine group experienced a high degree of good health during the study, and in comparing their health to that of the butter group, it appears to have been much better. When infirmary records are compared, it is readily seen that the margarine group fared much better than the butter group."

With the milk shortage not threatened but already on us, what are Congress and the State legislatures waiting for?

EXTENSION OF REMARKS

Mr. ROONEY asked and was given permission to extend his remarks in the RECORD in two instances, and in one to include an address by Mayor William O'Dwyer and in the other an article from the newspaper PM.

Mr. CELLER asked and was given permission to extend his remarks in the RECORD on two subjects.

Mr. McCORMACK asked and was given permission to extend his remarks in the RECORD and include a speech he made last night.

Mr. LODGE asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. CARSON asked and was given permission to extend his remarks in the RECORD and include a statement regarding the natural gas shortage.

Mr. D'EWART asked and was given permission to extend his remarks in the RECORD and include a newspaper editorial.

Mr. BYRNES of Wisconsin asked and was given permission to extend his remarks in the RECORD and include some editorials and newspaper articles.

Mr. LESINSKI (at the request of Mr. MADDEN) was given permission to extend his remarks in the RECORD and include an editorial.

Mr. MADDEN asked and was given permission to extend his remarks in the RECORD and include an editorial from the Gary Post-Tribune of Gary, Ind.

Mr. COX asked and was given permission to extend his remarks in the RECORD and include a brief statement by Dr. H. H. Kung.

Mr. MORRIS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a recent tribute to the late Mohandas K. Gandhi by the noted columnist, Hon. Sam B. Pettengill, which I think is most excellent.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. CHURCH asked and was given permission to extend his remarks in the RECORD in two instances and include two items appearing in today's Washington Times-Herald, headed in one case "Hinshaw sees seven ways United States may be struck," and in the other "Reece calls on Truman to stave off Democrat filibuster on civil rights."

THIRTIETH ANNIVERSARY OF LITHUANIA'S DECLARATION OF INDEPENDENCE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, I want to call to the attention of this House the fact that today is the thirtieth anniversary of Lithuania's declaration of independence. I want to say that the sympathy of every American goes out to the Lithuanians in the United States and to the Lithuanians in the home country because for the moment that brave people seem to be caught behind the iron curtain.

Little Lithuania, with a population of less than 3,000,000 people, is a Baltic State bounded on the north by Latvia, on the east and south by unhappy Poland and East Prussia, and on the west by East Prussia and the Baltic Sea.

The spirit of independence which is traditional to Lithuania is in the very soil of that nation. Essentially an agricultural country, with more than 45 percent of the land in farms and nearly 19 percent in forests, more than three-quarters of all Lithuanians work with the soil.

There has been no people in the whole of Europe who have had a deeper love for liberty than the Lithuanian people. The passing centuries have failed to keep their homeland enslaved. The Lithuanians have proved over and over again not only their right to freedom, but their determination to exercise that right.

As all Lithuanians believe that the present subjugation of the land of their forebears is temporary, liberty-loving Americans sympathize with them and pray for their successful liberation. We all look forward to the day when a new proclamation of liberty shall again bring joy to the hearts of the Lithuanian people everywhere in the world, and encouragement to all of those peoples who are determined to live under the principle which makes our own beloved Nation such a grand place in which to live one's life—the principle that inalienable to every man everywhere is the right of life, liberty, and the pursuit of happiness.

I want to say to the Lithuanian-Americans and through them to their homeland and home folks that the prayers of America will continue to ascend on high that brave Lithuania and her courageous people may soon know that success to their centuries of struggle for liberty which will crown them forever with the blessing of freedom, peace, and prosperity.

Our country has not recognized the actions of the Soviet Union in destroying the independence of Lithuania. The spread of communism in Europe and elsewhere must be stopped, and thereafter rolled back in Europe. When this happens the independence of Lithuania and the liberties of its people will be restored and regained.

The heart of America is with you, Lithuania.

THE LATE MORDECAI BROWN

Mr. CHURCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CHURCH. Mr. Speaker, I know the baseball fans of my State and the country in general will regret the passing of Mordecai "Three-Finger" Brown, one of baseball's all-time greats, who died yesterday after a long illness.

Brown gained his nickname from a childhood accident which cost him his

right index finger. He starred for the Chicago Cubs from 1904 until 1914. In that 10-year span he won 259 games and lost only 131.

The inventor of the famed "dipsy doodle" pitch, Brown was famous, too, for his meetings with Christy Mathewson, immortal New York Giants' hurler. The two faced each other on the mound 21 times, and Brown won 11 of the games.

I extend the sympathy of all to his widow, Sally, and two brothers and two married sisters who survive him.

SYNTHETIC RUBBER SCRAP

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 2029) to provide for the free importation of synthetic rubber scrap, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Line 6, strike out "india or synthetic" and insert "synthetic or india."

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. REED of New York. This bill, Mr. Speaker, was passed by the House on July 26, 1947. It was passed by the Senate February 2, 1948, with a clerical amendment that merely made its meaning more clear. It is entirely a noncontroversial measure which provides for the free entry into the United States of synthetic rubber scrap, under paragraph 1697 of the Tariff Act. It gives equal tariff treatment to both natural-rubber scrap and synthetic-rubber scrap and in no way applies to synthetic rubber other than scrap.

Enactment of the bill will eliminate a very serious and costly problem of classifying shipments of rubber scrap into the United States by the type of rubber scrap they contain. Very frequently these shipments contain both natural-rubber scrap and synthetic-rubber scrap. They are not separated, yet the natural variety is on the free list, while the synthetic scrap is dutiable at 7½ percent ad valorem. The practice has been that upon discovering the dutiable scrap in a mixed shipment the entire lot is subjected to the payment of duty, even though it contains duty-free scrap rubber.

Because of its bulk, transportation charges on rubber scrap are very high, making up the bulk of the expense of such shipments. For this reason, it is not believed removal of the duty on synthetic-rubber scrap will contribute to any excessive imports of this material.

NATIONAL CAPITAL HOUSING AUTHORITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, referred to the Committee on the District of Columbia:

To the Congress of the United States:

In accordance with the provisions of section 5 (a) of the District of Columbia Alley Dwelling Act, approved June 12, 1934, I transmit herewith for the information of the Congress the report of the National Capital Housing Authority for the fiscal year ended June 30, 1947.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 16, 1948.*

SECOND QUARTERLY REPORT ON AID TO GREECE AND TURKEY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 534)

The SPEAKER laid before the House the following message from the President of the United States, which was read and together with the accompanying papers, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

Pursuant to the provisions of Public Law 75 (80th Cong., 1st sess., 61 Stat. 103), I submit herewith the second quarterly report on aid to Greece and Turkey, covering the period from the inception of the program to December 31, 1947.

Since the last report submitted November 7, 1947, Greece has been subjected to ever-increasing pressure by the Communist minority, which, subservient to the foreign influences from which it draws support, would impose its will on the Greek people by force of arms. It is significant that the guerrilla warfare is directed not against the Greek Army but against the people of Greece. The deliberate and wanton destruction of Greek villages does not result from military engagements. It is determined and ruthless destruction intended to render people homeless and drive them from the soil; to force them into overcrowded urban centers where they become charges of an already overburdened state; and to create for them conditions of misery and hardship in the hope that this will make them susceptible to political agitation.

These bands which traffic in human misery and chaos are small, too small to claim any truly representative character. They total about 20,000, of which a large proportion are known to have been unwillingly impressed into the guerrilla ranks under threat of death to themselves and their families. There are members of the United States Congress who visited Greece during the past few months who know what horrible reprisals are taken against those unwilling to fight for the Communist guerrillas.

This policy is sapping the economic strength of Greece at the same time that the American Mission for Aid to Greece is seeking to build it up through reconstruction and economic assistance. This is, of course, the intent of the guerrillas, for a healthy Greece on the road to economic recovery would not be receptive to Communist ideology. Economic conditions in Greece have suffered from the continued military strife which has swelled the number of refugees in the north of Greece to over 420,000 and caused a greater share of the Greek national budget and of American-aid funds to be spent on nonproductive undertakings. Only the most strenuous and determined efforts of the Greek Government and people will suffice to cope successfully with the present situation.

The American mission is doing all in its power to assist, and its accomplishments have been considerable. Owing to the Communist obstruction it is increasingly clear, however, that economic recovery in Greece must await the establishment of internal security. Although economic programs most effective under the circumstances will continue to be actively prosecuted, the benefits from them can be fully realized only when the warfare against the guerillas has been successfully concluded.

To aid the Greek Government in the prosecution of the warfare against the guerrillas, the American mission at the close of the year transferred an additional $14,000,000 of aid funds from the economic to the military program, making a total allocation to the military of about $172,000,000. These additional funds will be used to support the formation of an additional 58 national-defense corps battalions, making a total of 100 as requested by the Greek Government; these battalions will take over the task of protecting the villages of the provinces from which they are recruited, thereby freeing the Greek National Army to conduct a more offensive warfare. If the guerrilla menace should increase as a result of greater outside assistance, a new situation would be created which would have to be dealt with in the light of circumstances prevailing at that time.

While recent developments are adverse, in that they have lengthened the time necessary for Greece's ultimate recovery, the situation is not without encouragement. Greece is still a free country. The recent announcement of a "government" by the Communist guerrillas, who do not effectively control territory in which to exercise any of the functions of government, appears to have been an act of desperation and not of strength. The transparent device of declaring the "free government" has not materially changed the existing situation, except to reveal more clearly to the Greeks and to the world the true character of Greece's enemy. The United States Government has already made known its view that recognition of this group by other governments would have serious implications and

would be clearly contrary to the principles of the United Nations Charter. The special United Nations Balkan Commission has passed a resolution that in its view any such recognition would constitute a threat to the peace.

I am pleased to be able to report that the Turkish-aid program is proceeding in an orderly manner. Careful planning and procurement are now resulting in deliveries which can be expected to flow at a fairly uniform rate.

Continued economic assistance to Greece will be provided under the European recovery program, if that program is authorized by the Congress. The European recovery program will not provide, however, for any additional military assistance required for Greece and Turkey, which will, at the appropriate time, be sought from the Congress under Public Law 75.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 16, 1948.*

THE CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the calendar.

UNITED STATES GEOLOGICAL SURVEY

The Clerk called the bill (H. R. 3106) to reenact and amend the Organic Act of the United States Geological Survey by incorporating therein substantive provisions confirming the exercise of long-continued duties and functions and by redefining their geographic scope.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. DEANE. Mr. Speaker, I object.

Mr. WELCH. Mr. Speaker, will the gentleman withhold his objection for a moment?

Mr. DEANE. Mr. Speaker, I withhold my objection to permit the gentleman to make a statement.

Mr. WELCH. Mr. Speaker, this bill was sent to me as chairman of the committee by the Department for introduction. It has been passed over several times in order that Members might have opportunity to learn more of the intent and purposes of the bill.

After a careful study of the proposal by the Committee on Public Lands both by a subcommittee and by the full committee it was reported unanimously.

The bill, if put into operation, will not cost the Government a penny; on the other hand, it will serve the purpose of giving valuable information to universities and institutions of learning which can be acquired through this bill if enacted into law.

I wish my friend the gentleman from North Carolina would explain the reason for his objection. The bill, as I said, has been passed over several times.

Mr. DEANE. I am glad to explain my objection to the gentleman from California. Let me point out that the well drillers feel that by far the most objectionable thing in the bill is that the Survey will be allowed to work for any nonprofit organization and that if this is allowed there will be very great possibility that it will take away from private enterprise a big portion of the work that is usually done by the men in the profession.

Furthermore, according to the information that I have secured, the Geological Survey would have the right possibly to a preferred position on the list of buyers of well-drilling equipment and machinery now owned by the War Assets Administration.

I confess that I am none too familiar with the legislation and I would be willing that it be passed over without objection, but in view of the information I have at hand it would seem to be desirable that further study be given the matter.

I now yield to the gentleman from Texas [Mr. KILDAY] if he has anything to add.

Mr. KILDAY. Mr. Speaker, I had proposed to ask that the bill go over without prejudice. I am interested in having an amendment to the bill adopted. During the past week there have been some informal conferences which may result in an agreement as to that portion of the bill in which I am interested. I had intended to ask that the bill go over without prejudice, but in view of the objection by the gentleman from North Carolina, I, of course, am not in position to make such a request.

The SPEAKER. Does the gentleman from North Carolina insist upon his objection?

Mr. DEANE. No, Mr. Speaker; I withdraw my objection and ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

RECOGNITION OF SERVICES OF CIVILIANS IN CONSTRUCTION OF PANAMA CANAL

The Clerk called the bill (H. R. 2273) to amend the act of May 29, 1944, providing for the recognition of the services of the civilian officials and employees, citizens of the United States, engaged in and about the construction of the Panama Canal.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, I ask that the bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PUBLIC AIRPORT, TERRITORY OF ALASKA

The Clerk called the bill (H. R. 3510) to authorize the construction, protection, operation, and maintenance of a public airport in the Territory of Alaska.

Mr. HUGH D. SCOTT, JR. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

AIRPORT AND PUBLIC HIGHWAY, FAIRBANKS, ALASKA

The Clerk called the bill (H. R. 3509) to authorize the construction of a class IV airport for the city of Fairbanks, Alaska, and a public highway or bridge from the city of Fairbanks to the location of the airport.

Mr. HUGH D. SCOTT, JR. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

TORNEY HOSPITAL PROPERTY, PALM SPRINGS, CALIF.

The Clerk called House Concurrent Resolution 57, regarding disposal of Torney Hospital property in Palm Springs, Riverside County, Calif.

Mr. KEAN, Mr. CUNNINGHAM, and Mr. ROCKWELL objected.

AMENDMENTS TO PUBLIC HEALTH SERVICE ACT

The Clerk called the bill (H. R. 3924) to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. HUGH D. SCOTT, JR. Mr. Speaker, I ask unanimous consent that the Senate bill S. 1454 be substituted for the House bill.

The SPEAKER. May the Chair inquire if the Senate bill is the House bill amended?

Mr. HUGH D. SCOTT, JR. The Senate bill is the same as the House bill with amendments. The Senate bill is substantially identical. There are certain amendments that are not in the House bill. They are, however, included in the Senate bill. It is desired that the Senate bill be substituted for the House bill.

The SPEAKER. Does the committee wish the Senate bill passed as is?

Mr. HUGH D. SCOTT, JR. Yes, the committee wishes the Senate bill passed as is.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That paragraph (j) of section 2 of the Public Health Service Act, as amended (42 U. S. C., ch. 6A), is amended by inserting immediately after the semicolon at the end thereof the words "isonipecaine and its derivatives, compounds, salts, and preparations; opiates (as defined in sec. 3228 (f) of the Internal Revenue Code);".

SEC. 2. Section 203 of such act is amended by striking out the last sentence thereof.

SEC. 3. Section 205 of such act is amended by redesignating subsection (c) as subsection (d) and inserting after subsection (b) the following new subsection:

"(c) The Surgeon General, with the approval of the Administrator, is authorized to create special temporary positions in the grade of Assistant Surgeons General when necessary for the proper staffing of the service; but the number of such special temporary positions, when added to the eight positions created by section 204 and subsections (a) and (b) of this section, shall not on any day exceed three-fourths of 1 percent of the highest number, during the 90 days preceding such day, of officers of the Regular Corps on active duty and officers of the Reserve Corps on active duty for more than 30 days.

The Surgeon General may assign officers of either the Regular Corps or the Reserve Corps to any such special temporary positions, and while so serving they shall each have the title of Assistant Surgeon General."

SEC. 4. (a) The first sentence of subsection (a) of section 206 of such act is amended to read: "The Surgeon General, during the period of his appointment as such, shall be of the same grade, with the same pay and allowances, as the Surgeon General of the Army; and the Deputy Surgeon General, while assigned as such, shall have the grade corresponding with the grade of major general, with the same pay and allowances. Assistant Surgeons General, while assigned as such, shall have the grade, with the pay and allowances thereof, corresponding with either the grade of brigadier general or the grade of major general, as may be determined by the Administrator after considering the importance of the duties to be performed: *Provided,* That the number of Assistant Surgeons General having a grade higher than that corresponding to the grade of brigadier general shall at no time exceed one-half of the number of positions created by subsection (b) of section 205 or pursuant to subsection (c) of such section."

(b) Such section is further amended by adding at the end thereof the following new subsections:

"(c) Any commissioned officer below the grade of director who is assigned to serve as chief of a division shall, for the duration of such assignment, have the grade of director and receive the pay and allowances applicable to such grade.

"(d) Within the total number of officers of the Regular Corps authorized by the appropriation act or acts for each fiscal year to be on active duty, the Administrator shall by regulation prescribe the maximum number of officers authorized to be in each of the grades from the junior assistant grade to the director grade, inclusive. Such numbers shall be determined after considering the anticipated needs of the service during the fiscal year, the funds available, the number of officers in each grade at the beginning of the fiscal year, and the anticipated appointments, the anticipated promotions based on years of service, and the anticipated retirements during the fiscal year. The number so determined for any grade for a fiscal year may not exceed the number limitation (if any) contained in the appropriation act or acts for such year. Such regulations for each fiscal year shall be prescribed as promptly as possible after the appropriation act fixing the authorized strength of the corps for that year, and shall be subject to amendment only if such authorized strength or such number limitation is thereafter changed. The maxima established by such regulations shall not require (apart from action pursuant to other provisions of this act) any officer to be separated from the service or reduced in grade."

SEC. 5. (a) Such act is further amended by striking out section 207 thereof and by redesignating sections 208 and 209 as sections 207 and 208, respectively.

(b) Paragraph (1) of subsection (a) of the section herein redesignated as section 207 is amended by striking "surgery" therefrom. Graduates of colleges of osteopathy whose graduates are eligible for licensure to practice medicine or osteopathy in a majority of the States of the United States, or approved by a body or bodies acceptable to the Administrator, shall be eligible, subject to the other provisions of this act, for appointment as commissioned medical officers in the Public Health Service. The second sentence of paragraph (2) of such subsection is amended to read: "Reserve commissions shall be for a period of not more than 5 years and may be terminated at any time, as the President may direct."

(c) Subsection (b) of such section is amended to read:

"(b) Not more than 10 percent of the original appointments to the Regular Corps authorized to be made during any fiscal year may be made to grades above that of senior assistant, but no such appointment may be made to a grade above that of director. For the purpose of this subsection the number of original appointments authorized to be made during a fiscal year shall be (1) the excess of the number of officers of the Regular Corps authorized by the appropriation act or acts for such year over the number of officers on active duty in the Regular Corps on the first day of such year, plus (2) the number of such officers of the Regular Corps who, during such fiscal year, have been or will be retired upon attainment of age 64 or have for any other reason ceased to be on active duty. In determining the number of appointments authorized by this subsection an appointment shall be deemed to be made in the fiscal year in which the nomination is transmitted by the President to the Senate. No person shall be appointed pursuant to this subsection unless he meets standards established in accordance with regulations of the President."

(d) Such section is further amended by redesignating subsections (c), (d), (e), and (f) thereof as subsections (e), (f), (g), and (h), respectively; by changing "subsection (c)" to "subsection (e)" and changing "subsection (d)" to "subsection (f)" in the subsection hereby designated as subsection (g); and by inserting after subsection (b) the following new subsections:

"(c) Commissions evidencing the appointment by the President of officers of the Regular or Reserve Corps shall be issued by the Administrator under the seal of the Federal Security Agency.

"(d) (1) For purposes of pay and pay period and for purposes of promotion, any person appointed under subsection (a) to the grade of senior assistant in the Regular Corps, and any person appointed under subsection (b), shall, except as provided in paragraphs (2) and (3) of this subsection, be considered as having had on the date of appointment the following length of service: 3 years if appointed to the senior assistant grade, 10 years if appointed to the full grade, 17 years if appointed to the senior grade, and 18 years if appointed to the director grade.

"(2) For purposes of pay and pay period, any person appointed under subsection (a) to the grade of senior assistant in the Regular Corps, and any person appointed under subsection (b), shall, in lieu of the credit provided in paragraph (1), be credited with the service for which he is entitled to credit under any other provision of law if such service exceeds that to which he would be entitled under such paragraph.

"(3) For purposes of promotion, any person originally appointed in the Regular Corps to the senior assistant grade or above who has had active service in the Reserve Corps shall be considered as having had on the date of appointment the length of service provided for in paragraph (1), plus whichever of the following is greater: (A) The excess of his total active service in the Reserve Corps (above the grade of junior assistant) over the length of service provided in such paragraph, to the extent that such excess is on account of service in the Reserve Corps in or above the grade to which he is appointed in the Regular Corps or (B) his active service in the same or any higher grade in the Reserve Corps after the first day on which, under regulations in effect on the date of his appointment to the Regular Corps, he would have had the training and experience necessary for such appointment.

"(4) For purposes of promotion, any person whose original appointment is to the assistant grade in the Regular Corps shall be considered as having had on the date of appointment service equal to his total active service in the Reserve Corps in and above the assistant grade."

(e) Beginning as of the date of enactment of this act, any officer of the Regular Corps of the Public Health Service on active duty on such date shall, in lieu of the service with which he was credited for the purposes of pay and pay period at the time of his appointment to such corps, receive credit, if it is greater, for 3 years if his appointment was to the senior assistant grade, 12 years if it was to the full grade, 20 years if it was to the senior grade, and 26 years if it was to the director grade.

(f) Any person appointed to any grade above the assistant grade in the Regular Corps of the Public Health Service after enactment of this act and prior to July 1, 1948, shall, for purposes of pay, and pay period, and (except in the case of an appointment to the director grade) for purposes of promotion, receive the credit provided under section 207 of the Public Health Service Act, as amended by this act, or shall receive credit, if it is greater, of 3 years if appointed to the senior assistant grade, 12 years if appointed to the full grade, 20 years if appointed to the senior grade, and 26 years if appointed to the director grade. In the case of an officer so appointed to the full or senior grade (1) he shall receive 2 years' seniority in grade if appointed to the full grade and 3 years if appointed to the senior grade, and (2) he shall be considered as having completed the 1 year of service in grade required for promotion to a restricted grade or to the director grade, as the case may be.

(g) Subsection (b) of the section herein redesignated as section 208 is amended to read:

"(b) Reserve officers, except when otherwise provided by law, shall receive the same pay and allowances when on active duty as commissioned officers of the Regular Corps, including allowances for travel and transportation of household goods and effects."

(h) Subsection (h) of the section herein redesignated as section 208 is amended by striking out "section 208 (d)" and inserting in lieu thereof "section 207 (f)".

(i) Such Act is further amended by inserting after the section herein redesignated as section 208 the following new section:

"PROFESSIONAL CATEGORIES

"SEC. 209. (a) For the purpose of establishing eligibility of officers of the Regular Corps for promotions, the Surgeon General shall by regulation divide the corps into professional categories. Each category shall, as far as practicable, be based upon one of the subjects of examination set forth in section 207 (a) (1) or upon a subdivision of such subject, and the categories shall be designed to group officers by fields of training in such manner that officers in any one grade in any one category will be available for similar duty in the discharge of the several functions of the Service.

"(b) Each officer of the Regular Corps on active duty shall, on the basis of his training and experience, be assigned by the Surgeon General to one of the categories established by regulations under subsection (a). Except upon amendment of such regulations, no assignment so made shall be changed unless the Surgeon General finds (1) that the original assignment was erroneous, or (2) that the officer is equally well qualified to serve in another category to which he has requested to be transferred, and that such transfer is in the interest of the Service.

"(c) Within the limits fixed by the Administrator in regulations under section 206 (d) for any fiscal year, the Surgeon General shall determine for each category in the Regular Corps, the maximum number of officers authorized to be in each of the grades from the assistant grade to the director grade, inclusive.

"(d) The excess of the number so fixed for any grade in any category over the number of officers of the Regular Corps on active duty in such grade in such category (including, in

the case of the director grade, officers holding such grade in accordance with section 206 (c)) shall for the purpose of promotions constitute vacancies in such grade in such category. For purposes of this subsection, an officer who has been temporarily promoted or who is temporarily holding the grade of director in accordance with section 206 (c) shall be deemed to hold the grade to which so promoted or which he is temporarily holding; but while he holds such promotion or grade, and while any officer is temporarily assigned to a position pursuant to section 205 (c), the number fixed under subsection (c) of this section for the grade of his permanent rank shall be reduced by one.

"(e) The absence of a vacancy in a grade in a category shall not prevent an appointment to such grade pursuant to section 207, a permanent length of service promotion, or the recall of a retired officer to active duty; but the making of such an appointment, promotion, or recall shall be deemed to fill a vacancy if one exists.

"(f) Whenever a vacancy exists in any grade in a category the Sugeon General may increase by one the number fixed by him under subsection (c) for the next lower grade in the same category, without regard to the numbers fixed in regulations under section 206 (d); and in that event the vacancy in the higher grade shall not be filled except by a permanent promotion, and upon the making of such promotion the number for the next lower grade shall be reduced by one."

SEC. 6. (a) Section 210 of such act is amended to read:

"SEC. 210. (a) Promotions of officers of the Regular Corps to any grade up to and including the director grade shall be either permanent promotions based on length of service, other permanent promotions to fill vacancies, or temporary promotions. Permanent promotions shall be made by the President, by and with the advice and consent of the Senate, and temporary promotions shall be made by the President. Each permanent promotion shall be to the next higher grade, and shall be made only after examination given in accordance with regulations of the President.

"(b) The President may by regulation provide that in a specified professional category permanent promotions to the senior grade, or to both the full grade and the senior grade, shall be made only if there are vacancies in such grade. A grade in any category with respect to which such regulations have been issued is referred to in this section as a 'restricted grade'.

"(c) Examinations to determine qualification for permanent promotions may be either noncompetitive or competitive, as the Surgeon General shall in each case determine; except that examinations for promotions to the assistant or senior assistant grade shall in all cases be noncompetitive. The officers to be examined shall be selected by the Surgeon General from the professional category, and in the order of seniority in the grade, from which promotion is to be recommended. In the case of a competitive examination the Surgeon General shall determine in advance of the examination the number (which may be one or more) of officers who, after passing the examination, will be recommended to the President for promotion; but if the examination is one for promotions based on length of service, or is one for promotions to fill vacancies other than vacancies in the director grade or in a restricted grade, such number shall not be less than 80 percent of the number of officers to be examined.

"(d) Officers of the Regular Corps, found pursuant to subsection (c) to be qualified, shall be given permanent promotions based on length of service, as follows:

"(1) Officers in the junior assistant grade shall be promoted at such times as may be prescribed in regulations of the President.

"(2) Officers with permanent rank in the assistant grade, the senior assistant grade, and the full grade shall (except as provided in regulations under subsection (b)) be promoted after completion of 3, 10, and 17 years, respectively, of service in grades above the junior assistant grade; and such promotions, when made, shall be effective, for purposes of pay and pay period and for purposes of seniority in grade, as of the day following the completion of such years of service. An officer with permanent rank in the assistant, senior assistant, or full grade who has not completed such years of service shall be promoted at the same time, and his promotion shall be effective as of the same day, as any officer junior to him in the same grade in the same professional category who is promoted under this paragraph.

"(e) Officers in a professional category of the Regular Corps, found pursuant to subsection (c) to be qualified, may be given permanent promotions to fill any or all vacancies in such category in the senior assistant grade, the full grade, the senior grade, or the director grade; but no officer who has not had 1 year of service with permanent or temporary rank in the next lower grade shall be promoted to any restricted grade or to the director grade.

"(f) If an officer who has completed the years of service required for promotion to a grade under paragraph (2) of subsection (d) fails to receive such promotion, he shall (unless he has already been twice examined for promotion to such grade) be once reexamined for promotion to such grade. If he is thereupon promoted (otherwise than under subsection (e)), the effective date of such promotion shall be 1 year later than it would have been but for such failure. Upon the effective date of any permanent promotion of such officer to such grade, he shall be considered as having had only the length of service required for such promotion which he previously failed to receive.

"(g) If, for reasons other than physical disability incurred in line of duty, an officer of the Regular Corps in the junior assistant grade is found pursuant to subsection (c) not to be qualified for promotion he shall be separated from the service. If for reasons other than physical disability incurred in line of duty, an officer of the Regular Corps in the assistant, senior assistant, or full grade, after having been twice examined for promotion (other than promotion to a restricted grade), fails to be promoted—

"(1) if in the assistant grade he shall be separated from the service and paid 6 months' pay and allowances;

"(2) if in the senior assistant grade he shall be separated from the service and paid 1 year's pay and allowances;

"(3) if in the full grade he shall be considered as not in line for promotion and shall, at such time thereafter as the Surgeon General may determine, be retired from the service with retired pay (unless he is entitled to a greater amount by reason of another provision of law) at the rate of 2½ percent of his active-duty pay at the time of retirement for each complete year, not in excess of thirty, of his active commissioned service in the service.

"(h) If an officer of the Regular Corps, eligible to take an examination for promotion, refuses to take such examination, he may be separated from the service in accordance with regulations of the President.

"(i) At the end of the first 3 years of service the record of each officer of the Regular Corps, originally appointed to the senior assistant grade or above, shall be reviewed in accordance with regulations of the President, and, if found not qualified for further service, he shall be separated from the service and paid 6 months' pay and allowances.

"(j) (1) The order of seniority of officers in a grade in the Regular Corps shall be determined, subject to the provisions of paragraph (2), by the relative length of time spent in active service after the effective date of each such officer's original appointment or permanent promotion to that grade. When permanent promotions of two or more officers to the same grade are effective on the same day, their relative seniority shall be the same as it was in the grade from which promoted. In all other cases of original appointments or permanent promotions (or both) to the same grade effective on the same day, relative seniority shall be determined in accordance with regulations of the President.

"(2) In the case of an officer originally appointed in the Regular Corps to the grade of assistant or above, his seniority in the grade to which appointed shall be determined after inclusion, as service in such grade, of any active service in such grade or in any higher grade in the Reserve Corps, but (if the appointment is to the grade of senior assistant or above) only to the extent of whichever of the following is greater: (A) His active service in such grade or any higher grade in the Reserve Corps after the first day on which, under regulations in effect on the date of his appointment to the Regular Corps, he had the training and experience necessary for such appointment, or (B) the excess of his total active service in the Reserve Corps (above the grade of junior assistant) over 3 years if his appointment in the Regular Corps is to the senior assistant grade, over 10 years if the appointment is to the full grade, or over 17 years if the appointment is to the senior grade.

"(k) Any commissioned officer of the Regular Corps in any grade in any professional category may be recommended to the President for temporary promotion to fill a vacancy in any higher grade in such category, up to and including the director grade. In time of war, or of national emergency proclaimed by the President, any commissioned officer of the Regular Corps in any grade in any professional category may be recommended to the President for promotion to any higher grade in such category, up to and including the director grade, whether or not a vacancy exists in such grade. The selection of officers to be recommended for temporary promotions shall be made in accordance with regulations of the President. Promotion of an officer recommended pursuant to this subsection may be made without regard to length of service, without examination, and without vacating his permanent appointment, and shall carry with it the pay and allowances of the grade to which promoted. Such promotions may be terminated at any time, as may be directed by the President.

"(l) Whenever the number of officers of the Regular Corps on active duty, plus the number of officers of the Reserve Corps who have been on active duty for 30 days or more, exceeds the authorized strength of the Regular Corps, the Administrator shall determine the requirements of the Service in each grade in each category, based upon the total number of officers so serving on active duty and the tasks being performed by the Service; and the Surgeon General shall thereupon assign each officer of the Reserve Corps on active duty to a professional category. If the Administrator finds that the number of officers fixed under section 209 (c) for any grade and category (or the number of officers, including officers of the Reserve Corps, on active duty in such grade in such category, if such number is greater than the number fixed under section 209 (c)) is insufficient to meet such requirements of the Service, officers of either the Regular Corps or the Reserve Corps may be recommended for temporary promotion to such grade in such category. Any such promotion may be terminated at any time, as may be directed by the President.

"(m) Any officer of the Regular Corps, or any officer of the Reserve Corps on active duty, who is promoted to a higher grade shall, unless he expressly declines such promotion, be deemed for all purposes to have accepted such promotion; and shall not be required to renew his oath of office, or to execute a new affidavit as required by the act of December 11, 1926, as amended (5 U. S. C. 21a)."

(b) Except as provided in subsection (d) of this section, no promotion shall be made under section 210 of the Public Health Service Act, as amended by this act, prior to July 1, 1948. Until that date officers of the Regular Corps may receive temporary promotions to higher grades with the pay and allowances thereof pursuant to section 210 (a) (1) of the Public Health Service Act, in force prior to the enactment of this act, notwithstanding the termination, prior to such date, of the war and of the national emergencies proclaimed by the President. Any officer holding, on June 30, 1948, an appointment pursuant to such section to a higher temporary grade shall continue in such grade until such appointment is terminated, as the President may direct.

(c) Effective as of the date of the enactment of this act, each officer of the Regular Corps on such date, in addition to the credit he has under preexisting legislation for purposes of promotion, shall be credited with 3 years of service.

(d) (1) Officers of the Regular Corps who have, or who on or before July 1, 1948, will have, the years of service prescribed in paragraph (2) of section 210 (d) of the Public Health Service Act, as amended by this act, for promotion to the senior assistant, full, or senior grade, shall be recommended to the President for such promotion, to be effective as of July 1, 1948, whether or not vacancies exist in such grade. Such promotions shall be made without examination, except that no promotions shall be made to the senior grade or any grade immediately below a restricted grade until the officer is found qualified for promotion pursuant to subsection (c) of section 210 of the Public Health Service Act, as amended by this act. No promotion shall be made pursuant to this paragraph to any grade in any professional category if such grade has been made a restricted grade pursuant to subsection (b) of section 210 of the Public Health Service Act, as amended by this act. For purposes of seniority an officer promoted under this paragraph shall be credited with the years of service in the grade to which promoted equal to the excess of his years of service on the date of promotion over the years of service required for promotion to such grade under paragraph (2) of section 210 (d) of the Public Health Service Act, as amended by this act.

(2) Officers in the junior assistant grade in the Regular Corps who have, or who on or before July 1, 1948, will have four or more years of service in the junior assistant grade, shall be recommended to the President for promotion to the assistant grade, to be effective as of July 1, 1948, without examination and whether or not vacancies exist in such grade. For purposes of promotion and seniority in grade, an officer promoted under this paragraph shall be credited with the years of service equal to the excess of his years of service on the date of promotion over 4 years.

(e) For purposes of seniority any officer of the Regular Corps of the Public Health Service on the date of enactment of this act shall be considered as having had service in the grade which he holds on such date equal to the excess of the service credited to him for promotion purposes over the length of service required under section 210 (d) (2), as amended by this act, for promotion to such grade.

(f) Except as provided in subsection (d) of this section, the provisions of this section shall not, prior to July 1, 1948, affect the term or tenure of office (including any office held under temporary promotion) of any commissioned officer of the Service in office upon the date of the enactment of this act.

SEC. 7. (a) The first sentence of subsection (b) of section 211 of such act is amended to read: "A commissioned officer shall be retired on the 1st day of the month following the month in which he attains the age of 64 years; and a commissioned officer may be retired by the Administrator, and shall be retired if he applies for retirement, on the 1st day of any month after completion of 30 years of active commissioned service in the Service."

(b) Paragraph (2) of subsection (c) of such section is amended to read:

"(2) The retired pay to which an officer, who has served 4 years or more as Surgeon General, Deputy Surgeon General, or Assistant Surgeon General, is entitled shall be based on the pay of the highest grade held by him as such Surgeon General, Deputy Surgeon General, or Assistant Surgeon General."

(c) Subsection (d) of such section is amended by changing the words "for age" to "under the provisions of subsection (b)."

(d) Section 211 of such act is further amended by adding at the end thereof the following new subsections:

"(g) An officer of the Regular Corps in the senior assistant grade in a category in which the full grade is a restricted grade, who has had 20 years of active commissioned or noncommissioned service in the Service (including any active Federal service in the armed forces) or has attained the age of 50, or an officer of the Regular Corps in the full grade in a category in which the senior grade is a restricted grade, who has had 25 years of such service or has attained the age of 55, may be retired in accordance with regulations of the Administrator if he has not been found pursuant to section 210 (c) to be qualified for promotion to the full grade or the senior grade, as the case may be. The retired pay of any such officer shall be at the rate of 2½ percent of his active-duty pay at the time of retirement for each complete year, not in excess of 30, of such service.

"(h) Retired pay pursuant to this section shall be terminated if the officer receiving such pay is recalled to active duty or, in the case of an officer of the Reserve Corps, if he is found to have recovered from his disability. Such pay shall be suspended for any period during which an officer fails without good cause to comply with a request by the Surgeon General that he submit to a medical examination, and shall be terminated if such failure continues for 6 months."

SEC. 8. Title II of such act is further amended by adding at the end thereof the following new section:

"TRAINING OF OFFICERS

"SEC. 218. (a) Appropriations available for the pay and allowances of commissioned officers of the Service shall also be available for the pay and allowances of any such officer on active duty in the Regular Corps while attending any educational institution and, subject to regulations of the President and to the limitation prescribed in such appropriations, for payment of his tuition, fees, and other necessary expenses incident to such attendance.

"(b) Any officer whose tuition and fees while attending an educational institution are paid pursuant to subsection (a) shall be obligated to reimburse the Service for such tuition and fees if he voluntarily leaves the Service within 2 years after the cessation of such attendance."

SEC. 9. (a) Sec. 706 of the act of July 1, 1944 (58 Stat. 682, 713), as amended, is amended to read:

"SEC. 706. In the case of any commissioned officer of the Service appointed prior to July 1, 1944, there shall be included, in determining the amount of retired pay pursuant to subsection (c) (1) of section 211, and in determining whether he should or may be retired pursuant to subsection (b) of such section, noncommissioned service in the Public Health Service, as well as all commissioned service."

(b) Title VII of such act is amended by changing sections 711 and 712, and references thereto, to sections 713 and 714, respectively, and by inserting immediately after section 710 the following new sections:

"APPOINTMENTS TO HIGHER GRADES FOR MENTAL HEALTH AND HOSPITAL CONSTRUCTION ACTIVITIES

"SEC. 711. Twenty officers may be appointed to grades in the Regular Corps of the Service above that of senior assistant, but not to a grade above that of director, to assist in carrying out the purposes of this act with respect to mental health, and 20 officers may be appointed to such grades in the Regular Corps to assist in carrying out title VI of this act. Officers appointed pursuant to this section in any fiscal year shall not be counted as part of the 10 percent of the original appointments authorized to be made in such year under section 207 (b); but they shall for all other purposes be treated as though appointed pursuant to such section 207 (b). The 20 officers authorized by this section to be appointed to carry out the purposes of this act with respect to mental health, and the 20 officers so authorized to be appointed to carry out title VI, shall be reduced by the number of officers appointed under clause (A) and the number appointed under clause (B), respectively, of section 208 (b) (2) of this act, in effect prior to the enactment of this section.

"CERTAIN RETIREMENTS FOR DISABILITY

"SEC. 712. Any officer of the Reserve Corps of the Public Health Service who was separated from the Service or returned to inactive status by reason of a disability incurred in line of duty after December 6, 1941, and prior to July 1, 1944, and who would have been eligible for retirement by reason of such disability if section 211 of the Public Health Service Act had been in effect on and after December 7, 1941, shall be considered as though he had been retired at the time of such separation or return to inactive service. Any such officer, and any other officer of the Reserve Corps retired for a disability which was incurred in line of duty after December 6, 1941, and prior to July 1, 1944, shall be entitled, for periods both before and after the date of the enactment of this section, to the same retired pay to which he would have been entitled if such section 211, as amended simultaneously with the enactment of this section, had been in effect on and after December 7, 1941."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SERVICEMEN'S READJUSTMENT ACT OF 1944

The Clerk called the bill (H. R. 4309) to amend title III of the Servicemen's Readjustment Act of 1944—GI bill of rights—pertaining to "loans for the purchase or construction of homes, farms, and business property," so as to provide more adequate and effective farm-loan benefits.

Mr. DEANE, Mr. PACE, and Mr. KEAN objected.

AUTHORITY TO SEND MILITARY AND NAVAL MISSIONS TO FOREIGN GOVERNMENTS

The Clerk called the bill (H. R. 2313) to amend the act of May 19, 1926 (44

Stat. 565), as amended by the acts of May 14, 1935 (49 Stat. 218), and of October 1, 1942 (56 Stat. 763), providing for the detail of United States military and naval missions to foreign governments.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CARROLL. Mr. Speaker, reserving the right to object, I should like to ask the chairman of the Committee on Armed Services, the gentleman from New York [Mr. ANDREWS], some questions concerning this legislation. When it came up some weeks ago, I asked that it go over without prejudice, as the gentleman knows. I should like to know whether there is any limitation upon the power of the President during this period restricting his sending military and naval missions to any friendly country upon request?

Mr. ANDREWS of New York. Mr. Speaker, I may say to the gentleman that since that question was originally raised the Armed Services Committee has agreed upon an amendment which I am prepared to offer today limiting it entirely to military missions in an investigatory way—that there can be no combat troops or anything in that category assigned. This applies only to missions we now have in Iran, in Greece, in Trieste, and places of that description which are not provided by law. I have the exact figures here. The complements are very small, in most cases 3, 4, or 5 officers and possibly 10 to 15 enlisted men.

Mr. CARROLL. For my own information, and I think for the information of the membership here, I should like to know this. As I read the present law and the comments coming from the various departments of the military, as I understand the law, the President now has full power to send military and naval missions to any friendly country upon their request, if it is to our own national interest.

Mr. ANDREWS of New York. He has that power under the statute in the Western Hemisphere, but not in the places in Europe to which I referred, except under the War Powers Act.

Mr. CARROLL. Well, that is my point. Until such time, then, as we sign a treaty of peace with Germany and Japan, he has full power.

Mr. ANDREWS of New York. He has full power to do it at the present time, but General Marshall is very anxious to have this matter cleared up on the books, looking toward the future.

Mr. CARROLL. I think for the purpose of clarification that we ought to understand that this is an extension of the 1926 act, extending in peacetimes the right of the President to send military and naval missions all over the world to friendly countries upon their request; is that right?

Mr. ANDREWS of New York. That is correct. I might say that this bill was brought up on the Consent Calendar with an understanding on the part of the Speaker of the House, and the majority and the minority leaders.

Mr. CARROLL. Do you put in your amendment a numerical limitation upon the military and naval missions?

Mr. ANDREWS of New York. There is no numerical limitation as such, but in the missions sent to Greece it was stated at the time how many there were in number. The amendment which will be offered, if the bill is permitted to come up, is this, that after the words "foreign governments" there be inserted the words, "*Provided*, That no combat forces, namely, forces organized and equipped for combat, will be detailed to any foreign government under the provisions of this act."

Mr. CARROLL. With that, I withdraw objection.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FOLGER. Notwithstanding this explanation, I am constrained to object, Mr. Speaker.

The SPEAKER. Three objections are required.

There being no fur her objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the act of May 19, 1926 (44 Stat. 565), as amended by the acts of May 14, 1935 (49 Stat. 218), and of October 1, 1942 (56 Stat. 763), is hereby amended to read as follows:

"DETAIL OF OFFICERS AND MEN OF THE UNITED STATES ARMY, NAVY, AND MARINE CORPS TO ASSIST FOREIGN GOVERNMENTS

"The President of the United States is authorized, upon application from foreign governments, and whenever in his discretion the public interest renders such a course advisable, to detail officers and enlisted men of the United States Army, Navy, and Marine Corps to assist such foreign governments: *Provided*, That the officers and enlisted men so detailed are authorized to accept from the government to which detailed offices and such compensation and emoluments thereunto appertaining as may be first approved by the Secretary of War, or by the Secretary of the Navy, as the case may be: *Provided further*, That such compensation may be accepted by the United States Government for remittance to the individual if in the opinion of the Secretary of war, or of the Secretary of the Navy, as the case may be, such a course appears desirable: *Provided further*, That while so detailed such officers and enlisted men shall receive, in addition to the compensation and emoluments allowed them by such governments, the pay and allowances whereto entitled in the United States Army, Navy, and Marine Corps, and shall be allowed the same credit for longevity, retirement, and for all other purposes that they would receive if they were serving with the forces of the United States: *And provided further*, That in addition to or in the absence of such compensation from such governments, the officers and enlisted men so detailed shall receive such additional compensation as may be determined by the Secretary of War, or the Secretary of the Navy, as the case may be, and approved by the President."

Mr. ANDREWS of New York. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDREWS of New York: On page 2, line 8, after the words "foreign governments", insert the words "*Provided*, That no combat forces, namely, forces organized and equipped for combat, will be detailed to any foreign government under the provisions of this act."

The amendment was agreed to.

Mr. ANDREWS of New York. Mr. Speaker, I move the further amendments made necessary by the Unification Act:

The Clerk read as follows:

Amendments offered by Mr. ANDREWS of New York:

Page 1, line 4 of title, after the word "naval", insert the words "and Air Force."

On page 2, line 2, after the word "Navy", insert the words "Air Force."

On page 2, line 8, after the word "Navy", insert the words "Air Force."

On page 2, line 9, after the word "*Provided*", strike out comma and insert the word *further*."

On page 2, lines 12 and 13, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Army."

On page 2, line 13, after the word "War", strike out the word "or"; and after the words "Secretary of the Navy", insert the words "or by the Secretary of the Air Force."

On page 2, line 16, strike out the words "Secretary of War" and insert in lieu thereof "Secretary of the Army"; and after the word "War", strike out the word "or."

On page 2, line 17, after the words "Secretary of the Navy", insert the words "or of the Secretary of the Air Force."

On page 2, line 22, after the word "Navy", insert the words "Air Force."

On page 3, line 4, strike out the words "Secretary of War" and insert in lieu thereof the words "Secretary of the Army"; and after the word "War", strike out the word "or."

On page 3, line 5, after the words "the Navy", insert the words "or the Secretary of the Air Force."

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXPANDED ROTC PROGRAM

The Clerk called the bill (H. R. 4143) to provide for the effective operation and expansion of the Reserve Officers' Training Corps, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, at the request of the author of the bill I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

REGIONAL AGRICULTURAL CREDIT CORPORATION

The Clerk called the joint resolution (H. J. Res. 275) to authorize the Regional Agricultural Credit Corporation, of Washington, D. C., to make loans to fur farmers, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the joint resolution?

Mr. PLOESER. Reserving the right to object, Mr. Speaker, a rule has been filed on this bill. There is one section of the bill that needs considerable clarification. Therefore, I object.

The SPEAKER. Three objections are required.

Mr. KEAN. I object, Mr. Speaker.

Mr. HUGH D. SCOTT, JR. I object, Mr. Speaker.

FUEL SUPPLIES

The Clerk called the resolution (H. Res. 385) requesting the Secretary of the Interior to furnish the House of Representatives full information in his possession concerning the amount of fuel oil, gasoline, petroleum products, and coal now available in the United States and what steps the Government should

take to make the proper and necessary supply available.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. KEAN. Reserving the right to object, Mr. Speaker, I objected to the adoption of this resolution when it came up 2 weeks ago, because the Acting Secretary of the Interior, Mr. Chapman, stated they had already given committees of Congress all the information in their hands, and that repetition would merely take the time of the bureaucrats and thus cost money. Will the author of the resolution tell us why the statement made by the Secretary of the Interior is incorrect?

Mrs. ROGERS of Massachusetts. I will be glad to tell the gentleman why. In the first place, this resolution was reported unanimously by the Committee on Public Lands. It was felt by the members of the committee that they did not have all the information from the Interior Department regarding two very vital commodities—coal and oil. The health of the Nation has been very much affected thus far because there has been a shortage of oil, and there is fear that there will be a shortage of coal. I think no committee has had the full information regarding the amount of oil and coal the United States has today. I find that there is no subject more interesting to the people of the United States today than the future of oil and coal for heating and for industrial and farm purposes.

Mr. KEAN. We all acknowledge that, but the question arises, do they already have this information? The gentlewoman feels that they do not have it and that there is information she wants. Consequently, Mr. Speaker, I will not object.

Mrs. ROGERS of Massachusetts. That is my belief, and it is the belief of the committee.

The SPEAKER. Is there objection to the present consideration of the resolution?

There being no objection, the Clerk read the resolution, as follows:

Resolved, That the Secretary of the Interior be requested to furnish the House of Representatives full information in his possession concerning the amount of fuel oil, gasoline, petroleum products, and coal now available in the United States and what steps the Government should take to make the proper and necessary supply available.

The resolution was agreed to.

A motion to reconsider was laid on the table.

L'ANSE BAND OF CHIPPEWA INDIANS, MICHIGAN

The Clerk called the bill (S. 522) to authorize the sale of certain lands of the L'Anse Band of Chippewa Indians, Michigan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized, in his discretion, to sell for the sum of $2,015 and convey to the village of L'Anse, Mich., certain tribal land and allotted Indian lands described as the southeast quarter of section 32, township 51 north, range 32 west, the north half northwest quarter of section 1, the south half northeast quarter of section 2, township 50 north, range 33 west, Michigan meridian, Michigan, containing one hundred and seventy-seven and twenty-nine one-hundredths acres, more or less. The sale of the tribal land shall be made only with the consent of the tribal council. The proceeds of the sale of the tribal lands, $640, shall be delivered to the bonded disbursing officer of the Great Lakes Indian Agency, Ashland, Wis., to be credited to the tribal funds of the Keweenaw Bay Indian Community. The proceeds of the sale of the allotted lands, $1,375, are to be placed to the credit of the various heirs in their respective individual Indian accounts by the disbursing officer of the Great Lakes Indian Agency. Such funds, received from the sale of these lands, may be reinvested in other lands in accordance with and subject to the provisions of the act of June 18, 1934 (48 Stat. 984), as amended.

With the following committee amendment:

Page 1, line 6, after "of", insert "the southeast quarter of."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

INDIANS OF THE FORT BERTHOLD INDIAN RESERVATION IN NORTH DAKOTA

The Clerk called the bill (S. 1133) providing for the per capita payment of certain claims of the Indians of the Fort Berthold Indian Reservation in North Dakota.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Reserving the right to object, Mr. Speaker, the report states that an amendment is to be offered striking out "$150" and inserting "$300,000 to be distributed." The bill I have does not contain that amendment. Does the chairman of the committee expect to offer the amendment?

Mr. D'EWART. The Senate bill contains the amendment, and that was the bill reported out by the Committee on Public Lands.

Mr. KEAN. Then along comes the Committee on Public Lands and says it is going to insert an amendment of $300,000, but it is not in the bill.

Mr. D'EWART. It is already in the Senate draft of the bill.

Mr. KEAN. It is not in the bill that I have before me, which is S. 1133.

Mr. D'EWART. It is in the Senate bill on line 7. It says $300,000 to be distributed per capita.

Mr. KEAN. It is not in the Senate bill 1133, which I have in my hand. There is nothing about $300,000 there at all.

Mr. D'EWART. You must have the bill as it was before it was amended.

Mr. KEAN. I see.

Then, Mr. Speaker, with that understanding, that the bill which will be passed is the one that is amended and not the one that I have in my hands I have no objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That within 60 days from the date of enactment of this act the Secretary of the Interior shall withdraw from the Treasury, and pay to the enrolled members of the Indians of the Fort Berthold Indian Reservation in North Dakota, $150 per capita, out of the balance of the principal and interest of the amount appropriated in settlement of certain claims of such Indians pursuant to the last paragraph preceding the heading "Miscellaneous Indian Tribal Funds," in the first section of the Interior Department Appropriation Act, 1947, remaining after the fees and expenses authorized by such paragraph to be paid from such appropriation shall have been paid or provided for. The money paid to such members under this act shall not be subject to any lien or claim of any nature against any of such members.

With the following committee amendment:

On page 1, line 7, strike out the figure and insert "$300,000 to be distributed."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ALBUQUERQUE INDIAN SCHOOL, NEW MEXICO

The Clerk called the bill (S. 1485) to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, New Mexico.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized in his discretion and subject to such terms and conditions as he may prescribe, to sell or exchange all or any part of those certain areas heretofore acquired for the Albuquerque Indian School, New Mexico, situated within tracts numbered 97a, 97b, and 98 as shown on the Middle Rio Grande Conservancy District map, comprising approximately thirty and seventy-five one-hundredths acres. In effecting any sale or exchange hereunder the Secretary of the Interior is authorized to execute such deeds or other instruments as may be necessary to transfer the title to any land so sold or exchanged. Any exchanges of land effected pursuant to this act shall be on an equal value basis.

SEC. 2. That the proceeds derived from any sale made under authority of this act shall be deposited in the Treasury of the United States as school revenues, pursuant to the act of May 27, 1926 (44 Stat. 560), and shall be available in the discretion of the Secretary of the Interior for the purchase of other lands and improvements or interests therein for the use of said Albuquerque Indian School.

The bill was ordered to be read a third time, was read a third time, and passed, and a motion to reconsider laid on the table.

POLSON, MONT.

The Clerk called the bill (S. 1507) authorizing the sale of undisposed of lots in Michel addition to the town of Polson, Mont.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to sell, under existing rules and regulations, the undisposed of lots in blocks 3, 4, and 5, in the Michel addition to the city of Polson, Mont., said lots being embraced in the trust allotment of Angeline Michel, deceased, Flathead allottee No. 1914.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COLONIAL NATIONAL HISTORICAL PARK, VA.

The Clerk called the bill (H. R. 2159) to authorize the Secretary of the Interior to prepare plans and estimates for a sewage-disposal system to serve the Yorktown area of the Colonial National Historical Park, Va., and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior, through the National Park Service, is hereby authorized and directed to make a study of sewage conditions in the Yorktown area of the Colonial National Historical Park, Va., and to prepare construction plans and estimates for an adequate sewage-disposal system for said area, including disposal of sewage from privately owned property in the locality of and within the said park. Such construction plans and estimates shall include an equitable basis for payment by private owners, who may use the sewage-disposal system, of a fair and reasonable proportionate share of the cost of construction of the said system and of the annual costs incidental to its maintenance and operation.

SEC. 2. The Secretary of the Interior shall transmit to the Congress a full and comprehensive report on this matter within 1 year from the date of appropriation of funds to carry out the provisions of this act.

SEC. 3. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $15,000 to carry out the provisions of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DIVISION OF WATERS OF THE SNAKE RIVER

The Clerk called the bill (H. R. 3603) granting the consent of Congress to the States of Idaho and Wyoming to negotiate and enter into a compact for the division of the waters of the Snake River and its tributaries originating in either of the two States and flowing into the other.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That consent of Congress is hereby given to the States of Idaho and Wyoming to negotiate and enter into a compact providing for an equitable division and apportionment among the said States of the waters of the Snake River and all of its tributaries originating in either of the two States and flowing into the other, upon condition that one suitable person, who shall be appointed by the President of the United States, shall participate in said negotiations as the representative of the United States and shall make report to Congress of the proceedings and of any compact entered into: *Provided*, That any such compact shall not be binding or obligatory upon any of the parties thereto unless and until the same shall have been ratified by the legislature of each of said States and approved by the Congress of the United States.

SEC. 2. There is hereby authorized to be appropriated a sufficient sum to pay the salary and expenses of the representative of the United States appointed hereunder: *Provided*, That such representative, if otherwise employed by the United States, while so employed shall not receive additional salary in the appointment hereunder.

With the following committee amendment:

Page 2, line 8, strike out the period and insert in lieu thereof a colon, and add "*Provided further*, That nothing in this act shall apply to any waters within the Yellowstone National Park or Grand Teton National Park or shall establish any right or interest in or to any lands within the boundaries thereof or in subsequent additions thereto."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PATENTS FOR PUBLIC LANDS

The Clerk called the bill (H. R. 3628) to revise the method of issuing patents for public lands.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, reserving the right to object, the report on this bill and several others on the calendar today do not conform with the Ramseyer rule. Today I will ask to have the bill passed over without prejudice in order to give an opportunity to the clerk of the committee to file a supplementary report. But if the report is not filed by the time the Consent Calendar is next called, I will make a point of order against the bill which will result in the bill being returned to the committee.

Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

UNITED STATES PARK POLICE

The Clerk called the bill (H. R. 3936) to authorize the United States Park Police to make arrests within Federal reservations in the environs of the District of Columbia, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That on and within roads, parks, parkways, and other Federal reservations in the environs of the District of Columbia over which the United States has, or shall hereafter acquire, exclusive or concurrent criminal jurisdiction, the several members of the United States Park Police force shall have the power and authority to make arrests without warrant for any felony or misdemeanor committed in the presence or view of such members in violation of any Federal law or regulation issued pursuant to law, or for any felony that in fact has been or is being committed in violation of any such law or regulation where they have reasonable grounds to believe that the person to be arrested has committed or is committing such felony, and shall have power to take any person arrested by them, without unnecessary delay, before the Federal court having jurisdiction over the offense or before a United States commissioner specifically designated to try and sentence persons charged with petty offenses as provided in the act of October 9, 1940 (54 Stat. 1058), or before any other officer having authority to hold or commit for the offense. Such police officers shall also have power upon such roads and within such parks, parkways, and other reservations to execute any warrant or other process issued by a court or officer of competent jurisdiction for the enforcement of the provisions of any Federal law or regulation issued pursuant to law: *Provided*, That the power and authority herein granted shall not extend to military personnel for offenses committed on military reservations.

SEC. 2. The Secretary of the Interior, with the approval or concurrence of the head of the agency having jurisdiction or control of any road, park, parkway, or other Federal reservation, or his duly authorized representative, is hereby authorized to make all needful rules and regulations for the regulation of traffic, for the protection of persons, property, health, and morals, to prevent breaches of the peace, to suppress affrays and unlawful assemblies, and to aid in the enforcement of any of the rules and regulations so promulgated. To any rule or regulation there may be attached a reasonable penalty for the violation thereof not exceeding, however, a fine of not more than $500, imprisonment for not exceeding 6 months, or both.

SEC. 3. For the purposes of this act, the environs of the District of Columbia are hereby defined as embracing Arlington and Fairfax Counties and the city of Alexandria in Virginia, and Prince Georges, Anne Arundel, and Montgomery Counties in Maryland.

With the following committee amendment:

Page 2, line 19, strike out the period and insert in lieu thereof a colon, and add the following language: "*Provided further*, That the power and authority herein granted shall not limit or restrict the investigative jurisdiction of the Federal Bureau of Investigation."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DE SOTO NATIONAL MEMORIAL, FLA.

The Clerk called the bill (H. R. 4023) to authorize the establishment of the De Soto National Memorial in the State of Florida, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, reserving the right to object, will the author of the bill tell me how much the cost is going to be from the point of view of upkeep.

Mr. PETERSON. Mr. Speaker, the upkeep is going to be reasonable and nominal. They say they are going to have one caretaker who will probably for a while be a part-time caretaker. Admissions will be charged, and it was testified to in the hearings that in a short time the admissions will take care of this expense. It is the intention that the local people are working on plans to give the land to build the road up there. They have already acquired one of the best collections of Indian artifacts which will be kept there. There will be a caretaker who will very probably be a part time caretaker for a while. Admissions will undoubtedly grow.

Of course as the admissions grow he may become a full-time caretaker, but they anticipate that in a short time it will be more than self-sustaining. We have definitely established that in the hearings.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purpose of establishing an appropriate memorial to Hernando de Soto, the Secretary of the Interior is authorized, in his discretion, to acquire on behalf of the United States, by donation, by purchase with donated funds when purchasable at prices deemed by him reasonable, or by condemnation with donated funds, such lands and interests in land within an area of not to exceed 25 acres as he may select in the vicinity of Tampa Bay and Bradenton, Fla., and to construct thereon a suitable memorial structure, together with such connecting roads and public facilities as may be desirable.

SEC. 2. Upon a determination by the Secretary of the Interior that sufficient land has been acquired by the United States for the memorial, such property shall be established as the De Soto National Memorial, and shall be administered by the Secretary of the Interior, through the National Park Service, for the benefit of the people of the United States. An order of the Secretary of the Interior, constituting notice of such establishment, shall be published in the Federal Register. Insofar as applicable and not in conflict with this act, the act of August 25, 1916 (39 Stat. 535), providing for the establishment of a National Park Service, as amended and supplemented, shall govern the promotion and development of the national memorial.

SEC. 3. There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DISPOSITION OF ELECTRIC ENERGY AT FORT PECK, MONT.

The Clerk called the bill (H. R. 4027) to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. JENSEN. Mr. Speaker, reserving the right to object, I would like to ask the author of the bill, the chairman of the committee, the gentleman from California [Mr. WELCH], to explain the provisions of this bill and the purposes of it.

Mr. WELCH. The gentleman from Montana [Mr. D'EWART] was chairman of the subcommittee which reported the bill to the full committee and he will be glad to explain the bill.

Mr. D'EWART. Mr. Speaker, the purpose of this bill is to transfer by sale from the Bureau of Indian Affairs to the Bureau of Reclamation approximately 25 miles of 33-kilovolt transmission lines, substations, appurtenances, and equipment constructed by the Bureau of Indian Affairs below Fort Peck in connection with the Fort Peck Indian Reservation. We are now in the process of developing that area under the Bureau of Reclamation, under the Missouri Valley development. Therefore, these lines that are now a part of the Indian reservation property are being turned over in connection with the power station development that is going on in Fort Peck, and the transmission line that will go from there to Garrison. It will connect up with that part of the line and be a part of the Bureau of Reclamation distribution system, instead of being a part of it under the Indian Bureau and a part of it under the Bureau of Reclamation.

Mr. JENSEN. May I ask, Is the gentleman perfectly satisfied with this bill?

Mr. D'EWART. The Indians from the Fort Peck Reservation appeared before the committee; the Indian Service appeared before the committee; the Bureau of Reclamation appeared before the committee. All agreed in the bill and the amount that was to be paid in return for the transfer of the lines.

Mr. JENSEN. That is not what I asked the gentleman. I asked the gentleman if he favored this bill. I have great respect for the gentleman's judgment.

Mr. D'EWART. I believe the bill is in the best interests of the distribution system that is being installed up there. In view of the fact that they have authorized this transmission from Fort Peck to Garrison Dam this should be made a part of that distribution.

Mr. JENSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. KEAN. Mr. Speaker, I ask unanimous consent to substitute a similar Senate bill, S. 1591.

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That, in aid of the administration of the Fort Peck project, there is hereby granted to the United States, for use by the Bureau of Reclamation, Department of the Interior (hereinafter referred to as the "Bureau"), in the discharge of its duties pursuant to the act of May 18, 1938 (52 Stat. 403), the electric-transmission lines, substations, rights-of-way, and other property described in section 7 of that certain permit and memorandum of understanding, dated November 2, 1945, between the Bureau and the Office of Indian Affairs, Department of the Interior (hereinafter referred to as the "Indian Office"): *Provided, however*, That the Bureau shall continue to furnish electric service for the uses and purposes of the Indian Office on the Fort Peck Indian Reservation, pursuant to the terms and conditions of said permit and memorandum of understanding, except as the same may be modified by the Secretary of the Interior.

SEC. 2. That the amount of money to be paid for said property shall be $58,577.52, or so much thereof as the Secretary of the Interior shall determine to be needed pursuant to the provisions of said permit and memorandum of understanding. Such sum shall be paid, from funds now or hereafter made available to the Department of the Interior for the construction of transmission lines and substations of the Fort Peck project, to the Commissioner of Indian Affairs, who shall deposit such sum in the Treasury of the United States as a credit on expenditures made for irrigation and power construction on the Fort Peck Indian irrigation project.

SEC. 3. The Secretary of the Interior is authorized to perform any and all acts as may be deemed necessary to carry out the provisions of this act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H. R. 4027) was laid on the table.

APPROVING THE PERFORMANCE IN THE FIELD OF CERTAIN FUNCTIONS RELATING TO THE PUBLIC LANDS

The Clerk called the bill (H R. 4461) approving the performance in the field of certain functions relating to the public lands.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That any function or duty of the Bureau of Land Management may be transferred from the District of Columbia and performed in the field when such transfer and performance are authorized pursuant to law by the Secretary of the Interior or the Director of the Bureau: *Provided, however*, That the tract books now held and administered in the District of Columbia shall not be transferred to the field.

Mr. KEAN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KEAN: Page 1, line 3, after the word "of", insert "the Grazing Service of."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONVEYANCE OF CERTAIN LANDS IN PARK COUNTY, WYO., TO THE STATE OF WYOMING

The Clerk called the bill (H. R. 4462) authorizing the conveyance of certain lands in Park County, Wyo., to the State of Wyoming.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, this question is highly controversial, and I object.

Mr. BARRETT. Mr. Speaker, will the gentleman withhold his objection?

Mr. KEAN. Yes, certainly; I reserved the right to object.

Mr. BARRETT. Mr. Speaker, there certainly should be no controversy whatsoever about this bill. Let me explain it.

As everyone knows, since the formation of the Union, certain lands have been set aside for the use of the common schools of the various States. In the Western States Congress vested sections 16 and 36 in each township to each of the States for the support of their schools. The only requirement in most enabling acts was that these sections be surveyed. The land involved herein is an 80-acre tract in section 36. What are the facts in connection with this controversy?

In 1892 the General Land Office asked the State if it wanted the township in which this land is located surveyed. The State wanted it surveyed and accordingly the Government caused a survey to be made. The Commissioner of the General Land Office in November of 1892 approved that survey. He notified the State of Wyoming that the survey had been approved and the State considered that it owned the land from that date. The Government of the United States by their officials considered that the land belonged to the State of Wyoming.

Why then the controversy? In 1917 the State of Wyoming leased that land to the Ohio Oil Co. That company

found oil on the land. Later it was found that the survey of 1892 did not locate the northwest corner of the school section.

The United States had notice of the lease from the State of Wyoming to the Ohio Oil Co. and the Geological Survey had knowledge of the existence of said lease and of the fact that the State was receiving royalties from the oil produced on that land and some was used for the support of the school in Wyoming and Mr. Speaker, for 35 years no objection was raised to the fact that the State claimed the land. When another survey was made it was found that one corner of the section had not been located. As a result of that error the United States claimed the land. As a matter of fairness and equity, however, that land belongs to the school children of Wyoming. There certainly should not be any controversy about that land and I think it is unconscionable that anybody would try to take advantage of that technicality.

Mr. GRANGER. Mr. Speaker, will the gentleman yield?

Mr. BARRETT. I yield.

Mr. GRANGER. Does not the controversy arise over a question of whether or not the corner was moved as the result of a movement of a stream bed?

Mr. BARRETT. No; I think not. In this particular case it is contended that one corner of the school section was not located. Certainly, however, everybody knew where that school section was and it was very easy to ascertain where that particular corner was because all of the other corners of the school section were located.

The Department itself has said in its report that because of the fact that the State of Wyoming held undisputed possession of this land for 35 years that certainly the Congress might well take that fact into consideration.

I understand that some members have been advised that the passage of this bill would result in litigation. I wish to say that such information is wholly incorrect. Our committee considered this legislation very thoroughly. The passage of this bill will result in clearing up difficulties that may have resulted because of an inadequate Government survey.

Mr. KEAN. Mr. Speaker, the land may be worth several million dollars. I think we ought to have a rule on this bill. I object.

SELECTION OF SUPERINTENDENTS FOR NATIONAL CEMETERIES

The Clerk called the bill (H. R. 4515) to provide for selection of superintendents of national cemeteries from meritorious and trustworthy male members of the armed forces who have been disabled in line of duty for active field service.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, I ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

SCHOOL FACILITIES WITHIN YELLOWSTONE NATIONAL PARK

The Clerk called the bill (H. R. 4823) to provide adequate school facilities within Yellowstone National Park, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, under such regulations as may be prescribed by the Secretary of the Interior, payments may be made, as provided herein, in advance or otherwise, from any revenues received by the United States from visitors to Yellowstone National Park, to the appropriate school district or districts serving that park, as reimbursement for educational facilities (including, where appropriate, transportation to and from school) furnished by the said district or districts to pupils who are dependents of persons engaged in the administration, operation, and maintenance of the park, and living at or near the park upon real property of the United States not subject to taxation by the State or local agencies and upon which payments in lieu of taxes are not made by the United States: *Provided*, That the payments for any school year for the aforesaid purpose shall not exceed that part of the cost of operating and maintaining such facilities which the number of pupils, in average daily attendance during that year, bears to the whole number of pupils in average daily attendance at those schools for that year.

SEC. 2. That, if in the opinion of the Secretary of the Interior, the aforesaid educational facilities cannot be provided adequately and payment made therefor on a pro rata basis, as prescribed in section 1 of this act, the Secretary of the Interior, in his discretion, may enter into cooperative agreements with States or local agencies for (a) the operation of school facilities, (b) for the construction and expansion of local facilities at Federal expense, and (c) for contribution by the Federal Government, on an equitable basis satisfactory to the Secretary, to cover the increased cost to local agencies for providing the educational services required for the purposes of this act.

SEC. 3. For the purposes of this act, the Secretary of the Treasury is authorized to maintain hereafter in a special fund a sufficient portion of the park revenues, based upon estimates to be submitted by the Secretary of the Interior, and to expend the same upon certification by the Secretary of the Interior.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

STATE-OWNED LANDS WITHIN GLACIER NATIONAL PARK, MONT.

The Clerk called the bill (H. R. 4980) relating to the acquisition by the United States of State-owned lands within Glacier National Park in the State of Montana, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized to acquire, and the State of Montana is authorized to convey to the United States, without regard to the requirements contained in section 11 of the act approved February 22, 1889 (25 Stat. 676), any lands, interests in lands, buildings, or other property, real and personal, owned by the State of Montana within the boundaries of Glacier National Park. The aforesaid properties may be acquired from the State of Montana by the Secretary of the Interior for such consideration as he may deem advisable, when the acquisition of such property would, in his judgment, be in the best interests of the United States.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RESTORATION OF THE FRANCIS SCOTT KEY MANSION

The Clerk called the joint resolution (H. J. Res. 150) to provide for the restoration and preservation of the Francis Scott Key mansion, to establish the Francis Scott Key National Monument, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, reserving the right to object, according to the history that is recorded, the lyrics of the Star-Spangled Banner were written on board a battleship. This report shows that they were written in Georgetown. I wonder if anybody on the committee will straighten us out on history and tell us what really happened?

Mr. BARRETT. Mr. Speaker, will the gentleman yield?

Mr. KEAN. I yield to the gentleman from Wyoming.

Mr. BARRETT. That is wholly incidental and not material in the consideration of the merits of the bill.

Mr. KEAN. It was put in by the committee as one reason for the passage of the bill.

Mr. BARRETT. I think the gentleman is jumping at a conclusion. Regardless of the merits of the gentleman's statement, the bill should be passed.

Mr. KEAN. This involves the building of a new house that seems to have been entirely destroyed. The report says that the house was demolished and what they want to do is to build a replica of it. I cannot see the sense of all of it.

Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

ELIMINATING THE REQUIREMENTS OF OATHS IN CERTAIN LAND MATTERS

The Clerk called the bill (H. R. 4513) to eliminate the requirement of oaths in certain land matters, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That written statements in public land matters within the jurisdiction of the Department of the Interior, heretofore required by law to be made under oath, need no longer be made under oath unless the Secretary of the Interior shall, in his discretion, so require.

SEC. 2. Unsworn written statements made in public land matters within the jurisdiction of the Department of the Interior shall remain subject to section 35 (A) of the Criminal Code (35 Stat. 1095, 18 U. S. C. sec. 80), as amended.

SEC. 3. That part of section 558 of the act of March 3, 1901, entitled "An act to establish a code of law for the District of Columbia" (31 Stat. 1279), as amended December 15, 1944 (58 Stat. 810, D. C. Code, 1940 ed., Supp. IV, sec. 1–501), which reads as follows:

"And provided further, That no notary public shall be authorized to take acknowledgments, administer oaths, certify papers, or perform any official acts in connection with matters in which he is employed as counsel, attorney, or agent, or in which he may be in any way interested before any of the Departments aforesaid" shall not apply to matters before the Department of the Interior.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PARK RIVER DAM AND RESERVOIR PROJECT, NORTH DAKOTA

The Clerk called House Joint Resolution 61, to provide for the designation of the Park River dam and reservoir project in Walsh County, N. Dak., as the Homme Reservoir Dam.

There being no objection, the Clerk read the joint resolution, as follows:

Resolved, etc., That the Park River dam and reservoir project in Walsh County, N. Dak., shall be designated on the public records as the Homme Reservoir and Dam.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE ACT MAKING FURTHER PROVISIONS FOR A CIVIL GOVERNMENT FOR ALASKA

The Clerk called the bill (H. R. 3344) to amend the fourth paragraph of section 4, chapter 1, title I, of the act entitled "An act making further provision for a civil government for Alaska, and for other purposes."

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the fourth paragraph of section 4, chapter 1, title I, of the act entitled "An act making further provision for a civil government for Alaska, and for other purposes," approved June 6, 1900 (31 Stat. 322; 48 U. S. C., sec. 101), as amended to read as follows:

"Division No. 3 shall consist of all the territory lying south and west of the line starting on the coast of the Gulf of Alaska at the one hundred and forty-first meridian of west longitude; thence north along said meridian to a point due east of Mount Natazhat in latitude sixty-one degrees thirty-one minutes twenty seconds north; thence due west to Mount Natazhat; thence westerly and northwesterly along the divide between the White and the Tanana Rivers on the north and the Chitina River on the south to the junction with the divide between the Chisana and the Nabesna Rivers in latitude sixty-one degrees fifty-two minutes forty seconds north, longitude one hundred forty-two degrees thirty-two minutes forty seconds west; thence northerly and northeasterly along the divide between the Chisana and the Nabesna Rivers to Mount Allen; thence northwesterly on a straight line crossing the Nabesna River approximately twenty-four miles to an unnamed peak in latitude sixty-two degrees thirty minutes forty seconds north, longitude one hundred and forty-two degrees forty-three minutes thirty seconds west; thence northerly and northwesterly along the divide between Cheslina and Tetling Rivers on the north and Totschunda and Platinum Creeks on the south, continuing northwesterly along the divide between the Tanana and the Copper Rivers to Mount Kimball; thence continuing southwesterly along the divide between the waters of the Kuskokwim River and Bay on the north and west and the Gulf of Alaska and Bristol Bay on the south to a westerly point of Cape Newenham; the said division to include the Alaska Peninsula, the Aleutian and Pribilof Islands, and all islands along and off the coast of this division, between Cape Newenham and the point where the one hundred and forty-first meridian, west longitude, intersects the northern line of the territory.

"This act shall take effect 60 days after it has been approved by the President."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HEADSTONES OR MARKERS FOR UNMARKED GRAVES OF MEMBERS OF THE ARMED FORCES

The Clerk called the bill (H. R. 4272) to provide for the procurement and supply of Government headstones or markers for unmarked graves of members of the armed forces dying in the service or after honorable discharge therefrom, and other persons, and for other purposes.

Mr. KEAN. Mr. Speaker, this report does not comply with the Ramseyer rule, and I therefore ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

ENACTMENT BY THE LEGISLATURE OF ALASKA OF A CODE OF LAWS FOR ALASKA

The Clerk called the bill (H. R. 4549) to authorize the enactment by the Legislature of the Territory of Alaska of a code of laws for Alaska.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding the provisions of section 8 of the act entitled "An act to create a legislative assembly in the Territory of Alaska, to confer legislative power thereon, and for other purposes", approved August 24, 1912 (U. S. C., 1940 ed., title 48, sec. 76), the Legislature of the Territory of Alaska is hereby authorized to enact, within 4 years after the date of enactment of this act, a code of laws for Alaska.

With the following committee amendment:

Page 1, line 9, after the word "act", insert "subject to the approval by Congress."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ATTENDANCE OF THE UNITED STATES MARINE BAND AT THE EIGHTY-SECOND NATIONAL ENCAMPMENT OF THE GRAND ARMY OF THE REPUBLIC

The Clerk called the bill (H. R. 5035) to authorize the attendance of the United States Marine Band at the Eighty-second National Encampment of the Grand Army of the Republic to be held in Grand Rapids, Mich., September 26 to 30, 1948.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, reserving the right to object, and I shall not object, I read in the newspaper that only three members of the Grand Army of the Republic attended last year. I wonder if the chairman of the Committee on the Armed Services can tell us how long we are going to send bands out if there is no one there attending the convention?

Mr. ANDREWS of New York. There may be only three members of the exact category of members of the GAR, but it is a very large convention.

Mr. KEAN. That is what I wanted to know.

Mr. ANDREWS of New York. I may say to the gentleman that it is the practice to designate the service bands only for national conventions of outstanding organizations, such as the GAR, the Confederate organization, the American Legion, and the Veterans of Foreign Wars.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the President is authorized to permit the band of the United States Marine Corps to attend and give concerts at the eighty-second national encampment of the Grand Army of the Republic, to be held in Grand Rapids, Mich., September 26 to 30, 1948.

SEC. 2. For the purpose of defraying the expenses of such band in attending and giving concerts at such convention, there is hereby authorized to be appropriated a sufficient sum to cover the cost of transportation and pullman accommodations for the leaders and members of the Marine Band, and allowance not to exceed $6 per day each for additional traveling and living expenses while on duty, such allowances to be in addition to the pay and allowance to which they would be entitled while serving their permanent station.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mr. PLUMLEY asked and was given permission to extend his remarks in the RECORD and include an address he delivered.

Mr. MURRAY of Wisconsin asked and was given permission to extend his remarks in the RECORD and include a radio address by Mr. Tiedeman.

Mr. SHAFER asked and was given permission to extend his remarks in the RECORD in two instances.

SUPPLEMENTAL REPORT ON H. R. 4478

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to file a supplemental report on H. R. 4478.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

COMMITTEE ON BANKING AND CURRENCY

Mr. WOLCOTT. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency may have until midnight tomorrow night to file reports on H. R. 5390 and H. R. 5391.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore (Mrs. ROGERS of Massachusetts). Under previous order of the House, the gentleman

from Michigan [Mr. ENGEL] is recognized for 15 minutes.

THE STORY OF 161,172 ARMY CHAIRS

Mr. ENGEL of Michigan. Mr. Speaker, here is the story of how the War Department was prevented from throwing away $2,567,000 of the taxpayers' hard-earned money, and how the Army procurement policy wastes tax dollars.

Last spring the Quartermaster Corps called for bids on 161,172 chairs for officers' quarters. The specifications which I have before me cover four typewritten pages. Instead of buying these chairs out of stock such as any ordinary taxpayer would do, they made the specifications so complicated that any factory who bid would have to tool up especially to make the chairs. The price bid on the chairs varied from $20 to $33 each. According to Colonel Howard, executive officer to General Middleswart, the average price would have been $26. The Aluminum Cooking Utensil Co., of Kensington, Pa., offered to furnish a similar chair at an average price of $12.75 each, f. o. b. Youngstown, Ohio, described as a "wearever aluminum chair." Major Simonseck, of the Chicago Office Quartermaster Depot wanted to buy this chair at $12.75. He was refused permission to make the purchase on the ground that it did not meet the specifications and did not match tables and other furniture that were to be purchased at the same time.

The gentleman from Illinois, Congressman DIRKSEN, obtained the complete file, which he referred to me at that time. Following the return of the contracting officer, Major Simonseck, from Chicago, Mr. Ray Cooper, representing the company and who had been following this matter through in Chicago, came to Washington to see what could be done to convince the Quartermaster General that these lower cost chairs should be bought. He stated that Brigadier General Feldman, who was then Acting Quartermaster General, said "that as long as he had anything to do with it, no other chair would be purchased than the one specified." When Mr. Cooper mentioned the fact that his chair was approximately half the price of the other chair, he quotes General Feldman as saying that "any salesman who attempts to sell the Army items because they are cheaper was making the wrong approach." He also quoted General Feldman as saying "that this program was outlined for not only this year but that it was the beginning of a 10-year program."

It was claimed by the company that this aluminum chair which was quoted at $12.75 each "conforms in all respects to Army specifications as to type of upholstery, color of upholstery," and so forth, the difference being in the shape of the legs of the chair and the bolted construction instead of welding. It is claimed that bolted construction is an advantage, because if any part of the chair becomes damaged it can be replaced without discarding the entire chair.

I took the matter up at that time with the War Department and protested their paying an average of $26 for a chair when they could buy practically the same thing for $12.75. The correspondence and reports to me were in March and April 1947. Later, on June 11, 1947, the budget officer of the War Department wrote me a letter stating that new tentative contracts were then in the Office of the Director of Service Supplies and Procurement waiting review and approval; that the above contracts were for two types of chairs—armchairs costing $10.70 each and side chairs costing $8 each, or an average cost of $9.45 instead of $26 per chair, chairs to be built according to new specifications drawn up by the Quartermaster General which "are designed for the purpose of giving the most efficient and economical service in any of the many varieties of climate where they will be put into use."

Summarizing, the War Department was going to purchase under the original specifications 161,172 chairs at an average price of $26 and for a total of $4,190,472, and had I not protested that is the contract which undoubtedly would have been signed. I am told they actually bought 161,172 chairs at an average price as stated by the budget officer of $9.45 or for a total of $1,523,075. While I did the protesting the actual credit goes to the Aluminum Cooking Utensil Co., of Kensington, Pa., who protested and did not get the contract, and to the gentleman from Illinois, Congressman EVERETT DIRKSEN, who forwarded their protests to me. They are the ones who should be credited with preventing the War Department from throwing away $2,567,000 of the taxpayers' hard-earned money. This is just one of many similar illustrations of the waste and extravagance which had been going on in the Army.

Somehow, the Army seems unable to use any manufactured products out of standard manufactured stocks. Everything has to be according to very special specifications. Millions of dollars of the taxpayers' money can be saved annually by getting away from useless specifications and using standard equipment and products wherever possible.

I am including in the RECORD at the close of my remarks four letterhead pages of Army specifications for the manufacturing of this chair for officers' quarters. Some of these specifications sound like the chemical analysis of battleship armor plate. Note the following specifications on the chemical analysis required for the material for the legs and posts of this chair for officers:

Side frames (legs) and back posts, aluminum tubing to be 63S as extruded and to conform to the following chemical analysis and minimum physical properties as shown below:

Chemical analysis: Silicon, 0.20 to 0.60; magnesium, 0.45 to 0.85; chromium, 0.10; iron, 0.35; copper, 0.10; titanium, 0.10; zinc, 0.10; other elements, 0.05 each; total other elements, 0.15.

And get these "required physical qualities":

Minimum physical properties: Tensile, 22,000 p. s. i.; yield, 16,000 p. s. i.; elongation, 8 percent.

When I read the specifications, I wondered whether they were making a chair for an elephant circus or for officers' quarters. And get this:

After forming, tubing to be aged to 63ST—5 temper.

Seat pan and back rest, low carbon cold-rolled sheet steel—Federal specifications ANQQS—636.

Plug inserts, black tenite No. 1 thermoplastic.

Color, brilliant black, slightly translucent.

Remember these are for officers' chairs for quarters. The bolts, nuts, and washers have to be "cadmium or zinc plated." They have to be of "low-carbon cold-rolled steel" and bolts and nuts "are to be made special." Floor glides to be "all steel parts, to be cadmium or zinc plated except the hardened steel bottom, which is bright nickel-plated and the spring steel retainer which does not require any plating."

These are just a few of the four letterhead pages of specifications for an Army officer's chair. When you look at the four pages of specifications you wonder how a contractor could make them even at an average of $26 per chair. What we need in the Army is some businessmen to do their buying for them and get away from this type of procurement.

Here as a real believe-it-or-not, are the exact specifications as set up and demanded by the War Department for these 161,172 officers' chairs:

SIDE-CHAIR SPECIFICATIONS

This specification covers requirements for a complete chair assembly.

DESIGN

Chair assembly to consist of the following parts: One right- and left-side frame (legs), two back posts, upholstered seat pan, upholstered back rest, four floor glides, two back-post plug inserts and necessary bolts, nuts, and washers as shown on print C 3585.

DIMENSIONS

Chair assembled:

Spacing of frame or legs at floor, front to back to be 20⅛ inches.

Spacing of frame or legs at floor, right to left to be 17⅝ inches front, 16⅝ inches rear.

Over-all height of chair, floor to top of back to be 32 inches.

Over-all of chair front to back to be 21⅝ inches.

Distance from seat to floor (front) 18 inches.

Distance from seat to floor (rear) 16⅛ inches.

Chair disassembled:

Right- and left-side frame (legs) two U-shaped aluminum tubular sections, extruded, 0.942 by 0.995 inside, 0.065 wall thickness and approximately 48 inches long with rounded corners, and having three 0.094-inch R beads centered on outside of wide section. Bead to be on one side only and when tube is formed, are to be on outside. Legs to be bolted to two upright back sections or posts.

Back posts: Two aluminum tubular sections extruded, 0.778 by 0.884 inch inside, 0.058 wall thickness approximately 22¼ inches long with rounded corners and having three 0.094-inch R beads centered on each outer surface of wide section. Tubing to be formed with beads outside, that is, to front and back of chair when assembled. Back posts to be bolted to leg section, located so that front-to-back dimension from outside leg at floor to outer top of formed upright will be approximately 21⅜ inches.

Seat pan: Sheet steel (0.035 inch thick) width at front of pan to be 15¼ inches, width at rear to be 14½ inches. Sides of pan to be

placed between leg and upright extrusions, then complete unit bolted together when assembling. Seat to have one layer of wadding and one layer of cotton covered with artificial leather.

Back rest: Sheet steel (0.028 inch thick) to consist of two sheet steel rectangular pans approximately 9 inches by 14 inches by 1⅝ inches deep. Outer pan to telescope the inner pan, inner pan to be bolted to uprights when assembling, to have one layer of cotton front pan only covered with artificial leather front and rear pan.

Floor glides: Each assembly consisting of hardened steel bottom bright nickel plated, rubber cushion, No. 16 W. & M. gage (0.062) steel cup. These parts are riveted to a retainer made of 0.032 by 1 1/16 wide spring steel. Glide assembly to be drive-in type inserted in open end of each leg. Assemblies to be replaceable.

Plug inserts made of black tenite to be pressed into top open end of back posts.

Bolts and nuts are to be made special.

Washers, standard 5/16-inch diameter lock washer.

MATERIAL

Side frames (legs) and back posts: Aluminum tubing to be 63S as extruded and to conform to the following chemical analysis and minimum physical properties as shown below:

Chemical analysis: Silicon, 0.20 to 0.60; magnesium, 0.45 to 0.85; chromium, 0.10; iron, 0.35; copper, 0.10; titanium, 0.10; zinc, 0.10; other elements, 0.05 each; total other elements, 0.15. After forming, tubing to be aged to 63ST—5 temper.

Minimum physical properties: Tensile, 22,000 p. s. i.; yield, 16,000 p. s. i.; elongation, 8 percent.

Seat pan and back rest, low carbon cold-rolled sheet steel, Federal specifications ANQQS-636.

Plug inserts, black tenite No. 7 thermoplastic.

Color, brilliant black—slightly translucent.

Bolts and nuts, low-carbon cold-rolled steel, Federal specifications FF-B-571.

Upholstering cover, artificial leather, synthetic resin-coated type III, Federal specifications KK-L-136b.

Cotton, 50 percent each No. 1 willowed cotton; spinning mill waste, and No. 2 high and medium Government grade, first-cut linters.

Wadding, No. 532 white cotton linters, regal quality.

FINISH

Side frames (legs) and back posts, aluminum tubing to be given 15-minute alumilite finish over bright acid etch.

Seat pan and back rest, green enamel finish dipped and baked.

Floor glides, all steel parts to be cadmium or zinc plated except the hardened-steel bottom which is bright nickel plated, and the spring-steel retainer which does not require any plating.

Bolts, nuts, and washers, cadmium or zinc plated.

SHIPPING

Chairs to be shipped knocked down, wrapped in paper, and packaged in 200-pound-test cartons. Four chairs to a carton. Special care to be exercised in protecting of aluminum tubing from scratches and tool marks. Above packed for overseas shipment in waterproof barrier material. Shipping containers to be constructed and strapped to conform with the requirements of one of the following specifications:

Nailed wood boxes, Jan-P-106 cleated plywood boxes, Jan-P-105; fully sheathed crates, Jan-P-104.

Mr. POULSON. Referring to the required strength of the chairs, do not the officers consider that they carry that much weight around?

Mr. ENGEL of Michigan. Yes; they think they do.

EXTENSION OF REMARKS

Mr. ALLEN of Louisiana (at the request of Mr. LARCADE) was granted permission to extend his remarks in the RECORD and include therein a newspaper article.

Mr. JOHNSON of Texas asked and was granted permission to extend his remarks in the RECORD on three separate subjects, and to include certain excerpts.

SPECIAL ORDER

The SPEAKER. Under a special order heretofore entered, the gentleman from Louisiana [Mr. HÉBERT] is recognized for 1 hour.

(Mr. HÉBERT asked and was granted permission to revise and extend his remarks and include certain extraneous matter.)

LOUISIANA POLITICS

Mr. HÉBERT. Mr. Speaker, I apologize to you for having found it necessary to use the House of Representatives of the United States to discuss Louisiana politics. I do not believe that this is the proper place for such discussions, but I have no alternative. The situation is not one of my own making, but one created by my good personal friend and colleague the gentleman from Louisiana [Mr. DOMENGEAUX].

On Thursday, January 15, on the floor of this House, under a unanimous consent to proceed out of order, my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] made certain charges, made definite and positive accusations, against former Gov. Earl K. Long, of Louisiana, and the Bureau of Internal Revenue.

In order to refresh your memory as to the language used by my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], and the nature of the accusations made by him against Earl Long, I quote from the proceedings in the House, as recorded in the CONGRESSIONAL RECORD, dated January 15, 1948, on page 214.

The gentleman from Louisiana [Mr. DOMENGEAUX] said:

Earl K. Long is a candidate for Governor of the State of Louisiana in the Democratic primary to be held on January 20. Earl K. Long was elected Lieutenant Governor of Louisiana in 1936, at which time was also elected Richard W. Leche as Governor of Louisiana. Earl K. Long became Governor of Louisiana in April 1939 when Governor Leche resigned, and he served until May 1940. Governor Leche and many other high officials in the State of Louisiana, and other persons, doing business with the State of Louisiana, were indicted and convicted in the Federal courts on various charges in defrauding taxpayers in the State of Louisiana.

The Earl K. Long-Richard W. Leche administration was one of reckless and fraudulent exploitation of the people's money and of the people's rights. Many connected with this regime were guilty of every conceivable misfeasance and malfeasance in office.

Earl K. Long, in his present campaign for Governor, boasts that even though some of his former associates were guilty of crime against the State, that he, himself, is innocent. He repeatedly tells the people that he was investigated and reinvestigated by various agencies of the Federal Government and nothing improper or wrong was found against him.

I now charge that Earl K. Long received an income in excess of a quarter million dollars during the years 1938 and 1939, while he was Lieutenant Governor and Governor of the State of Louisiana.

I charge that this income is largely of the same nature which his former associates profited in; an income of ill-gotten gain and graft, obtained in an illegitimate and illegal manner at the expense of the taxpayers of the State.

I charge that Earl K. Long did not report this income to the Federal Government and instead reported an income of a nominal sum. I charge that his failure to report the proper income was a willful intent to evade his income tax.

I charge that the Bureau of Internal Revenue has assessed at the present time against Earl K. Long a tax liability including fraud penalty in excess of $100,000.

I charge that Earl K. Long has agreed to pay this tax liability, including fraud penalties, but has requested that final consummation be deferred until after the present gubernatorial election.

I charge this tax claim, including fraud penalties, is now in the hands of the regional office in Dallas, Tex., and the technical staff of the Bureau of Internal Revenue in New Orleans for settlement. The apparent indifference on the part of the Bureau of Internal Revenue in allowing this matter to remain in abeyance is an aid in protecting an individual guilty of acknowledged tax evasion and violation of his trust in office against his people.

I call upon the Bureau of Internal Revenue to issue a deficiency notice of demand payment against Earl K. Long; and to effect the collection of this fraud income claim now, and to take whatever other steps proper under the circumstances. Should this not be done I intend to call this matter officially before the Congress of the United States by resolution asking for an investigation of such conduct by this Government agency.

We have had for almost 8 years constructive and honest State government in Louisiana. Our State is blessed, as no other, with natural resources. We have it within our means to provide a way of life for our people as good as any to be found in this country. We can do that with continued honest, constructive, and liberal government. Louisiana must not again put its affairs in the hands of a man like Earl K. Long, who swindled its taxpayers of hundreds of thousands of dollars, as well as many thousands of dollars from the United States Government.

I direct your attention Mr. Speaker to the definite and positive charges made by my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], without substantiation of documentary proof. I now categorically deny the statements made by my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], and shall refute indisputably each one of these charges made, and shall substantiate this refutation with photostatic copies of Earl K. Long's income-tax returns, as taken from the files of the Bureau of Internal Revenue, upon the authorization of Earl K. Long himself.

In making this address today, Mr. Speaker, I am seeking only one thing. I am seeking the truth. I am interested in nothing more or nothing less. Let the chips fall where they may.

Before proceeding further, Mr. Speaker, let me say this. In again apologizing for taking up the time of the House on this occasion, I direct attention that my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] has chosen his own forum. He has chosen for reasons best known to himself the floor of the House

of Representatives as the place to further the interest of the candidate he is supporting for Governor of Louisiana, to the detriment of the individual he opposes. I do not impugn my colleague's motives for one instant. Whether the floor of the House of Representatives is the proper place or not to wash Louisiana's political linen is a matter which he decided for himself in his own conscience. I am not the judge of his conscience. But having chosen to use this floor for the attack, he leaves me no alternative other than to use the same place in the defense of the man who has been so unjustly accused in this instance. I repeat, I want it understood also that I do not charge bad faith to my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], for whom I have the greatest respect and personal devotion. He is my close personal friend, a friendship which I have treasured for many years and will continue to treasure.

I have asked for permission to address the House today for 1 hour. I will not consume that time in my presentation, but I have asked for the hour in order to give my colleague, the gentleman from Louisiana [Mr. DOMENGEAUX] or any other Member of this House, an opportunity to question me in connection with this whole matter.

I ask that I not be interrupted during the presentation of this case. I shall refuse to yield until I have completed the presentation of the facts as reflected by the files in possession of the Internal Revenue Department, which I shall present in accordance with the established law on the subject. At the end of my presentation I shall be glad to answer any questions, but until then I shall not yield.

Now, Mr. Speaker, I also want it to be known that I am not taking my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] unawares by this presentation today. I not only have notified him of my intentions today but I have given him a complete copy of the address which I am now making, in order that he could come here well fortified, knowing in advance what I am going to say. He will have every opportunity to question me on any statement which I make. He says he wants the truth—and I believe him—and having been furnished the truth, he will have the opportunity to admit that he was in error when he made these charges on the floor of this House, and that he made them without the complete information having been furnished him. The entire matter then resolves itself for him to decide which is the more important, the truth, the unvarnished truth, or the election of the candidate he supports. The choice is his to make, not mine.

I therefore, Mr. Speaker, now proceed with the discussion of the facts, the true facts, in this case.

As you well know, there is only one way, and one way alone, for any individual outside of the Bureau of Internal Revenue to come in possession of any details related to a taxpayer's income, and that is through the taxpayer himself, or his accredited attorney and representative authorized to practice before the Bureau of Internal Revenue. There is no other legal way. Now, obviously my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] did not obtain this information from Earl K. Long himself, or from his accredited attorney. He will not deny that. He knows that is the truth. Therefore, I believe it is incumbent on him to disclose to his colleagues the manner and method by which he came into possession of his information. Somebody, somewhere in the Internal Revenue Department who had access to the income-tax returns of Earl K. Long, supplied my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] with his information; and when he supplied him with his information, he violated the law. He acted the rule of informer, or stool pigeon, if you please. And what did this individual do, who dares not reveal his identity, who dares not reveal his identity because he knows he would be prosecuted for violation of the law—what did he do? He illegally furnished my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] only part of the picture—that part which suited his own nefarious designs, and that design was a futile hope of electing his candidate, Sam Jones, Governor of Louisiana.

He did not give him the conclusion of the case, nor did he give him information on the complete story, because if he had, the name of Earl K. Long would have been cleared of any wrongdoing; and my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], acting in good faith, could not have—and I do not believe would have—made the statements which he made on the floor of this House on January 15.

Obviously, the individual who gave this information to my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] was not a friend of Mr. Long. It must be assumed on its face that he was and is an enemy of Earl K. Long, and by giving this erroneous information to my colleague he was undermining the character of Earl K. Long. His purpose was to smear, libel, and slander the character of Earl K. Long. He could have no other reason or design. If his intentions had been honorable, he would not be hiding under the cloak of anonymity.

In contrast to this presentation of information, Mr. Speaker, I come before you today with the facts gained in a legal and orderly manner, under the terms and within the scope of the law itself. I come to you today to present this evidence, which has been obtained by me in the manner prescribed by law, to refute the charges made by my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], the hostile press of the State of Louisiana, who is opposing Mr. Long in this election, and Sam Jones, the opposing candidate himself.

In this connection let me quote what my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] said, as recently as last Tuesday, in a prepared statement. It is in substance the same thing that the newspapers opposed to Mr. Long have been demanding editorially, and that Mr. Jones has been saying from the stump. But in order to be absolutely accurate, I quote verbatim my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], and he said this:

> The people of Louisiana are entitled to have the proof of these charges before they go to the polls in the February 24 primary election in which Earl K. Long is a candidate for governor. Of course, Earl K. Long could have and still can clarify the entire matter by authorizing the Commissioner of Internal Revenue to make public all records pertaining to the said Earl K. Long's income-tax file in question.

As to the first sentence that the people of Louisiana are entitled to have the proof of those charges before they go to the polls in the February 24 primary election, in which Earl K. Long is a candidate for governor, I agree 100 percent with my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], with the newspapers who have demanded to know the truth, and with Mr. Jones himself. It is because I agree with them and because Earl Long agrees with them that I am standing here today—to give you the truth.

As to the second sentence, that Earl K. Long could have and still can clarify the entire matter by merely authorizing the Commissioner of Internal Revenue to make public all records pertaining to the said Earl K. Long's income tax in question, I disagree, because this is not a statement of fact.

Ever since the day that my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] made his charges on the House floor, which, mind you, was less than a week from the date of the first primary, with a Saturday and a Sunday intervening, Earl Long has been trying to get the Bureau of Internal Revenue to release the facts in the case, and without success until this present time. My colleague the gentleman from Louisiana [Mr. DOMENGEAUX] made the charges at such a time which did not allow ample opportunity for Mr. Long to get all the facts from the Bureau of Internal Revenue. Mr. Long did say, however, that he would make the facts known as soon as he had an opportunity to get them, and he is keeping that word through me here today. This is the first chance that the opportunity has been made available to present the facts, and I am taking advantage of that opportunity.

May I digress for a moment to draw a contrast between the timing and method employed by my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] and myself in presenting this case?

Without notice or warning he made his unfounded charges on the Thursday preceding the Tuesday of election, thereby allowing no time for Earl Long to defend himself before the first primary election day.

As I have pointed out, I announced my intention almost 2 weeks before election day of answering his scurrilous charges and have handed to him this morning, hours before coming to the floor, a copy of this address.

I am giving full opportunity—more than a week before election—to the biased and prejudiced press of my State to publish the true facts.

Are they big enough to do it?

Now in order to keep the record straight, and in order to dispel from the minds of the people the confused situation which has been placed before them by distortion, obtaining a taxpayer's income-tax file from the Bureau of Internal Revenue is not as simple as those opposing Mr. Long would have you believe. Let us understand the law clearly. Only one person, and one person alone can ask to see, not to reveal, but to see the income tax files as related to his own income, and that is the taxpayer himself. He can do that personally, or through his attorney, who must in addition be qualified to practice before the Bureau of Internal Revenue. Nobody else, and I repeat, nobody else, can look at those files.

In an effort to learn the truth, with Mr. Long's full cooperation, when I returned to Washington from Louisiana recently I had with me the written authorization of Mr. Long himself to examine his income-tax files in toto. I personally presented this written request to Mr. George J. Schoeneman, Commissioner of Internal Revenue, because Mr. Long's income-tax returns are here in the Bureau of Internal Revenue in Washington. I had full authority from Mr. Long to examine those records and to make them public. What happened when I presented that request? Mr. Schoeneman refused to show them to me, and properly so. He pointed out to me that under the law he could not discuss the case with me and would not discuss it. This was the same position Mr. Schoeneman on the day previous had taken before the subcommittee of the Appropriations Committee of the House. Mr. Schoeneman explained that it would be necessary for Mr. Long himself, or his attorney, to come to Washington to examine the returns, and that nobobdy else would be allowed to look at them, but that Mr. Long or his accredited attorney would be permitted to photostat whatever pertinent documents they desired, other than interdepartmental communications, which he said are not available to the taxpayer or his attorney.

Obviously Mr. Long himself could not come to Washington because he is engaged in the throes of the present campaign. But upon my request he took the one course open to him, namely, through his accredited attorney, Clem H. Sehrt. On last Tuesday morning Mr. Sehrt appeared before the Bureau of Internal Revenue and asked to examine the files and make photostatic copies of the pertinent documents, which will prove that the charges of my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] are unfounded, false, and untrue.

I have here, Mr. Speaker, and ladies and gentlemen of the House, those documents. I hold them here in my hand. Here are the photostats of the official documents taken from the files of the Bureau of Internal Revenue which my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] has insisted that he wanted brought before you and the people of Louisiana. You have got them now.

And as I reveal this situation to you step by step, supported by those documents, you will readily grasp the real situation, and out of the confusion and chaos will come order and the truth.

But now let me give you a little background of this case before I present these documents. Mind you I am not making these statements on my own without substantiation and proof; mind you I am not merely making an unsupported assertion. Unlike my colleague the gentleman from Louisiana [Mr. DOMENGEAUX], I first make the statement and then support it by the official documents, by the irrefutable evidence of the Bureau of Internal Revenue files, which my colleague says will determine whether or not he made a correct statement on the floor of this House, as related to Earl K. Long's income-tax returns.

Now let me direct your attention to my colleague Mr. DOMENGEAUX's statement. We are in agreement that Earl Long was investigated. We are in full agreement. Earl Long has said on repeated and numerous occasions that he has been investigated and reinvestigated; that he is the most investigated man in Louisiana, but that nobody has as yet been able to successfully link him with graft or corruption or fraudulent income-tax returns. That is no secret. Of course, he has been investigated. What do you think he has been investigated for? Whether he wears a red or brown tie? Do you think he has been investigated to find out whether he drinks nectar sodas or whether he drinks Coca-Colas? Do you think he has been investigated to determine whether or not he parts his hair in the middle or on the side?

He has been investigated and he admits it, to determine whether or not he has violated the law, and until this day, this time, this hour, this minute, after all of these investigations, with the full power of the United States Government behind these investigations, with the full power of the State of Louisiana investigatorial bodies behind these investigations, Earl Long today is not guilty.

Now let me say to you what happened in this particular case, in which I tell you that my good friend and colleague the gentleman from Louisiana [Mr. DOMENGEAUX] was given misinformation. Here is what happened. I have nothing to conceal. Earl Long has nothing to conceal. Back in the year 1939 when the so-called Louisiana scandals broke—and I may say parenthetically here that I know a little bit about those scandals since I had a lot to do with bringing them to the public eye—Earl Long, who later became a candidate for governor among others, was investigated, and nothing was found against him. And then there was a lull, and the embers simmered on the fire. Earl Long became a candidate for lieutenant governor in 1943. Lo and behold, another investigation developed. It is that investigation, which I will disclose to you hereafter has been settled, but is again being resurrected by a frantic opposition in support of their candidate.

Does it not seem queer that only at election time do these unfounded, and to date unproven, charges crop up. Who is trying to get Earl Long in the Bureau of Internal Revenue? What individual is after him? I wonder if it is the same character who illegally gave to my colleague, the gentleman from Louisiana [Mr. DOMENGEAUX] false information, which he presented to you.

Be that as it may, here is what actually happened in this case, and I give it to you chronologically.

Bear in mind the harassment that Earl Long had been subjected to from 1939. Visualize his frame of mind, when, after he had proven time and time again that he was not guilty of wrongdoing, to be again confronted with Internal Revenue Department agents, throwing in his lap as income, certain political moneys which were not kept by Earl Long, which were not used by Earl Long for his own personal use, which did not find their way into his own personal bank accounts, and which were not legal income for purposes of income-tax declaration and payment of taxes.

Mr. Speaker, and ladies and gentlemen of the House, certain agents of the Bureau of Internal Revenue literally threw the book at Earl Long. In effect and substantially, practically every dime of money that was spent in the political campaign of 1940 and others, was charged against Earl Long as personal income.

Now Mr. Speaker, and ladies and gentlemen of the House, we are all familiar with how campaigns are conducted. We know how moneys are collected and expended during political campaigns. I dare say there is not a Member of this House today who at one time or another has not handled political funds and dispensed those political funds. May I ask, Are political moneys so expended taxable?

Do you know of any political candidate, or his manager, who has been requested to pay taxes on political funds spent in a campaign, disbursed in a campaign?

Have you ever included in your income-tax returns such political funds?

Have you ever been requested to pay taxes on such funds?

Of course not.

But what did some of the agents of the Bureau of Internal Revenue do where Earl Long was concerned?

They said to Earl Long, in effect: "Mr. Long, we have examined your income-tax returns for the years 1937, 1938, and 1939, and we have discovered that you have not included in these returns certain moneys which we are advised came into your possession. What is your explanation?"

"Explanation," Mr. Long exclaimed, "that's easy. They were political funds."

"Not that easy, Mr. Long," shot back these eager and industrious agents. "You have got to prove it to us."

"I accept your challenge, gentlemen, and will prove it," readily replied Mr. Long.

And Earl Long did prove it.

In other words, the Government can come against you, you, or you, and

charge you with having income of a certain amount, such as they did in the case of Mr. Long, and under the law the burden of proof is upon you, the taxpayer, to prove to the Government's satisfaction that such incomes are not your personal gain and profit. That is what Earl Long did.

With the burden of proof resting upon his shoulders he appeared before representatives of the Bureau of Internal Revenue, time after time, repeatedly, to explain what the Department wanted explained. Time after time at the request of the Department he voluntarily signed waivers allowing the Department unlimited time to investigate him. Would a guilty man have done this? Would a man who had something to hide sign away his rights under the law? I do not think he would have. Earl Long is not a guilty man. Earl Long had nothing to hide, and he readily signed these waivers.

So, from this stupendous amount which my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] would have you believe was Earl Long's income, and to which he said, and I quote:

I charge that the Bureau of Internal Revenue has assessed at the present time against Earl K. Long a tax liability, including fraud penalty, in excess of $100,000.

Comes false statement No. 1.

After a complete and thorough investigation by the Bureau of Internal Revenue, after an exhaustive study of Earl Long's income-tax returns, the agents of the Bureau of Internal Revenue finally came to the conclusion that, for the years of 1937, 1938, and 1939, Earl Long owed, not $100,000, plus fraud penalty, as my distinguished colleague would have you believe, but the small additional sum of $3,139.83. Three thousand one hundred and thirty-nine dollars and eighty-three cents for those 3 years.

And now for the proof.

Mr. Speaker and ladies and gentlemen of the House, I exhibit to you that figure on the original memorandum made by the Government agent himself, Mr. H. G. Bates, in his own handwriting, which he himself handed to Mr. Long at the conference at which an agreement was reached. But even then, even then, Earl Long said he did not owe the money or the additional tax, but because of lost receipts and other missing data which the Government requested 7 years later, Mr. Long agreed, under protest, to pay an additional tax on this negligible sum covering a period of 3 years.

And in this connection let me say to you, Mr. Speaker and ladies and gentlemen of the House, that Earl Long proved conclusively to the Government that he had no such alleged income—he proved not only by his own word but by sworn affidavits of the individuals who actually received this money for political purposes. Mr. Speaker, I hold in my hand a fistful of these affidavits. But the Government even went further than to rely on those affidavits. The Government agents interrogated each one of the individuals separately who had received these political funds and then came to the inevitable and correct conclusion that Earl Long was telling the truth.

After Mr. Bates had handed this memorandum to Mr. Long, he—Mr. Long—then prepared, according to procedure, Form 870 of the Bureau of Internal Revenue, using Mr. Bates' own figures as a basis for settlement. An examination of this form, which I now exhibit and ask to be incorporated in the RECORD, and that photostat from Earl Long's income-tax file in possession of the Bureau of Internal Revenue, reveals the figures are identical with those of Mr. Bates:

[New Orleans Division, District of Louisiana]

Form 870

TREASURY DEPARTMENT

INTERNAL REVENUE SERVICE

(Revised June 1941)

C:HGB:mcf

WAIVER OF RESTRICTIONS ON ASSESSMENT AND COLLECTION OF DEFICIENCY IN TAX

In re: Mr. Earl K. Long, Winnfield, La.

Pursuant to the provisions of section 272 (d) of the Internal Revenue Code, and/or the corresponding provisions of prior internal revenue laws, the restrictions provided in section 272 (a) of the Internal Revenue Code, and/or the corresponding provisions of prior internal revenue laws, are hereby waived and consent is given to the assessment and collection of the following deficiency or deficiencies in tax: Taxable year ended December 31, 1937, income tax in the sum of $1,359.06; taxable year ended December 31, 1938, income tax in the sum of $1,110.74; taxable year ended December 31, 1939, income tax in the sum of $670.03; amounting to the total sum of $3,139.83, together with interest thereon as provided by law.

EARL K. LONG,
Winnfield, La.

OCT. 20, 1944.

Mr. Speaker, I offer still further proof of this agreed settlement in the nature of the tax bills and the tax receipts themselves as evidence of payment on this amount.

Here, Mr. Speaker, in my hand are these tax bills; you know what they look like. We all have received them. And here are the receipts that Earl Long paid the money.

I ask unanimous consent that they be included in the RECORD at this point:

Form 7658—Revised May 1942

NOTICE AND DEMAND FOR INCOME TAX

[To insure proper credit, return this form with remittance]

Notice is hereby given that there has been assessed against you the amount of tax penalty and interest stated below. Demand is hereby made for the immediate payment of the unpaid balance thereof. If payment is not made within 10 days after date of this notice, the law provides that interest will be added at the rate of 6 percent per annum from the date shown below until paid.

Date: November 8, 1944.

To avoid further interest the amount stated on this notice must be paid to collector of internal revenue at New Orleans, La., within 10 days from date stated above.

Earl K. Long, Winnfield, La., Nov. 3—519010, 1937:

Assessment	$1,359.06
Interest	541.07
Balance due	1,900.13

Form 7658—Revised May 1942

RECEIPT FOR PAYMENT OF TAXES

Form 1—(Revised May 1940)

Name and address of taxpayer: Earl K. Long, Winnfield, La.

Income, 1937	$1,900.13
Interest	11.69
Amount	1,911.82

Collector, internal revenue, district of Louisiana. Paid, December 15, 1944. Cashier Division.

RECEIPT FOR PAYMENT OF TAXES

Form 1—(Revised May 1940)

Name and address of taxpayer: Earl K. Long.

Income, 1938, $820.82.

Collector, internal revenue, district of Louisiana. Paid, April 6, 1945. Cashier Division.

RECEIPT FOR PAYMENT OF TAXES

Form 1—(Revised October 1944)

Name and address of taxpayer: Earl K. Long, Winnfield, La.

Income, 1938	$665.49
Interest	36.81
Amount	702.30

Collector, internal revenue, district of Louisiana. Paid, July 9, 1945. Cashier Division.

RECEIPT FOR PAYMENT OF TAXES

Form 1—(Revised October 1944)

Name and address of taxpayer: Earl K. Long, Winnfield, La.

Income, 1938: Interest, April 6, 1945–July 9, 1945, $12.71.

Collector, internal revenue, district of Louisiana. Paid, July 9, 1945. Cashier Division.

RECEIPT FOR PAYMENT OF TAXES

Form 1—(Revised May 1940)

Name and address of taxpayer: Earl K. Long, Winnfield, La.

Income, 1939, $314.71.

Collector, internal revenue, district of Louisiana. Paid, December 15, 1944. Cashier Division.

RECEIPT FOR PAYMENT OF TAXES

Form 1—(Revised May 1940)

Name and address of taxpayer: Earl K. Long.

Income, 1939	$541.67
Interest	14.39
Amount	556.06

Collector, internal revenue, district of Louisiana. Paid, April 6, 1945. Cashier Division.

But I can best give you the story in Earl Long's own words, not uttered today, not written at a time when he is a candidate for public office and again under attack, but in October 1944. I let Earl Long speak for himself. When Earl Long agreed to pay that money he did so still under protest, as so many taxpayers do, and with your permission, Mr. Speaker, let me read to you Mr. Earl Long's letter of that date, a photostatic copy of which I have obtained from the Bureau of Internal Revenue. Under date of October 20, 1944, this letter accompanied form 870—which I have presented to you—and was addressed to Mr. William E. Logan, Internal Revenue agent in charge, New Orleans Division, Treasury Department, 901 Hibernia Building, New Orleans 12, La. Earl Long said this:

With further reference to your letters of March 31, 1943, addressed to Mr. and Mrs. Earl K. Long, of Winnfield, La., and the various conferences held in connection therewith following the filing of protests thereon, and without prejudice to our rights and purely with a hope of settling all issues herein, we attach hereto a schedule of proposed adjusted net income for the years 1937, 1938, and 1939 as the basis on which we will settle this matter.

As you know I have been probably the most investigated individual in the State of Louisiana. Both State and Federal agencies have investigated my affairs from top to bottom without finding any semblance of wrongdoing. During the years under consideration in this matter I was Lieutenant Governor, Governor, and a candidate for Governor of this State in a most hectic and epoch-making period. So many things happened in my career from 1937 through 1939 that it is utterly impossible for me to orderly marshal the events. From an income-tax standpoint I believe I am the only individual of political significance who has ever been called upon to explain the spending, etc., of political funds. A great deal of the income under consideration relates to funds which came into my possession in a purely political way. With absolute honesty I can tell you that I owe no tax whatever for the years 1937 through 1939. I may not be in a position to disprove every item of income in your letter, however, that is my misfortune and hence this offer in settlement. It will be expensive for me to litigate this matter and various trips to New Orleans for conferences, etc., have already been somewhat costly to a man of my modest means. In this connection I might add that, financially, I am not one-half as stable today as I was before 1936 during which year I became Lieutenant Governor, the first high political office held by me.

I hate to burden you with the above statements; however, those are the facts that are pertinent to the issues involved. In closing let me thank you and your staff for the courteous treatment which I have been accorded throughout the entire time when this matter has been in your Department, and may I add that I trust that this most substantial offer in settlement will, in due course, be accepted.

Respectfully submitted.

EARL K. LONG.

There, Mr. Speaker, is Earl Long's position, as stated in 1944, and today, February 16, 1948, it has not changed in the slightest. It is the same today as it was then, when this case which my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] tells you is not settled and that there is an assessment of over $100,000 against Mr. Long, including fraud penalty. His position today is the same as it was then. He does not owe any fraud penalty. As far as the tax assessment is concerned, it was settled, definitely and finally, in 1944, and it is not an open matter. But now let me carry you a step further. After the Government had accepted this payment of money and Mr. Long thought the case was closed, for reasons best known to themselves, an attempt was made to collect an amount of some fifteen hundred dollars additional from Mr. Long. Now you know and I know what the law is. There are only two penalties assessed against income-tax returns. One is a negligence penalty of 5 percent of the additional amount imposed for not keeping adequate records, and the other is 50 percent, which carries with it the implication that fraud has been committed.

What did Mr. Long do when presented with this additional $1,500 claim? Did he pay it? Did he, as my friend and colleague the gentleman from Louisiana [Mr. DOMENGEAUX] says he did, and I quote him again; the gentleman from Louisiana [Mr. DOMENGEAUX] said this:

I charge that Earl K. Long has agreed to pay this tax liability, including fraud penalty.

There are no if's and and's in that statement. There are no ambiguities; there are no innuendoes. That is a direct statement, an absolute and affirmative statement, an absolute and affirmative statement by my colleague, the gentleman from Louisiana [Mr. DOMENGEAUX] that Earl Long did agree to pay a tax liability amounting to over $100,000, including a fraud penalty.

Now here is the truth. Earl Long refused to pay $1,500 or 15 cents because he said he was not guilty of fraud, and in his own words as told to me only recently, and I quote him:

I will see icicles in hell before I pay because I am not guilty and do not intend to pay a fraud penalty.

Now, why do I say that?

Here is the documentary proof taken only last week, last Tuesday, as a matter of fact, from the income-tax files of Earl Long in the Bureau of Internal Revenue, proving that Earl Long refused to pay any fraud penalty, or any other kind of penalty.

It is dated October 20, 1944, and says to the Internal Revenue agent in charge, and I quote:

In the absence of an agreement with your office as to the proposed penalty, it is requested that the above case be referred for a hearing before the New Orleans office of the southwestern division of the technical staff.

There, Mr. Speaker, is the official document which I asked unanimous consent to place in the RECORD at this point:

[Treasury Department, Internal Revenue Service]

OCTOBER 20, 1944.

In re: Mr. Earl K. Long, Winnfield, La. Income tax, calendar years 1937, 1938, and 1939.

INTERNAL REVENUE AGENT IN CHARGE,
New Orleans, La.:

In the absence of an agreement with your office as to the proposed penalty, it is requested that the above case be referred for a hearing before the New Orleans office of the southwestern division of the technical staff. It is understood that the technical staff will not consider substantial issues or important evidence which have not been previously presented to your office.

EARL K. LONG,
Winnfield, La.

Does it say that Mr. Long agreed to pay a fraud penalty?

No; a thousand times, no; it says in clear and distinct language "In the absence of an agreement" and it is signed "Earl K. Long."

And until this date, this hour, this minute, Earl Long has not only not agreed to a so-called fraud penalty, but the Government has not directed a fraud penalty against him.

Let me elaborate here. I am reliably informed that only one agent out of the many participating in the conference, stood out for a fraud penalty, and the rest, at the worst, suggested that a 5-percent negligence penalty should be assessed against Mr. Long because he did not keep adequate records. May I say that Mr. Long has refused to pay even that penalty.

Let me say further in passing that I am reliably informed that Mr. H. G. Bates, who is an outstanding revenue agent and who investigated Mr. Long, if allowed to do so would readily say to you what he told Mr. Long during the conferences. That his recommendations were accepted by the Government in ninety-nine and nine-tenths of the cases, and in fraud cases all his recommendations were accepted, and his recommendation in this case is that there is no fraud.

Now we come to the third phase of the charges made by my colleague the gentleman from Louisiana [Mr. DOMENGEAUX] that there is an agreement between Earl Long and the Bureau of Internal Revenue to withhold the conclusion of this alleged fraud penalty until after the election. I tell you categorically and emphatically there is no such agreement. Now here are the facts.

After this matter was referred to the technical staff in 1944 at the request of Mr. Long, he asked that it be disposed of as expeditiously as possible. You

know and I know that the Bureau of Internal Revenue is terribly overworked. They are away behind in many of their cases because of lack of funds and other reasons. That may have been the reason, I don't know. There may have been over reasons which are not known to me, but the facts are that repeatedly and insistently since 1944 when this protest was filed, Mr. Long has continuously asked for a settlement and an opportunity to prove in a tax court, if necessary, that he was not guilty of fraud and did not owe a fraud penalty.

And that, Mr. Speaker and ladies and gentlemen of the House, is where the case rests today. Oh, what a different story to the charges made here. What a different picture to the one being painted in Louisiana by a hostile press.

The whole story of this incident does not end here.

Just before the first primary in which Earl Long led his closest opponent by some 120,000 votes, Mr. Long challenged his principal opponent, former Governor Jones, to make a statement of his, Jones', income tax during the time he was governor and immediately afterward, and to indicate thereon the sources of his income from various corporations which may have resulted from the fact that Mr. Jones was Governor of Louisiana.

I understand from the daily press that Mr. Jones last week submitted total sums of net income, but did not reveal the source of income as requested by Mr. Long. Mr. Jones' income as stated by him is a matter of record through the public press and the radio of Louisiana. In addition to this he also issued a statement in which he gave permission to the internal revenue collector to let anybody examine his income-tax returns. Of course, this statement is merely a camouflage and a red herring across the trail, because as I have shown you this afternoon, nobody, except the taxpayer or his accredited attorney, can examine those records. So, of course, such authority is merely issued for effect. It is only a grandstand play.

In contrast to the ambiguous manner in which Mr. Jones issued his statement on his own authority, I now read to you over the signature of Charles Donnelley, collector of internal revenue at New Orleans, a statement of the income taxes paid by Earl Long since 1935. This statement was submitted to Mr. Long by Mr. Donnelley at Mr. Long's request, and Mr. Long, in turn, has submitted the information to me for presentation at this time. It is most interesting, Mr. Speaker, and ladies and gentlemen of the House, to note the amounts of these returns, in view of the charges made on this floor as to the alleged huge sums of money which Mr. Long is alleged to have obtained through his official position as Lieutenant Governor and Governor of Louisiana.

In 1935 he paid a tax of $89.19.

In 1936 he paid a tax of $111.95.

In 1937 he paid a tax of $1,482.60.

In 1938 he paid a tax of $1,295.87.

In 1939 he paid a tax of $959.47.

Now I call your attention that the years 1937, 1938, and 1939 include the protested additional tax.

In 1940 he paid a tax of $211.68.

In 1941 he paid a tax of $121.27.

In 1942 when the taxes began to go up in this country, as we all know, he made enough money to pay $134.22 in tax.

In 1943 he paid $143.76.

In 1944 he paid no tax, but got a $16.28 credit to his estimated tax of 1945.

In 1946 he paid a tax of $442.50.

Now, Mr. Speaker, I will not burden you by reading Mr. Donnelly's letter in full which reflects Earl Long's returns since the year 1920. Instead I ask unanimous consent to place the letter of the Internal Revenue collector in New Orleans in the record at this point. It speaks for itself and I direct your attention to the fact that for the years 1928 to 1933 no income taxes were filed by Mr. Long.

During these years Mr. Long was attorney for the inheritance tax collector of the State of Louisiana and under the then existing law his returns were not taxable.

I particularly direct your attention to the last paragraph of the letter of the Internal Revenue collector of New Orleans which says, and I quote:

> The records of this office disclose that all taxes certified to me for collection for all the years in which returns were filed by you have been paid in full and that no penalties were assessed against you in any way for these years.

But, Mr. Speaker, Mr. Long has gone further than obtaining this letter from Mr. Donnelly in an effort to bring out the truth. He also wrote to George J. Schoeneman, collector of internal revenue, in which he asked him to furnish him—Long—his returns for the years 1916 through 1940 and told Mr. Schoeneman that it is essential that he have these in his possession immediately. Could anybody have done more to get the facts to the people? I ask unanimous consent, Mr. Speaker, to include Mr. Long's letter to Mr. Schoeneman in the record at this point. We have nothing to hide.

FEBRUARY 13, 1948.

Hon. GEORGE J. SCHOENEMAN,
Commissioner of Internal Revenue,
Washington, D. C.

DEAR MR. SCHOENEMAN: Please furnish me copies of income-tax returns filed by me for the years 1916 through 1940.

I am making this request because I am advised by Mr. Charles Donnelly, collector of internal revenue at New Orleans, that my income-tax returns for the years recited above are not in his office. He informs me that the said returns are in the possession of your office at Washington.

It is essential that I have the above immediately and your cooperation in this connection will be appreciated.

Thanking you, I remain,

Respectfully yours,

EARL K. LONG.

P. S.—I realize that for some of the above years my income may have been insufficient to require the filing of a return.

FEBRUARY 13, 1948.

Mr. EARL K. LONG,
New Orleans, La.

DEAR MR. LONG: I wish to acknowledge receipt of your letter of February 13, 1948, in which you request that I furnish you copies of all income-tax returns filed by you for the years 1916 through 1946, inclusive. You also desire a complete transcript be furnished you covering all income taxes paid by you, including the amount of taxes actually paid during each of the years as stated above. You further request to be advised if all assessments for income taxes certified to me for collection for the said years have been paid in full and you ask to be informed if any penalty has been assessed against you and certified to me for collection during the period referred to above.

With reference to your income-tax returns, I will advise that none of your returns filed for years prior to the taxable year 1941 are in my office. Returns for the taxable years prior to 1941, filed on Form 1040, were filed with the collector of internal revenue and transmitted by the collector to the Commissioner of Internal Revenue, Washington, D. C. and are, therefore, now in the files of the said Commissioner. Copies of returns for the years 1941 through 1946 have been prepared in this office and are transmitted with this letter.

There are no income-tax records existing in this office for years prior to the taxable year 1918 and it must be assumed that these records were destroyed with the sanction of the Congress, since this is the usual procedure as regards Federal records.

Below I am listing a complete transcript of your income-tax account with this office, showing the taxable year, the amount of tax assessed, the amount of tax paid and the dates of such payments:

Year	Amount of tax assessed	Amount paid	Date of payment
1918 (nontaxable return filed)			
1919 (nontaxable return filed)			
1920 (no return filed)			
1921 (no return filed)			
1922	$15.00	$15.00	Mar. 14, 1923
1923	46.00	46.00	Mar. 21, 1924
1924 (no return filed)			
1925 (nontaxable return filed)			
1926	9.11	9.11	Mar. 9, 1927
1927 (nontaxable return filed)			
1928 (no return filed)			
1929 (no return filed)			
1930 (no return filed)			
1931 (no return filed)			
1932 (no return filed)			
1933 (no return filed)

The records of this office disclose that all taxes certified to me for collection for all of the years in which returns were filed by you have been paid in full and that no penalties were assessed against you in any of these years.

Sincerely yours,

C. A. DONNELLY, *Collector.*

So there, Mr. Speaker, is the complete story. This is the factual story of the income tax of Earl K. Long. I am not a prophet nor a clairvoyant, but if I could judge the future by what has happened in the past I dare say that 4 years hence if Earl Long is a candidate for public office in Louisiana, and the same procedure follows, the millions of dollars which are now being expended in Louisiana in an effort to elect Sam Jones governor will be charged against Earl Long and he will be called upon once again to prove his innocence, which he has always done.

And now, Mr. Speaker, I yield to my friend and colleague the gentleman from Louisiana [Mr. DOMENGEAUX] or any other Member of this House to any question which he cares to ask and which I shall attempt to answer as fully as I can, adhering strictly to the facts and the record in the case.

Mr. Speaker, we have eliminated all of these charges. Here is the documentary proof, the photostatic copies, which show the true situation. It is with pleasure I give them to my friend for his examination and use. Let him look at them. He has them now. I state to him now that he can ask any question he desires to ask me, he can challenge me in any way in which he wants to challenge me. I yield to him for whatever purpose he desires.

Mr. DOMENGEAUX. I thank the gentleman. Of course, I want to ask the gentleman to yield to me for the purpose of making a statement. He has kindly consented to allow me sufficient time within his hour to make that statement.

Now, I want to ask you a question, please.

Mr. HÉBERT. Well, do you want to ask the question or make a statement first?

Mr. DOMENGEAUX. Yes; I would like to ask you several.

Mr. HÉBERT. Certainly; anything.

Mr. DOMENGEAUX. You gave a prepared statement to the press, a copy of which you gave me, and which you rather carefully followed in your presentation before the House. I notice, however, that in your prepared speech you stated that, "I shall substantiate this refutation with photostatic copies of Earl K. Long's income-tax return." I notice, Mr. HÉBERT, that you did not present that income-tax return at this time.

Mr. HÉBERT. That particular income-tax return will be presented immediately. I did not think it was necessary to present that particular thing, since I presented the income-tax findings.

Mr. DOMENGEAUX. Will the gentleman kindly present the income-tax returns for 1937, 1938, and 1939?

Mr. HÉBERT. I shall be very happy to do so, because there is nothing to hide.

Mr. DOMENGEAUX. Well, present them.

Mr. HÉBERT. Well, I do not have them at the present time, because there are some three trunkfuls of checks. We did not photostat everything down there we had. We photostated the pertinent and concluding documents.

Mr. DOMENGEAUX. Will the gentleman yield?

Mr. HÉBERT. Yes; certainly.

Mr. DOMENGEAUX. The gentleman in his statement to the press, and in the copy of the paper that he gave to me, states that, "I will substantiate what I have said in refutation of the DOMENGEAUX charges by the presentation of the tax return in question."

Mr. HÉBERT. I am glad the gentleman from Louisiana has read on further. I said I would refute what he has said. He has said that Earl Long is charged with a $100,000 fraud, and has agreed to pay it, and the gentleman here read documents showing that that is not a true statement.

Mr. DOMENGEAUX. Will the gentleman present the income-tax return? He will not do it, and I will tell you why, because his income-tax return on the face of it, in red ink, shows the marking of fraud penalties. That is the reason why.

Mr. HÉBERT. Of course, I have only access to the legal ways of getting documents out of the Bureau of Internal Revenue. I have only legal means.

Mr. DOMENGEAUX. You had that legal record, Mr. HÉBERT.

Mr. HÉBERT. As far as I am concerned, the record will speak for itself at this point, that the gentleman from Louisiana [Mr. DOMENGEAUX] has said Earl K. Long has agreed to pay a fraud penalty; that he has said Mr. Earl Long has pleaded guilty; that he has said Mr. Earl Long owed $100,000 to the Government. And, I again submit, Mr. Speaker, the documentary evidence does not substantiate those statements, and when he continues to read what I have said, he will read into the RECORD exactly the facts.

Mr. DOMENGEAUX. You have kindly consented to allow me the balance of your time to make my presentation, for which I thank you.

Mr. HÉBERT. I agreed to allow you whatever time you needed, because I will ask for an extension of time afterward, if you do not mind.

Mr. DOMENGEAUX. Fine, and I will be happy to answer any questions you may want to ask.

Mr. HÉBERT. Do you want me to interrupt you or wait until you have finished?

Mr. DOMENGEAUX. Just leave those documents there.

Mr. HÉBERT. Oh, I will leave them there; do not worry.

The SPEAKER. The gentleman from Louisiana [Mr. HÉBERT] yields to the gentleman from Louisiana [Mr. DOMENGEAUX].

Mr. DOMENGEAUX. Thank you, Mr. Speaker, and thank you, my colleague, from Louisiana, for yielding to me to make a statement with reference to the matter which you and I are presently vitally interested in. I am very much concerned, and very, very much disturbed, because I think that my good friend would not attempt to come upon this floor and make a statement that would be based upon subterfuge and would deliberately and intentionally not give the true and correct facts of this case.

Now, this whole thing depends upon one particular thing. Now, my friend has brought in some documents which do not amount to anything at all, as I will show you in a very short time. But, the important thing is the tax return. It is very, very peculiar that my friend and distinguished colleague from Louisiana made in his statement the very positive and unequivocal statement that he was presenting in evidence the photostatic copies of the income-tax returns of Earl K. Long. Now, my friends, I do not know why the gentleman from Louisiana [Mr. HÉBERT] made that statement, if he is able to say that at this time, and not want to produce the evidence, notwithstanding the fact that he allowed this statement to go out to the press of Louisiana and the press of this country, in which he leaves the implication that he has submitted to this House the photostatic copies of the income-tax returns of Earl K. Long. If he has them, I will be very glad to see them. My inclination is that the reason he has not presented them at this time is that those returns contain on the face of them a notation in red ink to the effect that they contain a fraud penalty. That is the reason why the gentleman from Louisiana [Mr. HÉBERT] I think is not willing to present them at this time.

I am going to mention a few other things on which my colleague bases the entire case. He bases the entire case upon a few tax receipts signed by Mr. Earl K. Long and signed by the Bureau of Internal Revenue. He also attempts to show the amount of money involved in this case by an unidentified and unauthenticated document, a plain sheet of paper which has no possible significance whatsoever. He attempts to show that that was the amount in agreement between Mr. Earl K. Long and the Bureau of Internal Revenue. He presents a series of documents that are waivers. The gentleman from Louisiana [Mr. HÉBERT] is trying to indicate that if Mr. Long was guilty he would not sign the waiver. The reason a man signs a waiver, if I may so inform the gentleman from Louisiana, when a question of tax deficiency or possible fraudulent taxation is raised against him, is that if he does not sign that waiver they are going to bring him into court or file a tax assessment against him. That is elementary. So it was the most natural thing in the world for Mr. Long to do, to prevent a disclosure of his vicious tactics in defrauding the people of the State of Louisiana throughout these years by signing these tax waivers, so that the people of the State of Louisiana and the people of this country would not know of those practices in which he has been engaged.

This letter he wrote is a self-serving declaration. Of itself it is a condemnation and an indictment of Mr. Long's present situation before and with the Income Tax Division. In that letter he says:

> I attach hereto a schedule of proposed adjustments, net income for the years 1937, 1938, and 1939, as a basis on which we can settle this matter. I see no reference or identification or offer of such schedule as you have made in this other matter. Also, in the last paragraph you say, "And may I add that I trust that this most substantial offer in settlement will in due course be settled."

I want to bring out another very significant fact, which has brought to my mind a great suspicion, existing in the activities and conduct of the Bureau of Internal Revenue in the settlement of this case. I should like to have an explanation as to why, shortly after I made these charges, Mr. C. A. Donnelly, Collector of Internal Revenue for the division of Louisiana, came out with a statement that was put in a paid advertisement of Earl K. Long, in which he said that research of his records indicated that there was no tax lien or deficiency assessment against Earl K. Long.

Mr. Speaker, insofar as that statement is concerned it was true, but my charges were that there was presently a tax matter involving fraudulent claims against Earl K. Long in the technical staff of the Bureau of Internal Revenue in the city of New Orleans and in the Dallas office. That was the statement I made. Mr. Donnelly knew, or should have known about that at that time, as Collector of the Bureau of Internal Revenue, that it was not in his office—just as this statement that he makes here today, a most ridiculous thing.

I am surprised that my friend credits us with so little intelligence as to bring in a statement which is only for home consumption in the State of Louisiana, signed by C. A. Donnelly, in which Mr. Donnelly reaffirms that his office discloses that "all taxes certified to me for collection in the years in which returns were filed by you have been paid in full and that no penalties were assessed against you in any of those years."

My dear friend and colleague from Louisiana, you know very well that that is a normal statement, possibly signed by an interested collector of internal revenue. But the fact still remains that the collector of internal revenue in the city of New Orleans or in any other office in the United States is not called upon to determine whether or not there are any tax penalties or whether or not there are any deficiencies until such matters are actually presented to him for actual consummation and collection of the taxes. So in this case Mr. Donnelly could say this about me, or he could say this about anyone, and likewise he could have said it about Al Capone. Had the original tax returns of Al Capone been filed in the city of New Orleans, he could have said that the original tax return filed by Mr. Capone was filed properly and the taxes paid thereon and no penalties were made, notwithstanding the fact that subsequently within that same office, substituting New Orleans for Chicago, tax penalties and fraud penalties thereon were paid. So this statement signed by Mr. Donnelly is not worth the paper it is written on, and is only given for the purpose of subterfuge and to bluff the people of the State of Louisiana into believing that Earl K. Long is a decent, respectable individual.

Mr. Speaker, I think that I have refuted completely these arguments and have shown that these documents have been brought in to try to hoodwink me and try to hoodwink the Congress and try to hoodwink the people of the State of Louisiana and have shown that these arguments are completely squelched as not having any bearing upon this case, and cannot be considered in the true light of what the real facts and conditions are.

The SPEAKER. The time of the gentleman from Louisiana has expired.

Mr. HÉBERT. Mr Speaker, I ask unanimous consent that I may be allowed to proceed for 15 additional minutes.

The SPEAKER. The Chair would remind the gentleman that there are other special orders.

Mr. DIRKSEN. Mr. Speaker, I find myself in some difficulty. I just came out of a committee where we are making up an appropriation bill and time is of the essence. I hoped that I could make my statement and then whatever arrangement it is desired to make subsequent will be all right.

Mr. DOMENGEAUX. I shall be happy to give way at this time.

The SPEAKER. The Chair wishes to state that following the gentleman from Illinois the gentleman from Massachusetts [Mr. HESELTON] and the gentleman from Louisiana [Mr. LARCADE] have special orders.

Is there objection to the request of the gentleman from Louisiana [Mr. HÉBERT] that he may proceed for 15 additional minutes following the address of the gentleman from Illinois [Mr. DIRKSEN]?

There was no objection.

EXTENSION OF REMARKS

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the RECORD.

Mr. WILLIAMS asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

Mr. SHORT asked and was given permission to extend his remarks in the

RECORD by having printed an address recently delivered by the gentlewoman from New York [Mrs. ST. GEORGE].

THIRTIETH ANNIVERSARY OF LITHUANIAN INDEPENDENCE

Mr. SASSCER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. SASSCER. Mr. Speaker, today marks the thirtieth anniversary of the declaration of independence by the people of Lithuania. It is an occasion celebrated throughout this country not only by our citizens of Lithuanian ancestry but by all freedom-loving Americans. We continue to observe this day for although Lithuania is again under the domination of a foreign power, the United States recognizes the Lithuanian minister and we still consider Lithuania an independent state.

Following the signing of the declaration of independence on February 16, 1918, Lithuania and Soviet Russia signed a peace treaty on July 12, 1920, in which Russia "renounced for all time sovereign rights over the Lithuanian people and their territory," and later, on September 28, 1926, both countries signed a pact agreeing "to respect in all circumstances the sovereignty and territorial integrity and inviolability of each other."

Is it any wonder that Lithuania felt secure in her freedom as a sovereign state? Or that she should direct her plans and energies toward the advancement of peaceful and progressive pursuits? Her efforts during these 20 years were rewarded with remarkable progress in economics, education, agriculture, manufacturing, trade and commerce, national independence and growth. These gains were short-lived, however, for in October 1939 Russia and Germany divided eastern Europe, placing Lithuania in the Russian sphere, and in June 1940 the Russian troops moved in and thus established within her boundaries the usual Nazi-Communist pattern.

Germany and Russia went to war in 1941 and for the next 5 years Lithuania was a continuous battlefield. First the Russian Army marching through the country, then the Nazis drove the Russians out, and then the Russians again drove out the Nazis, the conqueror and vanquished alike leaving behind destruction, chaos, and death. Those Lithuanians who died in battle did not have the glory of going down in defense of their country, but were caught in the cross-fire of two ruthless war machines. When the Germans left in 1944 they left behind a holocaust similar to that left by the Russians when they were driven out in 1941.

Even with the cessation of hostilities, Lithuania, like so many of her neighbors, could not settle down into a peaceful recovery, for under the "protection" of Russia and behind the iron curtain, suffering, fear, and hardship still continue.

The culture, ideals, and language of the 3,000,000 people of Lithuania are far different from the ideologies of Soviet Russia. History has taught that Lithuania will not be absorbed or subdued by invaders or conquerors, for she has always retained her autonomy, in spite of the many times she has won and lost her independence since that first Lithuanian Constitution in 1529.

By joint resolution of the General Assembly of Maryland, passed while I was president of the Senate, this day is officially designated in our State as Lithuanian day.

I join with the many thousands of fine Americans of Lithuanian descent who are numbered among our best citizens in their hope for the reappearance of the life of freedom in the homeland of their ancestors.

EXTENSION OF REMARKS

Mr. SADOWSKI asked and was given permission to extend his remarks in the RECORD in two instances.

The SPEAKER. Under previous order of the House, the gentleman from Illinois [Mr. DIRKSEN] is recognized for 10 minutes.

HON. JAMES DOMENGEAUX

Mr. DIRKSEN. Mr. Speaker, I find myself in something of a predicament today, and that predicament springs from the fact that I believe one of our colleagues in this House is in jeopardy of political crucifixion and, I think, the destruction of his reputation for both personal and official integrity. Oddly enough, that predicament on his part comes about through a statutory inhibition. He is a Democrat, and, as a Republican it may seem strange on the part of some that I am advocating his cause today; but it is a case of simple justice with me, and it is a case of simple decency. I refer, of course, to the gentleman from Louisiana, the Honorable JAMES DOMENGEAUX. He openly and in good faith made some charges on the floor of this House that came to my attention. Those were subsequently made in his own State. He waived his constitutional immunity and he is a codefendant in a libel suit in that State for the sum of $1,000,000. In addition thereto, his personal and political integrity is at stake.

The specific charge that was made by the gentleman from Louisiana, Representative DOMENGEAUX, on January 15 before this House was that Earl K. Long, presently a candidate for the governorship of Louisiana, had failed to report a substantial amount of income for tax purposes, and that an assessment and a fraud penalty in excess of $100,000 is now pending against Earl K. Long in the Bureau of Internal Revenue.

In that statement the gentleman from Louisiana [Mr. DOMENGEAUX] further alleged that Earl K. Long had requested that the Bureau of Internal Revenue defer action on the case until after the election in that State on February 24.

Inasmuch as proof of the charges is not available to the gentleman from Louisiana [Mr. DOMENGEAUX] because of a statute which prohibits the Bureau from divulging information on income-tax matters except to the taxpayer himself the gentleman from Louisiana [Mr. DOMENGEAUX] finds himself in a dilemma now.

In setting forth my interest in the matter, first let me make clear that I am not unaware of the danger that is involved in endeavoring to pursue by formal action of this House every charge that may be made on this floor; and, secondly, let me make perfectly clear that I have no personal interest in the election in Louisiana. I do not know the contesting parties; I have never seen them. As a citizen of the United States, and since Louisiana is a part of the great sisterhood of the Union, I only express the hope that they have good government there; but other than that I have not the slightest interest in whom they select, because that is a matter for the people of the State of Louisiana to determine.

Then, too, it is doubtful whether I would have manifested any interest in this matter whatsoever, notwithstanding these charges that have been openly made on the floor of the House if it had not been for the full-page advertisement which appeared in some Louisiana newspapers, and I refer specifically to the Daily Advertiser, of Lafayette, La., which is dated Monday, January 19, 1948. It is a full-page ad, and it sets forth verbatim the libel petition that was filed in the civil district court of New Orleans against the gentleman from Louisiana, Representative DOMENGEAUX, and others, together with certain other statements which are of no immediate interest here. But in the upper left-hand corner of this full-page advertisement, set forth in a box in bold-faced type, there appears this statement. The headline is:

Long owes no tax. Statement of Charles A. Donnelly, United States collector of internal revenue for Louisiana, said he knew of no claim—

No claim—

against Earl K. Long.

So he included everything. There was no claim against Earl K. Long, said the collector. Now, this Mr. Donnelly is a responsible officer of the Bureau of Internal revenue in the Treasury Department who is quoted in a box in boldfaced type in this full-page ad:

I am not supposed to discuss individual income-tax cases. This is a confidential matter. But in justice to Mr. Long I must say that my office is not handling a single matter with reference to Earl K. Long.

Mr. Donnelly was correct. As the collector of internal revenue the matter has not gotten to him. But suppose you were a resident of the State of Louisiana or the city of New Orleans and you read that statement; you could not help but conclude that there was no tax case of any kind or character, anywhere, or any time, pending against a citizen of the State of Louisiana, by the name of Earl K. Long; and it is quite obvious that if any citizen read it he would come to that conclusion.

It is entirely possible that it may have been unwitting on the part of Collector Donnelly that he should be used, and I am sure in good faith, to become something of a political campaign instrument. Above that, however, the important thing to me in support of a resolution that I am asking the Rules Committee to act upon tomorrow—and I had hoped they would today is, that while a statement of the United States collector of internal

revenue is used by one group to make it appear that no tax case is pending against Earl K. Long, a Member of this body from that State is unable under the law to obtain the information with which to supply the proof for his charges. As everyone knows, truth is an answer to libel. The gentleman from Louisiana [Mr. DOMENGEAUX] requested that information from the Commissioner of Internal Revenue, and very properly—and let me emphasize this—the Commissioner has refused to make it available to him, because that is the law and it would be criminal for the Commissioner of Internal Revenue to make that disclosure. There is a penalty attached. The revenue code prohibits disclosure except to the taxpayer himself and there are only certain methods by which disclosure is made. One is to the Ways and Means Committee, one is to the Finance Committee of the Senate and one to the Joint Committee on Internal Revenue Taxation.

We are right now marking up the Treasury-Post Office appropriation bill for the fiscal year 1949. There is an estimate before us for $188,000,000 for the Bureau of Internal Revenue for collecting revenue. If the revenue has not been collected, as a member of that committee and as a long-time member of the Appropriations Committee, I am deeply interested officially, personally, and otherwise. I remember when Mr. Morgenthau came before our committee and in a secret session gave us so much testimony that it caused us to appropriate $16,000,000 extra some years ago for a drive on tax evaders in the country.

Here comes a very responsible Member of this Congress and makes a charge on the floor that found its way into 36,000 copies of the CONGRESSIONAL RECORD. It was published everywhere in the country. You see, the confidence of the taxpayer, large and small, is involved in this thing. That is why in my official and representative capacity at least I had to take judicial notice of that statement. So a week or 10 days ago for nearly 1½ hours I queried Mr. George Schoeneman, Commissioner of Internal Revenue, with respect to this matter behind the closed doors of the subcommittee. Obviously, he said to me, he was not at liberty to testify, which is quite right because the law provides he cannot testify except to the Finance Committee, the Ways and Means Committee, and the Joint Committee on Internal Revenue Taxation.

It is a singular thing, perhaps, that the Appropriations Committee through its subcommittees cannot get the Commissioner to testify. We do not have the right to ask him to testify, although when we raised this question as to whether there was any delay in this matter he said he was at liberty to say that there had not been. So by implication he indicated that a file was pending.

Now, Mr. Speaker, I measure my words carefully, and I do it on the basis of a reputation of 16 years here during which time I have carefully safeguarded any statement I have ever made, but I feel in justice I must make it.

The fact is—and I measure these words very carefully—first, an income-tax case is pending in the Bureau of Internal Revenue against one Earl K. Long; second, it is a fact that the Commissioner of Internal Revenue and others have knowledge thereof; third, this has been admitted in the testimony of the Commissioner of Internal Revenue before the Subcommittee on Appropriations for the Treasury Department; fourth, the case in question involves a very substantial sum of money; fifth, the case has been pending for a very considerable period of time; sixth, the case involves fraud.

If these propositions be true—and I am prepared to stake my reputation for veracity that they are true—shall we permit a statement by a United States collector of internal revenue, which is true as far as it goes, but leaves a completely mistaken impression and a mistaken inference, be allowed to stand and so prejudice and jeopardize a Member of this House, or shall the whole truth be disclosed?

Very definitely no case is pending in the office of the collector of internal revenue in New Orleans against one Earl K. Long. The file is in the office of the Bureau of Internal Revenue in Washington.

I do not now pass upon other questions which may arise in connection with this matter. I merely say that a case is pending, that the Commissioner of Internal Revenue has rightly refused to supply the information to the gentleman from Louisiana, Representative DOMENGEAUX or to the Subcommittee on Appropriations for the Treasury Department, and that this resolution under which the committee will be empowered to summon all data bearing on this matter is necessary to prevent what I would esteem to be a hideous injustice to a Member of this House.

I must emphasize that over the years the Committee on Appropriations has provided millions of dollars to enforce the revenue laws and to seek out tax evaders. Shall we now permit the cloak of statutory secrecy to stand in the way of an immediate and complete disclosure of all the facts? I am confident from the testimony supplied by the Commissioner of Internal Revenue to the Subcommittee on Appropriations that he will be only too glad to cooperate in order that he might have a full opportunity to defend the integrity of the Bureau and to exonerate it from any allegation that it may have been remiss in its duty.

Involved also is the confidence of the public because those charges have been publicly made and have been repeated in many sections of the country. We want the people to know that the Bureau of Internal Revenue is a very forthright and honorable agency of the Government, which seeks to perform its full duty and, therefore, we must untie its hands so that this matter can be fully disclosed.

So, this resolution which I have introduced merely empowers that subcommittee or a special committee to bring all the data on this matter to the committee, so we can make verification of it and make a statement and make sure that a hideous injustice to a Member of this House is not done. I must emphasize that over the years the Committee on Appropriations has provided millions of dollars to enforce the collection of revenue. You see, public confidence is involved here. Suppose the little fellow out in Galena, Mo., where our esteemed colleague, Mr. SHORT lives, or up in Connecticut, where JOHN LODGE lives, or up in New York, where STERLING COLE lives, would pick up that kind of a statement, and he knows he has to make his peace with the collector of internal revenue. Maybe he owes them $100 or $200, and he reads that statement, and he says, "If you can make it a big pile, the chances are you may be able to get away with it." You see, confidence in the Bureau of Internal Revenue is involved here; confidence in the structure of Government is involved, and frankly, you do not dare to bypass this thing because it is too important. I am confident from the statement made to the subcommittee that Mr. George Schoeneman, a man of honor and repute, who is the Commissioner of Internal Revenue, would be glad, for the sake of his own Bureau and for the sake of the Government service that he has served for more than 27 or 28 years, that this matter be brought to light, that the truth be disclosed, that the whole facts be revealed, and that a very honorable gentleman of this House, who enjoys and should enjoy every prerogative and every perquisite of this House ought to have an opportunity to make that proof, if the proof is available, and particularly so since the collector of internal revenue in New Orleans whose political persuasion I know nothing about, has unwittingly permitted himself to be quoted in a paid advertisement that Mr. Long owes no tax and that there is nothing pending in his office. It is an interesting inference, but it does not state the whole truth.

So, as a matter of justice, as a matter of common decency, that young man from Louisiana, who has served with honor in this body for a number of terms, is entitled to have his hands upheld if the truth and if the facts repose somewhere within an agency of Government today. I remind you gentlemen, it could happen to anybody in this House on either side of the aisle, so let us defend and protect one of our own, because he spoke in good faith, and make available the proof of the charges that he made, since such proof can be supplied only by a resolution.

SPECIAL ORDER

The SPEAKER. Under previous order of the House, the gentleman from Louisiana [Mr. HÉBERT] is recognized for 15 additional minutes.

Mr. HÉBERT. Mr. Speaker, I yield the 15 minutes to the gentleman from Louisiana [Mr. DOMENGEAUX].

Mr. DOMENGEAUX. Mr. Speaker, I wish to continue the statement I was making when the gentleman from Illinois was recognized for the time previously assigned to him.

I have listened with much interest to the statements of my colleague from Louisiana. He has seen fit to defend Earl K. Long, a candidate for Governor of Louisiana, and he has seen fit to question my reliability and veracity. Of course, that is his privilege. At the same

time I am somewhat puzzled by the views of the gentleman from Louisiana [Mr. HÉBERT], since I know that until very recently he had little or no respect for Earl K. Long. The gentleman from Louisiana, Representative HÉBERT, points with pride in his biography, published in the present Congressional Directory, to his part in breaking the Louisiana scandal that involved this same Earl K. Long and led to wholesale convictions of many of Long's associates.

The biographical sketch in the Congressional Directory with reference to the gentleman from Louisiana, Representative HÉBERT, states that he was—and I quote:

> City editor of the New Orleans States, which broke the Louisiana scandal on June 9, 1939, and which paper was subsequently awarded the Sigma Delta Chi plaque for "courage in journalism."

The present activity of my colleague, in rising to the defense of Earl K. Long, is so laudable and praiseworthy, and motivated, I am sure, by his devotion to Louisiana and the advancement of her people, that it should put him in line for consideration for another citation—that of courage in politics.

This, however, is all beside the point. I do not think Congress is interested in details of the Louisiana political campaign or in any views which either the gentleman from Louisiana, Representative HÉBERT, or I might hold in this connection. On January 15 I made charges on the floor of the House of Representatives and later publicly in Louisiana, to the effect that there was pending against Earl K. Long a fraud case by the Bureau of Internal Revenue because of his failure to report properly his income and to pay the tax due thereon. I stated further that Earl K. Long had requested the Bureau of Internal Revenue to delay action in this case until after the gubernatorial election in Louisiana. I also charged that the bulk of the income that was not properly reported consisted of funds Earl K. Long derived from ill-gotten sources while he was Lieutenant Governor and Governor of Louisiana from 1936 to 1940. Furthermore I stated that the Bureau of Internal Revenue had not exercised due diligence in collecting the tax and fraud penalties due on the unreported income.

After I made the charges I was accused of seeking congressional immunity despite the fact that I immediately repeated these charges in Louisiana where I did not enjoy congressional immunity. I wish to stress at this time that I made the charges in Washington originally because the information was available here in the Nation's Capital and I felt that the matter was of such importance that I was not justified in withholding the information from the citizens of Louisiana for one moment after I had established to my own satisfaction the authenticity of these charges. There was no element of timing involved. It was merely a coincidence that the information came to me only a few days before the first primary election in Louisiana. Had I received this information 2 or 4 or 6 months before, I would have made the charges then.

There is only one issue involved here and that is the truth or falsity of my charges. This is a matter that is properly the concern of the Congress of the United States because Federal laws and a Federal agency are involved. It is our duty, as Members of Congress, to see that the laws are properly executed, and that prompt and complete collection of revenue is effected. If I had any doubt about the truth of the charges I made I would not have followed the course I have taken since making these charges, because I have sought and am seeking to bring to light the documentary evidence which will verify what I have said.

Speech-making and unsupported statements cannot change the facts. The record is made and it is here in Washington. The gentleman from Louisiana [Mr. HÉBERT] has admitted the investigation. He has said that he could not see the interdepartmental files. He has produced only letters from Long. He admits that a claim is pending. He seeks to talk away the amounts involved by saying they were political contributions. This is no defense. He makes the typical defense—no records available. Most taxpayers charged with fraud make this same defense. All of you keep political funds separate, and none of you have any difficulties. What a convenient alibi.

To show you how diligent I have worked to make the facts known, and to show you how confident I am about the truth of my accusations, let me tell you what I have done since making the charges.

The Internal Revenue Code, title 26, section 55, United States Code, provides that income-tax data can be opened to inspection only by the Ways and Means Committee of the House or the Finance Committee of the Senate, or by a select committee of the House or Senate authorized by resolution of either body. On the same day I made the charges against Earl K. Long I was told by the gentleman from Minnesota, Representative KNUTSON, chairman of the Ways and Means Committee, that since the matter was one of much importance to the citizens of Louisiana and since my charges reflected on the diligence of the Bureau of Internal Revenue, he would cooperate with me in securing the necessary information. It so happened, however, that at that time and for several subsequent days the Ways and Means Committee was engaged in handling the tax bill and following that the chairman was called away from Washington, all of which delayed action by the committee in connection with my charges.

The matter was also brought to the attention of the subcommittee of the House Appropriations Committee that handles appropriations for the Treasury Department. This subcommittee requested of Mr. George J. Schoeneman, Commissioner of Internal Revenue, while he was before the subcommittee, that he offer the income-tax file of Earl K. Long for inspection by the members. This he refused to do, and he likewise refused to answer any questions pertaining to the file, on the grounds that he was prohibited by law from making such disclosures.

These developments led to the introduction of House Resolution 462 by the gentleman from Illinois, Representative DIRKSEN, which measure is now before the Rules Committee for consideration. This resolution provides for appointment of a select committee to make an investigation into this income-tax matter, which is the only course that can be followed under the law and the prevailing circumstances.

I wish to emphasize that the facts can be brought to light only by producing the record and the whole record, including the interdepartmental file, which the gentleman from Louisiana [Mr. HÉBERT] has not seen. The political speech of my colleague cannot alter one word or one figure or one point of the true facts. These facts will be made known; that you may be sure of.

My colleague reflects on the source of my information. Of course, he does not know this source, so his statement in that connection is of no consequence. On the other hand, we might consider the character, conduct, and reputation of the person upon whom my colleague relies for his information, no other than Earl K. Long himself, a person who defamed his own brother, his benefactor, before a senatorial investigating committee in the city of New Orleans, when he charged the late Governor and Senator Huey P. Long with receiving large sums of graft money from corporations; a person who evaded military service during World War I by means of false representation of dependency of a sick sister then living in Colorado; a person who while Lieutenant Governor of Louisiana in 1937 swindled the State out of $10,000 from a State agency for alleged services rendered, when in fact he rendered no such services, and when confronted with the charge, stated he had given the money to the widow of Huey P. Long; incidentally, she denied it; a person who received from Robert S. Maestri, former conservation commissioner of Louisiana and mayor of New Orleans, a magnificent farm property in Winn Parish, La., conservatively worth $60,000, for which Long paid only $3,000; Long refused to divulge the records of the State conservation department, which would have disclosed the enormous "hot oil" operations of the said Robert S. Maestri; the same person who when he became Governor of Louisiana for a period of 11 months after the resignation in 1939 of Gov. Richard W. Leche, used the powers of his great office to protect those guilty of plundering the State; the same person who contributed to the politicization of Louisiana's schools and courts; the same person who encouraged and personally benefited from the nefarious practice of the so-called deduct system or forced contributions from hard-working and underpaid State employees; the same person whom Elmer Irey, former Chief of the Intelligence Unit of the Bureau of Internal Revenue, charged received over $46,000 from these funds; the same person who deprived the people of Louisiana of free elections; the same person who perpetrated political dictatorship; the same person who debauched public morality in Louisiana and established the philosophy and theory of government whereby it was considered

smart and fashionable to steal public funds; the same person who blackmailed business interests into supporting him or remaining silent for fear of retribution in the form of increased tax assessments; all of these charges were made by me and documented. This is the same person that my colleague the gentleman from Louisiana is largely depending on for the truthfulness of the statements he is now making.

Even assuming—and this is the broadest expression of mere assumption—that what my colleague has said is true, he has admitted there are fraud claims pending against Earl K. Long. This alone should be sufficient. Fraud is not a matter of amount. The crime is in the willful intent to deceive and to defraud. Earl K. Long is guilty of this by the words of his defender and even in his own words uttered on every stump in Louisiana since I made my charges. It must be noted that prior to my making these charges, Mr. Long had never seen fit to tell the people of Louisiana that there was a fraud charge against him. On the other hand, his greatest claim for support has been that he has been investigated and reinvestigated—which is in itself a rather dubious distinction—and that nothing wrong has ever been discovered. Apparently Mr. Long, in his public discussions, has neglected to refer to this particular discovery of wrong.

At this time I wish to reaffirm my charges against Mr. Long. I made these charges upon unimpeachable information as the record will disclose when it is revealed. I now state that this information will be found in the files of the technical staff, the files of the intelligence unit, and in correspondence between the special agent in charge of the Dallas, Tex., division office and the Chief of the Intelligence Unit, Mr. Woiff, of the Bureau of Internal Revenue in Washington.

It is most important to note that none of the above files or data was seen by the gentleman from Louisiana [Mr. HÉBERT].

My colleague from Louisiana, even though he has indicated he will vote for the pending resolution, nevertheless endeavors to establish in the minds of Members of Congress that this is a matter involving only politics in Louisiana and is something in which Congress has no concern. I wish to remind him that it was he who helped to bring the Federal authority into Louisiana to clean up the State; and I may suggest to him that his present activities in defense of Mr. Long will, in the event of Mr. Long's election, in my opinion, return the same vicious philosophy and practices of government my colleague helped to destroy in 1939.

The House of Representatives is acting properly when it agrees to consider the charges I made against Mr. Long. The people of Louisiana are entitled to know the truth or falsity of these charges before they vote for governor on February 24. But above all, the House is justified in taking this action because the charges have been made by a Member of this body to the effect that the Bureau of Internal Revenue, an agency of this Government and a creature of Congress, has not been diligent in the collection of moneys due the Government.

The ridiculous figures produced by the gentleman from Louisiana [Mr. HÉBERT] showing the amount of tax paid by Mr. Long are not an answer. They prove nothing. I challenge the gentleman from Louisiana [Mr. HÉBERT] to produce, not the amount of tax paid wherein the fraud lies, but the income figures, even as admitted by Mr. Long.

Mr. HÉBERT. Mr. Speaker, I am sure the Members of this House enjoyed the political speech of my good friend the gentleman from Louisiana [Mr. DOMENGEAUX]. That is the same speech that has been made in Louisiana for years and years and years. Whether the people of Louisiana want Earl Long or not is up to them; not up to me. I just could not let it go by at this time without offering some little observation on what has been said. Let me say this, however, that I agree with the gentleman from Illinios [Mr. DIRKSEN] in that the truth shall be the best answer. I welcome that. I shall vote for his resolution, because that is what I want. I am merely expediting it by giving you the facts today, a little ahead of time. His committee will find out the same thing. We welcome that opportunity. I am in full agreement with him that the truth shall be known, but I believe, far more important than Members of this House hanging together to protect themselves, is the fact that the individual citizen outside of this body, who does not have the floor of this House under the cloak of congressional immunity, shall be protected, no matter how small that citizen may be.

When a Member can come to this floor and make charges without documentary evidence, then I think it is about time to change the rules of the House.

Comment was made about my opinion of Mr. Long and my association with Mr. Long in the past. Yes. I told you I did everything I could to get something on him, but I could not. But I do not want to see an innocent man condemned. I agree with Jefferson, that it is better that 99 guilty escape than that 1 innocent man be hanged. I do not want to condemn anybody who should not be condemned.

Now he wonders at my change of opinion. You heard my good friend from Louisiana stand on this floor and denounce, within the rules of this House, the gentleman from the Sixth District of Louisiana. Oh, you all remember that. That happened just a few weeks ago. Other Members of the delegation took the floor, also. I did not. You remember what they said about him. You remember he was a candidate for governor, and you remember what a terrible man he was. Do you know where that gentleman is today? Do you know where he is today? He is on the platform in Louisiana with Sam Jones, unashamedly, making political love to him day and night and sleeping in the same political bed with my colleague from Louisiana. Oh, do not throw stones at a house. You might get a brick.

Now, referring to this statement by Mr. Donnelly. Do not get the impression that Mr. Donnelly volunteered that statement that appeared in this page ad. Do not get that impression. A newspaper reporter went to Mr. Donnelly after the gentleman from Louisiana [Mr. DOMENGEAUX] had made his charges and asked him the question, thinking they would get something on him; and instead of that they got a statement of facts. Naturally, the people on the Long side published it. I want to say right now, and repeat what my friend has just now said, that I relied on Mr. Earl Long's word. I do not rely on Earl Long's word. I rely on the Bureau of Internal Revenue records that he, himself, relies on. He criticized me for putting forth the statement of the man Bates, without substantiation. I do not ask you to accept that figure. I showed you what happened. Then I showed you Form 870, where the figures were identical. I do not come here making unsupported and unsubstantiated statements. He has told you about the red writing on these records. Oh, how did my friend get to see those records? I could not see them with authority from Long. Was he legally shown the records? He tells you how they looked. He describes them. I think he should take us into his confidence and let us know who is running things down there. Perhaps Mr. DIRKSEN's committee would like to know that; they would like to know who is giving out information and why. Let me tell you, there are two things which the gentleman cannot escape. Read tomorrow in the RECORD what he said here on the floor today, and you will see where he did not repeat those two charges. You will see where he did not say: "I charge Earl Long with an assessment of $100,000. I charge Earl Long with admitting guilt of fraud." You will not see that in the RECORD. He has backed up because I have produced the proof here, the documentary proof. Throw everything else out of the window, forget the speech he has made and look yourself, and you will see the two charges he made are refuted by the documents themselves. And I say to him also: By the truth ye shall be known.

The SPEAKER. The time of the gentleman from Louisiana has expired.

READING OF WASHINGTON'S FAREWELL ADDRESS

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that on Monday, February 23, 1948, after the reading of the Journal, Washington's Farewell Address may be read by a Member to be designated by the Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER. Pursuant to the order of the House just made, the Chair designates the gentleman from Virginia [Mr. FLANNAGAN] to read Washington's Farewell Address on Monday, February 23, 1948.

EXTENSION OF REMARKS

Mr. MALONEY and Mr. KERSTEN of Wisconsin asked and were given permission to extend their remarks in the RECORD.

The SPEAKER. Pursuant to the previous order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 30 minutes.

THE OIL SITUATION

Mr. HESELTON. Mr. Speaker, earlier today I read a telegram which I received this morning from an oil and coal dealer in Pittsfield, Mass., in which he explained his difficulties in not being able to get any more oil after the 18th of this month, leaving all of his customers for the balance of the month without necessary fuel. In his telegram he asked me to advise what I could do to divert fuel oil to them. I also referred to a telegram I received Saturday afternoon over the signature of Mr. David Bruce, Assistant Secretary of Commerce, containing 501 words, but which boiled down to saying simply: "No, we cannot and we will not do anything about this export program."

There was one glimmer of hope in Mr. Bruce's telegram. He also advised me that on February 6 the Department had sent word to all the American missions in the various countries asking for current advice as to the petroleum requirements. Mr. Bruce said the answers to these requests were coming in by cable. The Secretary of the Interior, Mr. Krug, this morning admitted that cables had been arriving but he did not know what their contents were. Mr. Bruce did not indicate what any of these replies contained. I thereupon urged by telegram that action should be taken on the individual countries' allotments as rapidly as the cables arrived. I also want to suggest that in fairness to the American people, the Members of this Congress and the committee that has devoted so much time to this problem, that there also should be full and prompt publicity on the information these missions submit in terms of their studies. If this is not done by Tuesday or Wednesday, it seems to me perfectly proper and that the situation calls for Congress to consider at once the necessity of congressional action.

We are confronted now with the simple fact that the Secretary of Commerce who has the power—and who has used that power twice within a month and a half—to reduce and, in fact, embargo exports of petroleum products will not do so. In the interest of the American people, in the interest of our economy, in the interest of full production in this country, and in the interest of national security, I submit that it is necessary for us to accept the full responsibility of placing such restrictions as we deem wise upon these exports of vitally needed fuel oil which are daily going out of this country in terms not of hundreds but of thousands of barrels. I have received data as to export licenses granted for the export of aviation gas, motor gas, kerosene, gas oil, distillate fuel oil, and residual fuel oil from January 1 to February 11. I have added them up in terms of gallons, because so often people hear talk about barrels and they do not know what quantity a barrel contains, but they do know what a gallon means.

To my amazement, our Government has licensed for export in only that 42-day period 270,958,778 gallons of this desperately needed fuel oil. That is more, on the figures for 1946, than was consumed in the individual States of Connecticut, Rhode Island, New Hampshire, Vermont, and Maine. It falls just slightly short of the total amount consumed in Massachusetts.

Let us look at it in another way. This morning, before the Committee on Interstate and Foreign Commerce of the House, Mr. Krug, in response to a question I asked, said that we would undoubtedly have a gasoline shortage in this country next summer. He added that we probably will have another fuel-oil shortage next winter. Then he concluded by saying that we would have a gasoline shortage the following summer. We could not get him to state when the end of shortages would come.

Yesterday I made an estimate on the basis only of motor gasoline, mind you, that we have licensed to go out of this country. Most of it, I assume, has already gone and is irretrievably lost. Remember that figure of ninety-nine-million-odd. That is not for the full quarter. But let us be conservative about it. I multiplied that by four and came up with a figure for the full calendar year of an export of 396,000,000 gallons.

What does that mean in terms of State consumption? There are 24 States that consumed approximately that amount, not in 1 month but in the full calendar year. They ranged from a list of seven where the excess of exports will be more than what that State consumed and on the basis of the figures of consumption, the excess of exports will range from 3,000,000 gallons to 91,000,000 gallons. There are three other States where the range of excess is from 23,000,000 to 168,000,000. There are 10 where the excess is 198,000,000 to 293,000,000. It is a curious thing that that amount of exports would total the annual consumption in the State of South Dakota. With reference to the balance, in four of them the excess ranges from 302,000,000 to 337,000,000. In the other 24 States it runs from one-tenth to a half of that amount consumed there every year.

Mr. Speaker, those are facts we have to take into consideration. They are facts that are going to mean something. If we run into a gasoline shortage we are going to be asked why we did not do something about it. I suggest one thing we can do is to take the responsibility now of insisting legislatively that there shall be some type of embargo no later than the end of this week, and then we will measure the results of that against the doubts that some people have as to effects on the economies of other countries.

I have no doubt about what would have happened in Tahiti if they had not gotten that 1,260 barrels going to them in terms of a license issued by the Department of Commerce. They would not have been able to use their lanterns and their lights quite so long, they perhaps would not have been able to make a certain amount of copra, but they would not be cold, they would not become ill, and they would not be out of work. The same thing holds true with the 7,500 barrels of gas oil and distillate fuel oil going under license to the Fiji Islands in this same period.

Mr. Speaker, because I am deeply convinced that, not only in terms of the immediate future but in terms of the long-range problem, this Congress must address itself to the question of how we are going to handle this problem, I have today introduced a resolution, H. R. 5392, for the purpose of creating a National Petroleum Commission. Basically it follows the pattern of the Interstate Commerce Act creating the Interstate Commerce Commission. It provides for a separate agency. It does not exclude natural gas or any other type of petroleum products now being controlled by any other agency. It places full responsibility in that commission. I am not wedded to that as a single idea of how we are going to meet this challenge and discharge our responsibilities. I have done this reluctantly because I think industry has done a magnificent job. But they have not done enough, and they know that themselves. These charges are being made in their own trade papers. The more progressive and more realistic in the industry recognize it. The late Clyde Morrow stated emphatically in an editorial printed in the National Petroleum News that they must rise to this challenge. I say they must rise to it this week and not next summer and not next winter. I think the time has come for them to speak up as to how they are going to do this job, to tell the Congress what they have done, what they have not done, how they expect to close this gap and whether they, in fact, can close it. I think that is important for us to know. Too many may be engaged in exporting and too many may be selling this oil overseas for the dollar value that is involved in contrast to the dollar value on our east coast. I say the challenge is definitely laid on their doorsteps this afternoon, and unless they come up immediately—and by "immediately" I mean by the end of this week—with some concrete suggestions which will be accepted by the Members of Congress and which can be explained to these people who are dependent upon us, as this gentleman who wired me is, to do something for them, then I say they have to accept the yoke of some type of regulation. I know of nothing better than a full-time expert commission with full responsibility which can take charge of what is going on in all phases of the industry from production through refining, distribution and marketing. It is not something any single Member can do. It is not something any single committee can do. We have our other responsibilities. But, what we are dealing with is the heart blood of our American economy, and in my opinion it is the greatest single factor, aside from manpower, in the whole over-all problem of our national security.

Your people and my people have been very tolerant, but they are not going to put up much longer with these shortages and these high prices without something in the nature of a satisfactory explanation. If that explanation is not forthcoming during the assigned hearings before the House Committee on Interstate and Foreign Commerce on Tuesday,

Wednesday, and Thursday of this week, I am going to do my level best to get this bill which has been referred to that committee reported favorably and to get the other resolution reported favorably to stop this leakage of desperately needed oils to such places as Tahiti and the Fiji Islands and Cuba and Mexico and other places fortunate today in having a reasonably warm climate, in favor of these people in our own communities who have been suffering, are suffering, and will suffer unless we have the courage and willingness to do the job ourselves.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. The gentleman knows that the resolution which I introduced, H. R. 385, which passed out of the gentleman's committee, the Interstate and Foreign Commerce Committee, provides that the Secretary of the Interior be requested to furnish the House of Representatives full information in his possession concerning the amount of fuel oil, gasoline, petroleum products, and coal now available in the United States, and what steps the Government should take to make the proper and necessary supply available. I gather, because the Committee on Interstate and Foreign Commerce passed that out, that they feel that the Secretary of the Interior is unable, for one reason or another, or else will not make available the amount of coal and oil there is in the country today. It seems to me it is a very curious situation. Of course now, since it has the authorization of the Congress, I should think he would act.

Mr. HESELTON. I may be mistaken as to what actually happened, but the Secretary was before the committee this morning. He addressed himself primarily to the problem of synthetic oil. He was questioned, however, on a great many subjects, including the problem of exports, the Department having one vote in the Review Committee, which has the final word on what the export quota shall be. I was called from the committee hearing for a matter of half an hour, and whether or not he made any reference to it I just cannot say at this time. I do know that the Departments of Commerce, Interior, and State have furnished a volume of information. Unfortunately, it is the sort of thing that bewilders you rather than explains anything, I think. I just have not been able to get what I need out of it. I am sure the committee would be glad to have the gentlewoman look it over and see if she can find something of value.

Mrs. ROGERS of Massachusetts. When I appeared before the committee I heard some of the testimony by the experts, the heads of the different departments. I felt that they were shadow-boxing, they were not giving the information they had, and I could not understand it.

Mr. HESELTON. I wish I had with me the telegram to which I referred. I will put it in the RECORD. If that is not an example of "off again, on again, gone again, Finnegan," I never saw one. They say, "We went to the minimum in January, we have gone below the minimum now, and we cannot and will not go any further. But we are getting this information now from these countries and we will review it." What are they getting it for? For the purpose of proving they were right in the first or second instance, or did they tell these countries what the situation is here?

Mrs. ROGERS of Massachusetts. It is amazing that they have to go to those countries to find out what those countries are receiving from the United States.

Mr. HESELTON. There is more than that that is amazing in this thing.

Mrs. ROGERS of Massachusetts. It is a very mysterious, phoney sort of thing.

I know the gentleman has done a great deal of work on this subject.

Mr. HESELTON. The parliamentary procedure here sort of cramps my style, and I am talking to a lady, so I cannot express myself as emphatically as I have to them, but I assure the gentlewoman they know that I think it is plain ignorance of facts, combined with stupid stubbornness, from start to finish. That should be plain as a pikestaff to anyone who can read English and understands figures. It does not require an expert to understand that a barrel of fuel oil shipped overseas is a barrel less here.

Mrs. ROGERS of Massachusetts. What chance is there of a resolution declaring an embargo coming out of the committee? I know the gentleman has one and I had one. I suggested the President issue an embargo in December.

Mr. HESELTON. I want my colleagues to vote that resolution out, and I hope we shall act between now and Friday afternoon so that we can get it on the floor next week. I have only one vote on the committee, but I think I have some substantial support. The interesting thing, of course, is that in the face of the unanimous committee recommendation made on January 26 that they should stop these shipments until we knew where we were at; they cannot tell us where we are at. They do not know. The Secretary admitted this morning that he did not know what the situation was in many of these countries, or even if they are rationing end use in them. Who does know? It is their job to find out, it seems to me. More than that, it is their job to tell us, so we can tell the American people. The American people expect that of us, at the very least.

Mrs. ROGERS of Massachusetts. Apparently they expect the information to come from the back doors of the various embassies in the foreign countries, or the countries themselves.

Mr. HESELTON. I have no knowledge that they have screened a single request. The most remarkably stupid thing was that set-up they had of 1,600,000 to Japan and the Ryukyus, and then they came down to 100,000. If they were so wrong in first instance they may be wrong in both.

Mrs. ROGERS of Massachusetts. How does the gentleman explain the fact that President Truman has not issued an embargo on petroleum products as he did in connection with coal?

Mr. HESELTON. The only thing I can say is that when I wired the President on February 10, Mr. Connelly's letter to me advised that the matter had been referred to the Secretary of Commerce. The law we enacted calls for the Secretary of Commerce to exercise those controls. It also has a provision in it that requires the Secretary to certify that we are not injuring our domestic economy when he grants these licenses. So far as I know, there has not been a single case where that certification has been issued. How that can be acceptable to the Department of Commerce, in view of the fact that in the great State of Michigan there are still 200,000 people out of work, in view of the shortage of fuel which resulted in the shut-down in the Pittsburgh area, and in view of what is going on in our area, is just beyond my comprehension.

Mrs. ROGERS of Massachusetts. I took the matter up on December 4. The situation was bad then. If the Secretary of Commerce had declared the embargo, then there would have been no suffering or no work stoppage.

Mr. HESELTON. I hope the gentlewoman will keep up her work.

Mrs. ROGERS of Massachusetts. What we want is action, not talk.

Mr. HESELTON. You are quite right. We are exasperated, which may keep us warm but it will not warm homes in New England. Since we know that the Department of Commerce is satisfied with its decision not to do anything more, I assume the President will not order it to act. Therefore, the only source of action is the Congress. We have been more than patient. No satisfactory reasons have been advanced for this decision. We know that every day we delay now means a further loss of thousands of barrels. I realize we will have no important legislation on the floor this week but I hope we will be in a position to act next week. And that will give the Department another chance to follow the committee's recommendation. But, if it remains defiant, if it ignores the recommendation, I think we should—we must—legislate. Personally, I am now inclined to favor House Joint Resolution 317 as the fairest approach toward limitations in terms of historical users and the demonstrated critical situation here. While I understand that Ambassador Douglas left for England today, I am grateful for his endorsement of the base period set forth in the resolution and I have every confidence that he will express his opinion as to the desirability of some such legislation as soon as he has time to study the pending proposals. It is entirely characteristic of his honesty and ability that he should have commended the action of the Foreign Relations Committee on the ERP program in the face of the ill-judged and ill-considered demands from some quarters that Congress pass the bill as submitted to it, without crippling amendments. Congress has a responsibility in all these matters and I do not think it is going to evade it, just because the Department of Commerce thinks under some further limitation it might be just possible that to divert 1 gallon of kerosene from Tahiti to Massachusetts or 1 barrel of distillate from the Fiji Islands to Detroit will wreck the economies of those countries or just because such balder-

dash is echoed by one or two editorial writers or three or four columnists, well-known to be friendly stooges for some of the rule-or-ruin circles in some quarters downtown. I have located a bit of interesting information about our friends in Tahiti. They number 8,585. Pittsfield numbers 26,652. Tahitians got about nine-tenths of a barrel of fuel oil per capita from this shipment—about thirty-seven and eight-tenths gallons. That should light a lot of lights. Wednesday night a considerable number of people among Pittsfield's 26,652 face the prospect of 11 days of unheated homes.

I do not think that makes any more sense to you than it does to me. I sometimes wonder if some people really believe they can kid us up here indefinitely. One thing is clear—they are engaged in a desperate gamble. I suppose they hope, as we do, that the weather will become warmer here soon and that people will soon forget that they were made cold and sick and jobless by this piece of supremely arrogant indifference to their comfort and welfare. What the excuse will be when we go short of gasoline this summer I cannot guess. I think we might look into the exports of motor gas and also of eight-cylinder automobiles Americans cannot buy; the exports of Diesel engines, of oil-burning units, of oil-burning tractors. I certainly intend to have for you soon the full story of our exports to Russia, under this program, including that cargo of transformer oil last January which Under Secretary Foster said must have taken place last summer. But the more driblets of information we blast out of hiding, the more convinced I am that we need a full-time expert group checking every phase of the problem, as I have advocated in H. R. 5392.

It might not be a bad idea for the Department of Commerce to adopt a catchy slogan like "Millions of gallons for everyone else but not one drop for you." Then they could answer all our correspondence, as well as that of our constituents, inexpensively, by printing it on several million letterheads, with a short typed body such as "Dear Congressman: See our slogan. Please shut up."

Speaking for myself alone, I do not intend to stop talking, even though we need fuel oil, not oratory, until I find a program has been adopted which is logical and sensible, which is demonstrably one which has been carefully prepared based on known facts here and elsewhere, and which can be explained and will satisfy intelligent Americans who are demanding that we act now. This evasive, buck-passing, hesitating performance here, running back to last December is one no one can explain to date, no one has even attempted to do so except in terms of expressing personal conclusions and generalities unsupported by a scintilla of evidence.

I cannot help but wonder how so intelligent a person as the Secretary of Commerce can come before committees of this Congress advocating the creation of additional stand-by controls in the face of the actual facts of the use of existing export controls.

I include here a copy of my original telegram of February 10 to Secretary Harriman, a copy of the telegram from David Bruce, Assistant Secretary of Commerce, a copy of my reply to him, and a copy of the bill I introduced today, which has been numbered H. R. 5392 and which has been referred to the House Committee on Interstate and Foreign Commerce:

WASHINGTON, D. C., *February 10, 1948.*

Hon. WILLIAM A. HARRIMAN,
Secretary of Commerce, Department of Commerce, Washington, D. C.:

After careful consideration of the release today by the Office of International Trade, I have urged the President to authorize you to order the Office of International Trade to send a cable immediately, such as the following, to the Governments of Argentina, Australia, Belgium, British Honduras, China, Costa Rica, Cuba, Denmark, El Salvador, France, Guatemala, Honduras, Mexico, New Zealand, Norway, Republic of Panama, Philippines, Portugal, Sweden, United Kingdom, Netherlands, British West Africa, Switzerland, and French West Africa, "Because petroleum products are in critical short supply in this country and because we must insure that supplies in our shortage areas are substantially increased immediately, and because we may find it necessary to extend the existing restrictions beyond March 31 unless we can readjust the situation in this country promptly, we regret to advise you that we believe, in the interest of continuing production in this country, maintaining transportation, and public utilities, keeping our schools and hospitals and churches and other institutions and individual homes heated to a minimum degree, and in the interests of being able to assist your Government and your people, as the American people hope to do, we must ask you to accept a 50-percent reduction in the allocations to your country as announced by this Department on February 9, effective immediately." I strongly urge that you order the proper authorities in the War Department to immediately reduce the allotment to Japan and the Ryukus by the same percentage. I further urge that immediate consideration be given to the shipment of motor fuel oil to the above countries adding Brazil, Italy, and Paraguay. I do this because of the current reports that we are faced with a motor-gas shortage next summer which will be disastrous, not only to the farmers in many areas, including the First District of Massachusetts, but to the people dependent upon essential travel by automobile for entire annual income. Finally, I urge that the entire item of reserve be made available for shortage areas at once, specifically 399,000 barrels of other motor fuel, 147,000 barrels kerosene, 353,500 barrels gas oil and distillate fuel oil, and 151,000 barrels residual fuel oil, a total of 1,050,000 barrels of petroleum products. I hope to have an official report as to the daily amount of these needed oils which were shipped from the Gulf coast during the month of January and the first 10 days of February, which I know you will consider. Obviously, we shall be losing very substantial amounts daily unless you direct this action at once. Since existing law gives you full authority, as you testified before the Banking and Currency Committee last fall, I hope you will anticipate the gravity of this request by myself to the President.

JOHN W. HESELTON,
Member of Congress.

WASHINGTON, D. C.,
February 14, 1948.

JOHN W. HESELTON,
House of Representatives.

In reply to your telegrams of February 10 to Secretary Harriman and Blaisdell, I should like to give you the following information:

(1) Your suggestion that cables be sent to various governments represents an accomplished fact since cables went to American missions in all of these countries on February 6 requesting latest information regarding petroleum requirements in those countries and replies are now being received.

(2) The reduction announced on February 10 in quotas which had been previously established was based on our information regarding requirements of these countries on the basis of their present uses of petroleum products and after new consultations with the representatives of these governments in Washington. Our original allotments represented in our opinion the minimum amounts needed by these countries from the United States to maintain an already meager standard of petroleum use, and the reduction above mentioned represents a substantial reduction from that minimum.

(3) In view of known restrictions in the major consuming countries which limit use of petroleum products to highly essential uses and in view of further fact no limitation exists on uses of petroleum in United States for non-essential purposes, it is our conviction that we have already reduced total exports as far as is justified by the facts now available and that further reductions in supplies made available for export would affect adversely our relations with other countries, and accentuate serious economic conditions. However, we are reviewing all allocations again in light of current information being received by cable as indicated above.

(4) With regard to further limitations on shipment of motor fuels our present judgment is that further reductions would not add sufficiently to United States reserves to make material difference in the availability of these fuels in the United States during the coming season of high motor fuel use. However, this matter also is under review in light of effects on world distribution and on our own petroleum imports.

(5) The licensing reserve to which you refer is not a physical reserve of petroleum awaiting export, but is part of the over-all quota against which licenses may be issued if emergency needs develop. We have no power to direct petroleum products into any shortage area in the United States. The recipient of a license must find United States supplies which a domestic purchaser could have bought at any time without restriction. We shall continue to hold licensing to a minimum, but the elimination of the reserve from the quota would not channel any petroleum to any essential use in the United States.

(6) There is no assurance that a curtailment in exports of these petroleum products under discussion would be reflected in an increase in the supply of such products to regions in the United States where acute shortages of them now exist. There are no licensed exports of these products from east coast ports.

(7) We have submitted to Interstate and Foreign Commerce Committee data regarding licensing by ports including gulf ports from January 1 through February 11.

DAVID BRUCE,
Assistant Secretary of Commerce.

WASHINGTON, D. C., *February 14, 1948.*

DAVID BRUCE,
Assistant Secretary of Commerce, Department of Commerce, Washington, D. C.:

I acknowledge, with appreciation, your telegram this date. Am very happy to learn cables have been sent and replies are now being received. Hope this will enable Department to announce further revision first of week. May I take liberty of suggesting wherever possibility of such revision is indicated, prompt action be taken without delaying until entire report is received. I urge this because of obvious daily loss of vital

products through the export program. Am sure you will understand I cannot agree with general conclusions you have expressed. Certainly cannot reconcile them with fact Department has placed 100-percent embargo on exportation of three types of fuel oil to six countries, nor am I impressed with statement that original allotments represented minimum amounts needed in these countries, in view of fact original allotment of 1,600,000 barrels of gas oil and distillate fuel oil was reduced to 100,000 barrels to Japan and the Ryukyus. Would appreciate your specific comment on how you reconcile it. Finally, with reference to your statement that a recipient of a license must find United States supplies which a domestic purchaser could have bought at any time without restriction, in view of constant reports that it is more profitable to sell overseas than domestically, is it not clear that the profit motive makes it possible for holders of licenses to outbid the prospective domestic purchaser? I shall be anxious to discuss these and many other questions with you Tuesday morning. However, in absence of further affirmative action along the lines I have suggested by middle of next week, I shall feel compelled to urge House Interstate and Foreign Commerce Committee to accept this as a final refusal to further restrict exports in the interests of admittedly acute shortages in this country and to report out the legislative prohibitions contained in House Joint Resolution 317.

JOHN W. HESELTON,
Member of Congress.

H. R. 5392

A bill to create a National Petroleum Commission, and for other purposes

SHORT TITLE

SECTION 1. This act may be cited as the "National Petroleum Commission Act."

NATIONAL PETROLEUM COMMISSION

SEC. 2. (a) There is hereby created, as an independent agency in the executive branch, a National Petroleum Commission (hereinafter referred to as the "Commission"), to be composed of 11 commissioners appointed by the President, by and with the advice and consent of the Senate. Not more than six of such commissioners shall be members of the same political party. Six commissioners shall constitute a quorum of the Commission. The President shall designate the commissioner who shall serve as chairman of the Commission.

(b) The term of office of each commissioner shall be 7 years, except that (1) the terms of office of the commissioners first taking office shall expire, as designated by the President at the time of appointment, three at the end of 4 years, three at the end of 5 years, three at the end of 6 years, and two at the end of 7 years, after the date of the enactment of this act; (2) any commissioner appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and (3) upon the expiration of his term of office a commissioner shall continue to serve until his successor is appointed and has qualified.

(c) Any commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office and for no other cause.

(d) Each commissioner shall receive compensation at the rate of $12,000 per annum. No commissioner shall engage in any business, vocation, or employment other than that of serving as a commissioner.

(e) The Commission is authorized to appoint such employees as may be necessary to carry out its functions.

(f) The principal office of the Commission shall be in the District of Columbia, but the Commission may exercise its powers at any place.

FUNCTIONS AND POWERS OF THE COMMISSION

SEC. 3. (a) The Commission is hereby authorized, by regulations, to prescribe such prohibitions and requirements with respect to the production, refining, distribution, and sale of petroleum and petroleum products (including natural gas) as it deems necessary for the protection of the national security and economy.

(b) There are hereby transferred to the Commission all functions now possessed by any agency of the Government with respect to the regulation of the transportation or sale of petroleum or petroleum products (including natural gas).

(c) For the purposes of the exercise of any function transferred to it by subsection (b), the Commission shall have all the powers possessed, under existing law, by the agency from which such function is transferred, and for such purposes the provisions of law (including penalty provisions) relating to such function and powers shall be applicable.

PENALTY FOR VIOLATION OF REGULATIONS

SEC. 4. Whoever violates any regulation prescribed by the Commission under section 3 (a) shall upon conviction thereof, be punished by a fine of not more than $10,000 or by imprisonment for not more than 2 years, or by both such fine and imprisonment.

ORDERS, REGULATIONS, ETC.; TRANSFER OF PERSONNEL, PROPERTY, AND UNEXPENDED BALANCES OF APPROPRIATIONS

SEC. 5. (a) All orders, rules, regulations, authorizations, or other actions made, issued, granted or taken in the exercise of any function transferred by section 3 (b), and in effect at the time of such transfer, shall continue in effect to the same extent as if such transfer had not been made, until modified, superseded, or repealed by the Commission.

(b) No suit, action, or other proceeding lawfully commenced by or against any agency shall abate by reason of the transfer of any function by this act, but the court, unless it determines that the survival of such suit, action, or other proceeding is not necessary for the settlement of the questions involved, shall allow the same to be maintained, with such substitutions as to parties as are appropriate.

(c) No administrative action or proceeding lawfully commenced shall abate solely by reason of the transfer of any function by this act, but such action or proceeding shall be continued with such substitutions as to parties as are appropriate.

(d) In each case of the transfer of any function, by this act, from any agency to the Commission, there are hereby transferred to the Commission such personnel, property, records, and unexpended balances of appropriations of such agency as the Director of the Bureau of the Budget determines to relate primarily to the function so transferred.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 6. There are hereby authorized to be appropriated such amounts as may be necessary to carry out the provisions of this act.

EXTENSION OF REMARKS

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the RECORD and to include extraneous matter.

NEXT PRESIDENT TO BE FROM MIDWEST

Mr. KERSTEN of Wisconsin. Mr. Speaker, I ask unanimous consent to proceed for 1 minute.

The SPEAKER pro tempore (Mr. ALLEN of Illinois). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. KERSTEN of Wisconsin. Mr. Speaker, the next President of the United States will be a man from the Midwest.

I do not venture to predict who he will be other than to say he will be a Republican.

It is heartening, indeed, for a Midwesterner to read the newspapers and see how the Nation keeps turning its eyes for leadership to our territory.

The pioneering spirit of the Midwest, no doubt, has a great deal to do with it. The Nation is looking for a strong man for leadership, a man of conviction, in these trying times.

We have seen the Republican Party particularly looking to the Midwest to find such a man. We have seen much favorable comment about the able senior Senator from Michigan [Mr. VANDENBERG]. We have heard considerable talk about the senior Senator from Ohio [Mr. TAFT]. In my State, we have heard much about the capable Gen. Douglas MacArthur. Even Governor Dewey, of New York, is a native of Michigan. The latest addition to the Midwest roll of honored names—men of influence and ability— is that of Harold E. Stassen, the former Governor of Minnesota.

The latest Gallup poll reveals how popular the men of the Middle West really are. This poll shows that Stassen, who made a popular, efficient governor in our neighbor State, ranks a close second to President Truman in the Presidential election.

Discounting the Democratic South, Stassen actually surpasses the President in national popularity.

The results are surprising. I believe they are important enough to become a part of the CONGRESSIONAL RECORD, because we in Wisconsin are proud of the statesmen the Midwest has offered the country in time of need.

The national results of the Gallup poll are as follows:

	Percent
Truman	45
Stassen	41
Wallace	6
No opinion	6

Take out the South, traditionally Democratic, the results are:

	Percent
Stassen	44
Truman	42
Wallace	7
No opinion	7

Mr. George Gallup states that only Gen. Dwight D. Eisenhower was stronger in the trial heats with President Truman than Mr. Stassen. He is to be complimented for his fine showing, and I hope he fully appreciates the high regard with which the American people apparently hold him.

EXTENSION OF REMARKS

Mr. JENISON. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD and include an address delivered before the Kansas Republican Women's Convention in Topeka, made by my predecessor, Hon. Jessie Sumner.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

SPECIAL ORDER

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Louisiana [Mr. LARCADE] is recognized for 60 minutes.

Mr. LARCADE. Mr. Speaker, I requested this time because I thought perhaps I might be drawn into the political debate between my colleagues from Louisiana with reference to the Louisiana political situation. But in view of the fact that my name was not mentioned, I ask unanimous consent to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1583. An act to provide for the conveyance to the State of Maryland, for the use of the University of Maryland, of the northern portion of a parcel of land previously constituted a part of the campus of the university and previously conveyed by the State of Maryland to the United States for the use of the Bureau of Mines; to the Committee on Public Lands.

ENROLLED BILLS SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 422. An act for the relief of Francesco and Natalia Picchi;

H. R. 648. An act for relief of Mrs. Elfreida Sakowsky Passant, alias Elfreida Sakowsky, alias Elfreida Pogue;

H. R. 650. An act for the relief of Ruston Jamsetji Patell;

H. R. 928. An act for the relief of Riyoko Patell;

H. R. 1078. An act for the relief of Mrs. Audrey Ellen Gooch;

H. R. 1408. An act for the relief of August W. Dietz;

H. R. 1650. An act for the relief of Maria Hedwig Feresz;

H. R. 1788. An act for the relief of the estate of John F. Hopperton, a minor, deceased;

H. R. 2350. An act for the relief of Mrs. Daisy Park Farrow;

H. R. 3168. An act for the relief of Antone G. Pina;

H. R. 3503. An act to permit the issuance of unrestricted deeds for town-site lands held by Alaska natives, and for other purposes;

H. R. 3778. An act to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25); and

H. R. 4115. An act to quiet title and possession with respect to certain land in the town of Cheverly, Prince Georges County, Md.

ADJOURNMENT

Mr. ARENDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 32 minutes p. m.) the House adjourned until tomorrow, Tuesday, February 17, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1303. A letter from the Chairman, National Mediation Board, transmitting a copy of the Thirteenth Annual Report to Congress of the National Mediation Board, including the report of the National Railroad Adjustment Board; to the Committee on Interstate and Foreign Commerce.

1304. A letter from the Administrator, Federal Security Agency, transmitting the Annual Report of the Social Security Administration, for the fiscal year 1947; to the Committee on Ways and Means.

1305. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1948 in the amount of $300,000 for the legislative branch, Senate (H. Doc. No. 528); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LEONARD W. HALL: Committee on Interstate and Foreign Commerce. H. R. 3692. A bill to amend the Interstate Commerce Act, as amended, with respect to ownership or stock interest in freight forwarders; with an amendment (Rept. No. 1376). Referred to the Committee of the Whole House on the State of the Union.

Mr. GILLETTE: Committee on Interstate and Foreign Commerce. H. R. 4112. A bill to provide for the acceptance and use of funds for support of the national weather service supplementing the funds appropriated for the operation of the Weather Bureau of the Department of Commerce; without amendment (Rept. No. 1377). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WOLCOTT:

H. R. 5390. A bill to continue for a temporary period certain provisions of the Housing and Rent Act of 1947; to the Committee on Banking and Currency.

H. R. 5391. A bill to continue for a temporary period certain powers, authority, and discretion conferred on the President by the Second Decontrol Act of 1947; to the Committee on Banking and Currency.

By Mr. HESELTON:

H. R. 5392. A bill to create a National Petroleum Commission, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ANDREWS of New York:

H. R. 5393. A bill to amend further sections 10 and 12 of the Pay Readjustment Act of 1942, as amended (37 U. S. C. 110 and 112), relating to allowances; to the Committee on Armed Services.

By Mr. BOGGS of Louisiana:

H. R. 5394. A bill to provide for cancellation of certain unenforceable judgments on the records of the United States district courts; to the Committee on the Judiciary.

By Mr. BURKE:

H. R. 5395. A bill to establish a national memorial museum to Wilbur and Orville Wright at Oakwood, Dayton, Ohio, and for other purposes; to the Committee on House Administration.

H. R. 5396. A bill for the protection of homing or racing pigeons; to the Committee on Merchant Marine and Fisheries.

By Mr. DEVITT (by request):

H. R. 5397. A bill to amend the Railroad Retirement Act and related acts, as amended by the act of July 31, 1946, by granting credit for services performed prior to January 1, 1937, to persons who have 6 months of service between August 29, 1935, and January 1, 1947; to the Committee on Interstate and Foreign Commerce.

By Mr. JOHNSON of Illinois:

H. R. 5398. A bill to provide for making available the Government-owned alcohol plant at Muscatine, Iowa, for the production of products from agricultural commodities in the furtherance of authorized programs of the Department of Agriculture, and for other purposes; to the Committee on Agriculture.

By Mr. KEAN:

H. R. 5399. A bill to increase the benefits payable under the Federal old-age and survivors insurance system, to liberalize the eligibility provisions of such system, to extend the coverage provisions of such system to the self-employed, employees of nonprofit institutions, agricultural labor, and, under voluntary compacts, to employees of State and local governments, and for other purposes; to the Committee on Ways and Means.

By Mr. KLEIN:

H. R. 5400. A bill to continue a system of nurseries and nursery schools for the day care of under-school-age children in the District of Columbia; to the Committee on the District of Columbia.

By Mr. LYLE:

H. R. 5401. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, so as to provide annuities for investigatory personnel of the Bureau of Narcotics who have rendered at least 20 years of service; to the Committee on Post Office and Civil Service.

By Mr. McGREGOR:

H. R. 5402. A bill to equalize the rates of compensation payable for wartime and peacetime service-connected disabilities; to the Committee on Veterans' Affairs.

By Mr. McMAHON:

H. R. 5404. A bill to reduce postage rates on parcels containing food, clothing, or medicines mailed to certain foreign countries; to the Committee on Post Office and Civil Service.

By Mr. MACY:

H. R. 5405. A bill to provide for the protection of potato and tomato production from the golden nematode, and for other purposes; to the Committee on Agriculture.

By Mr. MILLER of Maryland:

H. R. 5406. A bill to authorize the purchase of a new post-office site at Princess Anne, Md.; to the Committee on Public Works.

H. R. 5407. A bill to authorize the purchase of a new post-office site at Federalsburg, Md.; to the Committee on Public Works.

H. R. 5408. A bill to authorize the purchase of a new post-office site at Snow Hill, Md.; to the Committee on Public Works.

H. R. 5409. A bill to authorize the purchase of a new post-office site at Berlin, Md.; to the Committee on Public Works.

By Mr. NODAR:

H. R. 5410. A bill to reduce postage rates on parcels containing food, clothing, or medicines mailed to certain foreign countries; to the Committee on Post Office and Civil Service.

By Mr. POULSON:

H. R. 5411. A bill relative to the promoton and pay of retired Army officers; to the Committee on Armed Services.

H. R. 5412. A bill to forbid the imposition of certain conditions on the interstate or foreign transportation of psittacine birds;

to the Committee on Interstate and Foreign Commerce.

By Mr. REED of New York:

H. R. 5413. A bill granting additional allowance for military and naval personnel; to the Committee on Ways and Means.

H. R. 5414. A bill to exempt from estate tax national service life insurance and United States Government life insurance; to the Committee on Ways and Means.

By Mr. STEVENSON:

H. R. 5415. A bill to amend Public Law 396, Eightieth Congress, which extends veterans' preference benefits to widowed mothers of cetrain ex-servicemen and ex-servicewomen; to the Committee on Post Office and Civil Service.

By Mr. WELCH:

H. R. 5416. A bill to promote the interests of the Fort Hall Indian irrigation project, Idaho, and for other purposes; to the Committee on Public Lands.

H. R. 5417. A bill to authorize the Secretary of State to waive the collection of certain loans; to the Committee on Foreign Affairs.

By Mr. WORLEY:

H. R. 5418. A bill to provide for the reconstruction of the dam on Wolf Creek, Perryton, Tex., and for the repair of the Rita Blanca Dam, Dalhart, Tex.; to the Committee on Agriculture.

By Mr. YOUNGBLOOD:

H. R. 5419. A bill to repeal the tax on oleomargarine; to the Committee on Agriculture.

By Mr. KEARNS:

H. R. 5420. A bill to provide a plan for greater opportunities of employment, for distribution to management and to labor certain amounts of corporate income, and for other purposes; to the Committee on Ways and Means.

By Mr. SADOWSKI:

H. J. Res. 328. Joint resolution authorizing the President of the United States of America to proclaim October 11, 1948, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

By Mr. FARRINGTON:

H. Con. Res. 151. Concurrent resolution authorizing the printing as a House document of a report entitled "The Economy of Hawaii in 1947" and authorizing the printing of additional copies thereof; to the Committee on House Administration.

By Mr. BLOOM:

H. Res. 467. Resolution creating a select committee to conduct an investigation with respect to debts owed to American citizens by foreign governments, municipalities, and corporations; to the Committee on Rules.

By Mr. HAGEN:

H. Res. 468. Resolution creating a select committee to conduct an investigation and study of the widespread suffering and detrimental conditions existing among the Indians in the United States; to the Committee on Rules.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of South Carolina, memorializing the President and the Congress of the United States to oppose legislation relating to the FEPC, antisegregation, and antilynching; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUCHINCLOSS:

H. R. 5421. A bill for the relief of the estate of James Patrick Hackett and Charles L. Stover; to the Committee on the Judiciary.

By Mr. BATTLE:

H. R. 5422. A bill for the relief of James Greenwood; to the Committee on the Judiciary.

By Mr. CARROLL:

H. R. 5423. A bill for the relief of E. Neill Raymond; to the Committee on the Judiciary.

H. R. 5424. A bill for the relief of Mrs. Silvia Mapelli; to the Committee on the Judiciary.

By Mr. FARRINGTON:

H. R. 5425. A bill for the relief of the estates of Nancy Masako Arakaki; to the Committee on the Judiciary.

H. R. 5426. A bill for the relief of John Waipa Wilson; to the Committee on the Judiciary.

H. R. 5427. A bill for the relief of the estates of Gertrude Ornellas and Barbara June Ornellas; to the Committee on the Judiciary.

H. R. 5428. A bill for the relief of the estate of Josephine Pereira; to the Committee on the Judiciary.

H. R. 5429. A bill for the relief of John Chi Chong Holt; to the Committee on the Judiciary.

By Mr. GWINN of New York:

H. R. 5430. A bill for the relief of the aliens Peter Lukac and his wife, Suzanne Lukac; to the Committee on the Judiciary.

By Mr. RAMEY:

H. R. 5431. A bill for the relief of Mrs. Cleone L. Calhoun; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1346. By Mr. ANDREWS of New York: Resolution adopted by the Common Council of the City of Buffalo, N. Y., in protest against enactment of legislation in connection with the St. Lawrence seaway project; to the Committee on Public Works.

1347. Also, concurrent resolution adopted by the Senate of New York State, memorializing Congress to amend the Federal income-tax law having to do with inequitable tax discrimination between residents of the so-called community-property States and the so-called common-law States; to the Committee on Ways and Means.

1348. By Mr. HALLECK: Petition of citizens of Kosciusko and Jasper Counties, Ind., favoring universal military training; to the Committee on Armed Services.

1349. By the SPEAKER: Petition of Damon Reavis, Menard, Ill., petitioning consideration of his resolution with reference to violation of his constitutional rights; to the Committee on the Judiciary.

1350. Also, petition of James R. Allen, Wilmington, Del., petitioning consideration of his resolution with reference to complaints against Hon. Harold N. Burton, Associate Justice of the Supreme Court, and others, regarding justice in the courts; to the Committee on the Judiciary.

1351. Also, petition of A. V. Strock, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1352. Also, petition of Miami Friendship Townsend Club, No. 1, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1353. Also, petition of M. W. Clark, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 13; to the Committee on Ways and Means.

1354. Also, petition of Mrs. Ida L. Bush, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1355. Also, petition of Mary Faming and others, petitioning consideration of their resolution with reference to legislation for universal military training; to the Committee on Armed Services.

1356. Also, petition of Mrs. H. L. Briden and others, petitioning consideration of their resolution with reference to restraining production and showing of crime-producing movie films and those which contribute to juvenile delinquency; to the Committee on Interstate and Foreign Commerce.

1357. Also, petition of United American Veterans, petitioning consideration of their resolution with reference to enacting H. R. 4528; to the Committee on the Judiciary.

1358. Also, petition of James V. Jackson, South Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1359. Also, petition of Arthur E. Nelson, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1360. Also, petition of Miss Alvira Dodge, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1361. Also, petition of Mrs. M. McNaughten, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

SENATE

TUESDAY, FEBRUARY 17, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Our Heavenly Father, save us from a worship of the lips while our hearts are far away.

In the battle now being fought in the realm of ideas, where deadly attacks are made upon our greatest treasure, our belief in God and the Gospel of Christ, deliver us from the peril of indifference, for we know that rust will crumble a metal when hammer blows will only harden it.

May this minute of prayer find each one of us, in his own way, reaching out for Thy help and guidance.

Hear our prayers and be with us this day. We ask in Jesus' name. Amen.

THE JOURNAL

On request of Mr. TAFT, and by unanimous consent, the reading of the Journal of the proceedings of Friday, February 13, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on February 14, 1948, the President had approved and signed the act (S. 1394) to provide increased subsistence allowances to veterans pursuing certain courses under the Servicemen's Readjustment Act

of 1944, as amended, and for other purposes.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Swanson, one of its reading clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 1454. An act to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes;

S. 1485. An act to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, New Mexico;

S. 1507. An act authorizing the sale of undisposed-of lots in Michel addition to the town of Polson, Mont.; and

S. 1591. An act to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes.

The message also announced that the House had passed the following bills of the Senate, each with an amendment, in which it requested the concurrence of the Senate:

S. 522. An act to authorize the sale of certain lands of the L'Anse Band of Chippewa Indians, Michigan; and

S. 1133. An act providing for the per capita payment of certain moneys appropriated in settlement of certain claims of the Indians of the Fort Berthold Indian Reservation in North Dakota.

The message further announced that the House had agreed to the amendment of the Senate to the bill (H. R. 2029) to provide for the free importation of synthetic-rubber scrap.

The message also announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H. R. 2159. An act to authorize the Secretary of the Interior to prepare plans and estimates for a sewage-disposal system to serve the Yorktown area of the Colonial National Historical Park, Va., and for other purposes;

H. R. 2313. An act to amend the act of May 19, 1926 (44 Stat. 565), as amended by the acts of May 14, 1935 (49 Stat. 218), and of October 1, 1942 (56 Stat. 763), providing for the detail of the United States military and naval and Air Force missions to foreign governments;

H. R. 3344. An act to amend the fourth paragraph of section 4, chapter 1, title I, of the act entitled "An act making further provision for a civil government for Alaska, and for other purposes," approved June 6, 1900 (31 Stat. 322; 48 U. S. C., sec. 101), as amended;

H. R. 3603. An act granting the consent of Congress to the States of Idaho and Wyoming to negotiate and enter into a compact for the division of the waters of the Snake River and its tributaries originating in either of the two States and flowing into the other;

H. R. 3936. An act to authorize the United States Park Police to make arrests within Federal reservations in the environs of the District of Columbia, and for other purposes;

H. R. 4023. An act to authorize the establishment of the De Soto National Memorial, in the State of Florida, and for other purposes;

H. R. 4461. An act approving the performance in the field of certain functions relating to the public lands;

H. R. 4513. An act to eliminate the requirement of oaths in certain land matters, and for other purposes;

H. R. 4549. An act to authorize the enactment by the Legislature of the Territory of Alaska of a code of laws for Alaska;

H. R. 4823. An act to provide adequate school facilities within Yellowstone National Park, and for other purposes;

H. R. 4980. An act relating to the acquisition by the United States of State-owned lands within Glacier National Park, in the State of Montana, and for other purposes;

H. R. 5035. An act to authorize the attendance of the United States Marine Band at the Eighty-second National Encampment of the Grand Army of the Republic to be held in Grand Rapids, Mich., September 26 to 30, 1948; and

H. J. Res. 61. Joint resolution to provide for the designation of the Park River Dam and Reservoir project in Walsh County, N. Dak., as the Homme Reservoir and Dam.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

H. R. 422. An act for the relief of Francesco and Natalia Picchi;

H. R. 648. An act for the relief of Mrs. Elfreida Sakowsky Passant, alias Elfreida Sakowsky, alias Elfreida Pogue;

H. R. 650. An act for the relief of Ruston Jamsetji Patell;

H. R. 928. An act for the relief of Riyoko Patell;

H. R. 1078. An act for the relief of Mrs. Audrey Ellen Gooch;

H. R. 1408. An act for the relief of August W. Dietz;

H. R. 1650. An act for the relief of Maria Hedwig Feresz;

H. R. 1788. An act for the relief of the estate of John F. Hopperton, a minor, deceased;

H. R. 2029. An act to provide for the free importation of synthetic-rubber scrap;

H. R. 2350. An act for the relief of Mrs. Daisy Park Farrow;

H. R. 3168. An act for the relief of Antone G. Pina;

H. R. 3503. An act to permit the issuance of unrestricted deeds for town-site lands held by Alaska natives, and for other purposes;

H. R. 3778. An act to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25); and

H. R. 4115. An act to quiet title and possession with respect to certain land in the town of Cheverly, Prince Georges County, Md.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

SUPPLEMENTAL ESTIMATES, FEDERAL WORKS AGENCY (S. DOC. NO. 119)

A communication from the President of the United States, transmitting revised estimates of appropriation for the fiscal year 1949 involving an increase of $658,000 for the Federal Works Agency, in the form of amendments to the budget for said fiscal year (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

INSTITUTE OF INTER-AMERICAN AFFAIRS

A letter from the Secretary of State, transmitting a draft of proposed legislation to amend the act of August 5, 1947, entitled the "Institute of Inter-American Affairs Act" (Public Law 369, 80th Cong.) (with an accompanying paper); to the Committee on Foreign Relations.

SETTLEMENT OF CERTAIN CLAIMS BY DEPARTMENT OF AGRICULTURE

A letter from the Under Secretary of Agriculture, transmitting pursuant to law, reports showing the names of all persons against whom claims in excess of $1,000 have been compromised, the address of such persons, the nature of the claims, the amount of the compromises, and the reasons therefor (with accompanying papers); to the Committee on Agriculture and Forestry.

REPORT OF FEDERAL SECURITY AGENCY

A letter from the Administrator, Federal Security Agency, transmitting, pursuant to law, the annual report of the Social Security Administration for the fiscal year 1947 (with an accompanying report); to the Committee on Finance.

REPORT OF NATIONAL MEDIATION BOARD

A letter from the Chairman of the National Mediation Board, transmitting, pursuant to law, the thirteenth annual report of the National Mediation Board, including the report of the National Railroad Adjustment Board, for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Labor and Public Welfare.

REPORT ON AID TO GREECE AND TURKEY

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Foreign Relations:

To the Congress of the United States:

Pursuant to the provisions of Public Law 75 (80th Cong., 1st sess., 61 Stat. 103), I submit herewith the second quarterly report on aid to Greece and Turkey, covering the period from the inception of the program to December 31, 1947.

Since the last report submitted November 7, 1947, Greece has been subjected to ever-increasing pressure by the Communist minority, which, subservient to the foreign influences from which it draws support, would impose its will on the Greek people by force of arms. It is significant that the guerrilla warfare is directed not against the Greek Army but against the people of Greece. The deliberate and wanton destruction of Greek villages does not result from military engagements. It is determined and ruthless destruction intended to render people homeless and drive them from the soil; to force them into overcrowded urban centers where they become charges of an already overburdened state; and to create for them conditions of misery and hardship in the hope that this will make them susceptible to political agitation.

These bands which traffic in human misery and chaos are small, too small to claim any truly representative character. They total about 20,000, of which a large proportion are known to have been unwillingly impressed into the guerrilla ranks under threat of death to themselves and their families. There are Members of the United States Congress who visited Greece during the past few months who know what horrible reprisals are taken against those unwilling to fight for the Communist guerrillas.

This policy is sapping the economic strength of Greece at the same time that the American Mission for Aid to Greece is seeking to build it up through reconstruction and economic assistance. This is, of course, the intent of the guerrillas, for a healthy Greece on the road to economic recovery would not be receptive

to Communist ideology. Economic conditions in Greece have suffered from the continued military strife which has swelled the number of refugees in the north of Greece to over 420,000 and caused a greater share of the Greek national budget and of American aid funds to be spent on nonproductive undertakings. Only the most strenuous and determined efforts of the Greek Government and people will suffice to cope successfully with the present situation.

The American mission is doing all in its power to assist, and its accomplishments have been considerable. Owing to the Communist obstruction it is increasingly clear, however, that economic recovery in Greece must await the establishment of internal security. Although economic programs most effective under the circumstances will continue to be actively prosecuted, the benefits from them can be fully realized only when the warfare against the guerrillas has been successfully concluded.

To aid the Greek Government in the prosecution of the warfare against the guerrillas, the American mission at the close of the year transferred an additional $14,000,000 of aid funds from the economic to the military program, making a total allocation to the military of about $172,000,000. These additional funds will be used to support the formation of an additional 58 National Defense Corps battalions, making a total of 100 as requested by the Greek Government; these battalions will take over the task of protecting the villages of the provinces from which they are recruited, thereby freeing the Greek National Army to conduct a more offensive warfare. If the guerrilla menace should increase as a result of greater outside assistance, a new situation would be created which would have to be dealt with in the light of circumstances prevailing at that time.

While recent developments are adverse, in that they have lengthened the time necessary for Greece's ultimate recovery, the situation is not without encouragement. Greece is still a free country. The recent announcement of a "government" by the Communist guerrillas, who do not effectively control territory in which to exercise any of the functions of government, appears to have been an act of desperation and not of strength. The transparent device of declaring the "free government" has not materially changed the existing situation, except to reveal more clearly to the Greeks and to the world the true character of Greece's enemy. The United States Government has already made known its view that recognition of this group by other governments would have serious implications and would be clearly contrary to the principles of the United Nations Charter. The special United Nations Balkan Commission has passed a resolution that in its view any such recognition would constitute a threat to the peace.

I am pleased to be able to report that the Turkish aid program is proceeding in an orderly manner. Careful planning and procurement are now resulting in deliveries which can be expected to flow at a fairly uniform rate.

Continued economic assistance to Greece will be provided under the European recovery program, if that program is authorized by the Congress. The European recovery program will not provide, however, for any additional military assistance required for Greece and Turkey, which will, at the appropriate time, be sought from the Congress under Public Law 75.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 16, 1948.*

REPORT OF NATIONAL CAPITAL HOUSING AUTHORITY

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on the District of Columbia:

To the Congress of the United States:

In accordance with the provisions of section 5 (a) of the District of Columbia Alley Dwelling Act, approved June 12, 1934, I transmit herewith for the information of the Congress the report of the National Capital Housing Authority for the fiscal year ended June 30, 1947.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 16, 1948.*

NOTE.—The report accompanied a similar message to the House of Representatives.

REPORT OF BOARD OF DIRECTORS OF PANAMA RAILROAD CO.

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Interstate and Foreign Commerce:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the Ninety-eighth Annual Report of the Board of Directors of the Panama Railroad Company for the fiscal year ended June 30, 1947.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 17, 1948.*

PETITIONS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A petition of the Miami Townsend Club, No. 22, Miami, Fla., praying for the enactment of legislation providing for a uniform national pension system; to the Committee on Finance.

By Mr. MAYBANK:

A concurrent resolution of the Legislature of the State of South Carolina; to the Committee on Public Works:

"Concurrent resolution requesting the Congress of the United States to make a larger apportionment of Federal funds available for the immediate construction of an adequate farm-to-market road program

"Whereas the rural residents of South Carolina are badly handicapped and inconvenienced because of the lack of adequate paved farm-to-market roads; and

"Whereas such lack of all-weather roads is proving costly to our farmers economically and socially; and

"Whereas the system of Federal-aid roads has reached a much more satisfactory stage of completion than that of the farm-to-market system and is much more adequately sufficient; and

"Whereas at this crucial time of necessity for ample farm production, every reasonable facility should be furnished to help our farmers: Now, therefore, be it

"*Resolved by the senate (the house of representatives concurring)*, That the South Carolina delegation in Congress be requested to urge a larger apportionment of Federal funds for the immediate construction of an adequate farm-to-market road program; be it further

"*Resolved*, That copies of this resolution be forwarded immediately to the Members of Congress from South Carolina."

RESOLUTION OF SOUTH CAROLINA HOUSE OF REPRESENTATIVES RELATING TO CIVIL RIGHTS

Mr. JOHNSTON of South Carolina. Mr. President, I am in receipt of a resolution adopted February 12 by the House of Representatives of the State of South Carolina, memorializing the Congress of the United States to seriously consider and oppose national legislation relating to the FEPC, antisegregation, and antilynching legislation, so as to continue to vest these important matters solely under the jurisdiction of the States.

I find the observations and expressions contained in this resolution in close parallel with my own thinking on such subjects and at this time I ask unanimous consent to present the resolution for appropriate reference and printing in the RECORD.

There being no objection, the resolution was received, referred to the Committee on the Judiciary, and, under the rule, ordered to be printed in the RECORD, as follows:

Resolution memorializing the National Congress of the United States to seriously consider and oppose national legislation relating to the FEPC antisegregation and antilynching legislation, so as to continue to vest these important matters solely under the jurisdiction of the States

Whereas there is certain proposed legislation pending before the United States Congress, or probably soon to be so pending; and

Whereas such proposed legislation is in the form of the Fair Employment Practices Act, proposed antisegregation legislation; and

Whereas the enactment of such proposed legislation will strike at the fundamental constitutional principles that a State shall prescribe all remedies and all forums for the adjudication of all matters not granted under the United States Constitution to the Federal Government by the people of the various States; and

Whereas the very first and last steps in a would-be police or totalitarian state is to strip the constituent elements of such state of all powers and to place unwarrantedly such powers in the hands of a strong federal government; and

Whereas the enactment of such proposed legislation into Federal laws further concentrates unwarranted powers in the Federal Government; and

Whereas such course is dangerous for the very reason that such will eventually destroy the jurisdiction, powers, and authority of the various States, and therefore the people; and

Whereas further, it is the minorities in a police or totalitarian state who suffer the most, due to the fact that constituent political elements thereof, or constituent republics thereof, have been stripped of all power; and

Whereas it is felt that the various States of the American Union can far better pass laws that would be much more beneficial to its people in regard to the proposed legislation: Now, therefore, be it

Resolved by the house of representatives, That the proposed legislation above referred to is not only sectional in its purpose

but that the enactment of such into law will not only be inimical to the South but to the Nation as a whole.

That such proposed legislation is unconstitutional and un-American in that it would give to making the Federal Government all powerful and would destroy the checks and balances of the people, which they have, and which are necessary for them to have, in order to prevent a too powerful bureaucratic government from undermining the fundamental principles of Americanism.

That the enactment of such legislation into law when carried to its logical conclusion will destroy the rights and privileges of the minorities of this land, so that those who now clamor for the passage of such legislation will no doubt be its victims tomorrow.

That any bill or bills providing for the enactment of such proposed legislation be killed in the outset in order that we might not gamble with the future of America.

That a copy of this resolution be directed to the following: The President of the United States Senate, the Speaker of the House of Representatives, the two United States Senators from South Carolina, to the six Representatives in the United States Congress from South Carolina.

HOUSE OF REPRESENTATIVES.
COLUMBIA, S. C., *February 12, 1948.*

The PRESIDENT pro tempore laid before the Senate a resolution of the House of Representatives of the State of South Carolina identical with the foregoing, which was referred to the Committee on the Judiciary.

GREAT LAKES-ST. LAWRENCE SEAWAY AND POWER PROJECT

Mr. IVES. Mr. President, I ask unanimous consent to present for appropriate reference and printing in the RECORD a resolution adopted by the Robert L. Hague Merchant Marine Industries Post, No. 1242, of the American Legion, Department of New York, in opposition to the St. Lawrence seaway and power project.

There being no objection, the resolution was received, ordered to lie on the table, and to be printed in the RECORD, as follows:

"Whereas the American Legion at its twenty-ninth annual national convention, held in the city of New York, N. Y., on the 31st day of August 1947, adopted a policy calling for positive and aggressive action by the American Legion in support of a strong American merchant marine; and

"Whereas the Congress of the United States now has before it legislation giving approval to an agreement with Canada relating to the construction of the Great Lakes-St. Lawrence seaway and power project; and

"Whereas it has been fully demonstrated that construction of said seaway as presently planned would not permit its use by the overwhelming majority of vessels in the American merchant marine; and

"Whereas construction of such seaway would be in the nature of a direct grant of aid to the operators of shallow-draft, foreign-flag vessels in competition with the American merchant marine: Now, therefore, be it

"*Resolved*, That the Robert L. Hague Merchant Marine Industries Post, No. 1242, of the American Legion, Department of New York, is opposed to the construction of the Great Lakes-St. Lawrence seaway and power project; and be it further

"*Resolved*, That the Senate and House of Representatives of the United States are hereby urged to refuse to give congressional approval to the agreement relative to construction of said project."

Adopted at a regular meeting of the Robert L. Hague Merchant Marine Industries Post, No. 1242, of the American Legion, Department of New York, held on the 20th day of January 1948.

EDWARD C. HOLDEN, Jr.,
Commander.
WILLIAM SCHWARTZ,
Adjutant.

WORLD AIR COMMERCE DAY—RESOLUTION OF BOARD OF DIRECTORS OF MIAMI (FLA.) CHAMBER OF COMMERCE

Mr. PEPPER. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution adopted by the board of directors of the Miami (Fla.) Chamber of Commerce.

There being no objection, the resolution was received, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Whereas World Trade Week (May 17–22, 1948) will bring the businessmen of the world into conferences, throughout this and other nations, on mutual problems; and

Whereas the greatest aids to world peace and international good will are improved communications and increased trade relations between the nations of the world; and

Whereas Maritime Day, long established to honor men, ships, and the great part the merchant fleets of the world have played and are playing to facilitate world commerce and trade, is a definite part of World Trade Week; and

Whereas no day has been set aside on a national scale to focus public attention on air transportation, the most rapidly growing mode of shipping cargo and carrying passengers; and

Whereas the problems pertaining to both air and sea commerce are related in so many respects and the scope of a national Air Commerce Day would overlap Maritime Day to an extent which makes it obvious that the 2 days should be observed within the period of a single week: Be it therefore

Resolved, That a World Air Commerce Day should be declared nationally as a feature of World Trade Week and every effort be made to bring the focus of world attention on the present growth and potentially unlimited possibilities of future air-passenger service and on air carriers as movers of the world's goods; and be it further

Resolved, That the Congress of the United States be urged to designate a World Air Commerce Day to be observed each year 3 days from Maritime Day, either before or after, depending upon the day of World Trade Week on which Maritime Day occurs.

BOARD OF DIRECTORS, MIAMI
CHAMBER OF COMMERCE.
FEBRUARY 2, 1948.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GURNEY, from the Committee on Armed Services:

S. 2123. A bill to exempt certain officers of the Regular Army and Regular Air Force from the provisions of statutes requiring retirement by reason of age, and for other purposes; without amendment (Rept. No. 889).

By Mr. GURNEY (for Mr. HILL), from the Committee on Armed Services:

S. 1525. A bill to provide for furnishing transportation for certain Government and other personnel, and for other purposes; with amendments (Rept. No. 890).

By Mr. TOBEY, from the Committee on Banking and Currency:

S. 1807. A bill to provide for the temporary extension of the Export Control Act and title III of the Second War Powers Act; with amendments (Rept. No. 891).

REPORT ON DISPOSITION OF EXECUTIVE PAPERS

Mr. LANGER, from the Joint Select Committee on the Disposition of Executive Papers, to which was referred for examination and recommendation a list of records transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted a report thereon pursuant to law.

ADDITIONAL EXPENDITURES BY SPECIAL SMALL BUSINESS COMMITTEE

Mr. BROOKS. Mr. President, from the Committee on Rules and Administration, I ask unanimous consent to report an original resolution. The resolution merely authorizes the appropriation of an additional $15,000 to be expended by the Small Business Committee. The report is signed by all the members of the Rules and Administration Committee who are in Washington at the present time, and it was unanimously adopted by the committee. I ask unanimous consent for the present consideration of the resolution.

Mr. BARKLEY. Mr. President, I should like to have an explanation of what the resolution proposes to do.

Mr. HAYDEN. Mr. President, the Special Committee to Study the Problems of American Small Business will expire on April 1 next. Some additional duties have been imposed upon the committee, in the matter of obtaining steel for small business and other enterprises. The committee has exhausted its funds. Just before the Senator from Nebraska [Mr. WHERRY], the chairman of the committee, left Washington, he explained to me that it was necessary to have the additional amount authorized by the resolution which has been reported by the Senator from Illinois. The question of the extension of the life of the committee is not at all involved. That is a matter which Congress will have to consider later, because the life of the committee will not expire until the first of April, as I have said. The resolution which has been submitted will provide money for the time between this date and April 1 only.

The PRESIDING OFFICER (Mr. CAIN in the chair). Is there objection to the request of the Senator from Illinois?

There being no objection, the resolution (S. Res. 200) was considered and agreed to, as follows:

Resolved, That the Special Committee to Study the Problems of American Small Business Enterprises, created by Senate Resolution 20, Eightieth Congress, agreed to January 24, 1947, and extended by Senate Resolution 153, Eightieth Congress, agreed to July 26, 1947, is hereby authorized to expend from the contingent fund of the Senate $15,000 in addition to the amounts heretofore authorized for the same purposes.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

(Mr. BARKLEY introduced Senate bill 2165, to promote the development and conservation of certain resources in the submerged coastal lands adjacent to the shores

of the United States, which was referred to the Committee on Interior and Insular Affairs, and appears under a separate heading.)

By Mr. MARTIN:

S. 2166. A bill for the relief of Terez Hagymasi; to the Committee on the Judiciary.

By Mr. LANGER:

S. 2167. A bill relating to the promotion of veterans of World War II in the field service of the Post Office Department; to the Committee on Post Office and Civil Service.

(Mr. LANGER also introduced Senate bill 2168, authorizing the appropriation of $1,000,000,000 for the purposes of rural electrification, which was referred to the Committee on Agriculture and Forestry, and appears under a separate heading.)

By Mr. MYERS:

S. 2169. A bill for the relief of Anna Halberstam; to the Committee on the Judiciary.

By Mr. SALTONSTALL:

S. 2170. A bill for the relief of Augustyn Mystokowski and Janina Ludwika Mystokowski; to the Committee on the Judiciary.

By Mr. DWORSHAK (by request):

S. 2171. A bill to promote the interests of the Fort Hall Indian irrigation project, Idaho, and for other purposes; to the Committee on Interior and Insular Affairs.

(Mr. PEPPER introduced Senate bill 2172, to extend the maturity for mortgages under the National Housing Act in the case of property owned by veterans of World War II, to authorize the Reconstruction Finance Corporation to purchase home loans guaranteed or insured under the provisions of title III of the Servicemen's Readjustment Act of 1944, as amended, and for other purposes, which was referred to the Committee on Banking and Currency, and appears under a separate heading.)

By Mr. PEPPER (for himself, Mr. HOLLAND, Mr. HAYDEN, Mr. MCFARLAND, Mr. DOWNEY, Mr. CONNALLY, Mr. O'DANIEL, Mr. MORSE, Mr. CORDON, and Mr. CAIN):

S. 2173. A bill to amend the provisions of the Agricultural Adjustment Act relating to marketing agreements and orders; to the Committee on Agriculture and Forestry.

By Mr. GURNEY:

S. 2174. A bill to amend further sections 10 and 12 of the Pay Readjustment Act of 1942, as amended (37 U. S. C. 110 and 112), relating to allowances; to the Committee on Armed Services.

By Mr. MCGRATH:

S. 2175. A bill for the relief of Gabe Budwee; to the Committee on the Judiciary.

By Mr. ECTON:

S. 2176. A bill authorizing the Secretary of the Interior to issue a patent in fee to Allen Old Horn, Sr.; to the Committee on Interior and Insular Affairs.

By Mr. SALTONSTALL (for himself and Mr. LODGE):

S. J. Res. 183. Joint resolution authorizing the President of the United States of America to proclaim October 11, 1948, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

By Mr. CAPPER:

S. J. Res. 184. Joint resolution to prohibit the use of grains for the manufacture of intoxicating liquor for 1 year, or until October 15, 1948, as may be determined by the President and the Secretary of Agriculture; to the Committee on Banking and Currency.

DEVELOPMENT AND CONSERVATION OF CERTAIN RESOURCES IN SUBMERGED COASTAL LANDS

Mr. BARKLEY. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill to promote the development and conservation of certain resources in the submerged coastal lands adjacent to the shores of the United States, and I request that a letter of transmittal from the Attorney General to the President of the Senate, together with a statement explaining the bill, may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, the bill introduced by the Senator from Kentucky will be received and appropriately referred, and, without objection, the letter and explanatory statement will be printed in the RECORD.

There being no objection, the bill (S. 2165) to promote the development and conservation of certain resources in the submerged coastal lands adjacent to the shores of the United States, introduced by Mr. BARKLEY, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

There being no objection, the letter and explanatory statement were ordered to be printed in the RECORD, as follows:

UNITED STATES
DEPARTMENT OF THE INTERIOR,
Washington, D. C., February 6, 1948.

Hon. ARTHUR H. VANDENBERG,
President pro tempore,
United States Senate.

MY DEAR SENATOR VANDENBERG: Enclosed is a draft of a proposed bill "to promote the development and conservation of certain resources in the submerged coastal lands adjacent to the shores of the United States."

This proposed bill was drafted jointly by the Department of the Interior, the Department of Justice, and the National Military Establishment.

There is attached to the proposed bill an explanatory statement which summarizes and discusses its provisions in detail.

We recommend that the proposed bill be referred to the appropriate committee for consideration and that it be enacted promptly.

The Bureau of the Budget has advised that there is no objection to the submission of this proposed bill to the Congress.

Sincerely yours,

JAMES FORRESTAL,
Secretary of Defense.
TOM C. CLARK,
Attorney General.
J. A. KRUG,
Secretary of the Interior.

EXPLANATORY STATEMENT CONCERNING A PROPOSED BILL TO PROMOTE THE DEVELOPMENT AND CONSERVATION OF CERTAIN RESOURCES IN THE SUBMERGED COASTAL LANDS ADJACENT TO THE SHORES OF THE UNITED STATES

On June 23, 1947, by its decision in *United States* v. *California* (332 U. S. (preliminary print) 19) the Supreme Court settled an important question which for more than a decade had been the subject of controversy. The issue in the case was whether the United States or California had paramount rights in and power over the submerged lands of the 3-mile marginal belt off the coast of California, including the authority to exploit or authorize the exploitation of the resources of such lands. The Court decided "that California is not the owner of the 3-mile marginal belt along its coast, and that the Federal Government rather than the State has paramount rights in and power over that belt, an incident to which is full dominion over the resources of the soil under that water area, including oil" (332 U. S. 38–39). On October 27, 1947, the Court entered a decree which adjudged that:

"1. The United States of America is now, and has been at all times pertinent hereto, possessed of paramount rights in, and full dominion and power over, the lands, minerals, and other things underlying the Pacific Ocean lying seaward of the ordinary low-water mark on the coast of California, and outside of the inland waters, extending seaward three nautical miles and bounded on the north and south, respectively, by the northern and southern boundaries of the State of California. The State of California has no title thereto or property interest therein.

"2. The United States is entitled to the injunctive relief prayed for in the complaint.

"3. Jurisdiction is reserved by this Court to enter such further orders and to issue such writs as may from time to time be deemed advisable or necessary to give full force and effect to this decree."

The basic reasons for the Court's decision were that the acquisition of the 3-mile belt has been accomplished by the National Government and that the "protection and control of it has been and is a function of national external sovereignty" (332 U. S. 34). These reasons obviously are not limited in their application to the submerged lands adjacent to the coast of California.

Moreover, while the California case only involved the 3-mile belt, there is no reason to believe that the Court's conclusion would be any different with respect to the resources of any area beyond the 3-mile limit to which the National Government may have extended its jurisdiction. Such an extension of jurisdiction was accomplished by the proclamation of September 28, 1945, which declared that the United States "regards the natural resources of the subsoil and sea bed of the continental shelf beneath the high seas but contiguous to the coasts of the United States as appertaining to the United States, subject to its jurisdiction and control * * *." (Executive Proclamation 2667, September 28, 1945, 10 FR 12303.) Indeed, this action of the President was assimilated by the Court in *United States* v. *California* to previous declarations concerning national jurisdiction within the 3-mile belt (332 U. S. 33, 34, fn. 18).

Petroleum is vital to our national security and important in our national economy. Within the 3-mile belt off our coast large quantities of oil and gas have been and are being produced, and more are believed to exist in the continental shelf beyond that belt. Most of the oil and gas now being produced within these areas is in fields that are being drained by wells on land not owned by the Federal Government. It is therefore highly desirable that the Congress promptly make provision for the conservation and development of oil and gas in the coastal areas below low tide and outside the inland waters of any State. In addition, some equitable relief should be extended to the States and their political subdivisions, grantees, and lessees because of actions with respect to oil and gas taken by them prior to the Court's decision in *United States v. California* and on the assumption that the States owned the oil and gas deposits in these areas.

The enclosed draft of bill is designed to meet these needs. There follows an analysis and discussion of its significant provisions.

1. Section 2 (b) defines the term "submerged coastal lands," and thus the areas covered by the bill, as including two categories of submerged lands. The first is "submerged lands seaward of the shores of the United States and Alaska which are under the dominion of, and subject to the paramount rights of, the United States * * *." This language paraphrases that used by the Court in the *California Case* (332 U. S. 38, 39). It is intended to be descriptive of the marginal belt off the coast of California, which was the subject matter of that case, and also of such other marginal belt areas

off the coasts of the United States and Alaska as involve no facts which might call for a different conclusion than that reached by the Court in deciding the California case. The marginal belt areas thus described are, of course, outside the inland waters of the States, which include ports, harbors, bays, rivers, and lakes. As to such inland water areas, the Federal Government has asserted no claim (332 U. S. 25, 26).

The second category of areas covered by the bill is "all other submerged lands of the entire continental shelf seaward of such shores [of the United States and Alaska], within which submerged lands the natural resources appertain to the United States and are subject to its jurisdiction and control, but which resources are not owned by any State or other person * * *." This language paraphrases that used by the President in the proclamation of September 28, 1945. It is intended to characterize the continental shelf areas which are within the scope of that proclamation and which are beyond the seaward boundaries of the marginal belt described in the first category. The phrase "but which resources are not owned by any State or other person" has been added in order to exclude any lands under the inland waters of the States which may form portions of the continental shelf. The words "or other person" identify any grantee of such an area from a State.

2. Section 3 (a) provides that the oil and gas deposits in submerged coastal lands shall be subject to disposal only in accordance with the provisions of the proposed bill. It further provides that "no rights in or claims to such deposits, whether based upon applications filed or other action taken heretofore or hereafter, shall be recognized except in accordance with the provisions of this act." The quoted language is intended to bar any conceivable claims to obtain, without compliance with the terms of the bill, permits or leases of these oil and gas deposits that may be asserted by persons who have heretofore filed applications for such permits or leases with the Department of the Interior. These applications were purportedly filed under the Mineral Leasing Act of February 25, 1920, either as originally enacted or as amended (41 Stat. 437, 30 U. S. C. sec. 181 et seq.). Commencing in 1937, the applications were suspended pending a determination of the nature and extent of the rights of the Federal Government in the submerged coastal lands.

After the Supreme Court decision in the California case, the question whether the Mineral Leasing Act applied to these areas became material. On August 8 and 28, 1947, the Solicitor of the Department of the Interior and the Attorney General, respectively, held that the act did not apply to the submerged coastal areas. Accordingly, on September 8, 1947, the Director of the Bureau of Land Management denied the applications pending in that Bureau, and on October 6, 1947, the Secretary of the Interior denied the applications pending in his office.

There is no reason to think that the legal conclusions of the Solicitor and the Attorney General, and the consequent administrative actions denying all the then pending applications, can be successfully challenged in the courts. But regardless of this assumption, no substantial equity appears which would justify giving any of these applications preferential consideration in the issuance of oil or gas leases or otherwise treating them as valid. Moreover, a substantial number of them involve producing oil and gas areas developed by lessees of California at great expense and under circumstances, which, as hereafter discussed, may justify the issuance of exchange leases, in accordance with the procedures set forth in the proposed bill, to the holders of the State leases.

3. Other portions of section 3 point up the major premise of the proposed legislation, that is, the vital relationship of the petroleum in the submerged coastal areas to our national security. Thus, subsection (b) declares the policy of the Congress to be that the petroleum resources of these areas shall, to the maximum extent consistent with the needs of the national economy, "be conserved as a national asset vital to the security of the Nation," and requires all administrative action under the bill to conform to that policy. A continuing implementation of the same policy is provided for by subsection (c), which declares that the provisions of the bill shall also be administered in accordance "with such determinations as to national security, conservation, or development," in furtherance of the policy declared in subsection (b), as may be made from time to time by the President. The President is authorized by subsection (d) to withdraw from disposition any of the submerged coastal lands and reserve them for the use of the United States in the interest of national security, thus making provision for the husbanding of petroleum underground for future military use.

Finally, subsection (e) of section 3 gives the United States in time of war, or when the President shall so prescribe, the right of first refusal to purchase at the market price all or any portion of the oil and gas produced from the submerged lands. This would, in effect, give the Government a continuing option at a fair price, ahead of any other possible purchasers.

4. Sections 4, 5, and 6 authorize the Secretary of the Interior in his discretion to grant oil and gas leases of submerged coastal lands. Of course, such leases may not be granted with respect to lands reserved by the President in the interest of national security under section 3 (d), nor may they be granted without the approval of the Secretary of Defense with respect to lands designated by the latter as needed for navigation purposes or for national defense under section 14. Sections 4, 5, and 6 and other portions of the bill have been drafted along lines similar to those of the Mineral Leasing Act (30 U. S. C. sec. 181 et seq.), but are different in a number of respects because water areas are involved or because of considerations of national security.

Section 4 relates to the leasing of submerged coastal lands which are not within any known geological structure of a producing oil and gas field, and section 5 relates to lands within such a structure. In both cases, the leases are to be issued after competitive bidding to the responsible person bidding the highest bonus. With respect to lands not within a structure, this represents a departure from the Mineral Leasing Act, which provides for the issuance of a lease to the first qualified applicant. (30 U. S. C. sec. 226.) It is felt that such a departure is justified because bona fide operation in the submerged land areas is much more expensive than on dry land, and competitive bidding will discourage the purely speculative operator who does not really intend to develop the land.

Section 4 provides that the area of a lease of land not within a known geological structure of a producing field shall not exceed 64,000 acres at the time of the issuance of the lease. However, within 3 years thereafter, the area must be reduced to not more than one-half of the original area or 7,680 acres, whichever is larger. Before the end of the fifth lease year, the area must be reduced to not more than 7,680 acres. Section 5 provides that the area of a lease of land within a known geological structure shall not exceed 2,560 acres. The only comparable provision of the Mineral Leasing Act limits the acreage of a leasing unit on a known structure to 640 acres (30 U. S. C. sec. 226), while the regulations under that act fix a limitation of 2,560 acres on any lease of land not within a structure. (43 CFR 192.40.) Section 6 of the bill provides an over-all acreage limitation on leases held by any one party of 128,000 acres (of which not more than 30,720 acres may be held under producing leases) in any one of the following coastal regions: The Pacific Ocean or the Gulf of Mexico or the Atlantic Ocean. Under the Mineral Leasing Act, the over-all limitation on leases is 15,360 acres in any one State, and on options taken for exploration purposes is 100,000 acres in any one State. (30 U. S. C. sec. 184.)

The acreage limitation provisions of the bill are to some extent more generous than those under the Mineral Leasing Act. The reasons for this are that exploration and development in water areas are more costly and complex than on dry land, and that, unless such greater acreage is permitted, exploration and development will be retarded. It should be made clear, however, that the acreage limitations with respect to the size of individual leases are merely ceilings, and that in the issuance of leases the Secretary is required by the bill to exercise discretion in fixing the acreage as well as in prescribing the shape and dimensions of the land involved, and is also directed to insist on reasonable compactness. Under the Mineral Leasing Act, though the acreage permitted to be included in any one leasing unit on a structure is 640 acres, the Department of the Interior has followed the general practice of offering tracts for bidding in units of 160 acres or less.

The term of leases issued under sections 4 and 5 of the bill is to be 5 years and so long thereafter as there is production in paying quantities. At the end of that 5 years, in the absence of such production, off-structure leases are to receive an extension of not more than 5 years, upon proof of the performance of "actual development work" costing at least $75,000, or such greater amount as the Secretary may fix at or before the granting of the lease. "Actual development work," as referred to in this clause of section 4, does not include any geophysical or geological exploration activities. The provision for expenditure of at least $75,000 should discourage delays in development, while at the same time protecting the lessee who, though proceeding with reasonable speed, is unable to obtain production in paying quantities before the end of 5 years because of conditions peculiar to submerged-land development. For similar reasons, section 5 provides for a 2-year extension of structure leases if, at the end of the primary 5-year term, there is no production in paying quantities but drilling operations commenced not less than 90 days prior thereto have been and are being diligently prosecuted.

According to section 4, until there is a discovery, off-structure lessees are to pay a rental of 25 cents per acre per annum for the fourth lease year and not less than 50 cents per annum for every lease year thereafter. The Mineral Leasing Act fixes an annual rental of not less than 25 cents per acre for every lease year except the second and third (30 U. S. C., sec. 226). The provisions of the bill are designed to give the lessee the lighter burden during the early years when he should be spending all he can on development under difficult water conditions. Moreover, under the bill the lessee will have paid a bonus in competing for the lease, which is not the case under the Mineral Leasing Act.

With respect to both structure and off-structure leases, the royalty to be paid is not less than 12½ percent of the amount or

value of the oil or gas produced. In the case of off-structure leases, the bill requires payment of a minimum royalty of not less than $1 per acre per annum, after discovery, in lieu of rental. Under the Mineral Leasing Act, the royalty rate on off-structure leases is flexed at 12½ percent and on-structure leases at not less than 12½ percent (30 U. S. C., sec. 226). The 12½ percent is made a minimum (rather than fixed at that rate) for off-structure leases under the bill so as to permit the exercise of discretion by the Secretary in the light, among other things, of the royalty rates heretofore charged by the States in the submerged-land areas.

5. The bill's major theme of national defense and the public welfare is again reflected in subsections (f) and (g) of section 6 and in section 14. Subsection (f) of section 6 gives the Secretary of the Interior the power to regulate the rate of prospecting and development by lessees and the quantity and rate of production from leases, in the interest of national defense or the public welfare. Under this provision, the Secretary could, when clearly justified in the national interest, fix such rates without strict regard for conservation or engineering practices. Moreover, this power of the Secretary is additional to those he has under the provisions of the Mineral Leasing Act, incorporated by reference in section 13 of the bill. These provisions deal with, among other things, the prevention of waste; the exercise of reasonable diligence, skill, and care in operations; and, in the case of unitization, the rates of prospecting and development and quantity and rate of production. (Secs. 16, 17 (b), and 30 of the Mineral Leasing Act; 30 U. S. C. secs. 225, 226 (e), 187.)

Subsection (g) of section 6 will permit the Secretary of the Interior, upon the recommendation of the Secretary of Defense, during a state of war or national emergency declared by the Congress or the President after the effective date of the bill, to suspend operations or terminate any lease issued under the bill. This provision is intended to facilitate, during periods of national military or similar urgency, the complete control by the Federal Government of a resource essential to the national defense and of coastal areas strategically important from a defense standpoint. However, while each lease must be taken subject to the exercise of this right of suspension and termination, any lessee adversely affected by the exercise of the right should receive reasonable compensation. The development of submerged lands involves the expenditure of large sums of money. Unless some provision for compensation is made, operators will quite likely refuse to take leases and necessary development will be retarded. With this in mind, subsection (g) requires all leases to contain a provision for payment to the lessee whose operations are thus terminated or suspended of an amount determined in accordance with regulations promulgated by the Secretary which may incorporate guiding equitable principles.

Under section 14, the Secretary of Defense, with the approval of the President, may designate as restricted those areas needed for navigation purposes or for national defense, and while so designated no exploration is to be conducted on, and no lease issued for, any part of these areas except with the approval of the Secretary of Defense. This provision was drafted in order to make possible the maximum freedom of defense activities in the coastal waters, as well as to avoid undesirable obstructions to navigation generally.

6. In sections 7 to 10, the bill deals with the problem of relief to the coastal States, their political subdivisions and grantees and those holding oil and gas leases from them, that prior to the Supreme Court's decision of June 23, 1947, acted on the assumption that the submerged coastal lands belonged to the States. The relief provided by the bill is of two kinds. One is directed to the continuation of operations by persons who presently are operating under State oil and gas leases, and the other relates to the waiving of liability for past trespasses.

Oil was discovered on the California coast at the beginning of the century. (332 U. S. 30.) While there was some production in the submerged lands off that coast prior to 1921, production under leases issued by the State did not start until 1922, after the passage of a State leasing act. (Cal. Stats., 1921, Chap. 303, p. 404.) When the Supreme Court decision was handed down in 1947, there were 78 producing oil and gas leases on tidal and submerged lands which had been issued by California, with a monthly production of about 1,000,000 barrels of oil. It is estimated that the total withdrawal of oil from the tidal and submerged lands off the California coast prior to the date of the decision has amounted to more than 150,000,000 barrels. To a considerably lesser extent than on the California coast, there has been oil and gas development in the Gulf of Mexico, which began under State leasing acts some 10 years ago. It is estimated that the total withdrawal of oil from the Gulf areas prior to June 1947 amounted to less than 10,000,000 barrels.

The Supreme Court in the California case said that "the record plainly demonstrates that until the California oil issue began to be pressed in the thirties, neither the States nor the Government had reason to focus attention on the question of which of them owned or had paramount rights in or power over the 3-mile belt." (332 U. S. 39.) Ou August 19, 1937, the Senate passed Senate Joint Resolution 208 directing the Attorney General to assert, maintain, and establish Federal ownership of the 3-mile belt and its petroleum deposits along our entire coast, but the House of Representatives did not act on the resolution, though its Judiciary Committee held hearings on the matter and reported favorably on the substance of the resolution. (See Hearings, House Judiciary Committee, 75th Cong., 3d sess., on S. J. Res. 208, February 23–25, 1938; H. Rept. No. 2378, Judiciary Committee, 75th Cong., 3d sess., on S. J. Res. 208, May 19, 1938.) In the Seventy-sixth Congress, similiar legislation was considered, but no action was taken by either house. (See Hearings, Subcommittee No. 4, House Judiciary Committee, 76th Cong., 1st sess., on H. J. Res. 176 and H. J. Res. 181, March 22, 23, 1939; Hearings, Senate Public Lands Committee, 76th Cong., 1st sess., on S. J. Res. 83 and S. J. Res. 92, March 27-30, 1939.) In the Seventy-ninth Congress, hearings were held by the Judiciary Committees of both Houses on a number of substantially identical resolutions quitclaiming Federal title in these areas to the States. (See Joint Hearings, 79th Cong., 1st sess., on H. J. Res. 118 et al., June 18–20, 1945; Hearings, Senate Judiciary Committee, 79th Cong., 2d sess., on S. J. Res. 48 and H. J. Res. 225, February 5–7, 1946.) These committees both reported favorably on one of these measures, House Joint Resolution 225, venturing the opinion that the States owned the submerged coastal lands, with their oil and gas resources, and that the Supreme Court had so held. (See H. Rept. No. 927, Judiciary Committee, 79th Cong., 1st sess., on H. J. Res. 225, July 17, 1945; S. Rept. No. 1260, Judiciary Committee, 79th Cong., 2d sess., on H. J. Res. 225, April 26, 1946.) The resolution passed both Houses, but the President vetoed it on August 1, 1946, and his veto was not overridden. The President's reasons were that the question of ownership was a legal one which should be determined by the Supreme Court in the California case, which had been commenced and was then pending; that the issue had not theretofore been determined; and that if "the United States owns these areas, they should not be given away." (See Veto Message, H. Doc. 765, 79th Cong., 2d sess.)

On May 29, 1945, the Attorney General filed a suit, entitled *"United States* v. *Pacific Western Oil Company"* in the United States district court, at Los Angeles, in an effort to settle the question of ownership. But, in order to expedite a determination, he dismissed that suit, and on October 19, 1945, commenced the original action against California in the Supreme Court, which culminated in the Court's decision of June 23, 1947, favorable to the United States. In that action, the Government took the position (brief, p. 70), and the Court in its opinion agreed (332 U. S. 36, 37, 38), that the case judicially raised the question of Federal versus State ownership for the first time.

As the foregoing references illustrate, it is clear that prior to the decision by the Supreme Court, no one could really be certain that the Federal Government owned the submerged coastal areas and their petroleum deposits. The States assumed that they were the owners, acted on that assumption, enacted legislation authorizing the issuance of oil and gas leases, and actually issued such leases.

In his oral argument of the California case in the Supreme Court, the Attorney General said:

"We will recommend to the Congress that legislation be enacted designed to relieve California and those who have operated under State authority, from the necessity of accounting to the United States for revenues derived in the past from the exploitation of any of the lands here involved. Such legislation, in the view of the President, should also establish equitable standards for the recognition of investments made by private interests and should offer a basis for the continued operation of private establishments wherever consistent with the national interest, and on terms which would be fair and just under all circumstances."

And in the supplemental brief for the United States in that case, it was said:

"In this connection it is pertinent to note, as stated by the Attorney General at oral argument, that the President had authorized him to say that there is no desire on the part of the President or of any Federal official to destroy or confiscate any honest or bona fide investment, or to deprive the State or its subdivisions of any reasonable expectation of return from the areas that have been developed.

"The President recognizes that in the event the decision of this Court is favorable to the United States, it will be necessary to have congressional action looking toward the future management of the resources of this area. And he also intends to recommend to the Congress that legislation be enacted recognizing both prospectively and retrospectively, any equities of the State and those who have operated under it, to the fullest extent consistent with the national interest."

Sections 7 to 10 of the proposed bill were drafted in the light of the foregoing assurances. Sections 7 to 9 make provision for the issuance of leases by the Federal Government in exchange for oil and gas leases issued prior to June 23, 1947, by any State or its political subdivision or grantee and covering submerged coastal lands. The Secretary of the Interior is directed (not merely authorized) to issue such a lease upon the favorable determination of a commission to be known as the Submerged Coastal Lands Commission. Its three members are to be appointed by the President, by and with the advice of the Senate. The Commission is to determine whether the national interest would be served by the issuance of an ex-

change lease, whether the holder of the old lease is equitably entitled to receive an exchange lease, and the terms and conditions under which the latter may be issued. Eight standards are enumerated which are, among other things, to guide the Commission in making its determinations. These standards are believed to be relevant to the national interest and the equities of the applicants. Each exchange lease is to be for a period not exceeding the unexpired portion of the term of the old lease; is to cover, in whole or in part, the same area of submerged coastal lands as was covered by the old lease; and is to provide for not less than the rentals, royalties, and other payments provided for in the old lease.

Section 7 also provides that if the Commission determines against the issuance of an exchange lease, but believes that in fairness the applicant should receive a sum of money, it shall so report to the Secretary, who is to submit its report to the Congress for consideration. This provision would, for example, cover a case where the Commission considers that issuance of a lease would be against the national interest, but finds that the applicant has substantial equities. In such cases the Congress will be the final judge of whether, and how much, compensation should be paid.

Section 8 sets out certain conditions with which there must be compliance before an exchange lease can be issued. One of them is that an application for such a lease must be filed within 6 months from the date of the Commission's first meeting. Some time limitation for filing is desirable in order to make possible the determination of the status of the lands, and the oil and gas operations on them, as soon as the circumstances permit. Otherwise the leasing and oil and gas development of the lands would be indefinitely delayed and retarded. However, while the actions so far taken by the Supreme Court in the California case definitely establish a rule of law, the actual seaward limits of the inland coastal waters of California and the actual low-tide lines along its coast, which, together, constitute the landward boundary of the 3-mile marginal belt, have not yet been fixed. Moreover, for similar reasons, this is also true of the Gulf of Mexico. Hence, at the end of the 6-month period for filing applications the question of whether particular tracts of land are within or without the marginal belt may still be unresolved, and may remain so for some time. To meet this situation, section 8 also provides that upon a satisfactory showing of substantial doubt as to whether an area constitutes submerged coastal lands within the meaning of the bill the Submerged Coastal Lands Commission may, from time to time, extend the period for the filing of applications upon the request of any party in interest made within the 6 months or any extension of the basic period previously granted by the Commission.

Another requirement of section 8 is that each applicant for an exchange lease must state in his application that the lease applied for shall be subject to the same "overriding royalty obligations as the old lease. Overriding royalty obligations are those owed by an oil and gas lessee to persons other than the owner of the land. They are created by the lessee, sometimes when he assigns his lease and reserves such a royalty, and sometimes when, while retaining his lease, he grants such a royalty in order to obtain capital. They represent substantial property interests. If the commission decides that an exchange lease should be issued, it is felt that the applicant should in fairness to these royalty owners continue to honor the same obligations with respect to the new lease as existed with respect to the old one.

Because the determination of whether exchange leases should be issued may be delayed for substantial periods of time and because producing areas are involved, section 9 authorizes any lessee from a State or its political subdivision or grantee to continue operations on a provisional basis pending the issuance of exchange leases, provided an application in accordance with section 8 is timely filed. The section also provides for the making of interim arrangements by the Secretary of the Interior with the old lessors and their lessees covering the management, operation, and control of oil and gas wells during the intervening period.

Section 10 would have the effect of releasing any State, its political subdivisions or grantees, and those holding leases from them, from liability for trespasses committed in producing oil or gas from any submerged coastal lands prior to June 23, 1947, the date of the decision in the California case, and from liability to account to the United States for oil or gas theretofore extracted from these lands, or for moneys received under such leases. However, because uncertainty about the question of paramount rights and control was resolved by the decision, it is provided that any State, and its political subdivisions or grantees, shall be required to account to the United States for rentals, royalties, and other sums received after the decision under any such leases.

7. Following the precedent established by section 35 of the Mineral Leasing Act (30 U. S. C., sec. 191), section 11 of the bill provides for payment of substantial portions of the gross income derived by the Federal Government from oil and gas operations in the submerged coastal lands to the States where this income is produced, and to the reclamation fund created by the Reclamation Act of June 17, 1902 (32 Stat. 388, 43 U. S. C., sec. 391 et seq.). Each State is to receive 37½ percent of all such income from activities within the boundaries of that State and within the 3-mile marginal belt. This money is to be available for the construction and maintenance of public roads or public parks or for the support of public schools or other public educational institutions, as the legislature of the State may direct. The reclamation fund is to receive 52½ percent of all such income from activities within the boundaries of any of the States to which the Reclamation Act, as amended or supplemented, is or may become applicable and within the 3-mile marginal belt.

8. The rest of the bill adopts the substance of, or incorporates by reference, various provisions of the Mineral Leasing Act.

VETERANS' HOUSING LOANS

Mr. PEPPER. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill which proposes to make two very salutary changes in the present law relative to the subject of veterans' housing. I know the great interest of the distinguished Senator from Washington, presently occupying the chair, in this subject. Under the present law unhappily the RFC can no longer guarantee veterans' housing loans 100 percent. It in my opinion is absolutely necessary, if the veterans are going to be able to get access to adequate housing, that what some call the second mortgage, that part of the veterans' housing loan which is guaranteed by the Veterans' Administration, be purchasable by some public authority. I am told that we are threatened with a crisis in housing because the insurance companies and others who ordinarily purchase housing paper are desisting from such purchase, to see if Congress will not raise the interest rate to 4½ percent instead of 4 percent as under the law at the present time. I am also told that the whole housing program, at least the veterans' part of it, is threatened with coming to a standstill and with paralysis unless the Congress either raises the interest rate to 4½ percent and thereby adds to the burden of cost that the veteran must bear, or restores to the RFC the power to take this paper at 100-percent valuation. If we do the latter, I think it is possible we may escape the necessity of raising the interest rate, but I venture to say we must do one or the other. We must either raise the interest rate to 4½ percent, so that private purchasers will purchase the paper, or we must put the Government again in possession of the power it formerly had and wisely exercised of purchasing this paper, and make it possible for a veteran to secure a home by paying a very small amount as a condition precedent to doing so. My bill, which I have just sent to the desk, proposes to restore to the RFC the power that it formerly had and which the Congress took away, to purchase the paper guaranteed by the Veterans' Administration, as well as FHA paper, which it can now purchase at 100-percent valuation. Secondly, it proposes to extend the period of amortization on veterans' housing loans from the present 25 years to 32 years. That obviously will lower the monthly payment which the veteran will be required to make and will ease the burden that he will have to bear.

Not only that, Mr. President, but my bill makes these salutary benefits, should they be provided by the Congress, effective from the 1st of February of this year. I feel that there is a real crisis in the veterans housing field, and I hope that the bill will make some contribution to its speedy solution. I commend it to those who have been so interested as the able Senator from Washington has been in this whole housing program for veterans.

There being no objection, the bill (S. 2172) to extend the maturity for mortgages under the National Housing Act in the case of property owned by veterans of World War II, to authorize the Reconstruction Finance Corporation to purchase home loans guaranteed or insured under the provisions of title III of the Servicemen's Readjustment Act of 1944, as amended, and for other purposes, introduced by Mr. PEPPER, was received, read twice by its title, and referred to the Committee on Banking and Currency.

Mr. PEPPER. Mr. President, I also ask unanimous consent that certain testimony which I gave on this subject in behalf of amendments to the Wolcott bill, which were similar to what I have offered in the present bill, may appear in the RECORD following my remarks.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

NOTES FOR SENATOR PEPPER ON S. 287, MORTGAGE INSURANCE (VETERANS)

I. LEGISLATION

Federal home-loan bank operations

Under the present law, the Federal home-loan banks cannot accept as collateral for

their advances home-mortgage loans with more than 20 years maturity. Section 503 (b) of the Wagner-Ellender-Taft bill would encourage and facilitate the making of home loans with longer than 20-year maturities by member institutions (such as building and loan associations) by authorizing the Federal home-loan banks to make advances to such members on home-mortgage loans with maturities of up to 25 years as contrasted with the present limitation of 20 years.

Federal Housing Administration operations

Under section 203 of the National Housing Act the maximum maturity of home-mortgage loans insured thereunder on new construction is limited to 20 years, except in the case of newly constructed, single-family, owner-occupied homes costing $6,000 or less where the maximum maturity may be 25 years. Loans are up to 90 percent of value of house. The maximum statutory interest rate is 5 percent, but this has been reduced to 4½ percent in actual practice.

Section 508 (a) of the Wagner-Ellender-Taft bill would raise the 20-year-maximum maturity to 25 years. Under section 602 of the bill a maximum maturity up to 30 years on insured homes costing not more than about $5,260 would be authorized on newly constructed single-family, owner-occupied homes at 4 percent per annum for low-income families. Under section 510, veterans and their dependents who are unable to keep up payments can get an extension of mortgage for unexpired portion plus the period of military service.

Under section 603 of the National Housing Act the maximum maturity of home-mortgage loans insured thereunder is limited to 25 years and the maximum statutory interest rate is 4 percent.

GI Act operations

For home-mortgage loans guaranteed or insured under the Servicemen's Readjustment Act of 1944, as amended, the maximum maturity is 25 years and the maximum-interest rate is 4 percent.

Estimated monthly and total principal and interest costs [1] on a $5,000 mortgage

	Monthly	Total
Sec. 203 of National Housing Act [2]	$27.80	$8,600
Sec. 603 of National Housing Act [3]	26.40	8,180
Servicemen's Readjustment Act [4]	26.40	8,180
Sec. 602, Wagner-Ellender-Taft bill [5]	23.90	8,604
S. 287, Senator PEPPER's bill [6]	24.60	9,446

[1] In addition, there would be about $25.75 per month based on 1944-45 levels payable for real estate taxes ($16.50) hazard insurance ($1) and maintenance ($8.25).

[2] Mortgage—90 percent of property valuation, 25-year maturity, 4½ percent interest. There would be an additional premium charge of one-half percent of principal—$2.02 initially per month and declining by a few cents per month each year. The down payment would be $260.

[3] Mortgage—90 percent of property valuation, 25-year maturity, 4 percent interest. There would be an additional premium charge of one-half percent of principal—$2.02 initially per month and declining by a few cents per month each year. The down payment would be $260.

[4] Mortgage—90 percent of property valuation, 25-year maturity, 4 percent interest rate. There is no premium charge. The down payment would be $260.

[5] Mortgage—90 percent of loan for purposes of comparison, 30-year maturity, 4 percent interest. There would be no premium charge. The down payment would be $260.

[6] Mortgage—90 percent of property valuation, 32-year maturity, 4½ percent interest rate. The premium charge would be the same as in note 2 above. The down payment would be $260. At 3½ percent interest with a 30-year maturity, the monthly payments would be $22.45 and the total payments of principal and interest would be $8,082.

II. ECONOMIC FACTORS

1. The objective of the bill is to reduce monthly payments for veterans when wages are low relative to the high cost of living and to enable them to bridge periods of unemployment more easily.

2. Even though prices on housing were under ceilings in 1946, a large portion of rental and sales housing in 1946 was at a higher price than many veterans indicated they could afford.

3. The average sales price in 1946 of all new permanent homes given priority authorization was $7,500 and the average rental $59 per month.

4. A survey in June 1946 showed that the average rent veterans said they could afford was $43 per month and the average price they could pay for a home was $5,500. About one-half of the veterans desired to rent.

5. About a million homes will be put under construction in 1947 and another million completed.

STATEMENT REGARDING ACTIVITIES OF FEDERAL NATIONAL MORTGAGE ASSOCIATION

Federal National Mortgage Association, a subsidiary of Reconstruction Finance Corporation, will now purchase first mortgages which are insured by the Federal Housing Administration under the provisions of sections 603 and 608 of the National Housing Act. The Association will continue to purchase mortgages insured under sections 203 and 207 of the act. Mortgages insured under sections 203 and 603 of the National Housing Act cover one- to four-family dwellings; mortgages insured under sections 207 and 608 of the act cover rental housing projects.

Agents of the Association in the 31 regional offices of RFC will execute contracts with Federal Housing Administration approved mortgagees for the immediate purchase of mortgages already insured under section 203 or 603 of the National Housing Act (except farm mortgages) or will issue firm commitments to purchase such mortgages when insured and delivered within a 9-month period. In the case of a commitment contract the seller will be required to deposit 1 percent of the amount of the mortgage as a commitment charge, which will be refunded to the seller upon delivery of the loan documents within the commitment period. The purchase price will be an amount equal to the unpaid principal balance of the loan, plus accrued and unpaid interest, and will be available to the seller upon delivery of the loan documents.

Effective January 1, 1948, such mortgages as the Association agrees to purchase must be delivered within 1 year after the loans have been insured by Federal Housing Administration.

The Association will also consider applications for direct loans to be secured by mortgages insured under section 207 of the National Housing Act, provided the applications are submitted prior to the beginning of construction. Applications for commitments to purchase loans insured under section 207 or 608 upon completion of construction of a housing project likewise must be submitted before construction has commenced.

Federal National Mortgage Association is without statutory authority to make direct loans secured by mortgages insured under section 608 of the National Housing Act; to make or purchase loans insured under title I of the act; or to make or purchase second-mortgage loans. The Association also lacks authority to make or purchase home loans guaranteed or insured by the Veterans' Administration.

Detailed information concerning the activities of Federal National Mortgage Association may be obtained from the loan agencies of Reconstruction Finance Corporation.

NOVEMBER 17, 1947.

DEVELOPMENT AND CONSERVATION OF RESOURCES IN COASTAL LANDS

Mr. CORDON. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill.

On the 6th day of February there was transmitted to the Senate by the Secretary of Defense and the Secretary of the Interior jointly proposed legislation, the announced purpose of which was "to promote and develop the conservation of certain resources in the submarine coastal lands adjacent to the shores of the United States." The ordinary procedure with reference to a bill transmitted by one or more of the departments would be its introduction by request, through the chairman of the appropriate committee. The senior Senator from Nebraska [Mr. BUTLER], who is chairman of the Senate Committee on Interior and Insular Affairs, being absent at this time, I introduce the bill by request of the Departments referred to. I desire——

Mr. BARKLEY. I do not know whether the Senator is aware of the fact that I introduced a bill on the same subject, which I frankly say was drawn by the Department of Justice.

Mr. CORDON. I did not know that.

Mr. BARKLEY. It has been referred to the Senate Committee on Interior and Insular Affairs.

Mr. CORDON. Mr. President, in that event I ask to withdraw my bill until I can check up further. I was simply introducing it by request.

CONVEYANCE TO ESCAMBIA COUNTY, FLA., OF PORTION OF SANTA ROSA ISLAND—AMENDMENTS

Mr. PEPPER submitted amendments intended to be proposed by him to the bill (H. R. 3417) to provide for the conveyance to Escambia County, State of Florida, of a portion of Santa Rosa Island which is under the jurisdiction of the War Department, which were referred to the Committee on Armed Services, and ordered to be printed.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred, as indicated:

H. R. 2159. An act to authorize the Secretary of the Interior to prepare plans and estimates for a sewage-disposal system to serve the Yorktown area of the Colonial National Historical Park, Va., and for other purposes;

H. R. 3344. An act to amend the fourth paragraph of section 4, chapter 1, title I, of the act entitled "An act making further provision for a civil government for Alaska, and for other purposes," approved June 6, 1900 (31 Stat. 322; 48 U. S. C., sec. 101), as amended;

H. R. 3603. An act granting the consent of Congress to the States of Idaho and Wyoming to negotiate and enter into a compact for the division of the waters of the Snake River and its tributaries originating in either of the two States and flowing into the other;

H. R. 3936. An act to authorize the United States Park Police to make arrests within Federal reservations in the environs of the District of Columbia, and for other purposes;

H. R. 4023. An act to authorize the establishment of the De Soto National Memorial, in the State of Florida, and for other purposes;

H. R. 4461. An act approving the performance in the field of certain functions relating to the public lands;

H. R. 4513. An act to eliminate the requirement of oaths in certain land matters, and for other purposes;

H. R. 4549. An act to authorize the enactment by the Legislature of the Territory of Alaska of a code of laws for Alaska;

H. R. 4823. An act to provide adequate school facilities within Yellowstone National Park, and for other purposes;

H. R. 4980. A bill relating to the acquisition by the United States of State-owned lands within Glacier National Park, in the State of Montana, and for other purposes; and

H. J. Res. 61. Joint resolution to provide for the designation of the Park River dam and reservoir project in Walsh County, N. Dak., as the Homme Reservoir and Dam; to the Committee on Interior and Insular Affairs.

H. R. 2313. A bill to amend the act of May 19, 1926 (44 Stat. 565), as amended by the acts of May 14, 1935 (49 Stat. 218), and of October 1, 1942 (56 Stat. 763), providing for the detail of the United States military and naval and Air Force missions to foreign governments; and

H. R. 5035. A bill to authorize the attendance of the United States Marine Band at the Eighty-second National Encampment of the Grand Army of the Republic to be held in Grand Rapids, Mich., September 26 to 30, 1948; to the Committee on Armed Services.

ADDITIONAL EXPENDITURES BY COMMITTEE ON APPROPRIATIONS

Mr. BRIDGES submitted the following resolution (S. Res. 201), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on Appropriations hereby is authorized to expend from the contingent fund of the Senate, during the Eightieth Congress, $10,000 in addition to the amounts, and for the same purposes, specified in section 134 (a) of the Legislative Reorganization Act approved August 2, 1946, and Senate Resolution 130, agreed to June 26, 1947.

MEETINGS OF COMMITTEES

Mr. IVES asked and obtained consent that the Subcommittee on Education of the Senate Committee on Labor and Public Welfare be permitted to continue hearings on Senate bill 1390 during the remainder of today's session.

Mr. TAFT asked and obtained consent that the Committee on Expenditures in the Executive Departments be permitted to sit during the session of the Senate today.

Mr. ROBERTSON of Wyoming asked and obtained consent that a subcommittee of the Committee on Armed Services be permitted to meet during the session of the Senate today.

Mr. KNOWLAND, on behalf of Senator COOPER, asked and obtained consent that a subcommittee of the Committee on the Judiciary be permitted to meet during the session of the Senate today.

AMERICAN PRINCIPLE APPLIED TO A JOINT EUROPEAN RECOVERY PROGRAM—ADDRESS BY SENATOR CAPEHART

[Mr. CAPEHART asked and obtained leave to have printed in the RECORD an address entitled "American Principle Applied to a Joint European Recovery Program," delivered by him at Peoria, Ill., on February 7, 1948, which appears in the Appendix.]

PAY AND RETIREMENT BENEFITS FOR POSTAL EMPLOYEES—ADDRESS BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD an address delivered by him on Saturday, February 14, 1948, at the annual meeting of Eastern States Postal Employees' Councils, at the William Penn Hotel, Harrisburg, Pa., which appears in the Appendix.]

ECONOMIC PROBLEMS—ADDRESS BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD an address delivered by him on February 12, 1948, in Philadelphia, Pa., at the annual banquet of the Pennsylvania State Association of Township Supervisors, which appears in the Appendix.]

TWO HUNDRED AND FORTY-SECOND ANNIVERSARY OF THE BIRTH OF BENJAMIN FRANKLIN—ADDRESS BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD an address delivered by him on January 17, 1948, in connection with the ceremonies in Philadelphia marking the two hundred and forty-second anniversary of the birth of Benjamin Franklin, which appears in the Appendix.]

EXPANSION OF STEEL INDUSTRY—ARTICLE BY W. L. RUSSELL

[Mr. MYERS asked and obtained leave to have printed in the RECORD an article regarding the expansion of the steel industry, written by W. L. Russell and published in the Pittsburgh Press of February 3, 1948, which appears in the Appendix.]

DISTRIBUTION OF AMERICAN RESEARCH FUNDS—ARTICLE BY CLARENCE A. MILLS

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD an article entitled "Distribution of American Research Funds," by Clarence A. Mills, of the University of Cincinnati, published in the magazine Science of February 6, 1948, which appears in the Appendix.]

UNITED STATES STAND ON THE PALESTINE SITUATION—ARTICLE BY SUMNER WELLES AND MEMORANDUM BY SENATOR BREWSTER

[Mr. BREWSTER asked and obtained leave to have printed in the RECORD an article entitled "United States Stand on Palestine Viewed As Starting UN on League's Path," written by Sumner Welles and published in the New York Herald Tribune of February 17; also a memorandum prepared for him dealing with the legal problems involved, which appear in the Appendix.]

CIVIC PROBLEMS, CIVIC BODIES—ARTICLE BY JESSE C. SUTER

[Mr. CAPPER asked and obtained leave to have printed in the RECORD an article entitled "Civic Problems, Civic Bodies," written by Jesse C. Suter and published in the February 8, 1948, issue of the Washington (D. C.) Sunday Star, which appears in the Appendix.]

THE OIL MUDDLE—EDITORIAL FROM THE EXETER NEWS LETTER

[Mr. BRIDGES asked and obtained leave to have printed in the RECORD an editorial entitled "The Oil Muddle," from the Exeter (N. H.) News Letter of February 5, 1948, which appears in the Appendix.]

DISMANTLING OF GERMAN INDUSTRIAL PLANTS—EDITORIAL FROM THE NEW HAMPSHIRE MORNING UNION

[Mr. BRIDGES asked and obtained leave to have printed in the RECORD an editorial entitled "BRIDGES Is Right," pertaining to the dismantling of German industrial plants, published in the New Hampshire Morning Union of February 12, 1948, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—EDITORIAL FROM THE DAYTONA BEACH EVENING NEWS

[Mr. AIKEN asked and obtained leave to have printed in the RECORD an editorial entitled "The St. Lawrence Seaway," from the Daytona Beach Evening News, which appears in the Appendix.]

NATIONAL SECURITY WEEK

Mr. SALTONSTALL. Mr. President, I ask unanimous consent to have printed in the RECORD a statement written by the distinguished chairman of the Senate Armed Services Committee, the Senator from South Dakota [Mr. GURNEY]. The statement, which appears in the current issue of the Reserve Officer, relates to National Security Week, which is now being observed throughout the country.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON ARMED SERVICES.

In these days of international uncertainty and tension it is very desirable that American citizens be kept constantly aware of the need for an adequate security force.

National Security Week, under the sponsorship of the Reserve Officers Association of the United States, is an effective and dramatic way of reminding the American public that only a strong America can make a genuine contribution to the preservation of peace.

I am heartily in accord with the patriotic purpose behind National Security Week, and I hope every citizen of America will take part in its observance.

CHAN GURNEY,
Chairman.

LITHUANIAN INDEPENDENCE DAY

Mr. LODGE. Mr. President, yesterday, February 16, marked the thirtieth anniversary of Lithuania's independence day. It is therefore appropriate that we pause to pay our sincere respects to our many citizens of Lithuanian descent and to join with them in the fervent hope that the day may not be too far distant when this brave little nation once again will enjoy true liberty and freedom.

We all know how the traditionally freedom-loving people of the Republic of Lithuania were the first to disappear behind the implacable "iron curtain." We have all read with distress of mass deportations, of arrests in the night, of swift trials, of executions, and of the other tragic symptoms of systematic extermination. These unhappy events can give us little cause for rejoicing on a day which commemorates a country's independence. But it should cause us to ponder seriously whether we, as the strongest Nation in the world, have not been lax and morally weak in permitting such conditions to continue to exist.

Last November the Lithuanian Minister here in the United States addressed

a moving appeal to the President of the General Assembly of the United Nations. He spoke on behalf of the Republic of Lithuania which, since 1940, has been occupied and administered by officials of the police state. He asked the United Nations to take measures, in keeping with the fundamental rights guaranteed by the United Nations Charter, to safeguard the Lithuanian people against enslavement and extermination. Certainly the United Nations cannot turn its back and look the other way when the spokesman of a small nation appeals for a hearing on life-or-death charges of this kind. Nor can we, as Americans, continue to ignore through silence an intolerable situation of this kind. Not since 1941, when the State Department issued a statement denouncing the Russian occupation of Lithuania, has there been any further official comment on our part. Our continued silence is not a matter for pride.

Mr. President, February 16 means as much to our Lithuanian friends as July 4 means to us. Let its significance not escape us. Let not its future observance be marked with the deprivation of civil rights, freedom of the press, speech, and assembly. Let this day stand once again for free elections and free religions. Let us, at the very least, lend strong moral courage to those who through ties of family, friendship, and tradition, remember Lithuania as a cradle of freedom in Europe, and who look to us, as a powerful stronghold of moral and civil liberty, for a word of encouragement and hope in these troubled times.

Mr. President, I ask unanimous consent to have printed following these remarks an editorial entitled "Lithuania's Independence," printed in the New York Times of February 16.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

LITHUANIA'S INDEPENDENCE

With their country still writhing under the heel of the conqueror, the Lithuanian people commemorate today with heads bloodied but unbowed the thirtieth anniversary of the signing of their declaration of independence. After more than a century of struggle against oppression by the Russian Czars, and in defiance of the armies of the Kaiser then still on Lithuanian soil, the Council of Lithuania, on February 16, 1918, in consultation with American Lithuanians, formally declared the country to be free and independent. This act conformed with President Wilson's doctrine of the right of self-determination. There seemed to be every prospect for its continued success and prosperity when the Kaiser's empire collapsed, and when the Russian revolutionary government proclaimed that the age of "imperialistic ravishers" was over. In the peace treaty with Lithuania the Soviets "voluntarily and for all time abandoned all the sovereign rights of Russia over the Lithuanian people and their territories."

The independence of Lithuania is still recognized by the United States and most other countries, and Lithuanian diplomatic missions still function abroad. But Russia, reverting to the policies of the "imperialistic ravishers," has renounced all her pledges and treaty obligations and has again annexed Lithuania, like the two other Baltic republics, by her own unilateral action. Moreover, she is subjecting their people not only to the oppression and terrorism that is the lot of everybody under Moscow's rule, but is deliberately pursuing a policy of extermination and deportation in the effort to replace the "unfriendly" native populations with reliable Russian Communists.

But the Lithuanian people continue to fight for independence. They are fighting as partisans in the forests. They are fighting, insofar as that is possible, at the ballot boxes. Even the Russians had to admit that in recent local elections the Communists polled only 11.6 percent of the vote, the rest going to "nonparty" candidates. Above all, they are fighting to arouse the conscience of the world, in particular that of the United Nations, to which they have submitted a plea for action against the genocide being practiced in their land. Sooner or later the world will have to take note of their struggle and give it the support it deserves.

CONCENTRATION OF ECONOMIC POWER IN JAPAN

Mr. MCMAHON. Mr. President, on January 19, my good friend the junior Senator from California [Mr. KNOWLAND] delivered an address to the Senate in which he very vigorously criticized the occupation policy in Japan. He particularly directed his criticism to an order of the Far Eastern Commission known as Order 230. I suggested to the Senator from California that it would have been well if he had consulted General MacArthur in order to obtain the general's viewpoint. In answer to a question as to whether that had been done, the Senator asserted that he had not done so. I thereupon told the Senator I would forward his speech to General MacArthur for his comment. I have in my hand a copy of a letter which General MacArthur wrote me regarding Order No. 230. The letter is dated February 1, 1948, and as it is not long I should like to read it:

GENERAL HEADQUARTERS,
SUPREME COMMANDER
FOR THE ALLIED POWERS,
Tokyo, Japan, February 1, 1948.

Senator BRIEN MCMAHON,
United States Senate,
Washington, D. C.

DEAR SENATOR MCMAHON: I have your letter of January 22 and the pages from the CONGRESSIONAL RECORD subsequently received under separate cover, for which I thank you.

The discussion of Senator KNOWLAND covers a policy paper of the United States formulated by the State, War, and Navy Departments and referred to the Far Eastern Commission for consideration by the other 10 governments represented on that body and to the Supreme Commander for the Allied Powers for guidance. As the sources of origin, authorship, and authority are all in Washington and my responsibility limited to the executive implementation of basic decisions formulated there, I am hardly in a position 10,000 miles away to participate in the debate.

For your information, however, I did publicly state my view with respect to the underlying purpose of the policy paper known as FEC 230 on New Year's Day last and subsequently on January 6, 1948, at San Francisco the Secretary of the Army in an address before the Commonwealth Club, with marked clarity, summed up the situation as it presently exists. It is somewhat difficult to understand why these published views did not figure in the discussion of the subject matter upon the floor of the Senate, and against the possibility that the texts of such statements did not come to your attention I am enclosing herewith copies thereof which I should be only too glad to have inserted in the RECORD as you have suggested.

In any evaluation of the economic potential here in Japan it must be understood that the tearing down of the traditional pyramid of economic power which has given only a few Japanese families direct or indirect control over all commerce and industry, all raw materials, all transportation, internal and external, and all coal and other power resources, is the first essential step to the establishment here of an economic system based upon free private competitive enterprise which Japan has never before known. Even more it is indispensable to the growth of democratic government and life, as the abnormal economic system heretofore in existence can only thrive if the people are held in poverty and slavery.

The Japanese people, you may be sure, fully understand the nature of the forces which have so ruthlessly exploited them in the past. They understand that this economic concentration not only furnished the sinews for mounting the violence of war but that its leaders, in partnership with the military, shaped the national will in the direction of war and conquest. And they understand no less fully that the material wealth comprising this vast concentration at war's start increased as war progressed, at the forfeiture of millions of Japanese lives, as resources of Japan theretofore only indirectly controlled came under direct control and ownership. These things are so well understood by the Japanese people that apart from our desire to reshape Japanese life toward a capitalistic economy, if this concentration of economic power is not torn down and redistributed peacefully and in due order under the occupation, there is no slightest doubt that its cleansing will eventually occur through a blood bath of revolutionary violence. For the Japanese people have tasted freedom under the American concept and they will not willingly return to the shackles of an authoritarian government and economy or resubmit otherwise to their discredited masters.

With expressions of cordiality.

Faithfully yours,

DOUGLAS MACARTHUR.

Mr. President, I ask unanimous consent that there be printed in the RECORD, immediately following these remarks, the documents referred to in the letter of General MacArthur.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

JANUARY 1, 1948.

To the People of Japan:

The design of a remodeled and reconstructed Japan is nearing completion. The pattern has been etched, the path has been laid. The development now lies largely in your own hands. Success or failure will depend upon your ability to practice the simple, yet transcendental, principles which modern civilization demands.

No occupation, however benevolent and beneficial, can substitute for the spiritual uplift which alone can lead to an invincible determination to build a future based upon the immutable concepts of human freedom—a social status under which full consciousness of individual responsibility must ever remain the keystone to the arch of success and progress.

Individual hardship is inevitable. Your economy, due to the disastrous war decisions of your past leaders, is now impoverished. This can only be relieved by employment to the maximum of the energies of your people, by wisdom and determination on the part of your leaders, and by the restoration of peace with its removal of existing limitations upon international trade. So long as your needs

continue to be greater than your productive capacity, controls upon your internal economy will be essential lest the weaker segments of your population perish. Such controls must, however, only be temporary and subject to ultimate removal in favor of free enterprise.

Economically, Allied policy has required the breaking up of that system which in the past has permitted the major part of the commerce and industry and natural resources of your country to be owned and controlled by a minority of feudal families and exploited for their exclusive benefit. The world has probably never seen a counterpart to so abnormal an economic system. It permitted exploitation of the many for the sole benefit of the few. The integration of these few with government was complete and their influence upon governmental policies inordinate, and set the course which ultimately led to war and destruction. It was, indeed, so complete a monopoly as to be in effect a form of socialism in private hands. Only through its dissolution could the way be cleared for the emergence of an economy conducive to the well-being of all the people—an economy embodying the principle of private capitalism, based upon free competitive enterprise—an economy which long experience has demonstrated alone provides the maximum incentive to the development of those fundamental requirements to human progress—individual initiative and individual energy.

Politically, progress toward reform has been equally encouraging. Your new constitution is now in full effect, and there is increasing evidence of a growing understanding of the great human ideals which it is designed to serve. Implementing laws have reoriented the entire fabric of your way of life to give emphasis to the increased responsibility, dignity, and opportunity which the individual now holds and enjoys. Government has ceased to be totatitarian and has become representative, with its functions decentralized to permit and encourage a maximum of individual thought and initiative and judgment in the management of community affairs. Control of every political segment has been shifted to permit the selection of a new leadership of your free choice capable of advancing democratic growth.

Socially, many of the shackles which traditionally have restricted individual thought and action have been severed and action has been taken to render the exercise of police power a matter for individual and community, rather than national, responsibility. The judicial system has been freed from executive and legislative controls, and laws have been enacted to temper inordinate bureaucratic power by requiring all public officials to justify the trust of public responsibility and answer for their acts directly to the people.

Every Japanese citizen can now for the first time do what he wants, and go where he wants, and say what he wants, within the liberal laws of his land. This means that you can select your own work, and when you have completed it you can choose your own method of relaxation and enjoyment, and on your day of rest you can worship as you please, and always you can criticize and express your views on the actions of your government. This is liberty. Yet inherent in it are its obligations to act with decorum and self-restraint, and become acutely conscious of the responsibilities which a free society imposes upon its every segment.

The future therefore lies in your hands. If you remain true to the great spiritual revolution which you have undergone, your nation will emerge and go on—if you accept only its benefits without its obligations, it will wither and go under. The line of demarcation is a simple one, understandable to all men—the line between those things which are right and those things which are wrong. The way is long and hard and beset with difficulties and dangers, but it is my hope and belief and prayer this New Year's Day that you will not falter.

DOUGLAS MACARTHUR.

ADDRESS BY SECRETARY OF THE ARMY K. C. ROYALL

To many American citizens—including myself—the most surprising development—and one of the most disappointing aspects of our victory over Germany and Japan has been the responsibility and cost which have been placed upon us in the matter of occupation. There were few who originally recognized the extent of this burden. And today every citizen of our country is justified in asking the "what" and the "why" of our occupation policies.

On this occasion I will speak specifically of Japan. Immediately after the surrender, the objectives of our policy were stated to be, first, "To insure that Japan will not again become a menace to the peace and security of the world," and, second, "to bring about the earliest possible establishment of a democratic and peaceful government which will carry out its international responsibilities, respect the rights of other states, and support the objectives of the United Nations."

The underlying idea was the prevention of future Japanese aggression—direct prevention by disarmament and indirect prevention by creating a type of government unlikely to develop again the spirit of aggressive war. The real well-being of Japan—or her strength as a nation—was decidedly a secondary consideration—secondary to protection of ourselves against Japan, and secondary to payment of reparations to the victorious Allies for the damages inflicted upon them.

This attitude is clearly shown by the emphasis in the original directive, which stated in part: "Japan shall be permitted" (not encouraged but permitted) "to maintain such industries as will sustain her economy and permit the exaction of reparations * * * but not * * * enable her to rearm. * * * Access to, as distinguished from control of, raw materials should be permitted. Eventual Japanese participation in world trade * * * will be permitted."

It is clearly understandable—and it was fully in accord with the then feelings and opinions of our people—that in 1945 the main purpose of occupation should be protection against an enemy which had viciously attacked us and which had committed brutal atrocities against our troops and our private citizens.

Since then new conditions have arisen—in world politics and economics, in problems of national defense, and in humanitarian considerations. These changes must now be fully taken into account in determining our future course, but it should be remembered that these developments arose in large part after the original policies were set.

These original policies were promptly carried out. Within a few months after the end of hostilities, all Japanese tactical units had been dissolved and all implements of war destroyed or insulated. The top Japanese military organizations, as well as the infamous secret and terroristic societies, were abolished. Those who formulated the Japanese policies of conquest and aggression were removed from important political and economic positions.

War-making industries were marked for removal and reparation. This included arsenals, private munitions plants, aircraft factories, military research laboratories, synthetic rubber and oil plants, shipbuilding installations, and certain chemical, machine tool, precision bearing, thermoelectric, and metal factories, nonferrous and others. Commitments were made to other nations for payment of reparations with those plants.

Other steps followed, including those leading to the dissolution of concentrations of property ownership and economic power. At the end of the war—and for a long period before the war—land ownership had been in the hands of a comparatively small part of the population. The system was analogous to the feudal system of past centuries, and in Japan the land barons used their power to encourage war.

In the business field, the Zaibatsu, or money cliques dominated completely and ruthlessly the Japanese economy—through holding companies and monopolies. A dozen families controlled over 75 percent of the country's commerce, industry, and finance.

The influence over the Japanese Government of these and other monopolies was almost unbounded, and they were linked inseparably with the militarists. This joint group over a course of years—and particularly in the year and a half before Pearl Harbor—encouraged Japan toward war and destruction.

Steps were taken to break both types of concentrations. Under a directive issued by the Supreme Allied Commander, the Japanese Diet enacted in the fall of 1946 a land-reform law under which, through local land commissions, the 5,500,000 Japanese farm families could acquire land from the present owners at a reasonable price and pay for it over a period of years. This program will be completed by the end of 1948. Just as in America, the small landowner is symbolically and factually democracy in practice, so we expect that in time the strength of Japanese democracy will find roots in similar soil.

Action against the Zaibatsu has proceeded vigorously, and its control has now been virtually abolished. Sixty-seven holding companies, with 4,000 subsidiaries and affiliates, have been marked for liquidation. The two largest holding companies—Mitsubishi and Mitsui—have been closed. Others of the larger ones have been almost wholly liquidated.

The Japanese Government has been directed to prepare legislation prohibiting international cartels. Stringent antitrust and deconcentration legislation has been prepared and passed in part. A Holding Company Liquidation Commission has been established and is functioning in the supervision of the entire program.

While these various steps were being taken, new developments were arising, and old factors were changing in importance. Japan had never been able to provide all of its own food—nor to produce enough of many other necessities of life. Seventy-eight million Japanese occupy an area smaller than California, and of that area only 16 percent is capable of cultivation.

The population is still growing at an enormous rate. It is expected to reach 84,000,000 by 1951. The current troubled condition in Asia leaves practically no food available for import into Japan, even if the currency and Japanese export situation would make food purchases possible—which they would not. And yet without food and other necessities, Japan would be faced with widespread starvation and disease—would seethe with unrest and disorder and hopelessness. Even aside from the simple principles of humanity, we could not, under such conditions, accomplish our original objective of a peaceful Japanese Government. Nor could we hope that Japan would be other than susceptible to totalitarianism and Shintoism with democracy, to begin to replace educational regimentation with academic freedom, and to build the foundations for a peace-loving government of the people.

For this and other achievements in Japan, great credit must be given to General MacArthur and his staff. America was, indeed, fortunate that for this vital task, it had an outstanding leader who could bring the Japanese to a complete realization of their defeat and at the same time obtain their full cooperation in forming a free and stable government.

But the Department of the Army and the Department of State—which shares the policy responsibility of occupation—both Departments realize that for political stability to continue and for free government to succeed in the future, there must be a sound and self-supporting economy, and General MacArthur in command of the occupation can be depended upon to implement these policies.

We also realize that the United States cannot forever continue to pour hundreds of millions of dollars annually into relief funds for occupied areas, and that such contributions can end without disaster only when the occupied countries can pay for their own necessities with their own production and exports.

These factors have resulted in efforts to improve in many fields the economic situation in Japan. And with this increasing economic approach there has arisen an inevitable area of conflict between the original concept of broad demilitarization and the new purpose of building a self-supporting nation.

In the case of agriculture the two purposes do happen to run practically parallel. The breaking down of feudal holdings has ended a war-making influence. At the same time the wider division of lands tends to produce incentive on the part of the larger number of landowners and thereby to increase over-all production.

But it is a different situation with manufacturing. The destruction of synthetic rubber or shipbuilding or chemical or nonferrous metal plants will certainly destroy the war potential of Japan, but such destruction may also adversely affect the peace potential.

The dissolution of the Zaibatsu may present in itself no serious economic problem, but at some stage extreme deconcentration of industry, while further impairing the ability to make war, may at the same time impair manufacturing efficiency and reduce the over-all production and the exportable surplus of Japanese industry—may, therefore, postpone the day when Japan can become self-supporting.

Such is our dilemma. It is clear that Japan cannot support itself as a nation of shopkeepers and craftsmen and small artisans any more than it can exist as a purely agricultural nation. We can expect a continuing economic deficit in Japan, unless there is at least some degree of mass industrial production.

Another border-line situation between demilitarization and economic recovery is presented in the case of personnel. The men who were the most active in building up and running Japan's war machine—militarily and industrially—were often the ablest and most successful business leaders of that country, and their services would in many instances contribute to the economic recovery of Japan.

What should we do about them now? We cannot afford to leave the Japanese war system intact nor forget that there is danger in retaining in power leaders whose philosophy helped bring on World War II. On the other hand, we cannot afford to sterilize the business ability of Japan.

Nor can we believe without qualification individual Japanese protestations of war innocence or of peacetime reformation. One Senator said to me in Germany shortly after VE-day: "I have inquired everywhere, and I have not yet found a single Nazi in Germany," to which could perhaps now be added, "Nor a war lord in Japan."

All these matters present questions of degree, and the decisions are matters of judgment. These decisions are not difficult at a cocktail party or from an easy chair or on a rostrum, if made by those who have no responsibility for the decisions or their results. It is somewhat different when you must live and suffer with any errors that you might make.

The Departments of State and Army are trying to draw the lines in the right place. And in doing so they are giving—and will give—full weight to the changes in political and military and economic considerations which have occurred since the initial days of occupation.

We realize that deconcentration must stop short of the point where it unduly interferes with the efficiency of Japanese industry. Earlier programs are being reexamined—as for example the details of the program stated in the paper submitted some months ago to the Far Eastern Commission, and recently given wide publicity as FEC-230.

We are not averse to modifying programs in the interests of our broad objectives. A bill recently submitted to the Japanese Diet setting up procedures for deconcentration of excessive economic power was changed before its final enactment—changed with a view of giving added weight to the economic needs of Japan.

In the case of plant dismantling and reparations—in addition to the matter of disarmament—we are bound by certain agreements with other nations—agreements which must be carried out unless breached by those others or altered by consent. However, since last summer we have had a competent group of industrial engineers in the Pacific, selecting the specific plants which, consistent with our obligations, can be dismantled with the minimum of detriment to Japanese economic recovery. The report and recommendations of this committee should reach the Department of the Army during this month.

I would not leave the impression that questions of demilitarization or reparation or deconcentration or disqualification of personnel are the most immediate obstacles to Japanese recovery. The principal difficulties arise from the destruction which was brought to Japan and to the chaotic condition which has existed in the Far East since VJ-day.

The flimsy nature of Japanese construction and the concentrated population centers made these islands most vulnerable targets for our incendiary and other missiles. Even aside from the effects on Hiroshima and Nagasaki—of the atomic bombs, many Japanese cities were largely destroyed. I believe that on a percentage basis, greater Tokyo—with about 7,000,000 people as of 1940—was as badly damaged as any enemy city in the entire world.

Japan has long been dependent on the rest of Asia not only for foodstuffs but for raw materials needed in their manufacturing and business life, and it has relied largely on general commerce with China and other neighbors. With the war and its aftermath these sources of import and export are largely nonexistent.

Many affirmative steps have been and are being taken to meet these and other difficulties—and to promote recovery and thereby hasten the day when Japan will cease to be a financial burden to the United States. I wish that time permitted me to discuss in detail our activities in many fields, including those of finance and credit and foreign trade.

Some results of our efforts are apparent. Over-all Japanese industrial production has risen from 18 percent of the 1930–34 level in January 1946 to 40 percent in August 1947. In the case of coal—basically needed for business recovery—the present production is 86 percent of the 1930–34 level. Fertilizer has increased fourfold during occupation. One-fourth of the war-destroyed houses in Tokyo and vicinity have been replaced. Six hundred thousand acres of land have been reclaimed for cultivation, and a million more should be added by 1950.

In this whole picture of Japan do not forget that we are supervising an entire government—and one disorganized by an unsuccessful war. We have all the many normal policy and operating problems of a stable and successful government plus the added ones produced by the unusual and distressing conditions peculiar to present-day Japan.

The differences from our own country are such that we cannot expect to impose on the Japanese people an exact reproduction of American democracy. It follows that often there is no precise precedent for our problems, and the departments must do as our forefathers did in the early days of our own Government, reach the best results we can by trial and error.

The lines to be drawn are, of course, not always easy to draw, and as in the case of all decisions of importance, one cannot be too dogmatic. There can be—and are likely to be—differences of opinion among sincere and informed people. Nor do I have any illusion that everything we do will be perfect.

But I can assure you that our decisions will be made with realism and with a firm determination of doing all possible to prevent Japan from again waging unprovoked and aggressive and cruel war against any other nation. We hold to an equally definite purpose of building in Japan a self-sufficient democracy, strong enough and stable enough to support itself and at the same time to serve as a deterrent against any other totalitarian war threats which might hereafter arise in the Far East.

SALE OF CERTAIN LANDS OF L'ANSE INDIANS, MICHIGAN

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 522) to authorize the sale of certain lands of the L'Anse Band of Chippewa Indians, Michigan, which was, on page 1, line 6, after the word "of", to insert "the southeast quarter of."

Mr. WATKINS. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

SETTLEMENT OF CERTAIN CLAIMS OF INDIANS OF FORT BERTHOLD INDIAN RESERVATION, N. DAK.

The PRESIDING OFFICER laid before the Senate an amendment of the House of Representatives to the bill (S. 1133) providing for the per capita payment of certain moneys appropriated in settlement of certain claims of the Indians of the Fort Berthold Indian Reservation in North Dakota, which was, on page 1, line 7, strike out "$150" and insert "$300,000 to be distributed."

Mr. WATKINS. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

THE TAFT-HARTLEY LAW

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an editorial which

appeared in the Eugene Register Guard, my home-town newspaper, last week. The editorial is entitled "Political Freedom at Issue," and it deals with the Taft-Hartley law.

I wish to say for the record that I share every criticism of the Taft-Hartley law, which the editorial makes; indeed, every criticism of the Taft-Hartley law contained in the editorial is also to be found in the speeches delivered by the junior Senator from Oregon on the Taft-Hartley bill when it was before the Congress. I predict that as the campaign of 1948 gets under way the criticisms of the Taft-Hartley bill which were made during the debate on it during the course of its passage through the Congress will come home to roost. However, it is not too late for my party to take the steps it should take in adopting at this session of Congress some constructive amendments to the Taft-Hartley law. As the clouds of recession and possible depression, with consequent unemployment, start to hover over this land, people then will discover what a legal monstrosity the Taft-Hartley law really is. Millions of dollars are being spent in propaganda to convince the American worker that the Taft-Hartley law does not destroy or injure any of his legitimate rights. However, the propaganda is not fooling the workers because they are already beginning to experience the injustices of the law including its return to Government by injunction. I shall continue, Mr. President, across this land during the campaign, to make my fight for constructive amendments to the Taft-Hartley law, because in its present form it cannot be justified by the leaders of any political party.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oregon?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

POLITICAL FREEDOM AT ISSUE

Futility is a mild word, in our opinion, for those sections of the Taft-Hartley law which seek to make it a crime for labor unions or their leaders to spend union funds for political purposes. Indictment of Philip Murray, chieftain of CIO, brings sections to a test of constitutionality.

It is always unsafe to predict how the Supreme Court will interpret the Constitution or any section of it or amendment to it, but the issue in this case will be whether these sections of the Taft-Hartley bill conflict with the first amendment:

"Congress shall make no law * * * abridging the freedom of speech, or of the press."

It appears that Mr. Murray, with CIO funds, bought ads in the CIO News in behalf of a candidate for Congress in Maryland, and he probably would not even attempt to deny that he did this deliberately and defiantly.

Was this act within his rights as a citizen?

We think it was. We think that the privilege of publishing a political statement is one which must never be denied to any citizen or any group of citizens, and that the laws of libel are the only boundaries of that privilege. The fact that this privilege has been or may be abused has nothing to do with the main issue—the right or privilege of publishing a political opinion.

Likewise we think that the right or privilege of contributing moral or financial support to a party or to a candidate is one which can be limited only by clearcut and equitable definitions of "corrupt practices."

Take any of these rights away from labor unions, labor leaders or any other class of people, and you are paving a nice, swift road to dictatorship.

"But what about such smelly things as that gift of $500,000 out of United Mine Workers' funds which John L. Lewis made to the Roosevelt campaign in 1936, and apparently without consulting his miners?"

For the public, the best defense against such tactics is complete and merciless publicity. For union members whose treasuries may be raided by ambitious or unscrupulous leaders, the remedy lies in the votes within the union. There is nothing in the Constitution of the United States which says that a union may not prohibit the use of its funds for political purposes, except with the voted consent of the members.

Whether the offenders are great business corporations or rich labor unions, there is a point beyond which legitimate financial support of parties or candidates becomes an effort to buy preferment and publication of these transactions is a powerful weapon because, where the people are informed of such transactions there is instinctive and fierce resentment, such as that which followed news of the Lewis deal in 1936.

A public accounting of how a great union has administered its funds can do more to correct abuses than any effort to regulate in advance how they shall be spent. In too many unions the members have had no voice, political or otherwise, in their own affairs.

We do not think that political activity of unions or union leaders can or should be prohibited. There are grave abuses, but we have a hunch the Supreme Court will share our extremely conservative view that the remedy does not lie in abridging freedom of political action or free speech.

Mr. PEPPER. Mr. President, following the remarks by the Senator from Oregon regarding the Taft-Hartley law, I suggest that the most constructive amendment of that law would be its repeal. I hope the Senator from Oregon will associate himself with a good many of us who have introduced a bill to repeal the Taft-Hartley Act as the most constructive possible amendment of that legislation.

LEGISLATIVE PROGRAM

Mr. TAFT. Mr. President, I wish to state for the information of the Senate that when the Senate concludes its business today it will recess until tomorrow, at which time it may be possible to take up the measure relating to the legislative budget. A recess then will probably be taken until Friday, when we will start the consideration of the rent-control bill, if that be possible.

Mr. BARKLEY. Mr. President, in that connection, in view of the speeding of time, I think it is very important that the Senate begin and conclude the consideration of rent-control legislation at the very earliest possible date. As everyone knows, the present law will expire on the 29th of February. The Committee on Banking and Currency of the Senate has ordered a bill reported, which report I presume will be made today, extending the present law for 14 months. The House committee has voted out a joint resolution extending the present law for 1 month, with a view of giving more time for the consideration of the matter. From all standpoints, I think it would be extremely desirable if a bill could be passed before the expiration of the present law extending rent controls, under whatever form Congress will agree to do it, for a period of a year, or such other period in that neighborhood as may be agreed upon, rather than pass a measure temporarily extending the law for 30 days.

I make this observation in the hope that the Senate may be able to get rid of the question of rent control before the present law expires.

The PRESIDING OFFICER. The Chair would like to say to the Senator from Kentucky that his information is correct, that, subject to the ability of the various attorneys to get the bill in proper form, it will be reported to the Senate during the course of this afternoon.

Mr. BARKLEY. If the request has not been made, I suggest that the committee be allowed to have that done during the recess of the Senate.

The PRESIDING OFFICER. Without objection, the order is made.

RURAL ELECTRIFICATION

Mr. LANGER. Mr. President, I ask unanimous consent to introduced for appropriate reference a bill authorizing the appropriation of a billion dollars for rural electrification.

There being no objection, the bill (S. 2168) authorizing the appropriation of $1,000,000,000 for the purposes of rural electrification, introduced by Mr. LANGER, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. LANGER. Mr. President, I wish to speak on the bill.

The PRESIDING OFFICER. Without objection, the Senator may proceed.

Mr. LANGER. Mr. President, during the last 6 years, in the Great Plains area, in North Dakota, South Dakota, Montana, Nebraska, and Minnesota, and one or two of the adjoining States, there has been a woeful lack in the building of power lines and other facilities by REA. As I stated last Friday, when discussing the subject, there are hundreds of thousands of farmers who as much as 4 or 5 or 6 years ago joined REA cooperatives, but who have not yet had built up to and connected with their farms the lines which would provide power and electricity.

Most of us are familiar with the investigation of the subject conducted by the distinguished former Senator from Minnesota, Mr. Shipstead. About a year ago he conducted hearings which lasted some 3 or 4 weeks on the subject of REA cooperatives. Upon taking up the subject of the lack of expansion of REA in the Great Plains area, and in the Midwestern States, I was told by Mr. Claude Wickard that it was partly due to a lack of personnel. Therefore the Civil Service

Committee of the Senate investigated the personnel of the entire REA administration. The hearings before our committee lasted approximately 3 weeks. Nearly every hearing was attended by Mr. Claude Wickard, Administrator of Rural Electrification in the United States. As a result of his testimony, and the testimony of others before our committee, I have today introduced a bill authorizing the appropriation of $1,000,000,000 for the extension of REA.

One of the most important statements made at the hearings was that by Mr. Claude Wickard himself. I intend to read all of it into the RECORD, with my comments thereon. Mr. Wickard, on the 22d day of January, testified as follows:

To assist the committee—

He referred to the Civil Service Committee of the Senate—

in its examination of the Rural Electrification Administration, I would like to describe briefly the background of rural-electrification development in this country, the origin and purpose of REA, how the agency operates, what progress it is making, and the special problems existing at this time. I hope that such a report will assist you in understanding the personnel problems and policies of our agency.

Many Senators are busy with plans for loans to Greece, to Turkey, to Great Britain, and to other countries. Many are busily engaged in working on the Marshall plan. While they are busy trying to assist other people all over the world, I have received letters from farmers all over the Great Plains area protesting against the way in which the REA has been handled, both by the Democratic administration and the Republican majority in Congress. I may say that, if anything, the writers of these letters are more severe in their criticism of the way the Republican Congress has handled the REA than with the way in which the Democratic administration has handled it. I have received hundreds upon hundreds of letters protesting against the way in which REA is handled, and in substance the letters are all alike. The writers say that 4 or 5 or 6 years ago they joined an REA cooperative and paid in the money required, but from the day they paid in their money until today they have heard nothing more about the matter. Other letters, of course, say that since the writers have paid in their money there have been some meetings held, and some poles have been set up. Some say there are poles standing without any wires being strung upon them, and that up to the present time they have received no service through REA.

Other letters say that poles have been erected, and some wires have been strung, and then suddenly there has developed a so-called shortage of wire, so that all the work could not be completed. Other letters say that poles have been erected and lines have been strung, but that there are no aluminum conductors available, and therefore, the writers are without light and power.

Strangely enough, Mr. President, letter after letter sets forth that, although the REA was in the field before a private power company was anywhere near, yet owing to the ostensible lack of material and the fact that REA, so it was alleged, could not secure the necessary material, the local private power companies have built in their lines, sometimes with loans obtained from the Government, and have thus picked off the cream of the farmers around the small towns, with the result that now, when the REA has become organized, it is handicapped because it cannot induce certain farmers to join the REA and cannot hook up and connect with the local cooperatives.

Mr. Wickard very carefully, clearly, concisely, and logically explained how that development occurred throughout the country. He continued in his testimony:

Rural electrification had made little progress in this country up to 1935. Despite the extensive use of electric power in industry and of electric lighting in the cities and towns, only 744,000 farms, or slightly more than 10 percent of all the farms in the country, had received electric service as of January 1 of that year.

Mr. President, let me again interpolate, as I did last Friday, some figures at that point. Two years ago, when our soldiers were returned from foreign countries in which they had been stationed, they told, among other things, of the development of electric light and power in the rural communities of various foreign countries. They stated that in Finland, Norway, Sweden, and Denmark, from 95 to 100 farmers out of every 100 had light and power upon their farms. They said that in Germany 95 percent of all the farms were energized; that is, had electric light and power. Soldiers who had been stationed in Japan, on their return home told us that 95 out of every 100 farmers in Japan had electric light and power upon their farms.

Two years ago, Mr. President, and the statement is true even today, less than 50 percent, less than one-half the farmers of the United States had light and power upon their farms.

I see in his seat the distinguished junior Senator from South Dakota [Mr. BUSHFIELD]. In his State 90 out of every 100 farmers have light and power upon their farms.

In the State of the present Presiding Officer, the distinguished junior Senator from Washington [Mr. CAIN], 81 farmers out of every 100 have light and power on their farms.

The State of Rhode Island has the highest percentage of farm electrification in the United States. In that State 95 out of every 100 farmers have light and power on their farms. The State of Rhode Island, in which there is the highest percentage of farm electrification, does not have a higher percentage of rural electrification and power per capita than do the farmers of Japan, the figure being practically the same, but Rhode Island does not have as much rural electrification as there is in Norway, Sweden, Denmark, Finland, or Germany.

Mr. Wickard tells the reason why the private power companies, operating with private funds invested for the purpose of yielding dividends to the stockholders, were reluctant to build rural lines.

I remember one day discussing the matter with the distinguished junior Senator from Oregon [Mr. MORSE]. I had told him that in 1935, 1936, and 1937, if a farmer wanted to hook up with a private power company which had a line which passed right by the farmer's house, or which required the erection of only three or four or five poles, it would cost the farmer from $1,100 to $1,200 or $1,300 to be hooked up with the private power line. The distinguished Senator from Oregon told me that before REA and some other projects were developed in his State pretty much the same situation existed in his State.

Mr. President, of course the average farmer throughout the Great Plains area could not afford to pay $1,100, $1,200, or $1,300 simply to hook up his farm with a private line in order to receive light and power. Between 1935 and 2 years ago, a period roughly of 11 or 12 years, finally 25 farmers out of every 100 in the State of Montana, which is in the Great Plains area, secured light and power. In the State of Minnesota, 40 farmers out of every 100 secured light and power. But among 45 States of the Union, North Dakota is at the very bottom. In that State less than 7 farmers out of every 100 have light and power on their farms.

Mr. President, I introduced a bill today which provides for the expenditure of $1,000,000,000 for the extension of REA all over the United States. I particularly call the attention of my distinguished colleagues to paragraph (c), the last paragraph of the bill, which gives the Administrator of REA the right to use 10 percent of the money appropriated in the 10 States which are at the bottom of the list. In other words, for the first time in the States of Minnesota, Montana, Nebraska, North Dakota, South Dakota, and several other States, the REA Administrator would be given authority, in his discretion, to spend, in addition to the amount REA receives now under existing law, 10 percent of the amount authorized by my bill in the States which are now at the very bottom of the list of States.

Mr. Wickard continued:

There was money to be made in extending electric service in towns and cities, where the number of electric consumers per mile of line runs into the hundreds. Building rural lines with a consumer density of from only 1 to 6 per mile of line did not seem likely to be profitable. Practically the only rural families that had received electric high-line service were those living in large villages or situated near transmission lines that connected population centers. Many private power companies would agree to the building of rural lines only if the farmers themselves paid for much or all of the construction costs of the line, which then usually became the company's property.

I am sure that my distinguished colleague from South Dakota [Mr. BUSHFIELD], who lives in the Great Plains area, will bear me out in the statement that in 1935, 1936, 1937, or 1938, if a private line hooked up with the farmer and

the farmer paid $1,100 or $1,200, even after the farmer paid it the private company owned the line for which the farmer paid. That was the rule under which they operated.

Mr. Wickard further stated:

In addition, farmers were usually required to guarantee the payment of monthly or annual sums far in excess of what urban consumers had to pay or what the farmers could afford to pay. As a consequence, the great majority of farmers seemed to be doomed to get along without the conveniences and the advantages of high-line electric service.

It appeared unlikely that rural electrification would proceed at a more rapid pace without assistance. That assistance was provided by the Congress when funds for promotion of rural electrification were included in the emergency relief appropriation of 1935. On May 11, 1935, the Rural Electrification Administration was established by Presidential executive order. In 1936, the Congress authorized a 10-year program of rural electrification in the Rural Electrification Act. Under the act, the Administrator of REA is authorized to make loans for bringing electric service to persons in rural areas not receiving such service. REA operates no electric facilities and makes no grants. Its loans are made on a self-liquidating basis and are sufficient to cover the full cost of constructing lines and other electric facilities. They bear 2 percent interest and are repaid over a maximum of 35 years.

I invite attention to the fact that Mr. Wickard testified that these amounts were not grants. They were loans. They were not like some of the so-called loans about which we hear. Six or seven months ago I heard the distinguished senior Senator from Michigan [Mr. VANDENBERG] say:

We are sending $60,000,000 to China. I know that we are pouring it down a rat hole, but I am in favor of sending it. We are going to send $20,000,000 a month more.

Mr. President, every single dollar loaned out to REA represents a bona fide loan. Of the hundreds of REA's in this country, only one is in default at the present time. Seventeen million dollars' worth of interest, which is not yet due but is payable in the future, has already been paid. So Senators can see the excellent financial situation of REA.

Mr. Wickard further stated:

The act authorizes the Administrator to make loans to public bodies and agencies, to power companies, and to nonprofit cooperative associations of rural consumers. However, it became apparent early in the program that power companies were not interested in applying for any considerable number of REA loans. Certain power-company officials, in fact, went as far as to express the opinion publicly that practically all farms that could use power advantageously already had electric service. So farm people themselves took the initiative of organizing their own cooperative associations to provide themselves with electric service.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. LANGER. I yield.

Mr. MORSE. I am very much pleased that the Senator from North Dakota is making the statement he is making on the REA problems and on the need for greater development of the electric-power resources of the country. With the Senator's permission, I should like to invite his attention to a very definite trend, so far as a change of attitude is concerned on the part of private power utilities, as well as public power groups, toward the development of large power dams. Both groups are now getting together frequently in joint conference as to the need of a greater development of power resources.

It was not so many years ago that we found great private utilities very much concerned with and opposed to the movement for the development of the Nation's power resources, apparently because of fear that there would result great public ownership developments, and that the private utilities would thereby be forced out of business. Such fears were not well founded, as subsequent events have proved.

We now find public power advocates and private power advocates joining in various sections of the country in support of the maximum development of the Nation's power resources. In no section is this trend more pronounced than in my section of the Pacific Northwest.

The Senator from North Dakota will recall that last year, in discussing the need for greater power development, the junior Senator from Oregon introduced into the CONGRESSIONAL RECORD what was then called the Tacoma agreement, an agreement entered into by the advocates of various power developments. The agreement was entered into by officials of Bonneville and officials of the private utilities of the Pacific Northwest, urging upon the Congress a greater development of the power resources of that area. Such a development can come about only if we proceed to build the great wealth-producing projects of the Northwest, such as McNary Dam, Hungry Horse, Foster Creek, and the others.

As a supplement to the Tacoma agreement, I should like to have the Senator's permission to have made a part of the RECORD—because I think it bears upon the points which he is making—a telegram which was recently addressed to Hon. ALBERT J. ENGEL, chairman of the House Subcommittee on Appropriations for Civil Functions of the War Department. The telegram is dated January 30, 1948, and reads as follows:

JANUARY 30, 1948.

Hon. ALBERT J. ENGEL,
Chairman, Subcommittee on Appropriations for Civil Functions of War Department, House Office Building, Washington, D. C.:

The undersigned representatives of public and private electric-distribution systems serving more than 1,000,000 consumers in Washington and Oregon respectfully urge the vital need for appropriations that will bring McNary Dam on Columbia into production of power at earliest possible date.

Electric-power requirements of Pacific Northwest today exceed safe-operating capacity of existing generators, and the load is steadily growing. Our consolidated estimates indicate load will increase 397,000 kilowatts in 1948; 345,000 kilowatts in 1949; 336,000 kilowatts in 1950; and that there will be an average annual increase of 290,000 kilowatts from 1951 to 1956.

Part of this growth in power needs will be met by non-Federal plant additions, but magnitude of total requirements makes it imperative that major developments on Columbia River be expedited if people of region are to be protected against far-reaching losses that will result from any continued shortage of an essential element to growth and prosperity of Pacific Northwest. McNary Dam, already under construction, offers most expeditious source of large block of new power from Columbia and any delays in completion of this project will be costly to region and will entail unnecessary revenue loss to Government. Such delays would also require huge quantities of oil to be burned in steam-power plants on emergency basis, with attendant serious drain on Nation's short supply of petroleum.

Each and every electric-distribution system in region is carrying unprecedented responsibilities in connection with major expansion of its facilities, and the immediate foreseeable power needs of Pacific Northwest can be met only if Federal Government likewise recognizes its public-utility status and responsibilities as a major supplier of electricity at wholesale in the area.

This is particularly important because Federal Government through its program of multiple-purpose dams has preempted the development of Pacific Northwest's greatest power-producing stream, the Columbia River. Thus the Federal Government has a direct responsibility to the people of the Northwest to carry forward its power-supply projects.

In view of these immediate problems we urge that a distinction in budget making be recognized between ordinary public works and the Pacific Northwest Federal power-development program, and that the Congress approve a level of expenditures sufficient to expedite construction of McNary Dam and bring it into production of power as rapidly as physically possible.

Pacific Northwest Utilities Conference Committee: Washington Water Power Co., Spokane, Wash.; Pacific Power & Light Co., Portland, Oreg.; Portland General Electric Co., Portland, Oreg.; Puget Sound Power & Light Co., Seattle, Wash.; Seattle City Light, Department of Lighting; Mountain States Power Co., Albany, Oreg.; Tacoma City Light, Tacoma, Wash.; Northwest Public Power Association, Longview, Wash.; Chairman C. A. Erdahl, Commissioner of Public Utilities, Tacoma

I wish to say to my good friend the Senator from North Dakota that the proposals made in this telegram are in line with the proposals the junior Senator from Oregon has made in this body since the year 1945. We cannot begin to serve the needs of all groups in the Pacific Northwest, including the farmers, for whom the Senator from North Dakota is making such an able plea here today, unless we recognize the responsibility of the National Government to go forward in the building of these great power projects. I repeat now what I have said so many times, that in the long run it will be done without cost to the Government, because of the self-liquidating nature of these dams. Of course, it will be done with the resultant benefit of increasing present wealth and adding new wealth out of which new tax dollars can flow in payment of the national debt.

I wish to thank the Senator from North Dakota for permitting me to make this statement at this time, because I join with him wholeheartedly in his views regarding the need for the development of

the power resources of the Nation. I say to the farmers of the Pacific Northwest that the responsibility for meeting their electric-power needs rests on the Congress of the United States and no place else. Unless the Congress of the United States lives up to that responsibility, then my answer to the farmers of the Pacific Northwest, when they ask me for help in the effort to obtain the power-resource developments they need, will be that the Congress of the United States to date has failed to appropriate the necessary funds for the construction of these power-development projects. The voters of the Nation must make clear to the Members of Congress that the power resources of the Nation must be developed quickly if we are to expand our economy to the point necessary to meet our domestic economic needs.

Mr. LANGER. Mr. President, at this point in my remarks I ask unanimous consent to have printed a chart prepared by the United States Department of Agriculture, Rural Electrification Administration, which shows, by States, for 1935, 1945, 1946, and 1947, the number of farms electrified with central station service. It also shows the rank of each State. I particularly advise Senators who are interested in the subject of rural electrification to examine this chart to ascertain exactly where their own States stand.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE No. 1.—*Comparison of rank, percentage, and number of farms electrified with central-station service, by States, 1935, 1945, 1946, and 1947*

Area	Farms, Jan. 1, 1935, number [1]	Farms receiving central-station electric service, Dec. 31 1934			Farms, Jan. 1, 1945, number [1]	Farms receiving central-station electric service, Jan. 1, 1945			Farms receiving central-station electric service, June 30, 1946			Farms receiving central-station electric service, June 30, 1947			Increase in electrified farms from Dec. 31, 1934, to June 30, 1947		
		Number [2]	Percent	Rank		Number [3]	Percent	Rank	Number [4]	Percent	Rank	Number [5]	Percent	Rank	Number	Percent	Rank

[1] United States Census of Agriculture 1935 and 1945.
[2] Edison Electric Institute.
[3] United States Census of Agriculture, 1945, adjusted to exclude home plants.
[4] REA estimate (revised September 1947).
[5] REA estimate.

Mr. LANGER. I may say, Mr. President, that North Dakota stands forty-eighth, or at the bottom of the list. In talking this matter over with my distinguished colleague the junior Senator from North Dakota [Mr. YOUNG], we have determined to keep battling upon the Senate floor until the farmers of North Dakota get what they are rightly and legally entitled to. Instead of the distribution shown by the chart, we intend to see that, under the bill I have introduced, if it shall be enacted, one-tenth of all the money that is made available shall be used for the purpose of increasing the facilities in the 10 States which are at the bottom, in the discretion of the Administrator as to the amount of money he will spend, and the amount of material he will allocate if he gets the material, so that in REA service the States in the Great Plains area shall be placed in a position somewhat similar, at least, to that of the other States of the Union.

Mr. YOUNG. Mr. President, will my colleague yield?

Mr. LANGER. I yield to my distinguished colleague.

Mr. YOUNG. As I understand the provisions of the bill, they are not at all unreasonable, and the measure is along the line of the provision inserted in the Soil Conservation Act last year, extending relief more on the basis of need.

Mr. LANGER. It is similar to that.

Mr. YOUNG. The Senator certainly has my wholehearted support, and I hope his bill will be enacted.

Mr. LANGER. I thank my colleague.

Mr. President, it is essential to an understanding of the REA program and the functions of the REA staff that the full extent to which this is a cooperative program be appreciated. Rural electric co-ops constitute more than 90 percent of all the borrowers of REA loan funds, and have received more than 95 percent of all the loans made.

A rural electric co-op is owned by those who use the power it distributes. I emphasize the statement that it is owned by those who use the power it distributes. Retail rates are based on cost with allowance for repayment of the Government loan. Interest and amortization are paid from revenue. Each member has one vote at business meetings. A board of directors is elected once a year. The directors employ the manager, fix the rates, and otherwise direct the business, reporting periodically to the membership.

Rural electric cooperatives have many advantages as instruments for making electric service available to farmers at reasonable cost. First, REA-financed co-ops operate on a nonprofit basis. This enables them to provide electric service at cost. Second, directors of REA-financed co-ops are elected because of their own interest in making electric service available to rural people at reasonable rates. They serve without compensation, and keep operating expense at the lowest possible level consistent with good service. Third, members of rural electric co-ops themselves provide many services that help keep operating expenses low. For example, members are encouraged to report potential causes of service interruptions, such as tree limbs touching the lines. Most of them read their own meters and many make out their own bills. I know that will surprise many Senators, but that is the official record of the national administration of the REA. Fourth, previous experience of farmers with other types of co-ops helps them to organize and operate rural electric co-ops on a sound basis with a minimum of effort and expense.

I have no hesitation in saying that without these co-ops the rural-electrification program authorized by the Congress could not have been made effective, and that rural electric co-ops provide the only real hope of many farm families to get power-line electric service within the foreseeable future.

The extent to which the co-ops have been effective in carrying out the Rural Electrification Act is indicated in part by the great increase in rural electrification that has occurred in this country since 1935. I have already pointed out that only 1 farm in 10 was electrified 12 years ago. By July 1, 1947, REA's official estimate showed that a total of 3,575,000 farms, or 61 percent of all the farms in the country, were electrified. More than half of the farms receiving electric service since 1935 have been connected to REA-financed lines. Most of the rest are on lines of commercial power companies, which have been stimulated to greater rural-electrification activity by the REA program.

Progress in farm electrification, by States, since the initiation of the REA program, is shown in table I, which I have asked to have printed in the RECORD.

I shall now show how the REA program works. The amount which REA is authorized to lend annually is fixed by Congress, and REA then borrows the amount of its loan authorization from the United States Treasury.

Half of the amount available for loans in any given year is reserved for loans in the various States on the basis of the proportion that each State's unelectrified farms bear to the total number of unelectrified farms in the country. The other half of the fund may be used for loans at the discretion of the Administrator, but not more than 10 percent may be loaned in any one State or Territory.

Mr. President, I call attention to the fact, for example, that in the State of Connecticut, in the State of Rhode Island, in the State of Massachusetts, and in the State of West Virginia none of the money set aside by the Congress was used. Therefore, that money remained in the Treasury. In my opinion, the Administrator should have the power to use, in his discretion, any money not used, because it can readily be seen that when the Appropriation Committee meets, or when the political committee of either the Democratic or Republican Party meets, it gets a report from the REA Administration which says, "There is $5,000,000, $10,000,000, $50,000,000 available which has not been used," when as a matter of fact that is not strictly true, because either it has already been assigned to projects which are in the course of being constructed or it is set aside for those States which are not going to use it, and the Administrator knows it is not going to be used. So this provision, that the other half of the fund may be used for loans in the discretion of the Administrator, but not more than 10 percent may be loaned in any one State, is not quite sufficient, and the law should be changed as provided in the bill I am introducing.

Most REA borrowers operate only distribution systems and purchase power at wholesale from commercial power companies or public agencies. Distribution facilities account for nearly 90 percent of all REA loans made to date. A little more than 6 percent have been for generating plants and a little less than 5 percent for transmission facilities, a substantial part of which is an inherent part of distribution systems.

REA finances generation facilities only when borrowers are unable to obtain adequate supplies of power or to purchase power at reasonable wholesale rates. About 1 percent of the total loans approved have been for the installation of wiring, plumbing, and electrical equipment and appliances on consumers' premises. These loans are made to co-ops, which in turn make loans to their consumers. REA itself makes no loans direct to consumers.

Mr. President, very much to my surprise I found that the average citizen with whom I conversed, who was not familiar with the subject, did not know that to be true.

Mr. Wickard continued:

Before any REA loan can be made, the borrower is required to submit a detailed application, on the basis of which REA can determine whether or not the loan is feasible, that is, whether or not the facilities to be constructed appear to be reasonable security for the loan. If an application is approved, a loan contract is entered into between REA and the borrower, binding the borrower to performance of a specific amount of power system construction and binding the Government to finance the work. Before construction begins, the borrower submits detailed plans and specifications for approval by the REA engineering staff. Loan funds are actually advanced to the borrower only as they are needed to pay for completed construction which meets good engineering standards.

Again, Mr. President, I digress for a moment to show the complete misunderstanding on the part even of farmers who are customers of REA. Some of the customers believe they do not have the right to select their own engineer. As a matter of fact, they do have that right. All the REA cooperatives which have been organized within the last 3 or 4 years have the right, and indeed, it is a requisite that they select their own engineer. But when it comes to the selection of a permanent engineer, then approval must be obtained from the national administration, so that the national administration in making the loan will know exactly what the situation is in the REA, and whether or not the amount of the loan requested is justified or whether it should be made at all.

Mr. Wickard continued as follows:

Originally, REA loans were made for 25 years with interest at rates ranging from 2½ to 3 percent. Under the Pace amendment of 1944, however, extension of all loans to 35 years, with interest at a flat 2 percent, was authorized. These extensions have been completed in the case of about 85 borrowers and are being made for others requesting them as rapidly as the legal work can be done. Ordinarily, under the 35-year amortization plan, interest on each note is deferred for 2 years, with the borrower making equal quarterly payments of principal and interest thereafter.

To summarize the REA loan program, I might say that as of December 31, 1947, REA had approved loans totaling $1,191,000,000 to 1,029 borrowers, of which 947 were co-ops, 41 were public-power districts, 20 were other types of public bodies, and 21 were commercial power companies. Of these borrowers, 904 have rural electric facilities in operation. The facilities include 594,000 miles of lines serving about 2,030,000 farms and other rural consumers in about 2,200 counties of 46 States, Alaska, and the Virgin Islands.

These features of the program are summarized in tables Nos. 2, 3, 4, 5, and 6 which contain both national totals and State breakdowns.

Mr. President, I ask unanimous consent that tables 2, 3, 4, 5, and 6 may be printed in the RECORD at this point in my remarks.

The PRESIDING OFFICER (Mr. YOUNG in the chair). Without objection, it is so ordered.

The tables are as follows:

TABLE 2.—*Progress of REA program by fiscal years*

Fiscal year	Loan authorizations	Total loans approved	Miles to be constructed (loan estimate)	Consumers to be connected (loan estimate)	Funds advanced	Energized systems		
						Number	Miles	Consumers connected
1935-36	$13,928,288	$13,903,412	13,072	48,997	$823,262	11	400	693

NOTE.—State figures represent data for REA borrowers incorporated within the State.

TABLE 6.—*Loan allocations, by type of borrower and purpose, as of Dec. 11, 1948*

Type of borrower	Number of borrowers	Total amount	Distribution systems	Generation and transmission	Consumer facilities
Cooperatives	947	$1,141,230,747	$1,000,914,190	$127,474,434	$12,842,123
Public power districts	41	39,400,641	37,675,441	1,129,850	595,350
Other public bodies	20	4,776,695	4,682,004	94,691	0
Power companies	21	5,119,263	4,481,763	637,500	0
All	1,029	1,190,527,346	1,047,753,398	129,336,475	13,437,473

Mr. LANGER. Mr. Wickard continued:

In addition to making self-liquidating loans and supervising the construction of the facilities that constitute the only security for these Federal funds, REA has the responsibility for safeguarding these loans through advice and assistance to borrowers, since the real security of the Government in these loan investments is based not only on the proper construction of these facilities but on their satisfactory and efficient operation.

Mr. President, I ask unanimous consent that the remainder of the testimony of Mr. Claude Wickard be printed in full at this point in my remarks.

There being no objection, the remainder of Mr. Wickard's testimony was ordered to be printed in the RECORD, as follows:

At the outset, the boards of directors, and in many cases the managers, have had no previous experience in operating an electric utility. They are willing to undertake the responsibility of learning as a means of providing themselves with an essential service that they could not obtain in any other way. Any failure of REA to give them competent guidance would practically block the potentialities opened up by making rural electrification loan funds available.

From the beginning of their contacts with borrowers, REA personnel are instructed to operate on the basis that each electric co-op is an independent, locally owned, business enterprise, whose owners, officers, and local management have the primary responsibility for its success. Strong emphasis is placed on encouraging pride of ownership among the members. New directors and new managers are encouraged to assume their full responsibilities rapidly. As they develop in confidence and ability, they are asked to work out independently the proportionately larger number of their own problems.

Currently, the greater part of REA's management assistance is going to a relatively small number of borrowers. During the 1947 fiscal year, for example, we found that the group of borrowers receiving the bulk of management assistance was composed largely of the approximate 5 percent that experienced trouble meeting their interest and principal payments, and approximately an equal number which showed trends toward financial difficulties and needed good counsel to stay on their feet.

I might mention the auditing of co-op books, as an example of a management responsibility formerly performed wholly by REA, but now performed in part by the co-ops. Until this year the accounts of all borrowers were audited entirely by members of the REA field staff. This has now been changed, and co-ops which meet certain standards of maturity will in the future be asked to assume responsibility for having their general accounts audited periodically by certified public accountants of their own choice.

I have already indicated that the type of operation REA uses has been quite effective in getting electric service extended to rural people. It is proper for this committee to inquire, too, just how effective REA's program of management assistance to borrowers has been, and whether or not the Government has got its money's worth from the personnel assigned to this work. The effectiveness of management assistance is not always easy to measure, but the financial record of the REA borrowers is certainly an indication. This record, which has been consistently good since the start of the program, is given in some detail in the table No. 7. To mention here only the highlights, let me point out that through December 31, 1947, REA had advanced $821,000,000 as loans to its borrowers. As of the same date, the borrowers had repaid almost $87,000,000 of principal and had paid over $67,000,000 in interest. Payments included more than $23,000,000 paid on principal in advance of the time it was due. Only $949,000 was more than 30 days overdue. There has been only one foreclosure in the history of the program.

To summarize what I have just been saying, the REA program consists basically of making loans, protecting the security of these loans, and providing such management assistance to borrowers as is essential to the carrying out of the objectives of the Rural Electrification Act. I believe that this committee, with its concern for Government personnel and administrative matters, will be interested in knowing how REA is organized to do the job I have outlined.

The REA staff currently numbers about 925 persons, of whom 680 are employed in Washington and 245 in the field. REA has no field offices. For administrative purposes, the country is divided into 10 geographical regions, but the office for each region is in the Washington headquarters. I have here a map showing the REA regions.

We have four "line" divisions. These are the divisions that have the most direct contact with borrowers.

The function of the Applications and Loans Division is to assist borrowers with the preparation of their applications for loans, to study all applications, and to recommend for my approval those which are found to be feasible. It is also responsible for assistance to borrowers in connection with boundary studies, area coverage surveys, and other planning activities essential if a co-op is to extend service to every potential consumer in its service area. In this Division, too, lies responsibility for encouraging borrowers to undertake programs of wiring, lighting, and power-use education, with the aim of helping rural people to get maximum benefit from their electric service. In view of the varied duties of this Division, its personnel have a variety of backgrounds. Most of them have had agricultural training, some as economists, some as agricultural engineers, some as county agents. A few are electrical engineers.

The Engineering Division is responsible for all REA activities pertaining to engineering advice and assistance to borrowers in the design, construction, and technical operation of rural electric systems. It is this division, for example, which approves the preliminary plans and specifications for a line-construction job before a loan is made and which passes on completed construction before funds are advanced to pay for the work. Another of its major responsibilities is to assist borrowers with system engineering studies which are essential to their area coverage planning. The professional people in this division are chiefly electrical engineers.

The third line division, the Management Division, is responsible for helping REA borrowers to become efficiently run electric service businesses. Its responsibility begins when a co-op's first lines are energized and covers such management fields as organization, budgets, operating costs, power sources, personnel training, labor relations and others. This division is headed by a man who had done an outstanding job managing an REA-financed co-op and is staffed largely by persons with management experience and training.

The other line division is the Finance Division, which advises borrowers on their accounting problems, audits accounts of borrowers, and maintains the official loan accounts and records of the agency. Its key personnel are trained accountants.

In addition to these four line divisions, we have four staff divisions. The Technical Standards Division is a small division made up chiefly of electrical and agricultural engineers who assist the staff on technical problems relating to the development of system specifications and equipment standards. The Information Services Division prepares reports to the public on rural electrification progress and assists the staff and borrowers with problems in the field of cooperative and power-use education. The Personnel Division handles internal personnel affairs of the agency and also advises on personnel problems in connection with management of borrowers' systems. The Administrative Services Division is our housekeeping division.

REA has no legal division but relies for legal work on the Department of Agriculture Solicitor's Office, which has an associate solicitor and a small staff assigned to rural electrification work. These lawyers perform a number of essential functions in connection with our program. One that I might mention is the drawing up of the loan contracts between REA and its borrowers.

So much for the organization and early history of the REA program. I would like to mention briefly the wartime activities of

the agency as background for a discussion of the problems currently being faced by the REA staff.

By 1941, the new approach to rural electrification problems had proved itself beyond question and pointed the way for much more rapid expansion. But at that time the Nation had to devote much of the critical materials and manpower which power lines require to the urgent task of national defense and thereafter to winning the war. Large-scale expansion of rural power lines had to be postponed.

In some cases material which had originally been intended for the extension of electric service had to be diverted to the military effort. Two generating units being installed by the Dairyland Power Cooperative were requisitioned by the Navy for Caribbean bastion. Wire already delivered to a contractor building a cooperative transmission network in Texas was diverted to supplying munitions producers. The Dairyland Power Cooperative was unable to install substitute generators until 1946.

During the war, however, the importance to the National welfare of electricity on farms became so apparent that the connection of farms with critical production problems, that electrical equipment would help to solve, was authorized under special regulations of the War Production Board.

The U-1-C order of WPB permitted line extensions of 5,000 feet or less to farms with animal units sufficient to guarantee increased production of livestock, dairy and poultry products through the use of electricity. Under this regulation REA borrowers connected more than 200,000 farms.

Events following the lifting of materials restrictions in 1945 soon justified the expectations of those who had predicted a major expansion. The insistent demands from farmers for electric service caused us to raise our sights. Before the war our operations were geared to a program of loans of $40,000,000 a year, although congressional authorizations had reached a peak of $140,000,000 in 1 year. In the first postwar year loan authorizations totaled $300,000,000. Loans approved from funds for the first two fiscal years after VE-day exceeded the total approved during all the preceding 10 years of REA history.

Along with every other agency, we expected some delay in our program before materials would again flow for rural line construction at prewar rates. It was not until 1947 that the materials, ordered by reason of greatly increased REA loan approvals, began to be delivered in quantities comparable to prewar levels, although still greatly below the postwar demands.

The calendar year 1947 was the biggest year in several important aspects. The rate of construtions reached a new high almost every month, and is now the fastest yet attained in rural-electrification expansion.

REA borrowers brought central station electric service to 346,000 farms and other rural establishments in the calendar year 1947. This is 71,000 more consumers than they added to their systems in the previous peak year of 1946, and 87,000 above their prewar record which was established in 1939.

Funds advanced by REA to finance the construction program of the borrowers amounted to more than $225,000,000. This exceeded by about $93,000,000 the funds advanced in any previous year. The great expansion in the rate of progress of the REA program has quite naturally resulted in increased demands upon our limited personnel.

In addition to 87,000 miles of distribution lines that were energized during the year, the construction program included the "heavying-up" of many miles of lines to handle increased loads. It also included the construction of additional generating and transmission facilities.

Advances of funds under the provisions of loan contracts during the last half of 1947 was approximately equal to the amount of new loans approved. As the supply of materials improves, advances will exceed new approvals until the backlog of committed funds has been reduced to the amount required by normal construction operations.

Along with the tremendous growth in the number of farms and other rural establishments connected in 1947 to each REA-financed system, REA borrowers were faced—and still are faced—with the problem of obtaining an adequate power supply to meet the demands of new consumers as well as the greatly increased demands of old consumers.

To illustrate the increased demand for power, the total energy usable on REA-financed lines has increased nearly fivefold since before the war, although the number of consumers served has only doubled.

Despite the progress that has been made in rural electrification and contrary to the public statements of the program's detractors, a tremendous job lies ahead. More than 2,000,000 farms in this country do not yet have electric service. Farmers without service want and need it. Although the Congress has authorized loan funds for REA in large amounts since the war, the backlog of loan applications that could not be filled because of lack of funds has continued to grow. In the summer of 1945, REA had a backlog of loan applications on hand or in process in the field of slightly more than $200,000,000. The backlog today is $267,000,000 in spite of loan approvals amounting to almost $630,000,000 in the interval.

Some idea of the demand for electric service on the part of farmers in various sections of the country can be obtained from table 8, which shows by States the amount of loan applications on hand or in preparation in the field, as of January 7, 1948.

One of the reasons why the job ahead in rural electrification is so complex is that a great part of the power system construction remaining to be done is in the Great Plains States. Because the economy of those areas is primarily agricultural, their need for electric service is great. But because of extremely low average consumer density and other difficulties, the areas involve serious problems for any power distributor. Progress in these areas was extremely slow before the war. Today, the special problems are being solved and REA borrowers have a tremendous program under way in these sections of the country.

The acceleration of the REA program in the Great Plains States began in about 1944. It stemmed from three principal factors:

First, in 1944 a policy aimed at applying area-wide electrification to all sections of the country was initiated on an aggressive scale.

Second, more favorable financing terms were made available through enactment of the Pace Act.

Third, out of almost 10 years of rural electrification came experience that pointed the way for bringing service to the less densely settled areas on a feasible basis.

As a result of this combination of factors, scores of new rural electric co-ops have been organized in the Great Plains States since 1944—14 in the State of North Dakota alone, for example.

These new co-ops, together with the few established earlier in the REA program, are taking a businesslike approach to the problem of bringing electric service to all rural consumers in their service areas. First, the co-ops make boundary studies to help them estimate how far their lines can reasonably be extended; second, area surveys are made on a farm-to-farm and house-to-house basis to determine how many rural establishments within those boundaries still do not have central station electric service; third, system engineering studies are made as a basis for electric systems fully adequate to meet the needs of all consumers to be served.

As they develop their rural power systems, the leaders of these rural electric co-ops are finding that the farmers of the Great Plains States are tremendous users of power. For example, the estimated farm consumption on one system in North Dakota, Nodak Rural Electric Cooperative, of Grand Forks, increased from 100 kilowatt-hours per month in 1941 to 300 kilowatt-hours in 1947. Another North Dakota co-op estimates that its consumers who were using 175 kilowatt-hours per month on an average in 1946, will be using 300 kilowatt-hours in 1948. Average monthly farm consumption of power on all REA-financed lines in North Dakota increased from 90.4 kilowatt-hours in December 1941 to 168.2 kilowatt-hours in December 1946. The 1947 figure is expected to be much higher and the 1948 figure higher still.

Still another factor in the electrification of the sparsely settled rural areas has been the cooperation of town and country people. In some areas the rural electric co-ops and the towns and villages integrated their power facilities into larger systems. This practice has enabled the co-ops to reach out still further into unelectrified farm areas and attain area coverage. Almost invariably the co-op members and the townspeople benefited from the mergers.

One effect of all of this activity has been a great increase in the amount of REA loans for rural electrification in the Great Plains States. In the early years of the program the loan applications submitted from many of the Plains States were barely sufficient to exhaust the loan funds set aside for those States under the State-allotment provision of the Rural Electrification Act. Today the applications from those States surpass by far the total amount that can be made available to them from both the allotted and the discretionary portions of the year's loan fund. During the first 10 years of the program, for instance, loans to borrowers in North Dakota totaled $5,200,000. During fiscal 1946 and 1947, however, approximately $25,000,000 was allocated in that State. Similar increases were noted in other States in the Great Plains area.

These loan funds are now being converted into power lines to serve farmers. The number of farms electrified in the Great Plains States already shows substantial improvement. In the State of North Dakota, 5,300 new consumers were connected to REA-financed lines between July 1, 1945, and the present. This brings the total number of consumers served by the North Dakota co-ops to 12,030. When all funds already allocated to the co-ops in North Dakota have been converted into rural power lines it is estimated that farm electrification in the State will approach 50 percent.

This acceleration in activities could not have been achieved without special attention by REA to the less populated areas. Because the rural-electrification problems of these areas are more complex and because the rural-electrification program is new to the people there, REA has given a great deal of special advice and assistance to the REA co-ops in the Great Plains States. The line divisions give attention to region VI—North and South Dakota and Minnesota—to the full extent that the personnel situation permits. Five field representatives of one division, however, have resigned their positions in this region in the last 6 months. New and inexperienced personnel must be trained for the jobs.

Unfortunately, many of the thinly populated areas, in addition to being afflicted with the problems I have just been talking about, are also among the sections of the country in which the shortage of power is the most acute. These areas sometimes abound in the natural sources of power, but facilities for power production have simply not been developed rapidly enough to keep pace with the needs of rural people, who until recent years had little hope of ever getting electric service.

Except where there are large public power developments, there have been two main sources of power for the rural electric co-ops of the West. These have been municipalities and power companies which have sold power to the co-ops at wholesale. These

sources were adequate for the needs of infant rural power systems but they have now been outgrown in many cases.

One of the services of REA to the rural electric co-ops of the Great Plains States has been to assist them in locating new sources of power and in obtaining more favorable wholesale power rates that have made possible electrification of many areas. In a few cases, REA has been able to make loans for generation plants or transmission lines, or both, to Plains State borrowers when reasonable rates could not be obtained, or power supplies were not available, to meet the needs.

One example is the Minnkota Power Cooperative of Grand Forks, N. Dak., which was organized early in 1940 to serve four REA-financed electric distribution cooperatives in North Dakota and five in Minnesota. Currently it is serving seven of the cooperatives through generating and transmission facilities it constructed. Its two Diesel-power-generating plants have a combined installed capacity of 9,960 kilowatts.

Minnkota operates 385 miles of transmission lines. It has under construction additional transmission lines and 10,000 kilowatts of additional generating capacity. These additional facilities will provide power for the two member cooperatives not yet receiving service and a more adequate supply of power for those now served. The present facilities have been outgrown and expansion of the member distribution systems is necessarily slowed down.

Minnkota Power Cooperative has supplied power where it was not otherwise available and in a region that commercial power companies once considered unfeasible to electrify.

Here is another instance of the efforts REA is making to assist rural people in solving their power problem. Since the war REA has approved a loan to a commercial power company to install new transmission-line capacity to bring low-cost Bureau of Reclamation power into wide areas of western North Dakota where power supplies are inadequate.

Any description of the rural-electrification program would be incomplete if I failed to point out that in many areas the program has reached a state of development in which miles of new line, or number of new consumers, no longer provide an adequate criterion of progress. Consumption of electricity is increasing tremendously. Many co-ops of moderate size have seen their loads grow to gigantic proportions. The need for system strengthening has become just as imperative as the need for extending electric service to the many rural families still without it.

Rural electrification progress of the future must be measured in terms of ability to give good service as much as by the number of new connections. Old lines frequently must be rephased to enable them to carry more energy. Additional substations often are required, as well as larger transformers in existing substations. New transmission lines, and in some cases new generation facilities, are vitally needed by many co-ops. Such improvements to existing service do not always show up in terms of new consumers connected. They are hard to measure by conventional yardsticks. Nevertheless they have become a vital part of program progress. And they require annually an increasing amount of the REA loan fund.

There have been predictions that the position of rural electrification would be weakened materially if full prosperity failed to continue, with plans for expansion coming to a standstill, rural consumers greatly curtailing their use of electricity or even terminating service, and co-ops finding themselves unable to meet their loan obligations. REA does not share this view. Regardless of future economic conditions, whether hard times threaten or good times remain, the contribution of rural power will be vital. The history of the few rural electric systems in operation during the depression of the early 1930's shows that their patrons continued to lean heavily on electric power to aid the efficiency and volume of their production; that they were in a more favorable economic position because they had electricity available; and that the organizations supplying them with power faced no greater economic hardships than the average of other business institutions across the country.

In pushing ahead with the job of rural electrification, we must recognize the factors that will have a significant bearing on the future course of the program and the speed of its progress.

First of all, the Congress by its authorizations of loan funds will determine how soon service will be available to those rural people still without it and the extent to which service to all present consumers can be kept adequate and dependable.

Second, as industry's output of construction materials catches up with the tremendous postwar demand, rural power systems will be able to step up their line extensions.

Third, for many cooperatives the current or prospective inability to purchase sufficient power will be a handicap that must be overcome if rural electrification progress is not to be delayed before the job is finished.

Fourth, the safeguarding of the Government's loan investment in the program and the assurance of the program's effectiveness necessitate a staff adequate in numbers and qualified by training and experience to perform the changing functions of our agency in an efficient manner.

This last problem has a direct bearing on the future of the REA program, and I know it is a problem that is of concern to this committee, which has indicated its interest in efforts to attract and hold high-type personnel in the Government service.

For REA the job of administration has grown constantly as the program of rural electrification has progressed. By the end of this fiscal year, for example, it is expected that well over a billion dollars will have been advanced to REA borrowers, compared to $221,000,000 up to June 1940. There will be half again as many borrowers in 1948 as in 1940. Miles of line on REA-financed systems will have increased some 200 percent and the number of consumers upward of 300 percent. These figures illustrate how the work load and responsibility of the agency increase as the electrification job goes forward.

The increase in the work load, together with this year's reduction of $600,000 in the REA administrative appropriation, has necessitated a critical examination of every activity of the agency in an effort to get the best possible job done with the limited administrative funds available.

In order to operate within our budget, our personnel had to be reduced by 15 percent. The major part of the reduction, in compliance with the admonishment set forth in the 1948 Senate Appropriations Committee report, was accomplished by the abolition of high-salaried positions. Altogether, 181 positions were eliminated, of which 46 carried salaries of $5,000 or more.

Because of the feeling of insecurity growing out of the action of Congress last spring, and because of the low level of salaries we are able to offer, and other factors, we had 206 voluntary resignations and transfers between May 25 and December 31, 1947. Many of these people, some with years of experience in REA, left to take better paying or more secure positions elsewhere.

Qualified replacements have been difficult to obtain. On the first of January, the agency had approximately 100 vacancies. Of these, more than half are positions requiring people of professional training and experience.

Notwithstanding this unfortunate situation, I take great pride in the attitudes, qualifications, and accomplishments of the REA staff. Despite the problems that have arisen because of the loss of many of our experienced personnel, a high level of efficiency has been maintained as the record shows. It is significant to note that the over-all program of the agency is three times greater now than during the highest prewar year. Yet our staff is smaller than it was at the outbreak of the war. This year we have approximately one employee—including clerical as well as professional personnel—for each borrower. And yet the average allocation of Government funds, per cooperative, amounts to more than a million dollars.

REA's record is outstanding when compared with private banking institutions which have a comparable amount of loans outstanding. Its staff is smaller and its expenditures for salaries and wages are considerably less, while its responsibilities in making 100-percent loans are obviously more exacting.

It is fortunate for the cause of rural electrification and the Nation that we have such hard-working, capable, and efficient people on the staff of REA. Many of them have the opportunity to go elsewhere for better pay and greater opportunity, but are remaining because they believe their work in behalf of rural electrification is making such a worthwhile contribution to the welfare of rural people and the Nation.

Our personnel, like the millions of farm people who are learning to benefit from electrification, recognize electricity as a power that helps turn the wheels of progress. In today's world, electricity and power have come to mean practically one and the same thing. Always tireless, always on tap, electricity offers farmers greater opportunity for economical and diversified production than any other force available. It also offers to rural people the achievement of a modern standard of living with better facilities for health and for cultural progress than they have ever enjoyed before. Electricity, given its full opportunity, can be counted on to play a dynamic role in rural America's future.

Mr. LANGER. Mr. President, in order to show the financial standing, borrowers' payments of interest and principal, and cumulative totals as of December 31, 1947, I ask unanimous consent to have printed at this point in my remarks table No. 7.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 7.—*Borrowers' payments of interest and principal—cumulative totals as of Dec. 31, 1947*

Item	Distribution, transmission, and generation		Consumer facilities		Total, all loans		Total
	Interest	Principal	Interest	Principal	Interest	Principal	
Amount due [1]	$67,289,697.25	$57,731,845.18	$404,950.01	$6,138,787.53	$67,694,647.26	$63,870,632.71	$131,565,279.97
Amount paid [1]	66,779,155.75	80,601,356.87	398,204.28	6,093,665.93	67,177,360.03	86,695,022.80	153,872,382.83
Amounts overdue more than 30 days	570,894.00	321,108.97	6,579.88	50,642.36	577,473.88	371,751.33	949,225.21
Advance payments		23,282,077.44				23,282,077.44	23,282,077.44

[1] Includes amounts on notes declared due and paid in full by borrowers.

Mr. LANGER. Mr. President, I am sure that every Senator present will be interested in knowing the number of applications on hand and in process of preparation in the field as of January 7, 1948, so that at a glance they can tell exactly the amount of money which has been applied for in each one of the States. Therefore, I ask unanimous consent that table No. 8 may be printed in the RECORD at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 8.—*Applications on hand and in process of preparation in the field as of Jan. 7, 1948*

Alabama	$4,302,000
Arizona	1,050,000
Arkansas	5,143,000
California	100,000
Colorado	5,383,000
Delaware	150,000
Florida	5,825,000
Georgia	13,085,000
Idaho	1,525,000
Illinois	7,894,000
Indiana	1,880,000
Iowa	14,983,000
Kansas	10,891,000
Kentucky	8,050,000
Louisiana	2,668,000
Maine	175,000
Maryland	400,000
Michigan	3,255,000
Minnesota	11,855,000
Mississippi	5,186,000
Missouri	29,885,000
Montana	7,767,000
Nebraska	14,761,000
Nevada	80,000
New Hampshire	513,000
New Jersey	87,000
New Mexico	1,810,000
New York	220,000
North Carolina	2,583,000
North Dakota	17,586,000
Ohio	2,665,000
Oklahoma	11,751,000
Oregon	1,715,000
Pennsylvania	6,386,000
South Carolina	2,385,000
South Dakota	13,692,000
Tennessee	8,802,000
Texas	18,912,000
Utah	610,000
Vermont	450,000
Virginia	5,088,000
Washington	2,085,000
Wisconsin	6,558,000
Wyoming	3,495,000
Total	264,686,000

Mr. LANGER. Mr. President, as I said in the beginning of my remarks, I have before me approximately 1,000 letters written to me by farmers from the Great Plains area. Of course, naturally, most of them come from the State of North Dakota. My distinguished colleague advises me that most of the letters he has received dealing with REA come from the State of North Dakota. Naturally, the people of our State write to their own Senators on the subject.

Mr. President, during the past summer, no matter where I went in the Great Plains area, at places where the committee held public hearings, when I asked the people what they were most interested in, they did not inquire about the national debt, they did not inquire about the Marshall plan, they did not inquire about tax reduction, but their inquiries dealt with REA. Three or four hundred or more of those with whom I conversed were women—farmers' wives. They came to me and asked, "When are we going to get REA on our farms? We want a refrigerator. We want to put our meat some place where it will not spoil." Some said, "We want light so that our children when they study at night will not have to read by lamplight." One lady came up to me and said her family was very poor. She said her husband was a cripple and that she was obliged to do the milking in order to help support the family. She said she wanted electric power on her farm so the milking could be done by electric power.

A little while ago my distinguished colleague the junior Senator from Oregon [Mr. MORSE] said that he was extremely interested in the Taft-Hartley law and was going to travel all over the country and regardless of his party, advocate certain amendments to that law. I wish to say, Mr. President, that I am interested in seeing that the men and women in the Great Plains area obtain REA light and power on their farms. After waiting 5 or 6 years, the farmers of the Great Plains area certainly are entitled to the benefit of REA. Certainly appropriations for REA ought not to be cut by our party the way they were last year. The people of that area are entitled to have an appropriation of $1,000,000,000, as provided by my bill, for the purpose of expanding REA. That amount would not be a gift; it would not be a grant; it would simply be a loan; and the record shows that such loans are being repaid at a more rapid rate than the loans are due.

Mr. President, all I can possibly do so far as REA is concerned is in my feeble, humble way, to keep on bringing to the attention of my colleagues on this side of the aisle the fact that Mr. Wickard says that at least $1,000,000,000 is needed for the purpose. He did not testify to that directly, because he said the President's budget called for $300,000,000, but he frankly admitted that $300,000,000 would not begin to take care of the amount which has been applied for. If Senators will read the exhibit showing the applications by States they will see that much more money has been asked for than is available.

Those who are not in favor of granting such loans will say, "What is the use? The material is not available." We have already subpenaed the manufacturers of most of this material. Even in the short time since Mr. Wickard gave us the names of the suppliers of the material we have been amazed at the amount of material which has become available. For example, 3 or 4 years ago it was impossible to get poles, but today poles are a drug on the market. One can get all the poles he wants by sending a telegram. Other material is also becoming available at a very rapid rate.

So if this bill passes, I hope that when the Appropriations Committee meets it will approve an appropriation of $1,000,000,000 for REA. I wish to say that the testimony before the Civil Service Committee showed that when, 2, 3, and 4 years ago, the REA got large appropriations, all it could get, the amount was insufficient to permit the building of a plant large enough to take care of the business. In one or two instances the testimony showed that the business almost doubled inside of 2 years after the establishment of a plant. Of course, in such cases they now have the additional expense of tearing down the plant they have, or in some instances the expense of adding other units. My distinguished colleague from North Dakota is familiar with the fact that at Grand Forks, N. Dak., where they originally installed three units, within a short time afterward they added three more, even though they had thought the three original units would be ample. After the addition of the second three units, making a total of six, we find them now busily engaged in adding two more units, which will make a total of eight. So we can readily see how important it is, if the farmers in that section of the country are to have light and power on their farms, that sufficient money be made available so that the various cooperatives can get the needed light and power from the Rural Electrification Administration.

I remember, as I am sure my colleague does, an occasion when both of us were the guests of a service club. At that meeting, which was held some years ago, a man who had just been appointed manager of a cooperative invited questions. The manager of the private power company got up and asked him very sarcastically how much power he expected the average farmer to use. He could not answer very well, but finally he said he thought they might use as much as 100 kilowatts a month. The power man laughed at him for saying that. But, Mr. President, within 2 years after it was built, the average farmer there used 247 kilowatts a month, which gives some indication of the tremendous amount of power used on those farms.

Senators would also be surprise to learn the number of machines or motors the average farmer in the Northwest uses. No doubt Senators would think the number would be six or seven. Strangely enough, when the farmer has a modern house—and now most of the houses there are modern—he uses in the neighborhood of 40 motors—which, indeed, is surprising.

All of this shows how the Rural Electification Administration has grown far beyond the comprehension of even the most enthusiastic advocates of REA a few years ago. In my judgment it also shows a profound reason why every Senator should investigate thoroughly the wants of REA among the farming constituency he represents in the Congress. If Senators do so, I think they will be surprise and amazed at the development which has occurred since 1935, and particularly during the past 5 years.

EXPANSION OF LOW-COST HOUSING PROGRAM

Mr. MYERS. Mr. President, last month, a subcommittee of the joint congressional Committee on Housing held a 1-day hearing in my city of Philadelphia. The subcommittee, I am pleased to say, found near unanimity among the witnesses on the necessity for legislation such as the Wagner-Ellender-Taft bill, and particularly for a renewal of Federal

activity in the low-rent slum-clearance field.

There was near, but not complete unanimity, of course, because several spokesmen for real estate maintained that such legislation was not only unnecessary, but if you will, dangerous to the American way, and so forth.

However, the sentiment for decent housing for all our people, as would be made possible under effective long-range-housing legislation such as the Wagner-Ellender-Taft bill, was so overwhelming that when the Philadelphia Bulletin, a few days later, conducted a public-opinion poll in Philadelphia, it found 92 percent of Philadelphians convinced of the necessity for decent housing for low-income families and 88 percent favoring some form of Government financing to provide it. These poll results prompted the Bulletin to point out editorially that this was a sharp swing from the days, a few short years ago, when the Philadelphia city administration turned down three public-housing projects for which $18,000,000 of Federal funds were available.

After learning the error of its judgment in that instance and finally agreeing to participate in the Federal low-rent-housing program, the city has since become a great supporter of new legislation to resume and expand the program. Our experience with public housing in Philadelphia, as in most parts of Pennsylvania, has generally been most gratifying.

I ask unanimous consent to insert in the CONGRESSIONAL RECORD, as part of my remarks, the article from the Philadelphia Bulletin of January 10, 1948, containing the results of the Bulletin poll, and also an editorial from the same edition of the Bulletin commenting on the issues. This editorial says, in part:

The question is not simply whether poor people are entitled to decent housing for their own comfort, so much as whether better-to-do people can afford to allow poorer people to be indecently housed. The toll of crime, disease, and other social ills levied by substandard housing might easily cost more than publicly financed dwellings.

There being no objection, the article and poll were ordered to be printed in the RECORD, as follows:

PUBLIC HOUSING SENTIMENT

Public opinion in Philadelphia has swung sharply about since the days when City Hall turned down three public housing projects for which $18,000,000 of Federal funds were available.

This is clearly indicated by the testimony presented at the congressional hearing in this city on Thursday, and by a Bulletin poll, more fully discussed on the opinion page today.

The poll indicates that 92 percent of Philadelphians think housing should be built for low-income families and that of the 92 percent, about 88 percent favor some form of Government financing.

Those who are willing to spend tax funds for such a purpose are doubtless convinced that private enterprise will not and cannot build down to the low incomes and are largely actuated by sympathy for poorly housed families. But there is another consideration, brought out in the decision of the Pennsylvania Supreme Court approving the city's housing authority.

The question is not simply whether poor people are entitled to decent housing for their own comfort, so much as to whether better-to-do people can afford to allow poorer people to be indecently housed. The toll of crime, disease, and other social ills levied by substandard housing might easily cost more than publicly financed dwellings.

THE BULLETIN POLL—92 PERCENT HERE FOR GOVERNMENT ACTION ON LOW-INCOME HOUSING

(By Paul Trescott)

Provision of housing for low-income families was the principal topic discussed at a hearing before a congressional committee here this week.

Witnesses who urged that governmental agencies do something about the situation were speaking what is in the minds of most Philadelphians. Ninety-two percent of the city's adults are in favor of such an undertaking, the Bulletin poll finds.

There is also surprising unanimity on who should provide such housing. Eighty-eight percent of people talked to in a cross section feel it is a responsibility of Government. Thirty-nine percent think it a job for the Federal Government; 14 percent, the State; and 9 percent, the city. Others did not specify beyond the general term "government."

These opinions cut across all political and economic lines, though sentiment for governmental action is higher among low-income people themselves. Even among those with more than average incomes, 85 percent favor governmental action.

Generally the idea of using tax money for this purpose is favored. When asked who should pay for this type of housing, 12 percent said the Federal Government; 7 percent, the State, and 6 percent, the city. Sixteen percent said "government" without specifying which division. Twenty-five percent think the responsibility is on the taxpayers. Thus 66 percent feel that the job should be done by a governmental agency.

Thirty-one percent feel that the cost should be borne by the people who live in the houses. They apparently overlook the fact that low-income people cannot meet the costs at today's prices.

Three percent think such enterprises ought to be financed by private capital; 3 percent said "rich people" should bear the cost, and 8 percent had no opinion. The total is slightly more than 100 percent because some people mentioned more than one governmental division as sharing responsibility.

Oddly, sentiment is highest among the low-income group itself for having the people who live in the housing pay the cost. Sixty-one percent in this group favor use of tax money, 39 percent feel the families should pay the full cost.

In the average-income group, 28 percent would put the cost on the occupants, and 65 percent favor use of tax money.

In the high-income group, 30 percent would put the cost on the tenants, and 70 percent would use taxes.

THE ST. LAWRENCE SEAWAY

Mr. IVES. Mr. President, I do not wish to delay the contemplated recess of the Senate; but I should like to point out that the other day, in my absence, my very good friend the senior Senator from Wisconsin [Mr. WILEY] had inserted in the RECORD certain sections from the New York State Power Authority Act, which presumably were in contradiction of a statement I had previously made on the floor of the Senate. As a matter of fact, there is no contradiction whatever. However, I do not wish to make a reply to the Senator from Wisconsin in his absence. Therefore I shall delay pointing out the inconsistency in that connection until he is able to return. I understand that he is ill.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting sundry nominations and withdrawing a nomination, which nominating messages were referred to the appropriate committees.

(For nominations this day received, and nomination withdrawn, see the end of Senate proceedings.)

INTERNATIONAL TELECOMMUNICATION CONVENTION—REMOVAL OF INJUNCTION OF SECRECY

As in executive session,

The PRESIDING OFFICER laid before the Senate a message from the President of the United States, which, with the accompanying report from the Secretary of State, was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification I transmit herewith a copy of each of the following instruments signed in the English and French languages at Atlantic City on October 2, 1947, by delegates of the United States of America and by delegates of certain other countries represented at the International Telecommunication Conference and the International Radio Conference, Atlantic City, 1947:

(1) International telecommunication convention, with annexes;

(2) Final protocol to the convention; and

(3) Radio regulations annexed to the convention, with appendixes.

I transmit also, for the information of the Senate, the report which the Secretary of State has addressed to me in regard to this matter, together with (1) the volume, enclosed therewith, containing the texts of the instruments above-mentioned and of other acts of the Atlantic City conferences, and (2) an excerpt from the report of the delegations of the United States to those conferences.

In the event that the Senate advises and consents to ratification of the convention, final protocol, and radio regulations, it is requested that the Senate do so with the understanding that such ratification will be subject to the declarations which were made by the delegates of the United States in signing the convention and which are set forth in the final protocol to the convention, namely:

"Signature of this convention for and in the name of the United States of America constitutes, in accordance with its constitutional processes, signature also on behalf of all territories of the United States of America.

"The United States of America formally declares that the United States of America does not, by signature of this convention on its behalf, accept any obligation in respect of the Telegraph Regulations, the Telephone Regulations, or the Additional Radio Regulations referred to in article 13 of the Atlantic City convention."

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 17, 1948.*

(Enclosures: (1) Report of the Secretary of State; (2) volume containing texts of: (a) international telecommunication con-

vention, with annexes, Atlantic City, October 2, 1947; (b) final protocol to the convention; (c) radio regulations annexed to the convention, with appendixes; (d) other acts of the Atlantic City conferences; (3) excerpt from report of United States delegations to Atlantic City conferences.)

DEPARTMENT OF STATE,
Washington, February 12, 1948.

The PRESIDENT,
The White House:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to their transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a copy each of (1) the international telecommunication convention, (2) the final protocol to the convention, and (3) the radio regulations annexed to the convention, signed in the English and French languages at Atlantic City on October 2, 1947, by delegates of the United States of America and by delegates of certain other countries represented at the International Telecommunication Conference and the International Radio Conference, Atlantic City, 1947.

Accompanying the convention, and a part thereof, are five numbered annexes. Annex 1 is a list of countries, territories, and groups of territories. Annex 2 contains definitions of terms used in the convention. Annex 3 contains additional provisions relating to arbitration. Annex 4 consists of general regulations, including general provisions regarding conferences (pt. I) and provisions regarding international consultative committees (pt. II). Annex 5 contains the text of an agreement between the United Nations and the International Telecommunication Union.

Accompanying the radio regulations, and a part thereof, are 16 numbered and 3 lettered appendixes.

The texts of the instruments mentioned above are contained in a single volume, enclosed herewith, published by the existing International Telecommunication Union, which furnished the international secretariat for the Atlantic City conferences. Included in the same volume are the texts also of the following documents, which do not require action with a view to ratification on the part of the United States, namely:

(1) Additional protocols to the international telecommunication convention, 1947;

(2) Resolutions, recommendations, and opinions adopted at the International Telecommunication Conference;

(3) Additional radio regulations;

(4) Additional protocol to the acts of the International Radio Conference; and

(5) Recommendations and resolutions adopted by the International Radio Conference.

The International Telecommunication Conference met at Atlantic City from July 2 to October 2, 1947, inclusive, for the purpose of formulating a convention to revise or replace the international telecommunication convention which was signed at Madrid on December 9, 1932. The Madrid convention was transmitted to the Senate on January 27, 1934 (Senate, Executive B, 73d Cong., 2d sess) and, after ratification, entered into force with respect to the United States on June 12, 1934 (49 Stat., pt. 2, 2391).

The International Radio Conference met at Atlantic City from May 16 to October 2, 1947, inclusive, for the purpose principally of revising the general radio regulations (Cairo Revision, 1938) annexed to the Madrid convention of 1932. The Cairo radio regulations were transmitted to the Senate on January 27, 1939 (Senate Executive B, 76th Cong., 1st sess.) and, after approval, entered into force with respect to the United States on August 25, 1939 (54 Stat., pt. 2, 1417).

The telecommunication (plenipotentiary) conference was convened as a result of an invitation issued by the Government of the United States through its diplomatic missions and through the Bureau of the International Telecommunication Union at Bern, Switzerland. The arrangements for the radio conference were made subsequently. Details with respect to the convening of the conferences were decided upon as a result of a preliminary telecommunication conference held in Moscow, September to October 1946, between representatives of the United States of America, the United Kingdom of Great Britain and northern Ireland, the Union of Soviet Socialist Republics, France, and China. The Atlantic City conferences, in formulating a new convention and new regulations, took into consideration technical developments in the telecommunication field during recent years and also developments in the field of international organization.

The convention drawn up by the telecommunication conference contains provisions relating to telecommunication generally and certain special provisions relating to radio. An outstanding feature of the convention is the reorganization of the International Telecommunication Union in such a way that it may be brought into close relationship with the United Nations on a footing similar to that of other specialized organizations related to the United Nations. Article 26 of the convention, together with annex 5, deals with the relation between the Union and the United Nations.

The comprehensive radio regulations drawn up by the Atlantic City radio conference and adopted by the plenipotentiary conference, as an annex to the convention, are designed to modernize the uniform international rules with respect to radio and make them more responsive to scientific developments and technical improvements in the field.

It will be noted that annex 1 to the convention lists 78 countries, territories, or groups of territories which, upon the entry into force of the convention, will become or will be entitled to become separate members of the International Telecommunication Union, with voting and other rights incident to such membership. The delegates of certain governments signed the convention, as well as other documents related thereto, separately for one or more of the territorial possessions of their respective governments. Although "Territories of the United States of America" are listed separately from the United States of America, so that under article 1 of the convention those Territories, as a group, may be treated as a separate member, there was no separate signature on behalf of those Territories. In order to make the situation with respect to United States Territories entirely clear, the delegates of the United States, in signing the convention, made the following declaration, which is set forth in the final protocol to the convention:

"Signature of this convention for and in the name of the United States of America constitutes, in accordance with its constitutional processes, signature also on behalf of all Territories of the United States of America."

It will be observed also that article 13 of the convention states that the provisions of the convention are completed by four sets of administrative regulations, namely, telegraph regulations, telephone regulations, radio regulations, and additional radio regulations. In paragraph 3 of article 13 it is provided that "These regulations shall be binding on all members and associate members." The telegraph and telephone regulations were not drawn up at the Atlantic City conferences. This will be done at subsequent administrative conferences at which interested governments will be represented. The United States is not at present a party to the telegraph or telephone regulations adopted at Cairo in 1938, or previously, nor did the United States delegates sign the additional radio regulations which were adopted by the Atlantic City radio conference. Inasmuch as those three sets of regulations relate either to matters of particular concern only to the European region or to matters with respect to which the United States Government has not undertaken to adopt extensive regulatory measures, it is the policy of this Government not to accept any obligation under any of those regulations, at least for the time being. Accordingly, the delegation of the United States at Atlantic City reserved the position of this Government by making the following declaration, incorporated in the final protocol to the convention, as a condition to the signing of the convention on behalf of the United States:

"The United States of America formally declares that the United States of America does not, by signature of this convention on its behalf, accept any obligation in respect of the telegraph regulations, the telephone regulations, or the additional radio regulations referred to in article 13 of the Atlantic City convention."

If future conferences should amend those regulations so as to enable the United States Government to become a party to any or all of them, consideration will be given to changing the existing policy of this Government with respect thereto.

Under the provisions of article 23 of the convention, the convention and the radio regulations annexed thereto will, upon entry into force, abrogate and replace, in relations between the contracting governments, the international telecommunication convention signed at Madrid on December 9, 1932, as well as the Cairo radio regulations of 1938.

It is provided in article 49 of the convention that the convention shall enter into force on January 1, 1949, between countries, territories, or groups of territories in respect of which instruments of ratification or accession have been deposited before that date.

It is believed that the convention and radio regulations drawn up and signed at Atlantic City constitute a notable improvement over the existing convention and regulations which have for their purpose the international allocation of radio channels, the regulation of the use of those channels, and the bringing into effect of many other provisions governing the international regulation of telecommunication, particularly of radio.

A more detailed explanation of the purposes and provisions of the convention and its annexes, and of the radio regulations, is set forth in a comprehensive report of the delegations of the United States to the Atlantic City conferences. An excerpt from that report, comprising the major part of the concluding chapter thereof (summary and conclusions), is enclosed herewith.

Respectfully submitted.

G. C. MARSHALL.

(Enclosures: (1) Volume containing texts of: (a) international telecommunication convention, with annexes, Atlantic City, October 2, 1947; (b) final protocol to the convention; (c) radio regulations annexed to the convention, with appendixes; (d) other acts of the Atlantic City conferences; (2) excerpt from report of United States delegations to Atlantic City conferences.)

Mr. VANDENBERG. In connection with the treaties which were just laid down by the Chair, I ask unanimous consent that the injunction of secrecy be removed therefrom.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. GURNEY, from the Committee on Armed Services:

Maj. Gen. James Alward Van Fleet, [redacted], United States Army, for appointment as Director, Joint United States Military Advisory and Planning Group in Greece, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947;

Maj. Gen. Hubert Reilly Harmon, Air Force of the United States (colonel, U. S. Air Force), for appointment to the position of senior Air Force member of the Military and Naval Staff Committee of the United Nations, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947;

Rear Adm. Oscar C. Badger, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as Commander Naval Forces, Western Pacific;

Rear Adm. Cato D. Glover, Jr., United States Navy, for permanent appointment to the grade of rear admiral in the Navy;

Rear Adm. Henry R. Oster, United States Navy, for permanent appointment to the grade of rear admiral in the Navy;

Rear Adm. Edwin D. Foster, Supply Corps, United States Navy, to be Paymaster General and Chief of the Bureau of Supplies and Accounts in the Department of the Navy, with the rank of rear admiral, for a term of 4 years;

Alfred H. Noble and Graves B. Erskine, for appointment to the permanent grade of major general in the Marine Corps;

Edward A. Craig and Thomas J. Cushman, for appointment to the permanent grade of brigadier general in the Marine Corps;

Brig. Gen. Edwin Bowman Lyon and sundry other officers, for temporary appointment in the Air Force;

Brig. Gen. Frank Allen, Illinois National Guard, and several other officers, for appointment in the National Guard of the United States of the Army of the United States;

Brig. Gen. Erik Henning Nelson and sundry other officers, for appointment in the Air Force Reserve of the Air Force of the United States; and

Maj. Gen. William E. Kepner and sundry other officers for appointment in the United States Air Force.

CONFIRMATION OF NOMINATIONS IN THE ARMY, NAVY, AND MARINE CORPS

Mr. GURNEY. Mr. President, as in executive session, I ask unanimous consent that the Senate consider now the nominations approved by the Armed Services Committee of officers in the Army, Navy, and Marine Corps below the rank of general and admiral.

Mr. LANGER. Mr. President, reserving the right to object, I should like to see the names. There is one nomination to which I should like to object.

Mr. GURNEY. Those to which I refer are all below the rank of general. If the Senator would like to see the names, we shall have to put them on the calendar. That would cost about $100.

Mr. LANGER. I have no objection.

Mr. GURNEY. I ask that the list of officers of the rank of colonel and below be presently considered and approved.

There being no objection, the legislative clerk proceeded to read sundry nominations of officers in the Army, Navy, and Marine Corps, below the rank of general and admiral.

Mr. GURNEY. I ask unanimous consent that the nominations be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are confirmed en bloc.

Mr. GURNEY. I ask that the President be notified immediately of all nominations confirmed today.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith of the confirmations.

RECESS

Mr. KNOWLAND. I move that the Senate now take a recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 1 o'clock and 28 minutes p. m.) the Senate took a recess until tomorrow, Wednesday, February 18, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received February 17 (legislative day of February 2), 1948:

DIPLOMATIC AND FOREIGN SERVICE

Leonard N. Caswell, of Massachusetts, a Foreign Service staff officer, to be a consul of the United States of America.

Edward W. Mill, of Maryland, a Foreign Service reserve officer, to be a secretary in the diplomatic service of the United States of America.

IN THE ARMY

The following-named persons, under the provisions of an act of Congress approved April 16, 1947 (Public Law 36, 80th Cong.), for appointment in the Regular Army in the Army Nurse Corps and the Women's Medical Specialist Corps in the grade specified, with date of rank to be determined by the Secretary of the Army pursuant to provisions of the mentioned act. These officers have been selected to fill existing vacancies in the grades for which they are nominated and appointments in these grades will not act to exceed the number of positions authorized for such grades.

To be captains

Vida L. Buehler, WMSC (PT), [redacted].
Mary C. Burnham, WMSC (Diet.), [redacted].
Elizabeth S. Carloss, WMSC (Diet.), [redacted].
Mildred S. Carter, WMSC (PT), [redacted].
Mary L. Gill, WMSC (Diet.), R5.

WITHDRAWAL

Executive nomination withdrawn from the Senate February 17 (legislative day of February 2), 1948:

POSTMASTER

Richard B. Miller to be postmaster at Rushville in the State of Indiana.

HOUSE OF REPRESENTATIVES

TUESDAY, FEBRUARY 17, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most loving Father, whose mercy is over all, we rejoice that in Thy presence there is fullness of joy and at Thy right hand there are pleasures forevermore. As Thou hast committed unto us a service essential to all that is good and great in the being of man, teach us to sow seeds of brotherly consideration and justice to all men and to wait patiently for the fruitage of our labors. We pray Thee to help us to be brave enough to accept

life's daily trials and worthy enough to bear the cross that was borne for us. Grant that our failures and our triumphs may bear witness of our devotion to those rugged ways of conviction that free us from any cowardly act and bind us to every new duty. As life is a sacred trust, help us to accept the lowliest place where an open heart may serve and transform our labors into sacraments of fellowship. Hear our humble prayer as we thus go forth in the holy name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries.

COMMUNICATION FROM ACTING SECRETARY OF THE ARMY

The SPEAKER laid before the House the following communication, which was read by the Clerk and referred to the Committee on Foreign Affairs:

FEBRUARY 13, 1948.

Mr. JOHN ANDREWS,
Clerk of the House of Representatives, Washington, D. C.

DEAR MR. ANDREWS: Reference is made to the letter of December 19, 1947, to you from the Secretary of Defense which is in reply to your letter of December 19, 1947, transmitting an attested copy of House Resolution 365 of the Eightieth Congress.

House Resolution 365 required that certain information be transmitted to the House of Representatives at the earliest practical moment by the Secretary of State and the Secretary of Defense. As stipulated in the letter from the Secretary of Defense, I have been designated to make reply for him in this matter.

In order that all of the information available to the Department of State and Department of Army could be presented in a usable form, it was agreed between the Department of State and the Department of Army that after coordination with the Department of Army the formal reply to House Resolution 365 would be made by Department of State. For this reason the information obtained by Department of Army for reply to this resolution has been forwarded to the Department of State for submission to you by that Department.

Sincerely yours,

WILLIAM H. DRAPER, Jr.,
Acting Secretary of the Army.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING THE NINETY-EIGHTH ANNUAL REPORT OF THE BOARD OF DIRECTORS OF THE PANAMA RAILROAD COMPANY

The SPEAKER laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, referred to the Committee on Merchant Marine and Fisheries:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the Ninety-eighth Annual Report of the Board of Directors of the Panama Railroad Company for the fiscal year ended June 30, 1947.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 17, 1948.*

ADJOURNMENT OVER

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Thursday next.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

THE EASTERN SEABOARD OIL SITUATION

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, at long last I think we have a piece of good news for the east coast. It is reported this morning that although we would be in the red for about 2,000,000 barrels of home-heating oil by March 31, figures now indicate a favorable balance of 5,029,000 barrels at the end of the present heating season.

Mr. Speaker, that, in my opinion, is the result of pressure properly directed and is the result, in part at least, of the Department's cutting off exports out of the east coast, upon our insistent urging that it do so.

This morning we had an executive session. We had three gentlemen from the Department of Commerce with us. I am not, of course, at liberty to disclose what they said at this session, but I think I will assume responsibility for disclosing what I said. As a result of what they read to us, I asked them to cut off all exports for 48 hours. All I could get from them was the remark that they would consider it. I am going back to the committee now in the hope that we will have those telegrams released by the State Department so we can put them in the RECORD this afternoon.

My best recollection is that, of all of the countries that have so far replied, a majority indicated that they could and would take cuts, and that it amounted to about twenty-seven and one-half millions of gallons of heating oil.

I am also going to urge the Department of Commerce to place that 48-hour embargo on honoring any licenses until we can find out where we are in terms of these cable offers to cooperate by accepting further reductions.

I could thoroughly understand this situation if it involved any question of security, but I have been assured that there is not the slightest trace of security involved. I could even understand it if some felt we should use the traditional American approach of friendly and cooperative discussion with our neighboring countries, but the time is late, the emergency is real, and surely they would understand our situation and distress if we had had the foresight to have ordered someone to tell them about it last fall. I certainly prefer the type of action which can only be understood as one between friends. Canada responded immediately. Now, apparently, even at this late date, with considerable concern, the majority of these countries have responded splendidly.

Of course, we can go through the long process of legislation if we have to do so, but I want our people to understand that we have gotten through the talking stage and are now at the point where we are demanding action. We gave the Department full authority; that carries full responsibility. It has not exercised that authority as it should have. It has ignored these telegrams, most of which were read to our committee in the course of a short hour. Revisions could have been undertaken within a few minutes by any competent official after the receipt of each cable. How much is irrevocably lost, only they know.

It is my considered judgment that unless by 5 o'clock tonight the Department takes this affirmative and constructive step which I have urged upon it, and for which I assume full responsibility, the Department will be derelict in its clear duty under the law, which it has sworn to enforce, in the interest of the American people and their comfort, their welfare, their health, their jobs, and perhaps even lives of some of them. I can think of no more bitter reaction than the one which will be left in the minds of the people who now may know the truth, if the State Department lifts the ban it has the power to place on the disclosure of this fact, that the Department of Commerce prefers to gamble their welfare and their safety against the very unrealistic doubts apparently some of them have regarding other countries—doubts that I can now assure you, with deep sincerity, are not shared in many instances by equally responsible representatives of our Government in those countries, as well as the responsible people in the governments of those countries. I hope each of you will join with me, if you believe this to be true, in turning the full force of our collective opinion upon the Department in demanding prompt action, and I hope the people in your districts will join us in this one effort which may be the last we can make before the end of the heating season.

THE ELECTORAL COLLEGE

Mr. DEVITT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. DEVITT. Mr. Speaker, the electoral college is an outmoded institution. It should be abolished. Under its present operation it serves to frustrate rather than to express the will of the American people in Presidential elections. The southern Democrats are especially prejudiced by the present method of computing the votes of the various States. One of the ablest of the southern Democrats, and my associate on the House Committee on the Judiciary, the gentleman from Texas [Mr. GOSSETT], has long been aware of the inequitable operation of the present election machinery. He has proposed a system of proportional computation of the votes cast in Presidential

elections which provides that the votes of all citizens of the country would be counted in choosing a President. An examination of these proposed changes and an endorsement thereof is contained in a recent editorial in the Arkansas Gazette, of Little Rock, Ark. I include it as a part of my remarks and commend it to your careful reading.

The editorial referred to follows:

MORE REPRESENTATIVE ELECTIONS

One of the most curious byproducts of the current southern outrage over President Truman's civil rights program is the proposal by Representative GOSSETT, of Texas, that Presidential elections be made more representative. Specifically, Mr. GOSSETT wants to abolish the electoral college and divide the electoral vote of each State in the exact ratio of the popular vote. Resolutions to accomplish this end are now before the House Judiciary Committee.

Mr. GOSSETT is one of those who believe that Mr. Truman has sold the South down the river in an effort to appeal to the minority vote in pivotal Eastern States. Indeed, he charges that this has become a common practice among Presidents, and he argues that it can be ended only by a system under which every vote in a Presidential election would count exactly as cast.

This proposal is a welcome contrast to the suggestion, now sounding again in the overheated South, that the electoral college ignore the popular vote entirely and name a President of its own choosing. Mr. GOSSETT's suggestion not only makes a good deal of sense, but has a special meaning to the region.

After all, there is no good reason why the entire electoral vote of a State should be delivered as a unit to the candidate who receives a simple majority of the votes. The electoral vote, in fact, is based upon congressional representation—one for each Representative and Senator. It would require no alteration of existing election machinery to count electoral votes by congressional districts, awarding only two on a State-wide basis, or even to go all the way with Mr. GOSSETT and simply divide the present electoral vote in proportion to the popular vote.

This would certainly have the effect of spreading the political effort of both parties, for no national election could then be won on the basis of small popular majorities in a few key States. For the South it would mean an immediate break in one-party solidarity. In Arkansas, for instance, which polled 63,551 votes for Dewey against 148,965 for Roosevelt, more than a third of the State's electoral votes would have gone to the Republicans in 1944. The proportion of Republican votes in some other Southern States, notably North Carolina and Tennessee, is usually even higher.

This would mean that, in national elections at least, the Southern States would become bipartisan. The electoral votes that could be chipped away from the Democratic majorities would be worth having—worth the sort of effort the Republicans have never expended on the region. This would soon have a salutary effect upon State and local elections, for it is inevitable that a rejuvenated and effective southern wing of the Republican Party would grow out of it.

Mr. GOSSETT and the other supporters of the measures abolishing the electoral college are going to run into potent opposition from political interests in both parties, of course. But they deserve the determined support of all those southerners who now recognize that they have nothing to lose and a good deal to gain by breaking down the one-party tradition, and, for once at least, they would be able to point out to their critics that they are on the side of more and better democracy.

EXTENSION OF REMARKS

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the Appendix of the RECORD in two separate instances and include extraneous matter.

Mr. DONDERO asked and was given permission to extend his remarks in the Appendix of the RECORD and to include an editorial.

Mr. MACKINNON asked and was given permission to extend his remarks in the Appendix of the RECORD and include a magazine article.

LIBERTY

Mr. MATHEWS. Mr. Speaker, I ask unanimous consent to address the House for one-half minute.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. MATHEWS. Mr. Speaker, liberty is not the right to do what you choose; it is the responsibility of choosing to do what is right.

Mr. Speaker, I yield back the balance of my time.

EXTENSION OF REMARKS

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the Appendix of the RECORD and include two articles.

Mr. REED of New York asked and was given permission to extend his remarks in the Appendix of the RECORD in three instances and in each to include extraneous matter.

Mr. HERTER (at the request of Mr. JAVITS) was given permission to extend his remarks in the Appendix of the RECORD and include an exchange of correspondence with the Secretary of State, and also an editorial.

RENT CONTROL

Mr. JAVITS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JAVITS. Mr. Speaker, now that the Supreme Court has sustained the Federal rent-control law and the Banking and Currency Committee proposes to bring in a stopgap 31-day extension, it is time to take counsel for the immediate future. Fluctuations in the commodity markets are no reason for holding up a rent-control bill; the housing shortage is still our No. 1 domestic problem. A last-minute rent-control bill will get us into the same trouble as it did before. The 15-percent so-called voluntary-increase provision in the present law, which has caused so much mischief, was largely attributable to the take-it-or-leave-it basis on which the bill came before us a short time before rent control was to expire.

The Banking and Currency Committee should rule out at once any across-the-board increase. Every 5 percent of such an increase will increase the inflationary pressure on tenants in New York City alone to the tune of about $10,000,000 a month. We must have a bill brought in promptly, with adequate time for consideration; it should extend rent control to June 30, 1950—or at the least to June 30, 1949—with adequate safeguards to recontrol premises decontrolled under the 15-percent so-called voluntary agreements, to redress the injury to tenants for landlords' failures to redecorate and maintain rented premises, to give tenants fair protection against summary evictions, and to strengthen administration and enforcement of the whole rent-control law.

According to the latest figures furnished to me, it is estimated that 2,746,000 couples are living doubled up with other couples as of April 1, 1947, and that rents for uncontrolled units like apartment hotels, motor courts, and so forth, are 66 percent higher than comparable controlled units. It wil be a national catastrophe if rent control is not extended with a statesmanlike law and after mature deliberation, and not under a "Hobson's choice," as we did before, of having to take an unsatisfactory law or no Federal rent control at all.

PENSION FOR VETERANS OF WORLD WAR I

Mr. EDWIN ARTHUR HALL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. EDWIN ARTHUR HALL. Mr. Speaker, today I am introducing a bill granting pensions to veterans of World War I.

For the past 7 years, the accent has been to spend billions of the taxpayers' dollars in foreign countries. Without batting an eyelash, we have voted tremendous sums of money to pour down the rat holes of Europe and Asia.

Some of this money must have found its way to succor the downtrodden, to feed the hungry, and clothe the naked. But much of it has been wasted and is being wasted.

Be that as it may, we keep providing these billions for the nations across the sea while our own people are laboring to keep their heads above water and the wolf from the door.

I regret that it has come to the point when a Member of this House runs the risk of attack and abuse when he becomes presumptuous enough to request something for the Americans he represents.

All of which strikes no fear to my heart because my job is to consider the needs of the Americans who elected me before anybody else abroad.

I believe the time is ripe to come to the aid of the veterans of World War I. With the natural importance placed upon the needs of our younger veterans, we have overlooked, for a time at least, those who served so valiantly in the stirring days of '17 and '18.

We are guilty, therefore, of forgetting that our World War I heroes are older, their ranks thinning, and the exigencies

of former military service beginning to tell upon the numbers that remain.

They are the forgotten men of our generation. We have looked after the fighting men of every other American war but them.

As near as I can judge, the present average age of veterans of World War I is 57. Many are, of course, older. All have started down the trail which eventually leads to the setting sun.

These men are for the most part still vigorous. We owe them almost as much for what they did in the way of moral encouragement and keeping the home front in line during World War II as we owe them for their physical contributions in the first struggle.

But they ought to have consideration. We provided pensions for the GAR, the Spanish War vets, for all who went before. We have no choice but to begin thinking about the men who came back from France after participating in the war that was to end all wars.

Therefore, I submit the following bill and I urge upon the House its early, friendly acceptance. The Nation must be willing to meet her responsibility by preparing for final and equitable treatment of so patriotic and noble a group as the veterans of the First World War.

My bill reads:

A bill granting service pensions of $75 per month to veterans of World War I, and for other purposes

Be it enacted, etc., That any person who (1) served in the armed forces of the United States at any time between April 5, 1917, and July 3, 1921, (2) was honorably discharged from such service either after 90 days or more of service or for disability incurred in service in line of duty, and (3) either (A) is 60 years of age or over, or (B) has a disability of 10 percent or more and is 55 years of age or over, shall be entitled to receive a pension of $75 per month. If any such person is, on account of physical or mental disabilities, helpless or blind, or so nearly helpless or blind as to need or require the regular aid and attendance of another person, he shall be entitled to receive a pension of $100 per month in lieu of such pension of $75 per month.

SEC. 2. The original award of a pension to any person under this act shall be effective from the date of application or the first day of the second month following the enactment of this act, whichever is later.

SEC. 3. No pension or compensation payable to any person under any law or Veterans' Regulation in force on the date of the enactment of this act shall be reduced or discontinued by reason of any provision of this act, but a person may elect to receive pension under this act in lieu of such pension or compensation.

SEC. 4. The Administrator of Veterans' Affairs is authorized to prescribe such rules and regulations as may be n ecessary to carry out the provisions of this act.

A CASE OF DOUBLE TALK AND DOUBLE DEALING

Mr. MASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MASON. Mr. Speaker, today Great Britain is selling arms and ammunition to the Arab States. This makes it possible for the Arabs to defy and effectively oppose the decision of the United Nations Organization to partition Palestine and establish an independent Jewish state there.

Our State Department has placed an embargo upon the shipment and sale of arms and ammunition to the Jews in Palestine. This makes it impossible for the Jews there to implement the decision of the UNO or to defend themselves effectively against the attacks of the Arabs.

Mr. Speaker, this is an anomalous position for us to be in. Both Great Britain and the United States are active members of the UNO and are parties to the UNO decision to partition Palestine and set up an independent Jewish state. In fact, according to rumor, we practically forced the decision through the UNO Council. Both Great Britain and the United States are therefore morally bound to do what they can to implement that decision.

Mr. Speaker, in my opinion this is a clear case of double talk and double dealing on the part of our State Department and the British Foreign Office. Here we have the two leading nations that helped to establish the UNO, giving lip service to the UNO decision, yet by their actions seeking to nullify that decision and prevent it from being carried out. If the UNO decision in this matter is flouted, what can we expect will happen to future decisions? Will not the UNO—from which we were led to hope and expect so much—be rendered impotent by the acts of the very nations that were most influential in creating it? When will the actions of our State Department square with its words?

Mr. Speaker, before adopting the Marshall plan, Congress should demand an explanation from the State Department of its attitude in this matter. And before we give further aid to Great Britain through the Marshall plan we should insist that she carry out her UNO obligations.

STATE DEPARTMENT

Mr. RAYBURN. Mr. Speaker, I ask unanimous consent to address the House for one-half minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. RAYBURN. Mr. Speaker, I desire to say—and if it were a less prominent Member of the House I would pass it over without saying anything—in reply to the gentleman from Illinois, that when he accuses the State Department of the United States of double talk, it makes good reading to every enemy of democracy in this world.

EXTENSION OF REMARKS

Mr. O'HARA. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a letter to the President from a distinguished citizen of my district, Judge Moriarity. I am informed by the Public Printer that this will exceed two pages of the RECORD and will cost $142, but I ask that it be printed notwithstanding that fact.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

Mr. MERROW asked and was given permission to extend his remarks in the RECORD and include a radio address he delivered over the Columbia Broadcasting System.

Mr. LARCADE. Mr. Speaker, on yesterday I obtained unanimous consent to insert in the RECORD an address by Joseph C. Grew, former Ambassador to Japan. I am informed by the Public Printer that this will exceed two pages of the RECORD and will cost $159.75, but I ask that it be printed notwithstanding that fact.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

Mr. MULTER asked and was given permission to extend his remarks in the RECORD in three instances and include in each excerpts from newspapers.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an article by Harold J. Ruttenberg. I am informed by the Public Printer that this will exceed two pages of the RECORD and will cost $159.75, but I ask that it be printed notwithstanding that fact.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

Mrs. ROGERS of Massachusetts asked and was given permission to extend her remarks in the RECORD and include an address she delivered at the B'nai Brith dinner, and the reply of Admiral Louis E. Denfeld.

Mr. HÉBERT asked and was given permission to extend his remarks in the RECORD and include a radio address delivered last night by Earl K. Long, giving information relative to his income-tax return which was requested by the gentleman from Louisiana [Mr. DOMENGEAUX].

LEAVE OF ABSENCE

Mr. McMILLEN of Illinois. Mr. Speaker, I ask unanimous consent that my colleague, the gentleman from New York [Mr. BUCK] may be excused from attending further sessions of the House during the week on account of illness.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

LOUISIANA POLITICS

Mr. HÉBERT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include an editorial.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. HÉBERT. Mr. Speaker, I think we will all agree it is an open season on Louisiana politics as far as this House is concerned. Even the aisle to the center has melted and the Republicans are interested as well as the Democrats.

The last time the Republicans marched into Louisiana they carried bayonets. Yesterday the gentleman from Louisiana [Mr. DOMENGEAUX] relied on Republican heavy artillery to assist him, but it was as effective as the blanks which he has been firing.

The gentleman from Illinois [Mr. DIRKSEN] has introduced a resolution calling for an investigation of alleged fraud income-tax returns in the office of the collector of internal revenue in New Orleans. I heartily endorse and support this resolution and shall vote for it if and when it comes to the floor of the House. In connection with this resolution, the gentleman from Illinois [Mr. DIRKSEN] in an address before the House on yesterday referred to former Gov. Earl K. Long, and alleged charges made against him by a member of the Louisiana delegation, indicating that the resolution was aimed at Mr. Long.

Mind you, Mr. Speaker, I am not objecting to the resolution offered by the gentleman from Illinois [Mr. DIRKSEN], I am supporting it, but I must point out to you that I cannot agree that the Congress under the resolution has a right to delve into the individual income-tax returns of a particular taxpayer. The resolution is directed against the collector of internal revenue at New Orleans, however, it is freely admitted that the purpose of the resolution is to get Earl Long's income-tax returns, therefore, if the resolution is for that purpose it is just as logical to assume that the income-tax returns of any individual taxpayer can be brought before the committee, and I believe one taxpayer should be treated like any other taxpayer, which is the reason I am going to ask that Mr. Jones' returns also be brought before the committee since he, too, is a candidate for governor.

On yesterday, with photostatic documents I conclusively proved Mr. Long not guilty of any wrongdoing and completely refuted Mr. DOMENGEAUX' charges that Mr. Long is assessed $100,000, and had agreed to pay a fraud penalty, which also answered the observations made by the gentleman from Illinois [Mr. DIRKSEN] who was not present on the floor at the time I made my presentation. I feel certain the gentleman from Illinois [Mr. DIRKSEN] would not have made the statement which he did if he had been present to hear me because an examination and careful analysis of his remarks will reveal that we are in agreement on the situation except that the gentleman from Illinois [Mr. DIRKSEN] refers to a substantial sum and I refer to a specific amount of $1,500.

I answered all questions raised by the gentleman from Illinois [Mr. DIRKSEN] with photostatic proof of the pertinent documents. The gentleman from Illinois [Mr. DIRKSEN] has assured me his committee will make a report. Of course that report will substantiate my address of yesterday and will prove the gentleman from Louisiana [Mr. DOMENGEAUX] in error and me correct. I welcome full examination by the committee.

I believe there should not be two rules in this matter. What governs one should govern the other. I have in my hand an editorial from a Louisiana newspaper making certain charges against former Governor Sam Jones. I don't know whether Sam Jones is guilty of fraud or not, but I want to find out. I believe in fairness to Sam Jones, the people of Louisiana, and this country should know whether his income tax returns reveal all of his income or not. I think in fairness to Mr. Jones, as in the case of Mr. Long, this matter should be decided one way or the other. Mr. Jones has been charged by reputable people, including the district attorney, as well as the candidate for governor who opposes him, who is also a former governor. I do not want to harm Mr. Jones in one instance. If these charges are not true I want to know it. If they are true I want to know that too. Therefore, Mr. Speaker, I am following the same pattern as laid down by the gentleman from Louisiana [Mr. DOMENGEAUX] in trying to arrive at the truthful conclusion. I am not deviating in one instance. I, therefore, Mr. Speaker, will ask the committee appointed by you under the Dirksen resolution to subpena the books of the City Service Refining Corp.; the Shell Corp.; certain coal interests; and also the books of certain airlines operating in the State of Louisiana, in order to compare the amounts of money as fees or otherwise which they may or may not have paid former Governor Jones, and to compare these reports with the income tax returns filed by former Governor Jones in the office of the collector of internal revenue at New Orleans. There is only one way that this can be determined, and that is for a complete review and examination of Governor Jones' returns by the select committee proposed by the gentleman from Illinois [Mr. DIRKSEN]. I have discussed this matter with the gentleman from Illinois [Mr. DIRKSEN] and he has assured me that my request shall be accorded the same consideration given the other gentleman from Louisiana [Mr. DOMENGEAUX] in this instance.

Mr. Speaker, I do not believe that the Members of this House should be allowed to operate under a privileged rule in matters of public interest. If a Member of this House can come on this floor and make certain charges and then have a resolution passed by this House to give him the opportunity of proving those charges, I believe that same privilege should be accorded reputable citizens of any community, and particularly a district attorney who does not have the same opportunity as a Member of the House. That is all I am seeking to do in this case. I want to get everybody under the same tent. I repeat, I seek to do no harm to Mr. Jones; I only want the truth. If the charges made by these reputable people as reflected by the editorial which I have received permission to put in the RECORD are true, I believe the people of Louisiana should know it, and I repeat, by the same token, if they are not true, in justice and fairness to Mr. Jones, the people should know about it. I repeat, Mr. Speaker, I shall ask the select committee appointed by you to subpena and bring before them all matters pertaining to Mr. Jones' income, as well as the books of the companies which it is charged he received certain fees from and are not reflected in the income-tax returns which he gave out over his own name.

Now, Mr. Speaker, I read to you a telegram which I have just received, addressed to me and signed by Judge Leander H. Perez, district attorney of the parishes of St. Bernard and Plaquemines in Louisiana, and in my congressional district. I believe that you will agree with me that charges made by a duly elected district attorney of the State of Louisiana is well worth the attention of this Congress, since the door has already been opened by the gentleman from Louisiana [Mr. DOMENGEAUX] for such a procedure. Judge Perez, in his telegram to me, says this, and I quote him:

> In proposed notice to House of your intention to request subpenas or orders for production of records before special committee investigating income-tax frauds in Louisiana, regarding income of Sam Houston Jones, gubernatorial candidate, please include Mathieson Alkali & Chemical Works, and City Service Refining Co., of Lake Charles, La., Kansas City Southern Railway, Louisiana & Arkansas Railway, National Coal Association, Pan American Airways, Eastern Airlines, Inc., and United States Brewers Foundation, represented by Roland B. Howell, State director.
>
> All of whom are reliably reported to have paid Jones large fees for political favors, and also Steve Alford, former Gov. Sam Jones' superintendent of State police, regarding his collections for joint account of himself and former Gov. Sam Jones from large gambling interests in Louisiana, under guise of political contributions. All to determine whether Sam Houston Jones, gubernatorial candidate in present campaign against Earl K. Long, rendered full account of income to United States Government.
>
> LEANDER H. PEREZ,
> *District Attorney.*

I now direct your attention, Mr. Speaker, to an editorial taken from the Plaquemines Gazette, of Pointe a la Hache, La., dated February 7, 1948, before the gentleman from Illinois [Mr. DIRKSEN] introduced his resolution. It is the basis for these charges which I have brought to your attention.

As a part of my remarks, I include the following editorial:

JONES DARE NOT ANSWER

On Friday, January 16, before the first primary election of January 20, Earl Long promptly answered Congressman JIMMIE DOMENGEAUX's false charges which he made as a result of a conspiracy promoted by Sam Jones and the New Orleans newspapers and pointed out that JIMMIE DOMENGEAUX was not a candidate for Governor against him, but that Sam Jones was the New Orleans newspaper candidate for Governor.

Earl Long then and there issued his challenge to Sam Jones, as follows:

"I now challenge Sam Jones, as the candidate for Governor, to make and publish a sworn statement of his taxable income for the last 9 years, including the year 1938 to the present time, and to publish a sworn statement of the names of the persons, firms, or corporations who paid him 'fees' and how much during any of those years, and how much they are now paying him.

"I am prepared to make such a sworn statement and let the people have all the facts regarding my income, whom I represented and from whom I took fees before and after my short term as Acting Governor of Louisiana in 1939–40, up to the present time.

"I defy Sam Jones to accept this challenge and to publish, under oath, how much his income was before, during, and after the time he was Governor up to now, and particularly—

"How much the coal interests paid him to prevent the shipment of natural gas out of this State to compete with coal as fuel;

"How much the City Service Refining Co. paid him to repeal the 1-cent-per-barrel oil-refining tax:

"How much the air lines paid him to remove the tax on airplane gasoline, while he left the gasoline tax on the fishermen's and trappers' boats and the farmers' farm machinery; and

"How much the large Shell Corp. paid him for that big State shell reef near Lake Charles, which he leased to that corporation for 4 cents per yard when the State shells were worth $2.50 per yard; and

"How much those big interests are still paying him for the 'favors' he did for them while he was Governor in 1940–44.

"If Sam Jones will accept this challenge, let him give his sworn statement to his city campaign manager in New Orleans, and I will furnish my sworn statement to my campaign manager, both to be published at the same time."

Twenty-three days have passed since Earl Long issued that challenge to Sam Jones, which was published in the newspapers in New Orleans and throughout the State and repeated several times on the radio by Earl Long and his campaign manager.

Sam Jones has not answered.

Sam Jones will not answer the challenge.

Sam Jones cannot answer the challenge without confessing his guilt of graft and corruption in office as Governor between 1940–44.

Sam Jones' silence proves his guilt and proves his unfitness for reelection to the high office of Governor.

But Sam Jones has declined to answer another challenge from another candidate for Governor, because Judge Bob Kennon and the Kennon campaign committee in Lake Charles published the following challenge to Sam Jones about which Sam Jones has kept "mum" up to this time.

Here are the Kennon questions and challenge to Sam Jones, which he dare not, will not, and cannot answer:

"1. Whether he (Jones) was employed and paid by the coal interests to fight to keep Louisiana gas from being shipped out of the State to compete with coal, while he, Jones, was pretending to be working for the State and representing the interests of the State and its people.

"2. That in 1944 he, Jones, assisted a large corporation for which he, Jones, was secret attorney, in obtaining from the State in secret and without bids, a lease of thousands of acres of State-owned shell deposits near Lake Charles, La., for practically nothing and for a royalty of only 4 cents per yard on State shells worth $2.50 per yard—and how much Sam Jones was paid for that.

"3. That Sam Jones was paid to protect a large corporation who was guilty of stream pollution in the Calcasieu River in spite of the protests filed by hundreds of farmers and sportsmen and because of his political influence, Sam Jones secured immunity from prosecution for his corporation client.

"4. That, although the same corporation client of Sam Jones owns millions of dollars' worth of property in Calcasieu Parish subject to taxation, Sam Jones had them assessed by the State tax commission, which he controls, at only $250,000, or less than 2½ percent of its value.

"5. That through Sam Jones' influence, the Louisiana Highway Commission bought 13 acres of land from this same corporation client for $40,000, or about $3,000 per acre, when the same lands of that corporation were assessed for an average of only $7 per acre and how much Sam Jones got out of that.

"6. That since his term of Governor expired, Sam Jones has been using State police cars and with State-paid drivers in campaigns in Calcasieu Parish against veterans running for local offices."

EXTENSION OF REMARKS

Mr. GWYNNE of Iowa asked and was given permission to extend his remarks in the RECORD and include an editorial and a short letter.

Mr. JOHNSON of Illinois asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. DAVIS of Wisconsin asked and was given permission to extend his remarks in the RECORD and include a letter.

ATOMIC ENERGY COMMISSION

Mr. COLE of New York. Mr. Speaker, I ask unanimous consent to file a supplemental report in connection with the bill (H. R. 5216) to amend the Atomic Energy Act of 1946 so as to provide that no person shall take office as a member of the Atomic Energy Commission or as General Manager of such Commission until an investigation with respect to the character, associations, and loyalty of such person shall have been made by the Federal Bureau of Investigation.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

COMMITTEE ON UN-AMERICAN ACTIVITIES

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, one of my greatest services in this House was introducing and securing the adoption of the resolution creating the Committee on Un-American Activities. It is doing more to protect this country from the enemies within our gates than any other agency of this Government.

On yesterday the Supreme Court of the United States upheld the conviction of Leon Josephson for contempt of Congress, in refusing to be sworn last March by a subcommittee of the Committee on Un-American Activities.

The Communists have contended continuously that this committee is unconstitutional; in other words, these Communists, who are sworn to overthrow this Government are demanding that we respect what they say is their constitutional right to sabotage this Government, and are attempting to outlaw one of the greatest agencies this Government ever had for its protection against those subversive individuals.

The Court refused to hear Josephson's appeal from the decision of the United States Circuit Court of Appeals for the Second Circuit, which court last December had affirmed the conviction of Josephson in the United States District Court for the Southern District of New York.

Also on yesterday, in the United States District Court for the District of Columbia, the pleas of the 10 Hollywood witnesses that their cases should be thrown out of court were denied by United States District Court Judge Curran.

I presume that by now, at least, the Communists within our gates have learned that they cannot intimidate Congress or destroy one of its most valuable committees, which, as I said, is doing so much to unmask these enemies of our country, expose them to the public gaze, and subject them to prosecution, and also to deportation, than any other agency of this Government.

The SPEAKER. The time of the gentleman from Mississippi has expired.

LOUISIANA POLITICS

Mr. DOMENGEAUX. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. DOMENGEAUX. Mr. Speaker, I would have assumed that my dear and beloved friend and colleague from Louisiana would have had sufficient in what happened to him yesterday on the floor without attempting to confuse this matter further today. He came in like a lion with the attitude that he was going to tear me limb from limb. I think he left like a lamb.

Mr. Speaker, I am glad to see that he is going to support the Dirksen resolution. I do not know whether he is among those who for the past month have been attempting to do everything in their power to prevent the proper and legal disclosure of the fraudulent income-tax claim presently held against Earl K. Long by the Bureau of Internal Revenue.

I may say further, Mr. Speaker, that he brings in here the name of an honorable man, Sam Jones, who has a record of accomplishment and devotion to the people of the State of Louisiana. At this late hour, for the first time I have heard the statement that Sam Jones may have filed a fraudulent income-tax return. Sam Jones will welcome an investigation of his returns. The resolution of the gentleman from Illinois [Mr. DIRKSEN] has the authority, when passed, to look into Mr. Jones' income taxes, and I for one will insist that it does.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

MRS. MARTHA W. JOHNSON

The Clerk called the bill (H. R. 2136) for the relief of Mrs. Martha W. Johnson.

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

JONAH WILLIAMS

The Clerk called the bill (S. 310) authorizing the issuance of a patent in fee to Jonah Williams.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Jonah Williams of Sisseton, S. Dak., a patent in fee to the following-described lands allotted to him in the State of South Dakota: The west half of the southeast quarter and the southwest quarter of the northeast quarter of section 32, township 126, range 52, west of the fifth principal meridian.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHARLES GHOST BEAR, SR.

The Clerk called the bill (S. 311) authorizing the issuance of a patent in fee to Charles Ghost Bear, Sr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Charles Ghost Bear, Sr., of Gordon, Nebr., a patent in fee to the following-described lands allotted to him in the State of South Dakota: The southwest quarter of section 13, township 40 north, range 34 west, sixth principal meridian.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHARLES KILLS THE ENEMY

The Clerk called the bill (S. 312) authorizing the issuance of a patent in fee to Charles Kills the Enemy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Charles Kills the Enemy, of Winner, S. Dak., a patent in fee to the following-described lands allotted to him in the State of South Dakota: The northwest quarter of section 21, township 36 north, range 29 west, sixth principal meridian.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CALVIN W. CLINCHER

The Clerk called the bill (S. 313) authorizing the issuance of a patent in fee to Calvin W. Clincher.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Calvin W. Clincher, of Gordon, Nebr., a patent in fee to the following-described land allotted to him in Washabaugh County, S. Dak.: the northwest quarter of section 8, township 41 north, range 35, sixth principal meridian of South Dakota, containing 160 acres.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JAMES BLACK DOG

The Clerk called the bill (S. 402) to authorize and direct the Secretary of the Interior to issue to James Black Dog a patent in fee to certain land.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to James Black Dog, a Fort Peck Indian allottee, a patent in fee to the northeast quarter of section 34, township 30 north, of range 53 east, Montana principal meridian, containing 160 acres.

With the following committee amendment.

Page 1, line 8, insert the following: "*Provided*, That when the land herein described is offered for sale, the Fort Peck Tribe or any Indian who is a member of said tribe shall have 90 days in which to execute preferential rights to purchase said tract at a price offered to the seller by a prospective buyer willing and able to purchase."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. BESSIE TWO ELK-POOR BEAR

The Clerk called the bill (S. 499) authorizing the issuance of a patent in fee to Mrs. Bessie Two Elk-Poor Bear.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Mrs. Bessie Two Elk-Poor Bear, of Allen, S. Dak., a patent in fee to the northeast quarter of section 19, township 41, range 34 west, of the sixth principal meridian, South Dakota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TOM EAGLEMAN

The Clerk called the bill (S. 500) authorizing the issuance of a patent in fee to Tom Eagleman.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Tom Eagleman, of Pierre, S. Dak., a patent in fee to the southwest quarter of the southeast quarter and the south half of the southwest quarter of section 25 and lot 3 of the southeast quarter of section 26, all in township 108, range 73 west, of the fifth principal meridian, South Dakota.

With the following committee amendment:

On page 1, line 9, delete the period, add a colon and the following sentence: "*Provided*, That when the land herein described is offered for sale, the Crow Creek Sioux and the Lower Brule Sioux Tribes or any Indian who is a member of said tribes shall have 90 days in which to execute preferential rights to purchase said tract at a price offered to the seller by a prospective buyer willing and able to purchase."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. ELLA WHITE BULL

The Clerk called the bill (S. 542) authorizing the issuance of a patent in fee to Mrs. Ella White Bull.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Mrs. Ella White Bull, of Porcupine, S. Dak., a patent in fee to the following-described lands allotted to her in Bennett County, State of South Dakota: The southwest quarter of section 29, township 37 west, range 40 west, sixth principal meridian, South Dakota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RANKIN COUNTY, MISS.

The Clerk called the bill (H. R. 4118) to authorize and direct the Secretary of the Interior to issue a patent for certain lands in Rankin County, Miss.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That subject to the provisions of section 2, the Secretary of the Interior is hereby authorized and directed to issue to Thomas Loflin, who made entry under Choctaw scrip certificate on November 1, 1854, at the Jackson, Miss., district land office, his heirs and assigns, a patent for all rights to and interest in the following-described lands in Rankin County, Miss.,: The northeast quarter of the southeast quarter, section 35, township 3 north, range 2 east, Choctaw meridian, containing forty and one one-hundredths acres.

SEC. 2. Said patent shall issue upon application made not later than 1 year after the effective date of this act and upon the payment of a reasonable price for the interest patented as set by the Secretary in his discretion considering the appraised value of the land, exclusive of any increased value resulting from the development or the improvement of the land by the applicant or his predecessors in interest and considering and giving full effect to the equities of the applicant.

With the following committee amendments:

Section 1, page 1, line 3, strike out all after the word "that" and strike out all of line 4, and insert in lieu thereof "title in fee simple is hereby confirmed in."

Section 1, page 1, line 7, strike out the words "a patent for" and insert in lieu thereof the word "to."

Section 2, page 2, lines 3 to 11, inclusive, strike out all of section 2, lines 3 to 11, inclusive.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to confirm title in fee simple in Thomas Loflin to certain lands in Rankin County, Miss."

A motion to reconsider was laid on the table.

MRS. CHARLOTTE E. HARVEY

The Clerk called the bill (H. R. 1392) for the relief of Mrs. Charlotte E. Harvey.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Mrs. Charlotte E. Harvey, Glenwood, Minn., is relieved of all liability to pay to the United States any amount owing by her to the United States on account of the shipment of her household effects from Osakis, Minn., to Alexandria, Va., incident to her transfer, on or about September 16, 1943, from Rock Island, Ill.,

to Washington, D. C., while she was in the employ of the Department of War. The Department of War granted to the said Mrs. Charlotte E. Harvey an invalid extension, upon wich she relied, of the time within which such shipment was authorized to be made at the expense of the United States and later canceled such extension. In the settlement of accounts of any disbursing officer of the United States full credit shall be given for any payment made to cover the expenses of such shipment.

With the following committee amendment:

Page 1, line 5, after the word "United States", strike out the balance of the page down to and including line 7 on page 2 and insert "in excess of the sum of $5.41, on account of the shipment of her household goods and personal effects from Osakis, Minn., to Alexandria, Va., incident to her transfer, on or about September 16, 1943, from Rock Island, Ill., to Washington, D. C., while she was a civilian employee of the War Department. In the settlement of the accounts of any disbursing officer of the United States credit in the amount of $208.66 shall be given for any payment made to cover the expenses of such shipment."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

T. L. MORRIS

The Clerk called the bill (H. R. 1667) for the relief of the estate of T. L. Morris.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the estate of T. L. Morris, deceased, late of Cherokee County, S. C., the sum of $5,000. The payment of such sum shall be in full settlement of all claims against the United States on account of the death, on July 5, 1944, of the said T. L. Morris from injuries sustained by him when he was struck, on the said date, while plowing in a field, 8 miles west of the town of Gaffney, S. C., by an airplane in the service of the Army of the United States: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JESSE A. LOTT

The Clerk called the bill (H. R. 1786) for the relief of Jesse A. Lott.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the United States Employees' Compensation Commission be, and is hereby, authorized and directed to receive the claim of Jesse A. Lott, of Liberty, S. C., for injuries sustained in line of duty as a skilled laborer in the United States Maritime Shipyard, Brunswick, Ga., on or about May 16, 1918, the same as if it had been filed within the time specified by the Compensation Act of September 7, 1916, as amended. Any payments to be made as compensation shall begin with the date of the passage of this act.

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That notwithstanding the provisions of sections 15 to 20, inclusive, of the act entitled 'An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes,' approved September 7, 1916, as amended (U. S. C., 1940 ed., and Supp. V, title 5, secs. 765–770, inclusive), the Bureau of Employees' Compensation of the Federal Security Agency is hereby authorized and directed to consider any claim filed with the Bureau by Jesse A. Lott for compensation under such act, within 6 months from the date of enactment of this act, on account of alleged injuries incurred at the United States Maritime Shipyard, Brunswick, Ga., on or about May 16, 1918. No benefits shall accrue prior to the approval of this act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. SIRVART ARSENIAN

The Clerk called the bill (H. R. 2013) for the relief of Mrs. Sirvart Arsenian.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the 2-year limitation on certain suits in admiralty against the United States contained in section 5 of the Suits in Admiralty Act, approved March 9, 1920, as amended (U. S. C., 1940 ed., title 46, sec. 745), is hereby waived in favor of Mrs. Sirvart Arsenian, Fresno, Calif.; and she may sue the United States on her claim arising out of the death of her son, the late Albert A. Arsenian (who lost his life in the explosion at Port Chicago, Calif., on July 17, 1944, while serving as a civilian employee of the United States in the capacity of a member of the crew of the War Shipping Administration vessel *E. A. Bryan*) under the remaining provisions of such Suits in Admiralty Act, as amended, if she brings such suit within 1 year after the date of the enactment of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CLAUDE T. THOMAS, ET AL.

The Clerk called the bill (H. R. 2633) for the relief of Claude T. Thomas, legal guardian of Elizabeth Ann Mervine, a minor, and the estates of Mary L. Poole, deceased, and Hazel S. Thomas, deceased.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and hereby is, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $10,000 to the legal guardian of Elizabeth Ann Mervine, a minor; to pay the sum of $5,000 to the estate of Mary L. Poole, deceased; and to pay the sum of $5,000 to the estate of Hazel S. Thomas, deceased, of Oklahoma City, Okla., in full settlement of all claims against the United States for personal injuries to Claude T. Thomas and Elizabeth Ann Mervine and for the deaths of Mary L. Poole and Hazel S. Thomas, sustained as the result of an accident involving a United States Army vehicle on December 26, 1944, near Seiling, Okla.: *Provided*, That no part of the amounts appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with these claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 5, strike out "$10,000" and the balance of page 1 down to and including the word "Oklahoma" on line 6, page 2, and insert the following: "$1,000 to Claude T. Thomas, of Oklahoma City, Okla.; the sum of $250 to the legal guardian of Elizabeth Ann Mervine, a minor, of Oklahoma City, Okla.; the sum of $5,000 to the estate of Mary L. Poole, deceased, of Fort Madison, Iowa; and the sum of $5,000 to the estate of Hazel S. Thomas, deceased, of Oklahoma City, Okla., in full settlement of all claims against the United States for personal injuries to Claude T. Thomas and Elizabeth Ann Mervine and for the deaths of Mary L. Poole and Hazel S. Thomas, all resulting from an accident involving a United States Army vehicle, near Seiling, Okla., on December 26, 1944."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ESTATE OF H. M. McCORVEY

The Clerk called the bill (H. R. 2806) for the relief of the estate of H. M. McCorvey.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the legal representative of the estate of H. M. McCorvey, deceased, late of Moultrie, Ga., the sum of $836.59. The payment of such sum shall be in full settlement of all claims of such estate against the United States on account of personal injuries, property damage, and loss of wages sustained by the said H. M. McCorvey as the result of a collision on April 16, 1944, between the automobile owned and operated by the said H. M. McCorvey and a United States Army truck approximately 1 mile from Spence Field near Moultrie, Ga.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

THOMAS D. SHERRARD

The Clerk called the bill (H. R. 3964) for the relief of Thomas D. Sherrard.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States is hereby authorized and directed to remove from the records of his office the debt which has been raised therein against Thomas D. Sherrard,

manager, Kennewick Farm Labor Supply Center, Kennewick, Wash., in the sum of $79.20, together with interest due thereon from date of loss of the public funds for which he is accountable and which were stolen from the office of the Kennewick Farm Labor Supply Center, Kennewick, Wash., without his fault, sometime between May 26, 1943, and May 27, 1943.

SEC. 2. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $45.20 to be paid by the Secretary of the Treasury to Thomas D. Sherrard: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, notwithstanding any contract to the contrary. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

J. L. HITT

The Clerk called the bill (H. R. 4246) for the relief of J. L. Hitt.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to J. L. Hitt, Murfreesboro, Tenn., the sum of $3,500. The payment of such sum shall be in full settlement of all claims of the said J. L. Hitt against the United States for personal injuries sustained by him in a collision between the automobile in which he was riding and a United States Army vehicle on August 7, 1944, on United States Highway No. 41, about 8 miles south of Murfreesboro, Tenn.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JESSE F. CANNON, JACKSON JONES, AND THE ESTATE OF JOHN HALSTADT

The Clerk called the bill (H. R. 4541) for the relief of Jesse F. Cannon, Jackson Jones, and the estate of John Halstadt.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Jesse F. Cannon, of Salt Lake City, Utah, the sum of $331.48; to Jackson Jones, of Dugway, Utah, the sum of $212; and to the estate of John Halstadt, of Salt Lake City, Utah, the sum of $212, in full satisfaction of their respective claims against the United States for compensation for loss of earnings sustained by them when they were required to suspend operation of the Yellow Jacket Mine, located near Tooele, Utah, as a result of the use of such mine, during the period from June 22 to July 22, 1945, by the Dugway Proving Ground, as a target site for conducting technical operations involving the use of chemical agents, incendiaries, and explosives: *Provided*, That no part of the amounts appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with these claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HERBERT L. HUNTER

The Clerk called the bill (H. R. 4569) for the relief of Herbert L. Hunter.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States is hereby authorized and directed to cancel the indebtedness of Herbert L. Hunter, in the amount of $944.46, arising out of the transportation of his household effects from Cleveland, Ohio, to San Juan, Puerto Rico, upon transfer of his official station, while employed by the Department of Agriculture, extension of authorization for such transportation not having been approved within the 6-month period required by the regulations of the President of the United States under authority of the act of October 10, 1940 (54 Stat. 1105). The Secretary of the Treasury is hereby authorized and directed to pay to Herbert L. Hunter out of any money in the Treasury not otherwise appropriated, any amount hereto credited to such indebtedness or refunded to the United States on account of such indebtedness. In the audit and settlement of the account of any accountable officer of the United States, the payment of the amount for such transportation expenses shall be considered to have been authorized.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HOWARD A. YEAGER

The Clerk called the bill (H. R. 4570) for the relief of Howard A. Yeager.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Howard A. Yeager, captain, United States Navy, the sum of $128.96. The payment of such sum shall be in full settlement of all claims against the United States of the said Howard A. Yeager as reimbursement for travel performed pursuant to official Navy Department orders of May 1, 1945, May 8, 1945, and June 9, 1945: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ABRAHAM SPEVAK

The Clerk called the bill (H. R. 4593) for the relief of Abraham Spevak.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to pay, from any money in the Treasury not otherwise appropriated, to Abraham Spevak, of Newburgh, N. Y., the sum of $2,000 in full settlement of all claims against the United States on account of personal injuries sustained and medical expenses incurred by him as a result of an accident which occurred on July 7, 1941, at Stony Point, N. Y., involving an Army vehicle: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not to exceed $1,000.

With the following committee amendment:

Page 1, line 6, strike out "$2,000" and insert in lieu thereof "$500."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOHN CAMERON HENRY

The Clerk called the bill (H. R. 4672) for the relief of John Cameron Henry.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to settle and adjust the claim of John Cameron Henry, formerly a private, United States Army, for payment of the amount due him incident to his service in the Canadian Army, which was paid to the United States by the Government of the Dominion of Canada October 30, 1942, for his credit but which was erroneously paid by the United States finance officer to another individual of a similar name, and to allow in full and final settlement of the claim not to exceed $416.14. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $416.14, or so much thereof as may be necessary, for the payment of the claim.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MIRIAM BARKLE

The Clerk called the bill (H. R. 2803) for the relief of Miriam Barkle.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Miriam Barkle, Pacific Grove, Calif., the sum of $5,450.50. The payment of such sum shall be in full settlement of all claims of the said Miriam Barkle against the United States on account of personal injuries sustained on February 10, 1933, when the automobile in which she was riding was in collision with a United States Coast and Geo-

detic Survey truck on Del Monte Avenue in Monterey County: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING THE PROMOTION OF JAMES Y. PARKER

The Clerk called the bill (S. 1673) to authorize the promotion of James Y. Parker, Army serial No. O20712, as major, Army of the United States, as of March 1, 1942, under the act of February 16, 1942 (56 Stat. 94), and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the President is authorized and requested to appoint James Y. Parker, Army serial No. O20712, to the temporary grade of major in the Army of the United States under the act of February 16, 1942 (56 Stat. 94), with date of rank as of March 1, 1942. The Secretary of War is authorized and directed to carry such officer upon such appointment on the records of the War Department and of the Army as having served in the grade of major from March 1, 1942, to the date of his subsequent appointment to the temporary grade of lieutenant colonel in the Army of the United States.

SEC. 2. Nothing herein contained shall be construed as authorizing additional pay and allowances to the aforesaid James Y. Parker: *Provided*, That all payments of moneys heretofore made to such officer on the assumption of a previous legal appointment to the grade of major are hereby validated.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

YONEO SAKAI

The Clerk called the bill (S. 257) for the relief of Yoneo Sakai.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in the administration of the immigration and naturalization laws, the Attorney General is authorized and directed to record Yoneo Sakai as having entered the United States on October 10, 1926, for permanent residence. The said Yoneo Sakai shall not be subject to deportation by reason of such entry.

SEC. 2. The Attorney General is authorized and directed to cancel any warrants of arrest or orders of deportation which may have been issued, and to discontinue any deportation proceedings which may have been commenced, in the case of said Yoneo Sakai.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. HILDA MARGARET McGREW

The Clerk called the bill (S. 305) for the relief of Mrs. Hilda Margaret McGrew.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is authorized and directed to cancel forthwith the outstanding order and warrant of deportation issued pursuant to sections 19 and 20 of the Immigration Act of February 5, 1917 (U. S. C., title 8, secs. 155 and 156), in the case of Mrs. Hilda Margaret McGrew, any provisions of existing law to the contrary notwithstanding. From and after the date of enactment of this act, Mrs. Hilda Margaret McGrew shall not again be subject to deportation by reason of the same facts upon which the outstanding proceedings rest.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARY SUNGDUK CHARR

The Clerk called the bill (S. 316) for the relief of Mary Sungduk Charr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provisions of the immigration laws, the Attorney General is authorized and directed to permit Mary Sungduk Charr, of Venice, Calif., the Korean wife of a United States citizen veteran of World War II and the mother of a child who is a citizen of the United States, to remain permanently in the United States.

SEC. 2. Notwithstanding any other provision of law, at any time within 1 year after the date of enactment of this act, the said Mary Sungduk Charr may be naturalized as a citizen of the United States by taking the naturalization oath of allegiance before any court having jurisdiction of the naturalization of aliens.

With the following committee amendment:

Page 1, beginning in line 9, strike out all of section 2.

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MILAN JANDRICH

The Clerk called the bill (S. 409) for the relief of Milan Jandrich.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in the administration of the immigration and naturalization laws, the Attorney General is authorized and directed to record Milan Jandrich as having entered the United States on October 5, 1945, for permanent residence.

Upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Yugoslavian quota of the first year that the Yugoslavian quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNA KONG MEI

The Clerk called the bill (S. 457) for the relief of Anna Kong Mei.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, the Attorney General is authorized and directed to record Anna Kong Mei as having entered the United States on July 7, 1937, for permanent residence.

SEC. 2. The Attorney General is authorized and directed to cancel any warrants of arrest or orders of deportation which may have been issued, and to discontinue any deportation proceedings which may have been commenced, in the case of the said Anna Kong Mei.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SANG HUN SHIM

The Clerk called the bill (S. 521) to permit the naturalization of Sang Hun Shim.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purpose of the immigration laws, Sang Hun Shim, Weston, Conn., shall be held and considered to have been legally admitted to the United States for permanent residen on June 18, 1926, upon payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of Sang Hun Shim upon the ground of unlawful residence in the United States.

SEC. 2. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Japanese immigration quota.

The bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act for the relief of Sang Hun Shim."

A motion to reconsider was laid on the table.

MRS. MARIA SMORCZEWSKA

The Clerk called the bill (H. R. 3787) for the relief of Mrs. Maria Smorczewska.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the Immigration and Naturalization laws the Attorney General is hereby authorized and directed to record for permanent residence the temporary admission of Mrs. Maria Smorczewska, which occurred at the port of New York on January 9, 1947. Upon the enactment of this act the Secretary of State shall make a quota deduction of one against the Polish quota for the current year or the first year in which that quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MOKE TCHAROUTCHEFF ET AL.

The Clerk called the bill (H. R. 4050) to record the lawful admission to the United States for permanent residence of Moke Tcharoutcheff, Mme. Lucie Baptistine Tcharoutcheff, and sons Raymond and Robert Tcharoutcheff.

Mr. DEANE. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER. That completes call of bills on the Private Calendar.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. HORAN (at the request of Mr. JONES of Washington), for the remainder of the week, on account of death of his mother.

DISPOSITION OF CONDEMNED ORDNANCE, GUNS, PROJECTILES, AND OTHER CONDEMNED MATERIAL

Mr. ANDERSON of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 774) to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 8, strike out "War and" and insert "the Army, the Secretary of the Air Force."

Page 2, line 19, strike out "War" and insert "the Army, the Secretary of the Air Force."

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. McCORMACK. Mr. Speaker, reserving the right to object, may I ask the gentleman to give a brief explanation of this matter?

Mr. ANDERSON of California. Mr. Speaker, I shall be delighted to give the gentleman a brief explanation.

This is a bill to amend an act which permits the various armed services of the Government to dispose of certain condemned ordnance materials and was introduced by the gentleman from Virginia [Mr. BLAND]. It was approved by the House of Representatives last year, amended by the Senate and passed this year, and this morning was reported unanimously by the House Committee on Armed Services.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

SPECIAL ORDER

The SPEAKER. Under previous special order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 30 minutes.

Mr. ARENDS. Mr. Speaker, the gentleman from Massachusetts [Mr. HESELTON] has been called into a committee session. I ask unanimous consent that he may be permitted to extend his remarks at this point in the RECORD and include certain tables and tabulations.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. HESELTON. Mr. Speaker, I want my colleagues tomorrow morning to have before them the facts as they developed today, for their individual consideration. I am glad to state that at the conclusion of the executive session I took pains to urge one of the men who had been with us to consider a 48-hour embargo, very seriously, because I was in dead earnest in suggesting it. And if it was not done by 5 o'clock tonight I was going to take the liberty of asking my chairman to consider the wisdom of a third formal resolution, as a means of expressing our best judgment as to what should be done promptly. As in this emergency situation and in need of the facts, as disclosed to the committee approximately at noon, I was advised that some officer of the State Department wished to consult with us further. He came to the committee room, authorized me to release the gallonage figures, gave me excellent reason for his hesitation in acting on his own responsibility and took certain material with him for return by 9 p. m., if possible. He was most courteous and cooperative.

Perhaps this is all just as well in view of what I understand to have been the incidence at the Department of Commerce this afternoon. I placed my statements upon my own knowledge and what was told me by reliable informants. Before leaving the committee room I talked over the telephone with Mr. Thomas C. Blaisdell, director of OIT. My recollection is that he told me I could not anticipate that my suggestion of a 48-hour embargo would be carried out. I replied that I thought that was a most unfortunate decision and was simply forcing me to express my own personal conviction that the Department had been derelict in not acting promptly on the information he knew and I knew had been in the Department's hands for several days in some instances. Upon my arrival at my office one of the news services was on the telephone. I was asked what I knew about any 48-hour embargo ordered earlier in the afternoon. I stated I knew nothing about it, and was surprised to hear of it in view of the conversation I had had over the telephone with Mr. Blaisdell approximately 10 minutes before that time. They then put me on with the man who had handled the story who advised me that it was a fact that a 48-hour embargo had been ordered on the Gulf coast. I do not recall whether it extended to the west coast. He said that within a very short time another officer in the Department explained that this order had been rescinded. Shortly after 6 o'clock, and in any event before 7 p. m., the service called me to advise me that a 48-hour embargo had been ordered, with some limitation as to dock side loadings and perhaps other limitations.

I apologize for lack of full details. I will try to obtain them tomorrow for a report to the House on Friday. In any event apparently we can be thankful for this order tonight, and can be hopeful that it will stay in effect until Friday night. In the meantime, I shall try to gather the known facts on the Gulf coast as to loadings through industry. Perhaps some of our colleagues in that area have means of helping us. I shall also try to enlist the aid of members of the press for a spot-check tomorrow.

I am glad to report on certain material furnished from the State Department, as follows:

REDUCTIONS IN OIL ALLOCATIONS

Cables worded as follows were sent on February 6, 1948, to embassies or consuls at Shanghai, Manila, Lisbon, Copenhagen, Wellington, Brussels, The Hague, Rome, Rio de Janeiro, Reykjavik (Iceland), Dublin, Lagos (Nigeria), Melbourne, London, Bern, San Jose, Stockholm, Paris, Dakar, Oslo, Habana, Guatemala City, Tegucigalpa, Mexico City, Asuncion, San Salvador, Panama City, Accra, Belize, and Tahiti.

Following from Commerce:

"Adverse weather conditions and abnormally low stocks have aggravated critical shortages of all petroleum heating fuels throughout large areas of the United States.

"The seriousness of these shortages has led the Department of Commerce to reduce first-quarter export allocations, effective January 30, 1948, as follows"—

Here appeared list of allocations to the country addressed.

"In addition, the separate quota of 1,600,000 barrels of gas oil and distillate fuel oil established for Japan and Ryukyus has been reduced to 100,000 barrels. Such reductions have resulted in the following modifications of country allocations."

Here appeared modified allocations to country addressed.

"Concern is also increasing regarding diminishing United States stocks of aviation gasoline and motor gasoline. The course of events may shortly necessitate revisions of these allocations also. In the light of the revised first-quarter allocations and continuing critical United States shortages of petroleum heating oils and aviation gasoline and motor gasoline, the consulate is requested to consult immediately with representatives of the Chinese Government to determine what further reductions in the revised first-quarter petroleum allocations to China can be achieved without probable serious economic disruption.[1]

"It is urgent that OIT receive your reply not later than Wednesday, February 11, 1948.

"MARSHALL.

"J. M. GEORGE,
"IT-1310-DJWheeler/V6W,
"February 6, 1948."

By February 17 replies had been received from London, Buenos Aires, Paris, Shanghai, Habana, Guatemala City, Bern, Rome, Copenhagen, San Jose, Tegucigalpa, Mexico City, Reykjavik, Asuncion, San Salvador, Oslo, Wellington, Panama City, Lagos, Accra, Belize, Brussels, Rio de Janeiro, Manila, Tahiti, Melbourne, Dublin, Dakar, The Hague.

The following reductions were indicated as possible:

Motor gasoline:	
Barrels	668,904
Gallons	28,094,000
Kerosene:	
Barrels	132,000
Gallons	5,544,000
Gas, oil, and distillate fuel oil:	
Barrels	213,443
Gallons	8,963,606
Residual fuel oil:	
Barrels	166,189
Gallons	6,919,938
Aviation gas:	
Barrels	17,500
Gallons	735,000

[1] Information urgently required as to detail of essential end uses of petroleum from United States in China and the effect on the economy of the January 30 cuts and of possible further reductions.

From: London.
To: Secretary of State.
No: —, February 13.
United States urgent.
For commerce.

(1) Ministry fuel power agrees accept further net reduction of first quarter petroleum import requirements of 260,000 barrels, a 10-percent reduction from revised quota of 2,600,000 barrels, including aviation spirit. Ministry says willingness to accept further cut does not mean similar reductions can be made in future import requirements without having most serious effect upon British national economy. It may, in fact, be necessary to request increase in subsequent quotas to make good loss in current quarter.

(2) Reductions break down as follows:

(A) Motor spirit: reduction of 450,000 barrels. British say can only accept this cut if no restrictions on export of 510,000 barrels casinghead gasoline programed for lifting during present quarter by Shell.

(B) Kerosenes: reduction 80,000 barrels. Eliminates British export quota during quarter.

(C) Gas oil: British cannot agree to any reduction.

(D) Fuel oil: quota already nil.

(E) Aviation spirit: British asking increase of 270,000 barrels over quota of 120,000 barrels to replenish stocks which have been falling for some months.

(3) End uses of petroleum products:

(A) Aviation spirit: Military and commercial flying, including flying clubs.

(B) Motor spirit: Commercial vehicles, busses, taxies, tractors, stationary engines, and essential private motoring. No pleasure motoring permitted.

(C) Kerosene.

(I) Burning oil: Mainly used for heating, lighting, and cooking; allocated under priority system to essential users. Also used for agriculture, including incubators, industry, and aircraft jet engines.

(II) Vaporizing oil: Mainly farm tractors, balance industry and small fishing boats.

(D) Gas oil: Not used as a domestic fuel in Britain. Used for industry and bunkers, and in Diesel-powered vehicles. Industrial uses comprise:

(I) Auxiliary Diesel generating equipment to relieve excessive grid load. Most important during winter quarter.

(II) Small supplies as direct fuel in industrial power production.

(III) For carbureted water gas at gas works.

Requirements for Diesel-engined vehicles have already been cut to minimum on grounds dollar economy. No scope for further reduction as owing to shortage of rail transport, large-scale diversion of traffic from rail to road may become imperative during next few months. Minor uses gas oil for small fishing craft, barges, agriculture, and Diesel locomotives.

GALLMAN.

From: Wellington.
To: Secretary of State.
No.: — February 11.
Immediate.

Government view with much concern any suggestion reduction allocations, stating original approved quotas were calculated to barest minimum essential needs in view dollar shortage for maintenance country's economy and achievement expanded food production target. Minister Industries Commerce expresses hope utmost consideration will be given representations made, stated essential end uses petroleum from United States aviation gasoline principally air force, also maintenance urgent air transportation and mail carriage to island territories. Other motor gasoline increased number heavy trucks in essential operations, business, farmers, and other vehicles employed in food and other highly essential production (consume substantial percentage). Other essential transport services including railway department road services now relieving rail carriage hampered by rolling stock and coal shortages. Kerosene, agricultural tractors, industry, and lighting some rural areas, gas and distillate fuel (Diesel) oils used principally in primary industry, processing tractors, heavy farm machinery and manufacturing. Industrial Diesel oil substantially directed to minimum bunker requirements shipping for moving vessels to next port New Zealand almost entirely dependent on United States for requirements lubricating oil.

SERVICE.

To: Secretary of State.
No. —, February 10.
For Commerce.

Further cuts in allocations for Australia first quarter 1948 possible as follows (unit barrels) schedule B number description amounts: 501,700 other motor gasoline from 300,000 to 100,000; 502,700 kerosene from 50,000 to zero; 503,000 gas-oil and distillate fuel oil from 100,000 to 75,000; 503,100 residual fuel oil from 25,000 to zero.

These cuts based on actual imports schedule for rest of February and March, which will not exhaust allocations but should not be considered as applicable to subsequent quarters when maximum amounts allocated from United States may be needed. Australian Government obtaining all possible supplies from sterling areas, particularly Persian Gulf, and in view dollars shortage maintaining imports from United States at strictest minimum. Monthly consumption motor gasoline would be 39,500,000 gallons without rationing consumption reduced by rationing about 25 percent to 30,000,000 gallons. Reduction in motor gasoline imports would first affect pleasure driving now permitted at rate 200 miles per month per car. Gas-oil and distillate fuel oil imports could not be reduced without detriment to Australian manufacturing and industrial establishments, which use 89 percent of total imports of this product.

HUNT.

EXTENSION OF REMARKS

Mr. ARNOLD asked and was given permission to extend his remarks in the RECORD and include an editorial.

ENROLLED BILL SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 2029. An act to provide for the free importation of synthetic-rubber scrap.

ADJOURNMENT

Mr. ARENDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 37 minutes p. m.), under its previous order, the House adjourned until Thursday, February 19, 1948, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mrs. ROGERS of Massachusetts: Committee on Veterans' Affairs. House Report No. 1271 (pt. II). Supplemental report to accompany H. R. 4478. A bill to provide basic authority for certain administrative expenditures for the Veterans' Administration, and for other purposes; without amendment. Referred to the Committee of the Whole House on the State of the Union.

Mr. COLE of New York: Joint Committee on Atomic Energy. House Report No. 1290 (pt. II). Supplemental report to accompany H. R. 5216. A bill to amend the Atomic Energy Act of 1946 so as to provide that no person shall take office as a member of the Atomic Energy Commission or as General Manager of such Commission until an investigation with respect to the character, associations, and loyalty of such person shall have been made by the Federal Bureau of Investigation; without amendment. Referred to the Committee of the Whole House on the State of the Union.

Mr. BISHOP: Joint Committee on the Disposition of Executive Papers. House Report No. 1378. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. WOLCOTT: Committee on Banking and Currency. H. R. 5390. A bill to continue for a temporary period certain provisions of the Housing and Rent Act of 1947; without amendment (Rept. No. 1402). Referred to the Committee of the Whole House on the State of the Union.

Mr. WOLCOTT: Committee on Banking and Currency. H. R. 5391. A bill to continue for a temporary period certain powers, authority, and discretion conferred on the President by the Second Decontrol Act of 1947; without amendment (Rept. No. 1403). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. REEVES: Committee on the Judiciary. S. 535. An act for the relief of Adelbert E. Tuller; without amendment (Rept. No. 1379). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 641. An act for the relief of Mrs. Roberta Flake Clayton; without amendment (Rept. No. 1380). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 922. An act for the relief of Ruth Grossman; without amendment (Rept. No. 1381). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 939. An act for the relief of Charles Howard Richards; without amendment (Rept. No. 1382). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 970. An act for the relief of Mr. and Mrs. Harold T. Prosser; without amendment (Rept. No. 1383). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 1031. An act for the relief of Antonio Zamora; Mrs. Antonio Zamora; Antonio Zamora, Jr.; Mrs. Juan Chavez; John Chavez, Jr.; Roland Chavez; Selso Trujillo; Dr. M. G. Wright; and the heirs of Keith Lane; without amendment (Rept. No. 1384). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 1267. An act for the relief of Eleonore M. Hannon; without amendment (Rept. No. 1385). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 1716. An act for the relief of Mrs. Iola Veach; without amendment (Rept. No. 1386).

Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. S. 1721. An act conferring jurisdiction upon the United States District Court for the Western District of Washington to hear, determine, and render judgment upon any claim arising out of injuries sustained by G. R. Below, late of Seattle, Wash.; without amendment (Rept. No. 1387). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 550. A bill for the relief of Lizzie Reynolds, administratrix of the estate of Grace Reynolds, deceased; with an amendment (Rept. No. 1388). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. H. R. 911. A bill for the relief of Kam Fong Chun, Mr. and Mrs. Jose Dias, Joseph De Souza, Mr. and Mrs. Kenneth Ayres, and Jose Oducado; with amendments (Rept. No. 1389). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. H. R. 912. A bill for the relief of Hiro Higa and Kana Higa; with amendments (Rept. No. 1390). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. H. R. 1088. A bill for the relief of Mary Jane Harris; without amendment (Rept. No. 1391). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 1222. A bill for the relief of Mr. and Mrs. M. C. Lewis; with an amendment (Rept. No. 1392). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 2070. A bill for the relief of B. John Hanson; without amendment (Rept. No. 1393). Referred to the Committee of the Whole House.

Mr. JENNINGS: Commitee on the Judiciary. H. R. 2684. A bill for the relief of sundry fruit growers of the State of Delaware who sustained losses as the result of the fumigation of apples with methyl bromide in order to comply with the requirements of the United States Department of Agriculture relating to the Japanese-beetle quarantine; without amendment (Rept. No. 1394). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 2698. A bill to provide for an appeal to the Supreme Court of the United States from the decision of the Court of Claims in a suit instituted by the Mount Vernon, Alexandria & Washington Railway Co.; without amendment (Rept. No. 1395). Referred to the Committee of the Whole House.

Mr. REEVES: Committee on the Judiciary. H. R. 2734. A bill for the relief of Joseph M. Henry; with amendments (Rept. No. 1396). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 2919. A bill for the relief of Ray G. Schneyer and Dorothy J. Schneyer; with amendments (Rept. No. 1397). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 3027. A bill for the relief of Gertrude O. Yerxa, Mrs. G. Olive Yerxa, and Dr. Charles W. Yerxa; with an amendment (Rept. No. 1398). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 3641. A bill for the relief of Mrs. Helen E. Scofield; with an amendment (Rept. No. 1399). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 4129. A bill for the relief of Jerline Floyd Givens and the legal guardian of William Earl Searight, a minor; with amendments (Rept. No. 1400). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 4571. A bill for the relief of Carl R. Nall; with amendments (Rept. No. 1401). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. POTTER:

H. R. 5432. A bill to amend the Veterans' Preference Act of 1944 with respect to the priority rights of veterans entitled to 10-point preference under such act; to the Committee on Post Office and Civil Service.

By Mr. ANGELL:

H. R. 5433. A bill to transfer jurisdiction over certain school buildings in Vanport, Oreg., to the Federal Works Administrator and to authorize an appropriation to rebuild a school building in Vanport, Oreg., which was destroyed by fire; to the Committee on Banking and Currency.

By Mr. CHELF:

H. R. 5434. A bill authorizing the Attorney General of the United States to recognize and to award to outstanding courageous young Americans a medal for heroism known as the Young American Medal for Bravery, and for other purposes; to the Committee on the Judiciary.

By Mr. EVINS:

H. R. 5435. A bill to provide for the construction of a post office at Lynchburg, Tenn.; to the Committee on Public Works.

H. R. 5436. A bill to provide for the construction of a post office at Cowan, Tenn.; to the Committee on Public Works.

H. R. 5437. A bill to provide for the construction of a post office at Manchester, Tenn.; to the Committee on Public Works.

H. R. 5438. A bill to provide for the construction of a post office at Woodbury, Tenn.; to the Committee on Public Works.

H. R. 5439. A bill to provide for the construction of a post office at Smithville, Tenn.; to the Committee on Public Works.

H. R. 5440. A bill to provide for the construction of a post office at Sewanee, Tenn.; to the Committee on Public Works.

By Mr. JONES of Washington:

H. R. 5441. A bill to provide that veterans pursuing courses of education or training shall have the same rights to change their courses as are enjoyed by nonveterans; to the Committee on Veterans' Affairs.

H. R. 5442. A bill to provide that the standards for judging the conduct of veterans undergoing vocational rehabilitation shall be prescribed by the institutions concerned rather than by the Administrator of Veterans' Affairs, and for other purposes; to the Committee on Veterans' Affairs.

H. R. 5443. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

H. R. 5444. A bill to establish a procedure for the appointment of postmasters at post offices of the first, second, and third classes; to the Committee on Post Office and Civil Service.

H. R. 5445. A bill to amend the act of July 6, 1945, as amended, relating to the classification and compensation of employees of the postal service, so as to place rural carriers operating from first-class post offices on a 40-hour week; to the Committee on Post Office and Civil Service.

By Mr. MUHLENBERG:

H. R. 5446. A bill to enable States and their agencies and political subdivisions to plan for the construction of public works; to the Committee on Public Works.

By Mr. POTTS:

H. R. 5447. A bill to amend the Housing and Rent Act of 1947 to give tenants a cause of action where landlords secure permission to evict by misrepresenting their intentions; to the Committee on Banking and Currency.

By Mr. REED of New York:

H. R. 5448. A bill to amend sections 212 (b) and 231 (d) of the Internal Revenue Code; to the Committee on Ways and Means.

H. Res. 469. Resolution authorizing the printing of additional copies of House Report No. 1274 for the use of the Committee on Ways and Means; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLAND:

H. R. 5449. A bill for the relief of Mrs. Lucille Davidson; to the Committee on the Judiciary.

By Mr. CHADWICK:

H. R. 5450. A bill for the relief of Tacouhi Haladjian, Gulunia Haladjian, Virginie Haladjian, and Kirocor Haladjian; to the Committee on the Judiciary.

By Mr. GARMATZ:

H. R. 5451. A bill for the relief of Louisa B. Sank; to the Committee on the District of Columbia.

By Mr. McGARVEY:

H. R. 5452. A bill to provide for the extension of certain patents which were not fully utilized due to emergency conditions existing during World War II; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1362. By Mr. GWYNNE of Iowa: Petition of Mrs. Bert Davidson, of Grundy Center, Iowa, relating to S. 265; to the Committee on Interstate and Foreign Commerce.

1363. By Mr. ANDREWS of New York: Resolution adopted by the Association of New York State Young Republican Clubs, Inc., favoring the enactment of the European recovery plan; to the Committee on Foreign Affairs.

1364. By Mr. BRADLEY: Petition of 13 members of the American Legion Auxiliary, Clearwater, Calif., urging that legislation establishing a system of universal military training be enacted; to the Committee on Armed Services.

1365. By Mr. TOWE: Petition of George F. Axt, commander of Englewood Post, No. 78, American Legion, and 70 others, favoring a system of universal military training; to the Committee on Armed Services.

1366. Also, petition of Raymond A. Leonard, of Elizabeth, N. J., and 27 other residents of New Jersey, all in favor of a system of universal military training, and petition of 33 members of the American Legion Auxiliary, Guttenberg, N. J., also favoring a system of universal military training; to the Committee on Armed Services.

1367. By the SPEAKER: Petition of Robert S. Speigel and others, petitioning consideration of their resolution with reference to the universal-military-training bill, so that it may be brought up on the floor for debate; to the Committee on Rules.

SENATE

WEDNESDAY, FEBRUARY 18, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Rev. Christopher J. Berlo, C. P., chaplain, United States Army, offered the following prayer:

Almighty and everlasting God, author of all wisdom and dispenser of knowledge, deign to bestow upon the Members of this august assemblage, the elected representatives of a free and God-fearing people, the gifts of understanding and discernment, so that under the inspiration of Thy divine guidance their deliberations may be characterized by truth, tempered by charity, and guided by prudence.

Heavenly Father, from whom all blessings flow, we ask Thee to inspire both the leaders and the people of our great country with a deep and lasting appreciation of our divinely bestowed inalienable rights, with a firm and self-sacrificing resolve to preserve for our future generations, in all their pristine strength and vigor, those safeguards and guaranties of these rights, which were conceived in liberty and brought forth in unselfish patriotism by the founding fathers of our Constitution.

Grant that all the families of nations now torn asunder by the wounds of war, sin, and strife may know Thy truth, following it by a worthy life, and place themselves under Thy most gentle rule. In Thy mercy we beseech Thee, O Lord, from all guilt absolve us and from all evil deliver us. Amen.

THE JOURNAL

On request of Mr. TAFT, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, February 17, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 257. An act for the relief of Yoneo Sakai;

S. 305. An act for the relief of Mrs. Hilda Margaret McGrew;

S. 310. An act authorizing the issuance of a patent in fee to Jonah Williams;

S. 311. An act authorizing the issuance of a patent in fee to Charles Ghost Bear, Sr.;

S. 312. An act authorizing the issuance of a patent in fee to Charles Kills the Enemy;

S. 313. An act authorizing the issuance of a patent in fee to Calvin W. Clincher;

S. 409. An act for the relief of Milan Jandrich;

S. 457. An act for the relief of Anna Kong Mei;

S. 499. An act authorizing the issuance of a patent in fee to Mrs. Bessie Two Elk-Poor Bear;

S. 542. An act authorizing the issuance of a patent in fee to Mrs. Ella White Bull; and

S. 1673. An act to authorize the promotion of James Y. Parker, Army serial No. O20712, as major, Army of the United States, as of March 1, 1942, under the act of February 16, 1942 (56 Stat. 94), and for other purposes.

The message also announced that the House had passed the following bills of the Senate, severally, with an amendment in which it requested the concurrence of the Senate:

S. 316. An act for the relief of Mary Sungduk Charr;

S. 402. An act to authorize and direct the Secretary of the Interior to issue to James Black Dog a patent in fee to certain land;

S. 500. An act authorizing the issuance of a patent in fee to Tom Eagleman; and

S. 521. An act to permit the naturalization of Sang Hun Shim.

The message further announced that the House had agreed to the amendments of the Senate to the bill (H. R. 774) to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective Departments.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 1392. An act for the relief of Mrs. Charlotte E. Harvey;

H. R. 1667. An act for the relief of the estate of T. L. Morris;

H. R. 1786. An act for the relief of Jesse A. Lott;

H. R. 2013. An act for the relief of Mrs. Sirvart Arsenian;

H. R. 2633. An act for the relief of Claude T. Thomas, legal guardian of Elizabeth Ann Mervine, a minor, and the estates of Mary L. Poole, deceased, and Hazel S. Thomas, deceased;

H. R. 2803. An act for the relief of Miriam Barkle;

H. R. 2806. An act for the relief of the estate of H. M. McCorvey;

H. R. 3787. An act for the relief of Mrs. Maria Smorczewska;

H. R. 3964. An act for the relief of Thomas D. Sherrard;

H. R. 4118. An act to confirm title in fee simple in Thomas Loflin to certain lands in Rankin County, Miss.;

H. R. 4246. An act for the relief of J. L. Hitt;

H. R 4541. An act for the relief of Jesse F. Cannon, Jackson Jones, and the estate of John Halstadt;

H. R. 4569. An act for the relief of Herbert L. Hunter;

H. R. 4570. An act for the relief of Howard A. Yeager;

H. R. 4593. An act for the relief of Abraham Spevak; and

H. R. 4672. An act for the relief of John Cameron Henry.

AID TO CHINA—MESSAGE FROM THE PRESIDENT (S. DOC. NO. 120)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read by the Chief Clerk, referred to the Committee on Foreign Relations, and ordered to be printed:

To the Congress of the United States:

On several occasions I have stated that a primary objective of the United States is to bring about, throughout the world, the conditions of a just and lasting peace. This is a cause to which the American people are deeply devoted.

Since VJ-day we have expended great effort and large sums of money on the relief and rehabilitation of war-torn countries to aid in restoring workable economic systems which are essential to the maintenance of peace. A principle which has guided our efforts to assist these war-torn countries has been that of helping their peoples to help themselves. The Congress is now giving careful consideration to a most vital and far-reaching proposal to further this purpose—the program for aid to European recovery.

I now request the Congress to consider the type of further assistance which this country should provide to China.

A genuine friendship has existed between the American people and the people of China over many years. This friendship has been accompanied by a long record of commercial and cultural association and close cooperation between our two countries. Americans have developed a deep respect for the Chinese people and sympathy for the many trials and difficulties which they have endured.

The United States has long recognized the importance of a stable Chinese nation to lasting peace in the Pacific and the entire world. The vast size and population of China make her an important factor in world affairs. China is a land with rich tradition and culture and a large and energetic population. It has always been our desire to see a strong progressive China making a full contribution to the strength of the family of nations.

With this end in view, we have supported the National Government of China since it first came to power 20 years ago. China and the United States were allies in the war against Japan and as an ally we supported China's valiant war efforts against the Japanese. Since the Japanese surrender we have provided a great deal of additional assistance. Military aid was given the Chinese Government not only to help defeat the Japanese invaders but also to assist in reoccupying Japanese-held areas. The United States contributed the major share of the extensive aid received by China under the program of the United Nations Relief and Rehabilitation Administration. We made available to the Chinese Government at minimum cost large quantities of surplus goods and equipment of value to China's economy. We are currently extending further aid to China under our foreign relief program.

Nevertheless, the Chinese Government and people are still laboring under the double and interrelated burden of civil war and a rapidly deteriorating economy.

The strains placed upon the country by 8 years of war, and the Japanese occupation and blockade have been increased by internal strife at the very time that reconstruction efforts should be under way. The wartime damage to transport and productive facilities has been greatly accentuated by the continued obstruction and destruction of vital communications by the Communist forces.

The civil warfare has further impeded recovery by forcing upon the Government heavy expenditures which greatly exceed revenues. Continual issuances of currency to meet these expenditures have produced drastic inflation with its attendant disruption of normal commercial operations. Under these circumstances China's foreign exchange holdings have been so reduced that it will soon be impossible for China to meet the cost of essential imports. Without such imports, industrial activity would diminish and the rate of economic deterioration would be sharply increased.

The continued deterioration of the Chinese economy is a source of deep concern to the United States. Ever since the return of General Marshall from China, the problem of assistance to the Chinese has been under continuous study. We have hoped for conditions in China that would make possible the effective and constructive use of American assistance in reconstruction and rehabilitation. Conditions have not developed as we had hoped and we can only do what is feasible under circumstances as they exist.

We can assist in retarding the current economic deterioration and thus give the Chinese Government a further opportunity to initiate the measures necessary to the establishment of more stable economic conditions. But it is and has been clear that only the Chinese Government itself can undertake the vital measures necessary to provide the framework within which efforts toward peace and true economic recovery may be effective.

In determining the character and dimensions of the program which might be suited to this purpose, we have had to take into account a number of diverse and conflicting factors, including the other demands on our national resources at this time, the availability of specific commodities, the dimensions and complexities of the problems facing the Chinese Government, and the extent to which these problems could be promptly and effectively alleviated by foreign aid. United States assistance to China, like that provided to any other nation, must be adapted to its particular requirements and capacities.

In the light of these factors, I recommend that the Congress authorize a program for aid to China in the amount of $570,000,000 to provide assistance until June 30, 1949.

The program should make provision for the financing, through loans or grants, of essential imports into China in the amount of $510,000,000. This estimate is based upon prices as of January 1, 1948, since it is impossible at present to predict what effect current price changes may have on the program. Revised dollar estimates can be presented in connection with the request for appropriations if necessary. The essential imports include cereals, cotton, petroleum, fertilizer, tobacco, pharmaceuticals, coal, and repair parts for existing capital equipment. The quantities provided for under this program are within the limits of available supplies. The financing of these essential commodity imports by the United States would permit the Chinese Government to devote its limited dollar resources to the most urgent of its other needs.

The program should also provide $60,000,000 for a few selected reconstruction projects to be initiated prior to June 30, 1949. There is an urgent need for the restoration of essential transportation facilities, fuel, and power operations, and export industries. This work could be undertaken in areas sheltered from military operations and could help in improving the supply and distribution of essential commodities.

As in the case of aid to European recovery, the conduct of this program of aid should be made subject to an agreement between China and the United States setting forth the conditions and procedures for administering the aid. The agreement should include assurances that the Chinese Government will take such economic, financial, and other measures as are practicable, looking toward the ultimate goal of economic stability and recovery. The United States would, of course, reserve the right to terminate aid if it is determined that the assistance provided is not being handled in accordance with the agreement or that the policies of the Chinese Government are inconsistent with the objective of using the aid to help achieve a self-supporting economy.

Pending establishment of the agency which is to be set up for the administration of the European-recovery program, the assistance to China should be carried forward under the existing machinery now administering the foreign-relief programs. Legislation authorizing the Chinese program should make possible transfer of the administration of the Chinese program to the agency administering our aid to European recovery. The need for authority in the administering agency to make adjustments in the program from time to time will be as great here as in the European-recovery program.

The proposed program of aid to China represents what I believe to be the best course this Government can follow in the light of all the circumstances. Nothing which this country provides by way of assistance can, even in a small measure, be a substitute for the necessary action that can be taken only by the Chinese Government. Yet this program can accomplish the important purpose of giving the Chinese Government a respite from rapid economic deterioration during which it can move to establish more stable economic conditions. Without this respite the ability of the Chinese Government to establish such conditions at all would be doubtful. The achievement of even this limited objective is of such importance as to justify the proposed program of aid.

I recommend, therefore, that this program be given prompt and favorable consideration by the Congress.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 18, 1948.*

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

PROFESSIONAL AND SCIENTIFIC SERVICE IN WAR AND NAVY DEPARTMENTS

A letter from the Acting Secretary of War, reporting, pursuant to law, that no position had actually been filled in the professional and scientific service in the War and Navy Departments; to the Committee on Post Office and Civil Service.

DONATIONS BY NAVY DEPARTMENT TO NONPROFIT INSTITUTIONS AND ORGANIZATIONS

A letter from the Acting Secretary of the Navy, reporting, pursuant to law, a list of institutions and organizations, all nonprofit and eligible, which have requested donations from the Navy Department; to the Committee on Armed Services.

MEMBER OF DISTRICT OF COLUMBIA REDEVELOPMENT LAND AGENCY

A letter from the Commissioners of the District of Columbia, submitting, pursuant to law, the nomination of Richard R. Atkinson for reappointment as a member of the District of Columbia Redevelopment Land Agency, for a term of 5 years, effective on and after March 4, 1948; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. REED, from the Committee on Interstate and Foreign Commerce:

H. R. 2298. A bill to amend the Interstate Commerce Act, as amended, and for other purposes; with an amendment (Rept. No. 897).

By Mr. KILGORE, from the Committee on Armed Services:

S. 1107. A bill to amend section 2 of the joint resolution approved November 17, 1941 (55 Stat. 764), relating to the arming of American vessels; with amendments (Rept. No. 892).

By Mr. MORSE, from the Committee on Armed Services:

S. 1571. A bill to promote the national defense by increasing the membership of the National Advisory Committee for Aeronautics; with amendments (Rept. No. 893).

By Mr. MAYBANK, from the Committee on Armed Services:

S. 1723. A bill to amend Public Law 168, Seventy-seventh Congress, first session, an act to authorize the course of instruction at the United States Naval Academy to be given to not exceeding 20 persons at a time from the American Republics, other than the United States; with amendments (Rept. No. 894).

By Mr. BALDWIN, from the Committee on Armed Services:

S. 1790. A bill to amend the act of Congress entitled "An act to credit certain service performed by members of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service prior to reaching 18 years of age for the purpose of computing longevity pay, or for other pay purposes," approved March 6, 1946; with an amendment (Rept. No. 895).

AUTHORITY TO REPORT RENT-CONTROL BILL DURING RECESS

Mr. TAFT asked and obtained leave for the Committee on Banking and Cur-

rency to report during the recess of the Senate on the rent-control extension bill.

Subsequently,

Mr. CAIN, from the Committee on Banking and Currency, reported an original bill (S. 2182) to extend certain provisions of the Housing and Rent Act of 1947, to provide for the termination of controls on maximum rents in areas and on housing accommodations where conditions justifying such controls no longer exist, and for other purposes, and submitted a report (No. 896) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BRIDGES:

S. 2177. A bill for the relief of Leon Moore; to the Committee on the Judiciary.

By Mr. MOORE (for himself and Mr. THOMAS of Oklahoma):

S. 2178. A bill for the relief of John David Logan; to the Committee on the Judiciary.

By Mr. KNOWLAND:

S. 2179. A bill for the relief of Maria Ruggeri; and

S. 2180. A bill for the relief of Elfriede Walther; to the Committee on the Judiciary.

S. 2181. A bill to ratify the administrative promotions of employees on military furlough from the field postal service, in certain cases, and for related purposes; to the Committee on Post Office and Civil Service.

(Mr. CAIN, from the Committee on Banking and Currency, reported an original bill (S. 2182) to extend certain provisions of the Housing and Rent Act of 1947, to provide for the termination of controls on maximum rents in areas and on housing accommodations where conditions justifying such controls no longer exist, which appears under a separate heading.)

REDUCTION OF INDIVIDUAL INCOME-TAX PAYMENTS—AMENDMENT

Mr. HOLLAND. Mr. President, I ask unanimous consent to submit for appropriate reference an amendment intended to be proposed by me to the bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes, and I request that an explanation of the amendment by me may be printed in the RECORD.

There being no objection, the amendment was received, referred to the Committee on Finance, and ordered to be printed; and, without objection, the explanatory statement submitted by Mr. HOLLAND was ordered to be printed in the RECORD, as follows:

EXPLANATION BY MR. HOLLAND OF PROPOSED AMENDMENT TO H. R. 4790

The purpose of my proposed amendment to the bill H. R. 4790 is to amend the chapter of the Internal Revenue Code relating to methods of collection of delinquent taxes so as (1) to increase the present exemption of household furniture from distraint and sale for the satisfaction of Federal taxes from the present limit of $300 to $1,000, (2) to exempt a homestead not exceeding $5,000 in value from seizure and sale for the satisfaction of Federal taxes, and (3) to exempt from the Federal tax lien the property which is exempt from distraint or seizure and sale for the satisfaction of Federal taxes.

Under the provisions of existing law (sec. 3670 of the Internal Revenue Code), a lien is imposed upon "all property and rights to property, whether real or personal" belonging to a person who is indebted to the United States for taxes. Section 3678 of the Internal Revenue Code provides for suits to enforce this lien against all property and rights to property, whether real or personal, of a delinquent taxpayer.

However, the most common way of subjecting the property of a delinquent taxpayer to the satisfaction of Federal taxes is by administrative procedure under subchapter (c) of chapter 36 of the code. In brief, this subchapter gives a collector the right to distrain and sell the personal property of a delinquent taxpayer, and in addition, a right to seize and sell the real property of a delinquent taxpayer if the tax cannot be satisfied out of personal property. The only property exempt from distraint and sale is enumerated in section 3691 (a) of the code, which reads as follows:

"SEC. 3691. Property exempt from distraint: (a) Enumeration.

"There shall be exempt from distraint and sale, if belonging to the head of a family—

"(1) School books and wearing apparel.

"The school books and wearing apparel necessary for such family, also.

"(2) Arms.

"Arms for personal use.

"(3) Livestock.

"One cow, five hogs, five sheep and the wool thereof, provided the aggregate market value of said sheep shall not exceed $50.

"(4) Fodder.

"The necessary food for such cow, hogs, and sheep, for a period not exceeding 30 days.

"(5) Fuel.

"Fuel to an amount not greater in value than $25.

"(6) Provisions.

"Provisions to an amount not greater than $50.

"(7) Household furniture.

"Household furniture kept for use to an amount not greater than $300; and

"(8) Books and tools of trade or profession.

"The books, tools, or implements, of a trade or profession, to an amount not greater than $100."

This subsection as incorporated into the code was taken from the act of July 1, 1862 (12 Stat. 440) as amended. At the present time there is no exemption at all of real property that may be seized and sold to satisfy Federal taxes.

The last substantial change in the law which is now section 3691 (a) of the code occurred in 1866. Obviously, there has been a great change in personal property values since that time which necessitates a revision of the laws relating to exemptions of property from sale for satisfaction of delinquent Federal taxes. And it must be remembered that in 1866 only a small percentage of the people of the country were directly liable to pay Federal taxes. It has only been since the enactment of the Federal income tax in 1913 that a large number of the people pay Federal taxes directly. These considerations also may account for the fact that there has never been any exemption of real property from sale to satisfy Federal taxes and at the same time point to the necessity for such an exemption at the present time.

When judicial proceedings are instituted to enforce the Federal tax lien, it appears to be uncertain whether the exemptions listed in section 3691 (a) are applicable. Likewise, it is not clear whether the laws of the States exempting homesteads and other property are applicable in the case of a judgment to enforce the lien for Federal taxes. However, it is clear that if administrative proceedings under subchapter (c) of chapter 36 are instituted to collect Federal taxes that the State laws exempting homestead and other property are not applicable.

Most of the States, in one way or another, exempt homesteads from seizure and sale for any reason (except to satisfy taxes levied directly on such homesteads). Certainly a homestead should be just as invulnerable from seizure for Federal taxes as it is from seizure for State taxes. And it should be protected whether the method of tax collection is judicial or administrative. Therefore, to provide uniformity as to the liability of the property of an individual for the satisfaction of Federal taxes, my amendment would provide that the Federal tax lien would not apply to the property of a delinquent taxpayer which is exempt from distraint or seizure and sale under administrative process.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated:

H. R. 1392. An act for the relief of Mrs. Charlotte E. Harvey;

H. R. 1667. An act for the relief of the estate of T. L. Morris;

H. R. 1786. An act for the relief of Jesse A. Lott;

H. R. 2013. An act for the relief of Mrs. Sirvart Arsenian;

H. R. 2633. An act for the relief of Claude T. Thomas, legal guardian of Elizabeth Ann Mervine, a minor, and the estates of Mary L. Poole, deceased, and Hazel S. Thomas, deceased;

H. R. 2803. An act for the relief of Miriam Barkle;

H. R. 2806. An act for the relief of the estate of H. M. McCorvey;

H. R. 3787. An act for the relief of Mrs. Maria Smorczewska;

H. R. 3964. An act for the relief of Thomas D. Sherrard;

H. R. 4246. An act for the relief of J. L. Hitt;

H. R. 4541. An act for the relief of Jesse F. Cannon, Jackson Jones, and the estate of John Halstadt;

H. R. 4569. An act for the relief of Herbert L. Hunter;

H. R. 4570. An act for the relief of Howard A. Yeager;

H. R. 4593. An act for the relief of Abraham Spevak; and

H. R. 4672. An act for the relief of John Cameron Henry; to the Committee on the Judiciary.

H. R. 4118. An act to confirm title in fee simple in Thomas Loflin to certain lands in Rankin County, Miss.; to the Committee on Interior and Insular Affairs.

FORWARD-LOOKING REPUBLICANISM—ADDRESS BY SENATOR LODGE

[Mr. LODGE asked and obtained leave to have printed in the RECORD an address on the subject Forward-Looking Republicanism, delivered by him in Charleston, W. Va., February 12, 1948, before the Republican clubs of West Virginia, which appears in the Appendix.]

LINCOLN DAY ADDRESS BY SENATOR MARTIN AT KANSAS CITY

[Mr. KEM asked and obtained leave to have printed in the RECORD a Lincoln birthday address delivered by Senator MARTIN at Kansas City, Mo., February 13, 1948, which appears in the Appendix.]

RADIO NETWORKS AS TOOLS OF PROPAGANDA—EDITORIAL FROM THE CHICAGO DAILY TRIBUNE

[Mr. KEM asked and obtained leave to have printed in the RECORD an editorial entitled "Radio Networks as Tools of Propaganda," from the Chicago Daily Tribune of February 9, 1948, which appears in the Appendix.]

LINCOLN DAY ADDRESS BY SENATOR MARTIN AT CHICAGO

[Mr. BROOKS asked and obtained leave to have printed in the RECORD an address delivered by Senator MARTIN at the Lincoln

Day dinner of the Illinois Republican State Central Committee, at Chicago, Ill., on February 10, 1948, which appears in the Appendix.]

QUARTERMASTER CORPS RESEARCH LABORATORY AT BOSTON—STATEMENT BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD a statement made by him before a subcommittee of the Senate Committee on Armed Services considering Senate bill 286, to establish the Quartermaster Corps Research Laboratory at or in the vicinity of Boston, Mass., which appears in the Appendix.]

WHAT LABOR EXPECTS OF MANAGEMENT—ADDRESS BY H. W. BROWN

[Mr. GREEN asked and obtained leave to have printed in the RECORD an address entitled "What Labor Expects of Management," delivered by H. W. Brown, president, International Association of Machinists, at a meeting of the American Management Association at Chicago, Ill., on February 18, 1948, which appears in the Appendix.]

HUMANITARIAN WORK OF DR. J. W. WITTEN—ARTICLE FROM THIS WEEK

[Mr. BYRD asked and obtained leave to have printed in the RECORD an article entitled "The Man With 150 Sons," written by Ralph Bass and published in This Week for February 15, 1948, which appears in the Appendix.]

AWARD BY VIRGINIA JUNIOR CHAMBER OF COMMERCE OF DISTINGUISHED SERVICE CITATION TO W. BROOKS GEORGE

[Mr. BYRD asked and obtained leave to have printed in the RECORD a press release relating to the nomination of Mr. W. Brooks George as the recipient of the Distinguished Service Award of the Virginia Junior Chamber of Commerce, which appears in the Appendix.]

ELECTION RETURNS FROM NEW YORK—ARTICLE FROM NEW YORK TIMES

[Mr. BREWSTER asked and obtained leave to have printed in the RECORD the election returns from New York, as published in the New York Times of February 18, 1948, which appear in the Appendix.]

CAPEHART'S WORLD RFC PLAN—EDITORIAL FROM THE INDIANAPOLIS STAR

[Mr. CAPEHART asked and obtained leave to have printed in the RECORD an editorial entitled "Capehart's World RFC Plan," published in the Indianapolis (Ind.) Star on Monday, February 9, 1948, which appears in the Appendix.]

MEETINGS OF COMMITTEES

Mr. TAFT asked and obtained consent that the Committee on Expenditures in the Executive Departments, and the Committee on Interior and Insular Affairs, be permitted to sit during the session of the Senate today.

Mr. TAFT (for Mr. DONNELL) asked and obtained consent that the subcommittee of the Committee on the Judiciary considering the Tamm nomination be permitted to sit during the session of the Senate today.

LEAVES OF ABSENCE

Mr. McFARLAND asked and obtained consent that Mr. MAGNUSON be excused from attendance on the Senate during the remainder of the present week and next week.

Mr. LUCAS asked and obtained consent that Mr. MAYBANK be excused from attendance on the sessions of the Senate until February 27.

Mr. LUCAS also asked and obtained consent that he be excused from attendance on the sessions of the Senate until February 25.

ANNIVERSARY OF INDEPENDENCE OF LITHUANIA

Mr. LUCAS. Mr. President, on Monday last, February 16, American citizens of Lithuanian origin celebrated the independence of the brave little country from which they came. For it was 30 years ago on February 16, 1918, that there was published in the city of Vilnius the Declaration of Lithuanian Independence. On that day Lithuania became a modern nation under a constitutional form of government.

On gaining her independence the people of this remarkable country, which has existed on the shores of the Baltic Sea for centuries, made remarkable progress. The standard of living of the people advanced rapidly. Until war came to the Baltic Sea and the North Sea, her foreign trade showed a steady gain. Lithuania had faced westward and sought to take for herself the advantage and benefits of our western form of civilization. The nation worked hard to restore her great natural wealth, her prestige, and position among the nations of the world.

But the feeling of pride which our Lithuanian fellow citizens take in the independence of their mother country is dimmed by the fact of Soviet domination. For it was on June 15, 1940, that her independence was temporarily crushed by Russian forces who today are still in control of the country. Since that day Lithuania's lot has been harsh and tragic. It is indeed a grim sort of irony that her independence day was celebrated not in Lithuania but in other lands where freedom and liberty still survive. There is today no free Lithuania.

All over the world today millions of freedom-loving peoples look to America with hope. The passion for freedom is deeply rooted in the hearts of the Lithuanian people. The history of that country is the most revealing testimony of her right to enjoy the way of life of a free people. If we revere our American traditions, our country must take the moral leadership which is ours by virtue of our strength and moral heritage. We must work toward the goal of a world in which free governments are freely chosen by free men. This is a moral ideal, but it is an ideal which will make for the greatest security for our country. Foremost among the countries of the world to whom we owe that moral leadership is Lithuania, whose attachment to freedom lays a powerful claim on our sympathies and energies. Let us all hope that the time is not far off when Lithuania and the other countries of the world now subject to the influence of foreign powers can throw off the alien yoke and regain the freedom which is so rightfully hers.

LEAGUE FOR PEACE WITH JUSTICE IN PALESTINE

Mr. McMAHON. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement which I prepared with reference to the League for Peace With Justice in Palestine.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

During the past few days each of us Senators has received a document from the League for Peace With Justice in Palestine, marked "Confidential," with a notation that it is to be delivered in person. The only name which appears on the document is that of Benjamin H. Freedman who purports to be the organization's secretary.

I hope none of my colleagues who have received this document will take it seriously.

The League for Peace With Justice in Palestine consists of three individuals: Benjamin H. Freedman, P. M. Shoendorf, and Habib I. Katibah.

Freedman has worked in close collaboration with the directors of the Institute of Arab-American Affairs, Inc., of New York, an Arab propaganda agency, and the Arab office of Washington which is officially sponsored by the Governments of Egypt, Iraq, Lebanon, Saudi Arabia, Transjordan, and Yemen and is actually registered as a foreign agent with the Department of Justice. In addition, Freedman has actually participated in representations made by the Egyptian Minister to our State Department.

P. M. Shoendorf, the second of the three members of the League for Peace With Justice in Palestine is, in fact, Freedman's mother-in-law.

The third, final, and only other member of the League for Peace With Justice in Palestine, Habib I. Katibah, is an Arabian journalist who is associated with the Institute of Arab-American Affairs, Inc. In addition, he was an active leader in the Arab National League which, prior to the war, worked in close cooperation with the German-American Bund.

On May 2, 1946, the League for Peace With Justice in Palestine ran a full-page advertisement in the New York Herald Tribune in which it asked a million prospective members to send the organization $1 each. At that time it gave its address as a public stenographer's office at 345 Madison Avenue.

On May 9, 1946, the same ad was run in the New York Sun and the New York World-Telegram, but the address of the organization was then given as another public stenographer's address at 420 Lexington Avenue, New York City.

The address given in the document as circulated among us yesterday was post office box No. 228, station F, New York 16, N. Y.

It is abundantly clear to me that the League for Peace With Justice in Palestine is not only not a responsible organization with American interests at heart, but, in addition, is a one-man organization which tries to lend some respectability to the efforts of the registered Arabian propagandists.

THE LEGISLATIVE BUDGET

Mr. TAFT. Mr. President, I move that the Senate proceed to the consideration of Senate Concurrent Resolution 42, Calendar No. 931. This is the concurrent resolution regarding the legislative budget.

The PRESIDENT pro tempore. Would the Senator consider submitting the suggestion in the form of a unanimous-consent request, so as not to displace the unfinished business?

Mr. TAFT. I intended to displace the St. Lawrence seaway joint resolution. My understanding is that the St. Lawrence seaway measure will automatically come back before the Senate under the unanimous-consent agreement on February 27. I see no reason why it should not be completely displaced in the meantime.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Ohio that the Senate proceed to the consideration of Senate Concurrent Resolution 42, which the clerk will read.

The Chief Clerk read as follows:

Resolved by the Senate (the House of Representatives concurring), That it is the judgment of the Congress, based upon presently available information, that revenues during the period of the fiscal year 1949 will approximate $47,300,000,000 and that expenditures during such fiscal year should not exceed $37,200,000,000, of which latter amount not more than $26,600,000,000 would be in consequence of appropriations hereafter made available for obligation in such fiscal year.

Mr. LODGE. Mr. President, as I understand, the Senator from Ohio is asking that the St. Lawrence seaway joint resolution be displaced.

Mr. TAFT. That is correct. By unanimous consent, on Friday, February 27, the Senate will automatically return to the consideration of that measure, no matter what else may be pending.

Mr. LODGE. Would favorable action on the Senator's motion mean that there would be only 4 hours for debate on Friday, February 27, on the St. Lawrence seaway proposal?

Mr. TAFT. That is correct, unless the Senate took up something else. As a matter of fact, there is a full calendar which could be considered between now and February 27.

Mr. LODGE. As I have repeatedly said, I have been ready to vote on the St. Lawrence seaway measure for some time. But I did enter into an agreement with the Senator from Wisconsin [Mr. WILEY], the purport of which was that the time for offering amendments would close on February 23, and that then there would be time for discussion of the amendments between February 23 and February 27. I notice that the Senator from Wisconsin is not now in the Chamber, but that was the understanding agreed to. I should want to be sure that what we were doing was keeping faith with the agreement which I had with the Senator from Wisconsin.

Mr. TAFT. I do not know anything about the agreement; but we will have to proceed next Friday with the rent-control bill, the consideration of which will last, I suppose, over to Monday, and possibly Tuesday. It is proposed that on Wednesday, February 25, the Senate consider the motion of the Senator from Illinois [Mr. LUCAS] to reconsider the vote by which the resolution relating to the Committee on Expenditures in the Executive Departments was agreed to, which will take all day. Merely because we fixed a day 2 weeks ahead for a vote on a certain measure I do not think we can indefinitely keep that measure before the Senate when there is other business to be disposed of.

Mr. LODGE. I suggest to the Senator from Ohio that he did not understand what we did. We agreed on a time limit, February 23, for the offering of amendments, and to vote on the joint resolution on February 27, the understanding being that between the 23d and the 27th time would be afforded for the consideration of the amendments. I personally have been ready to vote at any time on the St. Lawrence seaway measure, and I think most Senators are, but we did have this agreement with the Senator from Wisconsin. I observe he is not in the Chamber, and we ought to keep faith with him.

Mr. BARKLEY. Mr. President, as I understand the rule, when a measure is pending as the unfinished business it is in order, of course, for any Senator to move that some other measure be taken up, but if such a motion is agreed to, it displaces the unfinished business, and it cannot be brought back before the Senate without another motion. If a unanimous-consent agreement is reached to take up a certain measure, it does not displace the unfinished business. I do not know what the Senator requested.

Mr. TAFT. I moved to displace the unfinished business, because it seems to me that when we agree to vote 3 weeks from a given time, and there is no debate on the particular measure then pending, we should set it aside and proceed with other business. Under the unanimous-consent agreement, the St. Lawrence seaway joint resolution will automatically come before the Senate for consideration as the unfinished business on February 27.

Mr. BARKLEY. It would not be the pending business until that time, if the Senator's motion should prevail, unless some Senator moved to take it up again, as was done originally. No amendment could be offered to it, because it would not be the pending business, although the amendments must all be offered by February 23. If the St. Lawrence seaway joint resolution shall be displaced, it will not be before the Senate, and no amendment can be offered to it, unless between now and that time some Senator moves to take it up again. It seems to me that unless there is objection to what the Senator is trying to have done, the best procedure would be to ask unanimous consent, which would not displace the St. Lawrence seaway measure. Is the Senator trying to have the legislative budget concurrent resolution taken up

Mr. TAFT. There was all of last week, the 2 days the Senate was in session, for debate on the St. Lawrence seaway, and no Senator desired to speak. Apparently there is no more to be said on the subject. There is this other agreement, about which I know nothing, and which is not set out in the RECORD, so far as I know.

Mr. LODGE. It was set out in the RECORD that February 23 would be the last day for the offering of amendments. I thoroughly sympathize with the Senator's desire to get ahead with the business of the Senate, and the RECORD will show that many times I said the Senate should vote sooner than the date fixed. But I think it will hopelessly complicate the transaction of business in the Senate if we agree by unanimous consent to do a certain thing and then agree later to do something else.

Mr. TAFT. Mr. President, the only unanimous-consent agreement the Senate has entered into is to resume consideration of the joint resolution relating to the St. Lawrence seaway on February 27.

Mr. LODGE. No. The Senate has agreed that the time for submission of amendments shall end on February 23.

Mr. BARKLEY. Mr. President, the arrangement which was entered into is not such an arrangement as is usually made. I do not recall when a vote on a measure has been fixed so far ahead as was done in this case, but the action was taken largely in order to accommodate Senators on the majority side of the Chamber, including the Senator from Ohio, who wanted to be absent for purposes which we all understand. The Senator from Ohio probably went farther away from Washington than anyone else.

Mr. TAFT. But I was ready to vote on the St. Lawrence seaway measure before I left Washington.

Mr. BARKLEY. The Senator from Ohio was justified in leaving Washington, because he is in very hot pursuit of a very high prize in this country. I do not criticize the Senator from Ohio for being away from Washington last week. I am very fond of the Senator from Ohio, and, as I have said before, because I am an advocate of the "good neighbor policy" he is my candidate for the Republican nomination for President of the United States. I live very close to where he lives. He lives just across the river from me. Other things being equal, I would be for the Senator for the Republican nomination. Therefore I do not criticize him for pursuing the prize, and even going as far West as Colorado in that pursuit.

Mr. TAFT. Mr. President, the Senator from Kentucky cannot blame me for the action which was taken postponing the vote on the St. Lawrence seaway. I was ready to vote on it last week.

Mr. BARKLEY. No; I do not blame the Senator for the postponement of the vote. Perhaps that action was taken during the Senator's absence. The action taken was unusual, but it was done in order to accommodate Senators. Of course, it was recognized that we could not for a whole week accommodate Senators on the majority side without some sort of quid pro quo to the minority side, in view of our "birthdays," political and otherwise. [Laughter.] The arrangement which was entered into was an unusual one. That, however, does not change the rule of the Senate that the measure relating to the St. Lawrence seaway is the unfinished business, and will remain the unfinished business unless it is displaced either permanently by motion or temporarily by unanimous consent.

Mr. TAFT. I do not want to interfere with the offering of amendments to

the measure. Under the terms of the unanimous-consent agreement, however, it seems perfectly clear to me that an amendment can be offered, whether the measure is before the Senate or not. The unanimous-consent agreement provides—

> And that no amendment shall be received to said joint resolution which has not on or before February 23, 1948, been submitted as an amendment intended to be proposed thereto and ordered to lie on the table and be printed.

Under that agreement an amendment certainly may be offered even though the joint resolution is not presently before the Senate.

Mr. BARKLEY. That is true. Amendments can be offered. But they are not offered to a measure which is pending and is the unfinished business.

Mr. TAFT. I may point out that since an amendment is now pending, other amendments can be submitted as intended to be proposed later, and ordered to lie on the table and be printed, but cannot be acted upon until whatever amendment is pending has been disposed of.

Mr. BARKLEY. Amendments may be submitted and printed for the information of the Senate.

Mr. TAFT. Mr. President, I thought there would be no objection to the procedure I suggested. I withdraw my motion, and now ask unanimous consent that the unfinished business be temporarily laid aside, and that the Senate proceed to the consideration of Senate Concurrent Resolution 42.

Mr. SMITH. Mr. President, will the Senator from Ohio yield for a parliamentary inquiry?

Mr. TAFT. I yield.

Mr. SMITH. The unanimous consent agreement provides:

> That a motion to recommit the said joint resolution shall only be in order on February 23, but a vote thereon shall not be had prior to February 27, 1948.

I am contemplating making a motion to recommit, in connection with which I propose to make some remarks. I am advised I cannot make that motion until the 23d, because the unanimous consent agreement provides "that a motion to recommit * * * shall only be in order on February 23." I ask the Senator from Ohio: Would the motion he has made, if adopted, interfere with my motion to recommit the measure dealing with the St. Lawrence seaway project.

Mr. TAFT. Yes; I think the Senator from New Jersey is correct. However, I have withdrawn the motion.

Mr. SMITH. I want to preserve my position to submit my motion on February 23.

The PRESIDENT pro tempore. The Senator from Ohio has withdrawn his motion, and has asked unanimous consent that the unfinished business be temporarily laid aside, and that the Senate proceed to the consideration of Senate Concurrent Resolution 42, which was read at the desk a few moments ago. Is there objection?

There being no objection, the Senate proceeded to consider the concurrent resolution (S. Con. Res. 42) establishing the ceiling for expenditures for the fiscal year 1949 and for appropriations for the fiscal year 1949 to be expended in said fiscal year.

GENERAL FEATURES OF THE LEGISLATIVE REORGANIZATION ACT

Mr. BRIDGES. Mr. President, on August 2, 1946, the Legislative Reorganization Act became law. The intent of this law was to provide for increased efficiency in the legislative branch of the Government.

The act provided for many changes. Among these, it reduced the number of standing committees of the Congress and defined the powers and duties of such committees. It provided the committees with increased clerical and professional staffs in order to assist in committee activities. It provided for the rendering of a legislative budget. It provided for a Legislative Reference Service to be established in the Library of Congress to assist in the legislative process. The Office of the Legislative Council was expanded. Lobbyists were to be required to register certain information with the Clerk of the House of Representatives and the Secretary of the Senate. The act provided for many other changes as well.

Most of these changes were hailed as a long step forward in modernizing the legislative procedures of the Congress. And in numerous instances, I can say without reservation, the Legislative Reorganization Act has worked admirably. I believe that my colleagues generally on both sides of the aisle share this view.

LEGISLATIVE BUDGET DESCRIBED

However, there were many of us who kept our fingers crossed when we voted for certain provisions of the act. One such provision was the section dealing with the legislative budget.

To the casual eye the text of the Legislative Reorganization Act creating the legislative budget does not seem difficult of accomplishment. It directs that the Committee on Ways and Means and the Committee on Appropriations of the House of Representatives and the Committee on Finance and the Committee on Appropriations of the Senate, or authorized subcommittees of these, shall, at the beginning of each regular session of the Congress, study the budget recommendations of the President and recommend to their respective Houses a legislative budget for the ensuing fiscal year. This report shall contain a recommendation for the maximum amount to be appropriated for expenditure in that year, which shall include such an amount to be reserved for deficiencies as may be deemed necessary by the joint committee. If the estimated receipts should exceed the estimated expenditures, the report shall contain a recommendation for a reduction in the public debt. The report is due on or before February 15.

The law further directs that a concurrent resolution by which the report would be adopted and fixing the maximum amount to be appropriated for expenditure in that year shall accompany the report. If the estimated expenditures exceed the estimated receipts, the concurrent resolution shall include a section stating the amount by which the public debt shall be increased.

Thus, in brief, the legislative budget calls for an estimate of Federal receipts and revenues, an estimate of recommended expenditures, the maximum amount recommended to be appropriated, a recommended reserve for deficiencies, and a recommendation regarding an increase or reduction in the public debt.

DIFFICULTIES IN MAKING A LEGISLATIVE BUDGET

At the time of its passage we of the Congress recognized this as a well-intentioned and beneficial piece of legislation. We recognized the merits of determining a budget goal by which the Congress could guide itself in its studies of appropriations, expenditures, and revenues. But we were not blinded to the inherent difficulties attendant upon such a determination. In theory we looked upon the legislative budget as a step forward. In practice we wondered if, in its present form at least, it would work satisfactorily.

As the act is now written, I do not believe that the legislative budget will ever be more than a pregame guess at the final score, for it asks the Joint Budget Committee to give its estimate of a multitude of new facts, figures, conditions, and requests with which it has had no time to become acquainted.

EARLY REPORTING DATE PRECLUDES THOROUGH ANALYSIS

On or about February 15, according to law, the Joint Committee on the Legislative Budget is required to report to the Congress its recommendations regarding the budget of the Federal Government for the ensuing fiscal year. This is accompanied by a resolution adopting the budget. Thus, approximately 1 month after the presentation of the President's budget, the Congress is asked to go on public record as to what it will do—generally speaking—about a 1,500-page Budget on which it has held, as yet, few hearings. Thousands of people spent up to 6 months preparing this budget, comprising hundreds of thousands of individual items. We are asked to provide a sum-total estimate as to the validity, necessity, and advisability of their functions and their requests without having at this time heard from any of the witnesses and without having had more than a cursory opportunity to review their detailed budget justifications.

This obviously does not allow the joint committee sufficient time in which to consider the budget estimates carefully before making its recommendations. Actually, long and detailed hearings are necessary if we are to have a realistic picture of the proper relationship between revenues, appropriations, expenditures, and debt reduction. This is impossible in the time allowed.

Furthermore, since the departments and agencies start to prepare their individual budgets as long as 6 months in advance of the President's budget, many changes have taken place and are taking place in their demands and requirements. These are not reflected in the President's budget. In many instances the Congress has no knowledge of these

requested changes at this time. In fact, in some instances the Congress will not become apprised of them until late in the spring or early in the summer. Yet the Congress is asked to predict what these changes will be and what should be done about them.

Furthermore, frequently in direct contravention of the expressed direction of the Congress, the departments and agencies of the Government have requested in the past, and presumably will again request, deficiency and supplemental appropriations, of most of which we have no advance knowledge. I shall speak further about violations of the deficiency law later in my discussion. At the moment, I wish merely to point out that with huge sums of money involved, the Joint Committee on the Legislative Budget has no way of crystal gazing into the whims and extravagances of departments and agencies which choose to disregard the lawful limits of their appropriations.

AMENDMENT OF LAW URGED

For these reasons I restate my firm opinion that section 138 of the Legislative Reorganization Act, dealing with the legislative budget, should be amended as to the date of presentation. Only at a much later date, after hearings have been held, after we of the Congress have had ample opportunity to weigh carefully the requests of the President's budget, can we in justice to the country, to the taxpayers, to the departments and agencies involved, and to ourselves, judiciously arrive at a sound estimate of the proper relationship between appropriations, expenditures, revenues, and debt reduction.

I strongly urge now that the law be amended so that the Committee on the Legislative Budget will not be called upon to make its decisions until a much later date. Many Members of Congress who have had to wrestle with the problem of preparing the legislative budget believe that such a change would make the budget a much more practical and valuable guide in properly balancing our Federal finances.

PRESENT LAW COMPLIED WITH

Since it was virtually impossible to amend the law prior to the reporting date, the Joint Committee on the Legislative Budget had no recourse but to comply with that law. It has done so in full awareness of its responsibilities. It has done so despite the paucity of detailed information which it has at hand. It has done so despite the certainty of harsh criticism by those who, refusing to seek economy in government, believe they will profit most this year by increased expenditures on the part of a free-spending Government.

The 102-man Joint Committee on the Legislative Budget met on January 22, 1948. This committee, as I have stated, was made up of the members of four committees—the House Committee on Appropriations, the House Committee on Ways and Means, the Senate Committee on Finance, and the Senate Committee on Appropriations.

I had the honor to be chosen chairman of the joint committee. A subcommittee, comprised of five members of each of the foregoing committees, was appointed by the chairman of each committee. This 20-man subcommittee submitted to the full committee its recommendations, which were adopted by a vote of 44 to 16.

REDUCTION OF $2,500,000,000 RECOMMENDED

Mr. President, I submit herewith the report of recommendations of the Joint Committee on the Legislative Budget for the fiscal year 1949, beginning July 1, 1948, and ending June 30, 1949.

The committee has determined, as a result of its deliberations, that for the fiscal year 1949:

First. The estimate of receipts is $47,300,000,000.

Second. The estimate of recommended expenditures is $37,200,000,000.

Third. (a) The maximum amount recommended to be appropriated against the Budget estimates of $32,900,000,000 for fiscal year 1949 is $30,900,000,000.

(b) The maximum amount recommended to be appropriated against the supplemental budget estimates for 1948 of $8,700,000,000 is $7,900,000,000.

Fourth. The reserve for deficiencies recommended is $225,000,000.

Fifth. The public debt should be reduced by a portion of the excess of Federal receipts over expenditures, but in no event less than $2,600,000,000.

The committee, in estimating receipts of $47,300,000,000, was $2,800,000,000 over the President's estimate of $44,500,000,000. In estimating expenditures of $37,200,000,000, the committee was $2,500,000,000 under the President's estimate of $39,700,000,000. Thus, while the President estimated an excess of receipts over expenditures of only $4,800,000,000, the committee estimated the excess to be $10,100,000,000, or a difference of $5,300,000,000 in the committee's favor.

The committee's estimate of $30,900,000,000 for new appropriations for 1949 was just $2,000,000,000 under the President's estimate of $32,900,000,000, while the committee's estimate of $7,900,000,000 for supplemental appropriations, 1948—including the large aid-to-Europe item—was $800,000,000 under the President's $8,700,000,000 figure. Thus, the savings in appropriations for the two items would run to $2,800,000,000.

REASONS FOR ACTION STATED

Some of the reasons which impelled the committee to make the determinations which it did are as follows—and I now quote from the report:

1. This is the highest peacetime budget that has ever been submitted for congressional consideration.

2. The spending program, as outlined in the budget document, contemplates little or no reduction in the number of Federal employees.

3. This budget recommends a total of $5,735,000,000 in new expenditures for 1949 for which there exists at the moment no authorizing legislation.

4. This Nation is admittedly in grave danger of runaway inflation which, if historical precedents are any guide, might, if unchecked, result in serious economic upheavals. Under such conditions, our present revenues would decline markedly, resulting in an increased debt and increased taxation unless present spending policies are curtailed. Since Federal, State, and local expenditures constitute the single greatest inflationary force in our economy, these expenditures should be curtailed wherever possible.

5. For the same reason, large-scale expansion and acceleration of public-works projects should be limited to such projects as are deemed urgently necessary to the public interest.

6. It is obvious that the taxpayers of this Nation should be relieved somewhat of the burden of wartime taxation. This cannot be done if Federal commitments are widely expanded and expenditures are needlessly increased.

7 World conditions make imperative heavy expenditures for foreign aid and national defense. Under such circumstances, discretion cautions us to conserve our financial resources.

The committee wishes to direct attention to the fact that appropriations for expenditure are substantially less in amount than are the estimated expenditures as contemplated by the President's budget. The difference between these two lies in the fact, as stated in the report, that expenditures recommended by the President for the fiscal year 1949 include not only the new appropriations which are requested of the Congress for this fiscal year, but also funds which are available for expenditure from appropriations which were made in prior years or in the current year from appropriations which are anticipated.

CONCURRENT RESOLUTION QUOTED

Because of the vast difference between proposed appropriations and the amounts available for expenditure, the draft of the concurrent resolution, presented in compliance with the law, was worded as follows:

Resolved by the Senate (the House of Representatives concurring), That it is the judgment of the Congress, based upon presently available information, that revenues during the period of the fiscal year 1949 will approximate $47,300,000,000 and that expenditures during such fiscal year should not exceed $37,200,000,000, of which latter amount not more than $26,600,000,000 would be in consequence of appropriations hereafter made available for obligations in such fiscal year.

APPROPRIATION CUTS NOT ENOUGH

It is obvious to all that as long as the departments and agencies of the Federal Government have vast sums of money appropriated in previous years to use for current expenditures, then the present action of the Congress in limiting appropriations will not have as salutary an effect on Government spending as might be desirable. In recent years, the record shows expenditures are outrunning appropriations by about 20 percent.

This condition, unless checked, will continue so long as the agencies of the Government have these vast reservoirs of unexpended balances to tap for their present uses. Since, as of November 1, 1947, there was almost $17,000,000,000 available to the agencies in unexpended balances, it is evident that reductions in appropriations will not for some years vitally affect the total expenditure picture. Obviously, then, a curb on expenditures is necessary. The accompanying recommended concurrent resolution, with its wording, "and that expenditures during such fiscal year should not exceed $37,200,000,000, of which latter amount not more than $26,600,000,000

would be in consequence of appropriations hereafter made available for obligation in such fiscal year," recognizes this problem and attempts to deal with it. But there can be no guarantee of reduced expenditures unless and until the Congress drastically reduces the unexpended balances now available to the Federal establishments.

PERSONAL THOUGHTS ON EXPENDITURE CUTS

At this time, when the financial condition of the Federal Government is so precarious, I personally favor more drastic reductions than those recommended by the Joint Committee on the Legislative Budget. Yet, in the deliberations of the committee, I have had to extend consideration to what cuts are likely in view of the handicaps under which economy-minded Members of Congress must work.

I personally believe that the need for economy now is so vital that I would support the reduction of Federal expenditures everywhere a reduction can be justified, and let the chips fall where they may.

COMPARISON WITH 1933

Perhaps it would be well to remind ourselves of the road the National Government has traveled in the past 15 years, a road of multiplied appropriations, multiplied costs, multiplied taxes, multiplied personnel, multiplied bureaus, multiplied controls, and multiplied hand-outs. It may come as a shock to some of us of an older generation to realize that there are millions of taxpayers in their mid-thirties who since they became voters have never seen economy practiced by the departments and agencies of the Government.

Let us be reminded of the position in which we find ourselves by observing a few markers down the road which we are traveling.

In 1933 Federal expenditures were $4,325,000,000. For 1949 the President estimates they will reach $39,669,000,000 an increase of 817 percent.

In 1933 Federal revenues were $2,079,000,000. For 1949 the Joint Committee on Internal Revenue Taxation estimates that revenues will amount to $47,300,000,000, an increase in excess of 2,000 percent.

In 1933 individual income taxes and corporation taxes totaled $746,000,000. For 1949 the President estimates these Federal taxes at about $33,000,000,000, an increase of 4,300 percent.

In 1933 our public debt was $22,000,000,000. Today it is two hundred and fifty-eight billion, an increase of 1,073 percent.

In 1933 there were 572,000 Federal employees. Today there are over two million, an increase of 250 percent.

In 1933 these employees earned $972,000,000 annual wage. Today the pay roll for Federal employees approximates $6,000,000,000, an increase of more than 500 percent.

In 1933 the executive branch of the Federal Government was a relatively small and closely knit organization. I might add it was also efficient. As of the latest count, there are now more than 1,000 bureaus and more than 45,000 individual offices.

I wish that it were possible, when people ask for new legislation involving large appropriations, to flash these figures before their eyes. The resulting effect on expenditures and taxation would be beneficial. Many times, I am afraid, people forget that each dollar appropriated is a dollar which must be paid in taxes, taxes which should be reduced to relieve the strain on taxpayers, taxes which could be reduced if extravagance were eliminated from Government.

CAN WE AFFORD IT?

It is popular nowadays for the self-styled liberals in Government to use the terms "reactionary" and "conservative" in referring to those who wish to see the budget balanced, payments made on the national debt, and Federal expenditures curbed to an extent agreeable with sane fiscal policies. Unless there is a national emergency, the proponents of a sound fiscal policy believe that the Federal Government should be able to pay as it goes.

We prefer not to borrow for deficit financing from the people of the Nation, particularly when it is the taxpayers themselves who must ultimately pay the bill, plus interest.

To those who believe in a sound government each appropriations bill ultimately raises the following question: "In the light of our present financial and economic condition, can we afford this particular item?" Each item must be judged on the grounds of necessity and benefits to be derived in relation to overall ability to pay. It must be remembered that waste, extravagance, duplication, and perpetuation of self are everywhere about us.

Of course, we all see the need for an adequate national defense. But there are 14,000,000 veterans who can witness to the waste within the armed services. The Congress authorized the unification of the armed services. Extensive savings should already be realized from that unification. If savings are not realized, then of course there is something radically wrong with the administration of the defense departments.

Of course, the American people want to do their part toward world recovery. We all know the need. I saw it with my own eyes this past fall. I also saw with my own eyes the inefficiency, the almost criminal waste of American tax dollars and equipment American tax dollars paid for, the lack of full intelligence in our approach to recovery problems.

Of course we all want to see the development of needed power projects. But we want to see them undertaken as a part of a sound program as the people, the taxpayers, can afford them. We do not want to see them pushed ahead by the whims and fancies of a willful administrator.

Of course, we want the Federal Government to extend proper aid to the States and local communities. But we know that it makes good sense to extend such aid within the ability of the people to pay. We have seen such aid skyrocket to more than $30,000,000,000 since 1933, and we have seen Federal agencies advertising for business with these dollars. It is very interesting to note, as perhaps many Senators have noted, that Federal agencies actually advertise for business.

Of course, an expanded population and an enlarged Government will require additional Federal employees. But I refuse to believe that we need double the number of employees we had in 1939 and between three and four times as many as we had in 1933. Federal agencies justified increases in employment during the war years as necessary for war work. Yet, over half of the agencies of the Government have actually increased their employment since the war peak.

Of course, we are all in favor of a finer America; an America with improved schools, hospitals, and roadways; an America which will not be threatened by floods or droughts, hunger or deprivation; an America with cheap electricity for our homes, cheap power for our industries, cheap nutrition for our farm lands; an America which will provide for the needy, both at home and abroad, which, if called upon, will be ever ready to defend itself against all aggressors; an America which will proudly show its gratitude to its veterans and provide jobs for all, veteran and nonveteran alike.

No patriotic citizen will deny that these are our goals. But we cannot accomplish these worth-while measures by unjustified Federal control of our markets, by oversubsidizing, by excessive grants-in-aid to States, municipalities, and individual citizens, by providing public works beyond our capacity to pay, by giving our resources beyond the needs of foreign countries or beyond their ability to distribute them so that waste makes us a laughingstock of other nations, by using our power to purchase food commodities in such a way that we encourage inflationary procedures, or by buying surplus goods and then destroying them while other nations desperately cry for them.

If we must continue huge expenditures for national defense in a time when the world is threatened, then other expenditures must be watered down. And there must be no water in defense expenditures, either.

We have been requested to give aid to foreign nations totaling $9,300,000,000. It is said that the amount of this aid must not be reduced if the program is to be successful. This may be so; I do not know as yet. But I do know that every Member of the Congress will do well to examine every dollar of that proposed aid if he wants to avoid the possibility of waste and needless expenditure of funds.

I say this with conviction. Only 2 months ago we were called together in special session to legislate on an interim-aid-to-Europe program calling for an appropriation of $597,000,000. It was prepared in large measure by the same persons who prepared the present aid program. On examination, the Senate Appropriations Committee found inex-

cusable irresponsibility in the preparation of the European-aid program. For example, within 2 weeks of submitting the bill to the Congress, the administration altered the allocations to Italy and Austria more than $16,000,000, not because the food situation had changed, but because the draftsmen of the bill had improperly tabulated the resources of Austria.

In another instance the Appropriations Committee was able to cut more than $1,000,000 from the program by the simple expedient of rerouting shipments of coal. In yet another instance approximately $12,000,000 was stricken from the bill without changing its intent in any degree. This was caused by the State Department's listing the price of grain as $7.50 above the list price. The committee noted and corrected other price discrepancies.

Certainly, with such inexcusable errors in mind, the Congress would be unwise indeed in taking at face value any estimates for the present aid program. The sacrifice that the American citizen is making in terms of heavy taxes alone will make close supervision of these requested appropriations an absolute necessity. Every Member who votes for this program has an obligation to post a watch against maladministration and inefficiency.

We must strive, therefore, to eliminate every last vestige of waste, inefficiency, and duplication of effort if we are to carry the tremendous financial loads of the future. We must eliminate the frills and extravagances of government. It is not even a question of whether we are securing full value for the money we spend. The measuring stick must be, except in emergencies, "Can we afford to do this? Is this essential to the welfare of the Nation?"

The Federal Government, the Members of Congress, cannot alone accomplish the tremendous task. We must have the cooperation of the States and municipalities. We must have the cooperation of the departments and agencies. Above all, we must have the support of the taxpayers.

Let me say a brief word about each. During and since the war most of the States have improved their financial status markedly, broadly as much as 33 percent in a few years. Some of the financial load should in the future fall to their lot. Much of the burden of financing State projects has in late years been taken over by the Federal Government. For example, a recent study made by the Senate Appropriations Committee reveals that the cost of operating the State governments is relatively small when compared with the burden of supporting the Federal Government. The President proposes to spend $39,700,000,000 for Federal Government purposes in 1949. The cost of all State governments combined in the latest year available, 1947, was only $5,800,000,000—only one-seventh as much.

The cost of grants-in-aid to States and local governments, including shared revenues, for 1949 has been estimated by the President at $2,250,000,000.

State and local governments must assume some of the financial load and must scale down their demands for Federal projects if we are to reduce expenditures.

Mr. President, in this portion of my remarks, rather than take the time to read it at this time, I ask unanimous consent to insert a statement which I prepared, as chairman of the Committee on Appropriations, regarding the cost of Federal and State Governments.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., February 3.—Senator STYLES BRIDGES, chairman of the Senate Appropriations Committee, released a study today which reduces President Truman's 1949 Federal budget request of $39,669,000,000 to terms the man back home can more readily understand. "This study," Senator BRIDGES explained, "shows State by State the pro rata cost of the President's budget compared with the cost of operating each State's own government." In every case the pro rata cost of the Federal Government is several times the cost of the State government. "For example, in my own State of New Hampshire," Senator BRIDGES declared, "this study indicates that our State government cost about $18,000,000 but that our share of the burden of President Truman's Federal budget amounts to $95,000,000, or over five times the local costs. For the country as a whole the Federal costs are seven times the combined costs of all State governments."

In California their State government costs about $582,000,000, but their share of the Federal costs amounts to $3,368,000,000. "This means," said Senator BRIDGES, "that just a 10 percent cut in the Federal spending program would save the taxpayers of California $337,000,000. A 10 percent cut at the Federal level would mean $846,000,000 to the taxpayers of New York State; $250,000,000 to the people of Ohio, and so on. If we are to make any real progress in achieving economy in government at the Federal level," Senator BRIDGES declared, "the people must take an active interest in the affairs of the Federal Government and be as concerned with its efficiency as they have been with their own State and local governments. Remember, from the standpoint of dollars and cents the Federal Government spends seven times as much as the States," BRIDGES concluded.

STATEMENT OF HON. STYLES BRIDGES, CHAIRMAN, SENATE COMMITTEE ON APPROPRIATIONS, ON COST OF FEDERAL AND STATE GOVERNMENTS, JANUARY 28, 1948

The cost of operating the Federal Government at the level recommended by President Truman exceeds the combined costs of all our State governments by about seven times. In other words, for every dollar the taxpayer pays to his State government, about $7 must go to support the Federal operation. This ratio varies with the State, but in every case the taxpayers' pro rata cost of the Federal burden exceeds greatly the cost of the State's own government.

While individuals and local groups interested in economy in government should continue to scrutinize local and State expenses, the lion's share of the spending occurs at the Federal level. This fact is often difficult to appreciate due to the inability to comprehend the significance of a national budget involving billions of dollars.

The accompanying tabulation brings the President's 1949 budget down to terms that can be more readily understood by the average taxpayer. In this table, the 1949 budget proposal of $39,669,000,000 is distributed among the States in proportion to all Federal income taxes paid in each State in 1947—the latest year for which such data are available. These figures represent a reasonable approximation of the cost of the President's spending program to the taxpayers of each State. To give the reader some basis for comparison, the cost of the State's own government is also indicated.

A casual glance at this table will reveal that the cost of operating the State government is a relatively small item compared to the burden of supporting the Federal Government. This table also makes it possible to calculate the approximate savings to the citizens of each State resulting from reductions in the Federal budget. For example, a 10-percent cut in the Federal spending program would mean a saving of $337,000,000 to Californians—or an amount equal to more than half of the total cost of operating the California State government. To the people of New Jersey a 10-percent cut in the Federal budget would save $133,000,000—an amount equivalent to over 80 percent of the cost of their own State government.

These facts suggest that taxpayers should place more emphasis upon achieving economy in government at the Federal level. While Washington seems far removed from most communities, the fact is that the spending program of the Federal Government has a very real effect on each and every one of us. Despite the enormous size of the Federal budget, the average person is surprisingly apathetic toward any effort to achieve economy. This apathy is due in part to the fact that the Federal Government climbed to its huge spending program in relatively recent years. Just 20 years ago Federal taxes did not amount to much compared to State and local taxes. Many of us do not appreciate the change that has taken place.

The Federal spending program recommended by President Truman for 1949 is four and one-half times Federal expenditures in 1939—just 10 years ago. It is hard for us to appreciate the magnitude of this increase and adjust our thinking to the new scheme of things. The current cost of all government (Federal, State, city, county, etc.) is over $50,000,000,000 annually. This is more than one-fourth of our national income and more than we spend for food.

While it is recognized that some increase in Federal spending over prewar levels is justified, it is certainly time to raise the over-all question of "How much can we, as a Nation, wisely afford to spend for government?"

Cost of Federal and State Governments (Federal cost based on President's budget proposal for 1949 prorated among the States on the basis of Federal income-tax collections in 1947)

Grand total	39,669	5,798	7

[1] Based on Federal expenditures requested by President Truman for fiscal year 1949. The total of $39,669,000,000 was prorated by States according to the proportion of all Federal income taxes paid in the fiscal year 1947.

[2] State taxes collected in fiscal year 1947 excluding unemployment taxes as reported by the Bureau of the Census. While actual expenditures by each State may be more or less than tax collections, it is considered that these collections reflect a normal expenditure level in most cases.

SAVINGS ACCOMPLISHED BY EIGHTIETH CONGRESS

Mr. BRIDGES. Mr. President, it might be well for a moment to look into what was done by the first session of the Eightieth Congress. In that session the Congress achieved a rather enviable economy record. To date this Congress has accomplished savings amounting to $3,367,550,803 in reductions from the President's budget estimates for appropriations. These include reductions in regular, permanent, and supplementary and deficiency appropriations. They do not include rescissions of appropriations previously made amounting to an additional $4,017,332,946. Together, these would amount to $7,384,883,749 in savings. Nor does this include $830,380,811 impairment of capital in the Commodity Credit Corporation which was not replaced by appropriations. It is an impressive savings of which all economy-minded Members of Congress may well be proud.

FACTORS LIMITING SAVINGS

I need not remind the Senate that it was not easily accomplished. We did this despite the necessity for maintaining a stronger military arm than we had anticipated, despite the necessity for granting large-scale appropriations for foreign aid, despite the interest payment of $5,000,000,000 on the public debt, despite our unequaled payments of over $7,000,000,000 for veterans' aid, despite our payments to support the functions of one of the largest peacetime Federal Governments our country has ever known, functions which we of the Appropriations Committee could not legally eliminate.

PROPAGANDA CAMPAIGN BY AGENCIES

In addition to this, we were faced with the arrogant refusal of many of the Federal agencies to cooperate with the Congress in effecting an efficient and economical government. In their struggle to maintain their swollen size, they used every lawful and many unlawful methods of attempting to coerce the Congress into appropriating larger sums of public funds than the Congress, after careful investigation, believed either necessary or desirable.

These efforts have been so outrageous that the agencies have had the temerity not only to seek higher appropriations than were approved by the Bureau of the Budget, but have so mismanaged their apportionments of funds as to place the Congress in a position either of giving the agencies what they want or of refusing additional appropriations toward the end of a year and thus curtailing necessary functions to the detriment of the American people. One agency, in fact, has had the effrontery to tell the Congress that it had no right to limit its appropriations.

Various methods were employed during the appropriations hearings to coerce the Congress through public pressure to accept agency estimates of proposed appropriations. Federal employees were in some instances organized in groups as soon as House cuts were announced. Each group was given specific objectives designed geographically to exert the maximum pressure on the Congress. Newspaper aid was sought, not only through news channels but through importuned editorials, which, through no fault of the press, but because Government officials deliberately exaggerated effects of curtailment of services, alarmed the public. Not content with this, attempts were made to elicit support of civic groups, State and local officials, chambers of commerce, labor organizations, business houses, veterans organizations, brokers, farmers, and railroad executives.

One favorite method was to announce in the press that House cuts necessitated the firing of a large number of employees. Dismissal notices were then sent to employees—preferably veterans—in a number far in excess of the number actually to be released. This was done knowingly and deliberately by the agency, which subsequently rehired large numbers of these employees without publicity. The most audacious of these propaganda stunts was that perpetrated by a group of public officials—in widely scattered parts of the country and all at approximately the same time—blaming the Congress in press releases for employee layoffs which were not occasioned by appropriation cuts but by administrative financial errors within the department over which the Congress had no control or knowledge.

These attempts to pressure the Congress into submission to departmental dictates were not the work of a few disgruntled employees. In most instances they were instigated with the full connivance or knowledge of highly placed officials with a full comprehension and an utter disregard of their responsibilities. Furthermore, they were carried on at Government expense, on Government time, using Government vehicles and Government equipment, including the use of the Government free-mailing privilege. At no time in our history has Federal money been so widely used to circumvent the will of the elected representatives of the people.

DEFICIENCY ABUSE MISUSES PUBLIC FUNDS

I believe that this is an appropriate occasion to call again to the attention of the Senate one other condition which has limited our economy efforts in the past, and which undoubtedly will adversely affect our plans this year. I refer to the continued refusal of certain departments and agencies to live within their appropriations as granted by the Congress.

Most Americans who are unfamiliar with the appropriations process believe that when the appropriations bills are passed for the ensuing fiscal year, that is the end of it. Unfortunately, this is by no means the case. Instead, a steady stream of deficiency and supplemental measures comes to the Congress while it is in session, swelling the total appropriation, except when the Congress refuses the requests.

Since 1931, 488 of these measures, involving 4,426 items, and costing the taxpayers more than $150,000,000,000, have been sent to the Congress. During the sessions of the present Eightieth Congress, 11 measures, involving 777 items and costing in excess of $6,000,000,000, have been sent to the Congress. Many of these measures, particularly those submitted during the war, have been the result of emergencies growing out of the conflict. At other times new legislation, such as pay raises, has necessitated additional appropriations. These instances are no fault of the departments and agencies.

But on many other occasions deficiency and supplemental appropriation requests are the direct result of the failure or refusal of Federal establishments to apportion their appropriations properly, as required by the antideficiency law. Such agencies, instead of dividing their appropriations properly over the four quarters of the year, have, with and without the approval of the Bureau of the Budget, arbitrarily decided that they, and not the Congress, are the best judges of how much should be spent. Having once taken this illegal step, they apportion their funds so that they inevitably find themselves without sufficient funds to complete the fiscal year. That is a favorite trick.

I have examined this condition carefully, and I am of the opinion that legislation strengthening the antideficiency law is needed to correct the abuse. It is the only way by which control of the public purse can be regained by the Congress.

The Congress cannot effect economies as far-reaching as would otherwise be

the case if the establishments of the executive branch adamantly refuse to cooperate, if they are allowed to continue their propaganda on the effects of reductions in appropriations, if they are allowed deficiency appropriations after willfully refusing to heed the limitations set by the Congress.

ECONOMY PROGRAM NEEDS PUBLIC SUPPORT

I stated previously that we of the Congress must have the support of the States and the cooperation of the executive branch if we are to accomplish as much in savings as we need to accomplish. I said there was one other group which must, above all others, help the Congress. That is the people of the country. Economy over an extended period, such as we need now for the long haul out of the morass of debt, can only be practiced successfully if the people, the taxpayers, the grass-roots voters, not only vigorously support economy moves, but take the initiative themselves and become champions of the cause.

We can balance the budget, we can reduce the debt, we can reduce taxes, and we can meet our commitments both at home and abroad; but we can accomplish these results only if expenditures are pared to the bone, if special interests refrain from asking the Government to build, maintain, grant, or subsidize projects which are either not vitally necessary, or which can be done by agencies other than the Federal Government. Nearly one-third of every dollar earned by the American people goes for some form of taxation. We have a debt the interest on which is equal to the entire cost of government back in the thirties. We have one of the largest peacetime budgets in history, every dollar of which, if spent, encourages inflation. Yet there are new demands for new legislation involving additional billions of dollars.

The people of our Nation, for their own sakes, must unselfishly wrench from before their eyes the blindfolds of greenbacks with which they have been deluded. They must remember that the Federal Government never does anything for nothing, that someone, someday, must pay, and pay with interest. That someone is the American citizen, the American taxpayer, the wage earner. That someday is now, and every day in the future.

The economy-minded Members of Congress need all the support which the people can give them. With such support, economy can and must be restored to the Government. Without it, we may well face a continued inflation leading to economic chaos, deficit spending, renewed controls, and an irreparable break-down of our domestic process.

The PRESIDENT pro tempore. The question is on agreeing to the concurrent resolution.

Mr. GEORGE. Mr. President, I shall support the concurrent resolution, but I wish to make it clear that I very much doubt—and I am stating merely my own personal view—whether the Government's revenues for the fiscal year 1949 will run as high as is indicated in the concurrent resolution.

Mr. President, in my opinion the time has arrived when we should take from our expenditure budget and revenue budget certain vast sums of money to which we are being committed presently, and for a period of years ahead of us. I think the matter should be handled by a special bond issue, let us say bonds for the winning of the peace, as we issued bonds for the winning of the war. Let the issue, as a mere illustration, be, let us say, twenty or twenty-five billion dollars, running over a period of 20 or 30 years.

My feeling is that the bonds could be sold, because the transaction incident to the sale of a bond and the purchase of a bond becomes a business proposition, business considerations control it, and with a suitable provision permitting the bonds to be purchased against estate taxes, at a very reasonable rate of interest, all our outside foreign financing during the next 4 years could be lifted out of current expenditure and income budgets, except for the interest upon the bonds, if payable annually, as I presume would be the case. Whether or not the Treasury Department would look with favor upon the suggestion I do not know. But it is undoubtedly of the highest importance that we should do something to take out of our expenditure budgets, and therefore out of our income budget, except for the item of interest, the vast new expenditures which in all good faith we feel we are called upon to make.

What I am saying is not in opposition to those expenditures wherever they may be properly made, after due and proper consideration, as in the case of the European aid program, which, I presume, will be reported to the Senate during the week.

In my judgment, we will not be able to have a very sensible fiscal policy or program so long as these extraordinary expenditures are thrown into our annual budgets. They could be eliminated from them by a sensible arrangement for a bond issue which would be inviting to businessmen and to other citizens who are able to purchase them if we would be willing to make very reasonable concessions respecting estate taxes in the statutes providing for the bond issue.

Mr. President, I have watched the Federal budgets and, as I have contemplated what we must of necessity do, or what we will do by way of extraordinary expenditures, I have come to the conclusion that if the Treasury continues to move in the direction in which it is now going, we will have an expenditure of $45,000,000,000 by 1951. The way the Treasury is now traveling the expenditures are not going to be reduced. While we may deplore it and may on occasion speak against it, as certainly as we are convened in the Senate Chamber today, we are headed toward a forty-five-billion- or forty-six-billion- or forty-seven-billion-dollar budget by 1951 or 1952. That burden on the American people, plus an additional ten billion to twelve billion dollars for State, county, and local governments, will one day break down the productive power of America. So, in order to enable us to visualize the budget as we should, it seems to me the wisest course is to authorize a special bond issue, sell it to the American people, and use the proceeds to take the extraordinary expenditures out of the annual budgets, so that we may face cold facts as they are, with some possibility of reducing the budget.

I shall vote for the concurrent resolution, but I most reluctantly subscribe to an estimated $37,200,000,000 of expenditures for the next fiscal year. Yet I know very well that the budget is going to reach that figure. I have seen it climb too fast during the past several years to imagine that we will be able to pull it down, under existing conditions and under our present fiscal arrangements.

Mr. President, I sincerely hope that we may be able to remove the extraordinary expenditures from the annual budget, save for the item of interest to which I have referred, so that we may then see precisely what we, as a nation, are doing.

Mr. BARKLEY. Mr. President, I shall occupy only a few moments of the Senate's time to comment on the concurrent resolution and the proceedings which have resulted in its presentation.

First, I should like to advert for a moment to the suggestion made by the Senator from Georgia [Mr. GEORGE] in regard to taking the extraordinary expenses to which he has referred out of the annual budget, and providing for them by a bond issue. I should like to inquire of the Senator from Georgia whether he contemplates that if such action were taken there would be a corresponding reduction in the standing debt of the United States, or even a greater reduction than the amount the bonds to which he refers would aggregate. In other words, whether, in spite of the suggested bond issue, there might be a reduction in the over-all public debt of the United States?

Mr. GEORGE. I do, yes. I contemplate that we could still reduce our present fixed debt.

Mr. BARKLEY. Of course, if we did not do that, the special bonds would merely add that much more to the public debt, and it would be greater by reason of the bond issue than it is now. The Senator's suggestion is worthy of consideration.

Mr. President, I wish to comment briefly on the date, namely February 15, on which a report on the legislative budget is required to be made to the two Houses of Congress under the Reorganization Act. I am convinced now, and I think the joint committee were convinced, that that date ought to be moved forward, because it is very difficult to arrive at any dependable figure or any dependable opinion or judgment within 6 weeks after Congress meets. Before a single appropriation bill has been passed or even introduced it is difficult to estimate how much we are going to spend and how much we are going to have to appropriate during the following months of the Congress after the 15th of February. It is not so hard to estimate the revenues of the Government, because we have the figures furnished us by the Treasury, we have the President's budget, we have the estimates of the Joint Committee on Internal Revenue Taxation. They frequently do not agree in their estimates, but they come sufficiently close to enable us to

arrive at some judgment. It was based upon these figures more or less that the President estimated—and his estimate has been accepted substantially—there would be a revenue for 1949 of $47,200,000,000. Of course, that estimate is based on present tax laws, and it is based upon present national income.

The national income of 1947, as reported recently by the Department of Commerce, was approximately $197,000,000,000. I think that is the highest national income in the history of the United States. So, based upon a similar income for 1949, which may be exceeded—or it may be an overestimation, depending upon conditions in the country, depending upon our commerce, our industry, our wages, profits, and all factors that enter into the making of an over-all national income—and based upon present taxes, it was estimated that there would be $47,200,000,000 revenue to the Treasury in the fiscal year 1949.

If the tax-reduction bill which has passed the House of Representatives should be adopted by the Senate and become a law, either by the signature of the President—and it has been announced rather authoritatively that the President could not approve such a measure—or if it should be enacted over a veto, that would take six and one-half billion dollars from the estimated income of the Treasury or $47,200,000,000, which would reduce the estimated income for the fiscal year 1949 to approximately $40,000,000,000.

The joint committee set up in the Reorganization Act met, as the law required, organized, and discussed in one meeting, at least, whether the committee should try to comply with the law by making a report to the two Houses by the 15th of February, or whether it should try to amend the law to postpone that date to some later date in March, April, or May. The committee felt that it could not justify what happened last year, when a stalemate existed as between the figure of the House, a six and one-half billion-dollar reduction in the budget, and the figure of the Senate, calling for a reduction of four and one-half billion dollars. The result was that nothing whatever was done. The two Houses could not get together, and no further meetings were held.

This time we met and organized. We had no information before the joint committee. No one appeared, and no one was asked to appear. Last year the Director of the Budget came before us, and for a day or two we inquired about various items in the budget of the President, which had been made up originally by the Bureau of the Budget and reduced by the President himself by approximately $5,000,000,000. This time we had no information whatever. Perhaps there was not sufficient time, but I felt, and still feel, that it would not have been out of place to have invited witnesses to appear before the joint committee—including the Director of the Budget—to give us a little information about some of the items in the budget.

The joint committee adopted a resolution to reduce the budget by two and one-half billion dollars, whether or no. It simply reached up and pulled down that figure. As I have said, we estimated $47,000,000,000-plus in revenue. That action was a leap in the dark—at least a step in the dark. Perhaps it was not a leap. It may have been an orderly step, but whether it was a step or a leap, it was in the dark, because we do not know whether we can reduce the budget by two and one-half billion dollars. Personally I should be glad if we could reduce it by even more than two and one-half billion dollars, because I recognize the necessity for our Government to get down to a permanent basis of expenditure which, over a period of years, may be regarded as normal. But we cannot do that at this time, as I see it. I do not know how long it will be before we can do it, because whether we want to do it or not, or whether we would like to do it or not, we are bedeviled by obligations which we cannot escape unless we are willing to abandon all efforts to restore and reconstruct the economy of the world, and take our chances on having that economy collapse entirely and go down with it. I do not see how we can suffer the complete collapse of the economy of the world without taking a great chance that ours might also go down, just as Samson pulled the temple down on himself in order to destroy the enemy.

How long that situation may exist, no one is prophet enough to foresee. No one can tell what may happen within the next year. We are supposed to have a surplus of $7,500,000,000 at the end of this fiscal year. That is, according to the budget estimate, there will be in the Treasury unexpended a surplus of seven and one-half billion dollars on the first day of July. We have already reduced that, or are about to do so, by $3,000,000,000, by reason of the bill which will be reported from the Committee on Foreign Relations within a few days, involving the European recovery program. We have said that as a bookkeeping transaction the expenditure of $3,000,000,000 of the $5,300,000,000 proposed to be appropriated shall be credited to the fiscal year 1948. So we must reduce the seven and one-half billion surplus on July 1 by $3,000,000,000, which will be taken out of it, which ordinarily would not come out of it because it would not normally be an expenditure for the fiscal year 1948. That leaves a surplus of $4,500,000,000 on the 1st of July.

In the joint committee the Senator from Colorado [Mr. MILLIKIN]—very appropriately, it seemed to me—as chairman of the Committee on Finance and as a Senator on his own responsibility, moved that not less than $2,600,000,000 should be paid on the public debt. So when we subtract $2,600,000,000, which we decided should be paid on the public debt, from $4,500,000,000, we have $1,900,000,000 as a figure around which appropriations which may be contingent upon the action of Congress may fluctuate. So if we advance from the ordinary budget of 1949, $3,000,000,000 paid out of the surplus of 1948 by the creation of a trust fund in the Treasury, and then reduce our public debt by $2,600,000,000, we shall have the figure which I mentioned. I believe that $2,600,000,000 is as little as we ought to reduce the public debt, because we cannot hand all that debt down to future generations. I am very sincere in the view that while we have a national income of nearly $200,000,000,000, and have an income of $47,000,000,000 placed in the Treasury, and have a surplus of $7,500,000,000, we ought to pay even more than $2,600,000,000 on the huge debt which has been created as a result of the war.

Mr. MILLIKIN. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. MILLIKIN. I am not at all disagreeing with the Senator's last statement; but I believe that the present general situation calls for a certain amount of caution regarding the extent to which we reduce the debt. Obviously the reduction of the debt is a contraction of credit; and an extravagant reduction might pull the plug on our economy and cause very devastating results. A cautionary note has come into the Treasury's own opinions on that subject.

Mr. BARKLEY. I appreciate that viewpoint; yet a reduction of the debt makes more money for expenditure available to those to whom payments are made in the debt reduction. It also involves an element of inflation. We cannot separate that subject from the question of taxes. The release of $6,500,000,000 in taxes to the American people would create that much more spending power and that much more inflation. So what the Senator says about the payment of too large an amount upon the public debt has its relationship to the release to the American people for expenditure of the enormous sums contemplated by the tax bill passed by the House. So if the payment on our public debt of more than $2,600,000,000 would release certain forces of credit or price inflation, certainly too large a tax reduction would do the same thing.

Mr. MILLIKIN. Mr. President, will the Senator further yield?

Mr. BARKLEY. I yield.

Mr. MILLIKIN. I merely wish to suggest that in a situation of some economic flux with possibility of recession, such as the situation in which we find ourselves at the present time, there is strong support for the theory that that is the time to start tax reduction, for a part of the reason relating to mass spending power which the Senator suggests. It does put more spending power in the hands of the people, and thus supports the spending economy, preventing the economy from taking what might otherwise be a more precipitous decline.

Mr. BARKLEY. All those things are double-edged swords. You meet yourself coming back when you argue expenditures and taxes and debt reduction; and it creates the impression which is created by the old adage with which the Senator from Colorado is as familiar in Colorado as we are in Kentucky—that it is impossible to tell from the rattler's track whether he was going or coming back.

Mr. MILLIKIN. Yes.

Mr. BARKLEY. That is largely true in the case of some of these intricate, complicated transactions.

The point I undertake to make is that if we take $3,000,000,000 out of next

year's expenses and add it to this year's expenses, and $2,600,000,000 out of this year's expenses or next year's expenses—the $2,600,000,000 is in 1949, but a corresponding figure is supposed to be related to 1948—we might wind up the fiscal year with a deficit, instead of with a surplus of any kind, especially in view of the demands upon us which are difficult to escape, such, for instance, European aid, to which I have referred, and also aid to China. We cannot escape them, even if we wished to. But by such bookkeeping juggling we might wind up with a deficit, rather than with a surplus.

For that reason I think we are proceeding without information which is adequate. Perhaps the committee could not have gotten it, but it did not try to get it.

All of that makes me believe that for the next fiscal year we should proceed in such a way that the committee could have no excuse for not getting information, so that we may proceed with some light on the subject.

Mr. MILLIKIN. Mr. President, under the Treasury's figures and under those of the Joint Committee on Taxation, there seems to be no possible doubt that for this fiscal year there will be a surplus of at least $7,500,000,000. The joint committee estimates it, as I recall, at $8,700,000,000. There is nothing in the present market situation that could disturb that result.

I think that there at least we have a reasonably stable set of figures on which we can work. If we take $2,600,000,000 for debt retirement in this fiscal year and if we transfer $3,000,000,000 for actual ultimate expenditure next year, we still have a pretty good margin this year for, let us call them, contingencies.

Mr. BARKLEY. I tried to point out that the Senator by his ingenious device—I do not mean the word "device" in any invidious sense, but that is what it is—has reduced the $7,500,000,000 surplus to $4,500,000,000.

Mr. MILLIKIN. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. MILLIKIN. And by the same token, it gives the opportunity for an equal amount of surplus—depending on how we spend—in the fiscal year 1949.

Mr. BARKLEY. No; I am not so certain about that, in view of the background that motivated this ingenious device or maneuver or bookkeeping arrangement to which the Senator from Colorado has lent his great influence and his powerful intellectual ability.

Mr. MILLIKIN. I stated that it would give the opportunity.

Mr. BARKLEY. Yes; but the opportunity may be vitiated by what might happen in the Congress hereafter.

I wish conditions were such that we could reduce the budget even more than that, Mr. President. The Senator from Maine [Mr. BREWSTER] makes frequent reference to a speech I made in New York a year and a half ago, in which I said that after conditions leveled off, after discharging the obligations the war had imposed upon us, I thought we could get down to an annual budget of about $25,000,000 or $26,000,000. I thought so then. Of course, we had no way of knowing then what would come up for mandatory consideration.

I certainly hope the prediction by the Senator from Georgia [Mr. GEORGE] of an annual budget of $45,000,000,000 or $46,000,000,000, or $47,000,000,000 in the future will not come true.

That is all I have to say, Mr. President.

The PRESIDENT pro tempore. The question is on agreeing to the concurrent resolution.

Mr. MYERS. Mr. President, in view of the discussion and debate which took place in both Houses of Congress last year on the legislative budget, and in view of what actually happened to the budget in both Houses of Congress, and in view of what the Congress did to the President's budget recommendations, I am wondering whether the resolution now presented to us is even worth the trouble of writing or printing.

In that regard, I desire to invite attention to but one item which was discussed last year in connection with the legislative budget. It was discussed in the House of Representatives and it was discussed on the floor of the Senate when we were considering the President's budget. The Treasury Department recently announced some statistics on tax refunds in the fiscal year which ended last June 30. They are very interesting statistics, and I am sure many Members of the Senate gave them the attention they deserved.

The statistics show, Mr. President, that in the fiscal year 1947, the Treasury Department refunded a total of nearly $3,000,000,000, the actual total being $2,897,000,000. This includes both Internal Revenue Bureau refunds and Customs Bureau refunds. On income taxes alone, in the fiscal year ending last June 30, the 1947 fiscal year, the Treasury refunded $2,882,735,904. This compares with the Budget Bureau-Treasury Department estimates, beforehand, of such refunds of $2,108,000,000, a difference of about $700,000,000. Originally, in January of 1946, when the first estimate of probable fiscal 1947 tax refunds was made, the Budget Bureau and Treasury estimated them at $1,570,000,000, but subsequently revised the figure upward to $2,108,000,000. This was still, as I have said, about $700,000,000 less than the actual refund made in the 1947 fiscal year.

Of course, Mr. President, the Senate knows what makes these figures on the 1947 fiscal year experience noteworthy today. I think, Mr. President, all of us remember the fight we had here less than a year ago, after a similar battle in the House, over the amount which the Congress should provide for the current fiscal year, the 1948 fiscal year, for Bureau of Internal Revenue to cover this item of income-tax refunds.

As you know, Mr. President, the Republican majority in Congress donned its shining armor, polished and shined its sword and lance, leaped astride an eager and impatient steed, a noble charger called Economy, and galloped to tilt against a wicked monster known as Governmental Extravagance, and known more particularly as a $37,500,000,000 Federal budget for the fiscal year 1948. This shining knight, this defiant warrior, this Republican majority, had roundly boasted it would seize yon budget and smite it a mighty blow, to wit, a $6,000,000,000 blow, which would amputate from said budget the extravagance and waste, the bloated profligacy, the boondoggling.

In this campaign against this monstrous budget, and in support of its proud boast that it would cut this $6,000,000,000 neatly from the budget with battle-ax or meat-ax, the Republican majority, first in the House and then in the Senate, seized upon the item of income-tax refunds, and announced to a breathless Nation and a cheering press that it had scored a great triumph and had, in this one item alone, reduced the budget by the vast sum of $800,000,000. At the rate it was going on this one appropriation bill, the first bill, as I recall, coming before the Eightieth Congress, carrying appropriations for the 1948 fiscal year, the Republican majority was very enthusiastic about its chances of carrying out the proud boast of amputating $6,000,000,000 from the budget.

When the bill containing the $800,000,000 cut on income-tax refunds came up in the House, the ranking minority member of the House Appropriations Committee described the reduction as a phoney reduction and warned his colleagues that in making the $800,000,000 reduction on tax refunds, the Congress was not saving a thin dime, and that all overpayments of taxes would have to be refunded. But a majority party member of the House Appropriations Committee, apparently quite indignant over the suggestion that the Treasury and Budget Bureau estimates were reliable because they were based on experience, insisted that the Appropriations Committee of the House was not only allowed, but qualified, to substitute its own estimate. The cut stood. When the bill came to the Senate, the cut stood, even though the minority members of the Senate Appropriations Committee clearly established in their minority views that the guess made by the majority in both the House and Senate committees was unrealistic and too low. The matter was further developed in the debate on the floor but, alas, all dissent was stifled, and the majority party rode off in triumph with its $800,000,000 cut in the budget safely defended against attack.

Now, Mr. President, it is my understanding that the Treasury Department will soon be running out of money with which to pay off tax refunds due in the current fiscal year. The Congress allowed $1,200,000,000 for this fiscal year. The Budget Bureau and the Treasury had asked for two billion one hundred and eight million. I warned the Senate on July 11 last that the amount appropriated would probably be exhausted by April 1, and that unless the Congress provided additional money, the Government would begin paying 6 percent interest on all refunds it was not able to pay. The 6 percent would continue until the additional funds were made available. Hence, instead of saving $800,000,000, the Congress would actually be losing money for the Government by

tacking on unnecessary interest charges. It certainly is poor business to pay 6 percent interest on a debt merely for the purpose of doctoring up the books in order to make a good showing in 1 month or in one fiscal year, and with no consideration for the over-all net cost of such fiscal legerdemain, such budget sleight-of-hand. Regardless of the entertainment value of such a performance, it is strictly poor "box-office."

Mr. President, I have here an editorial from the Philadelphia Bulletin of a few days ago, commenting on the issue of tax refund and phony budget cuts. Pointing out how the Budget Bureau and the Treasury, even with the advantage of long experience in making estimates, substantially underestimated the amount of tax refunds which would have to be paid out in the fiscal year 1947, the Philadelphia Bulletin declared, in connection with the dispute last year over this item in the 1948 budget, that "the President's figure looks closer to probability than the committee's savings," meaning the Appropriations Committee.

Where, oh, where, Mr. President, are those $800,000,000? What has happened to the knight in shining armor, mounted on his steed Economy, who rode out last year on his crusade against the bloated budget, and whose first triumph was the $800,000,000 savings on tax refunds?

Mr. President, I ask unanimous consent to have inserted in the RECORD as a part of my remarks the editorial to which I have just referred, from the Philadelphia Bulletin, entitled "Playing at Saving."

The PRESIDENT pro tempore. Is there objection?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

PLAYING AT SAVING

Refunds close to three billion dollars ($2,897,000,000) are due persons and corporations who overpaid their income taxes in the fiscal year 1947, ending June 30 last, according to a Treasury report.

This big sum recalls one of the budget-cutting controversies of last year. The President asked in his budget for the fiscal year 1948 the sum of $2,065,000,000 for tax refunds. The Republicans on the House Appropriations Committee, in their eager hunt for cuts to make up the promised $6,000,000,000 of savings, lopped off $800,000,000 of this sum.

Their Democratic colleagues rudely said this particular saving was phony, since the sum asked for by the President was based on past experience with refunds in proportion to collections.

Now it appears that the President's own refunds estimate was some $800,000,000 less than the refunds actually allowed for the fiscal year 1947. Tax collections for 1948 are running ahead of 1947. The President's figure looks closer to probability than the committee's savings.

The PRESIDENT pro tempore. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 42) was agreed to.

MATERNITY RELIEF FOR GOVERNMENT EMPLOYEES

Mr. LANGER. Mr. President, approximately 1 year ago I offered an amendment to a bill then pending to provide maternity relief for Government employees. Several Senators who did not vote for the amendment at that time came to me afterward and said that if a separate bill were introduced they would support it. I wish to say that this afternoon the subcommittee of the Committee on Post Office and Civil Service is reporting to the full committee. In order that Senators may be fully advised as to exactly what the situation is relative to maternity relief for Federal employees, I wish very briefly to state the foreign countries in which such relief is already provided.

In Argentina, Cuba, the Netherlands, Poland, and Spain, a leave period is allowed of 6 weeks before childbirth, and 6 weeks after, with full pay.

The leave period allowed in Belgium, Chile, Colombia, Costa Rica, Estonia, and France, is 1 month before childbirth, and 1 month after, with full pay.

The total period of leave allowed, divided before and after childbirth as required for individual cases, with full pay, is, in Greece, 4 months; Brazil, 3 months; Czechoslovakia, 3 months; Norway, 3 months; Sweden, 3 months; Bulgaria, 2 months; Great Britain, varying, but about 2 months; Denmark, 6 weeks, with half pay; Switzerland, 6 weeks, with full pay; and in Yugoslavia, 6 weeks, with full pay. In other countries, particularly Italy, Japan, Peru, Portugal, and Russia, the leave period allowed varies all the way from 1 month to 2 months.

Of all the countries on the face of the globe, it is found that Russia has the most liberal laws dealing with maternity relief for government employees. In order that Members of the Senate may fairly familiarize themselves with the subject before it comes to a vote on the floor of the Senate, which I hope will be soon, I ask unanimous consent to have printed in the RECORD the statement of Frieda S. Miller, Chief of the Women's Bureau of the Department of Labor, in favor of the bill (S. 784) to provide maternity leave to Federal employees, which statement was made before the Committee on Post Office and Civil Service.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF FRIEDA S. MILLER IN FAVOR OF S. 784, TO PROVIDE MATERNITY LEAVE TO FEDERAL EMPLOYEES, BEFORE THE CIVIL SERVICE COMMITTEE, FEBRUARY 18, 1948

The Women's Bureau of the United States Department of Labor favors the principle of S. 784, which would grant married women in the Federal service 60 days' maternity leave on doctor's certificate, in addition to sick leave and annual leave provided for Federal workers generally.

The Women's Bureau has long been concerned with promotion of standards and policies to safeguard the physical and economic well-being of the Nation's women workers, now nearly 17,000,000 in number. That task was made the continuing function of the Bureau by congressional mandate in 1920, and quite naturally it has included the development of standards for the protection of employed women. In 1942 the Women's Bureau and Children's Bureau issued a joint statement of recommended standards for maternity care and employment of mothers in industry, in consultation with an advisory committee of physicians, industrial hygienists, and women labor leaders. Those standards, which constitute the present Women's Bureau recommendations, include as one of their recommendations a provision for maternity leave on presentation of a doctor's certificate, one of the standards which would be established by S. 784.

In order to be adequate for the purpose of safeguarding women's employment at childbirth, maternity legislation should meet certain basic needs. One is the need to protect the worker's health. A woman worker should have enough time off before childbirth to prevent undue strain in the latter part of pregnancy and permit her to be in a rested state at the time of delivery. The mother should have sufficient time after delivery to regain her strength before returning to work. The welfare of the new infant and its need for care by the mother during the early period of adjustment is also important. The second urgent need of women workers at this time is that of income maintenance, so that the woman worker can pay her regular running expenses and in addition help meet the extra expenses of medical and hospital care.

The proposed bill, S. 784, would accomplish both of these objectives. By providing a full 60 days' maternity leave in addition to the 15 days' sick leave now allowed all Federal workers, the bill would enable married women workers to take a 14 weeks' leave of absence at childbirth. This conforms to the Women's Bureau standard, which calls for a leave period of 6 weeks before childbirth and 2 months after childbirth. S. 784 would provide income maintenance during the entire period, likewise made possible by combining the proposed maternity leave with existing sick-leave provision. An additional advantage of S. 784 results from the fact that it does not set up new or special machinery for administration. It would be administered in conjunction with existing sick-leave provisions, which would reduce administrative costs to a minimum.

As of December 1947, 400,287 women were employed in the Federal service. This was about half the number employed in the peak war period, when Federal employment included roughly 1,000,000 women. It is unlikely, of course, that the peacetime figure will ever reach the wartime total. However, a Women's Bureau study published in 1941, Employment of Women in the Federal Government, 1923 to 1939, Women's Bureau Bulletin 182, shows a continued growth in such employment, as new services and increased opportunities continue to be open to women. In the 16-year period from 1923 to 1939 the proportion of women to all Government employees advanced from 14.9 percent to 18.8 percent. Moreover, the study showed that women in the Government service are an older group than those in general employment. While in 1930 almost one-third of all women at work throughout the country were 18 but under 25, only about 12 percent of women Government workers in 1938 were that young. The study shows that as of December 1938 the average age for all women in the Federal service was 36.9 years. Assuming that the Federal Government employs as large a proportion of married women as is the case for the country as a whole, it is apparent that S. 784 would benefit a large group of Federal workers of childbearing age.

The problem of protecting married women before and after childbirth is becoming more and more urgent in the United States as an increasing number of such workers enter paid employment outside their homes. Over the past half century the proportion of married women to single women in the labor force has been constantly increasing. In 1900 married women constituted 15 percent of the woman labor force. In 1940 married women were 35 percent of such women. In 1947 the most recent figures available show that almost half of all women in the labor force, 46 percent, were married as compared with 38 percent single women and 16 per-

cent widowed or divorced. While figures are not available to show the proportionate increase of married women in the Federal service, it is reasonable to suppose that the pronounced trend toward increasing employment of married women which characterizes the population as a whole also prevails for that segment of the woman population employed in the Federal service.

Protection of employed women at childbirth is of such importance that the ILO established one of its earliest conventions on this subject. ILO Convention No. 3, adopted in 1919, provides for a rest period of 12 weeks at childbirth, payment of medical benefits adequate to maintain the health of the woman worker and her child, and guaranty of job security. Many countries have adopted similar provisions, either through maternity legislation or a nationwide system of social insurance. The ILO convention does not cover public workers. However, a number of countries with maternity legislation have included such workers in coverage.

The influence of the ILO standards appears in the laws of most countries for the period following 1919 to 1938. No recent general report for all governments is available, due to war's upheaval in so many countries. But as of 1938, when the ILO reported on maternity leave for public workers, most of the governments in the then League of Nations made maternity provisions for their women employees. Some of the general provisions are noted, as follows:

"LEAVE PERIOD ALLOWED

"I. Six weeks before childbirth, 6 weeks after; full pay: Argentina, Cuba, Netherlands, Poland, Spain.

"II. One month before, 1 month after childbirth; full pay: Belgium, Chile, Colombia, Costa Rica, Estonia, France.

"III. A total period of leave allowed, divided before and after childbirth as required for individual cases; full pay: Greece, 4 months; Brazil, 3 months; Czechoslovakia, 3 months; Norway, 3 months; Sweden, 3 months; Bulgaria, 2 months; Great Britain, varied; Denmark, 6 weeks, half pay; Switzerland, 6 weeks, full pay; Yugoslavia, 6 weeks, full pay.

"IV. Varying periods and provisions: Italy, Japan, Peru, Portugal, U. S. S. R."

The Women's Bureau looks forward to the time when standards for maternity protection will be established by law for women workers in all types of employment. In recent years, several proposals have been made for a Nation-wide system of health insurance, which would include maternity protection for women. It is noteworthy, however, that following the usual line of separation between public and private employment, proposals for general insurance programs are limited to private employment and do not cover workers in the Federal service. Should a general Nation-wide health-insurance plan be adopted, separate legislation would doubtless still be necessary to give maternity protection to women Government employees.

S. 784 affords the Government an opportunity to take the lead toward accomplishment of the ultimate objective of maternity protection for all employed women by adopting such legislation for its own women workers. Such pace setting by the Federal Government is not entirely without precedent. The Government was among the first to recognize the principle of equal pay for equal work for women when the Civil Service Commission adopted the Classification Act of 1923. S. 784 affords an opportunity to take similar progressive action in the field of maternity legislation. The Women's Bureau favors the adoption of S. 784.

Mr. LANGER. Mr. President, I ask unanimous consent to have printed at this point in my remarks the testimony of Dr. Martha M. Eliot, Associate Chief, Children's Bureau, Social Security Administration, Federal Security Agency.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY ON S. 784, A BILL TO PROVIDE MATERNITY LEAVE FOR GOVERNMENT EMPLOYEES, BY MARTHA M. ELIOT, M. D., ASSOCIATE CHIEF, CHILDREN'S BUREAU, SOCIAL SECURITY ADMINISTRATION, FEDERAL SECURITY AGENCY, BEFORE THE SENATE COMMITTEE ON CIVIL SERVICE, FEBRUARY 18, 1948

I am glad to appear before your committee in support of S. 784, a bill to provide maternity leave for Government employees. I should make it clear that I am speaking for myself and not for the Administration nor for the Federal Security Agency. The Federal Security Agency has as yet taken no position with respect to this bill.

The Children's Bureau has always been concerned with questions related to the protection of maternity from the point of view of the welfare of the infant as well as that of the mother. Questions as to the wisdom of employment away from home for a woman when she is pregnant have been raised repeatedly. There are indeed different views as to whether a woman who is pregnant should or should not undertake such work. In general, it may be said that a woman who is expecting a child should give first consideration to her own health and the welfare of her child. If, however, circumstances are such that employment is necessary, special plans should be made to safeguard both the mother and child. One of these safeguards has been found to be the establishment of a general policy calling for the granting of a period of maternity leave both before and after the birth of the child. The basis for such a policy is to be found in investigations of the effect of employment of the mother on the infant mortality rates and on the duration of pregnancy.

In its early studies of infant mortality, the Children's Bureau found that employment of mothers away from their homes during pregnancy was associated with a high neonatal infant mortality rate (infant death rate during the first month of life), with a high percentage of premature births, and with a high stillbirth rate. Furthermore, it was found that the influence of such employment during pregnancy on the infant death rate was greater the shorter the interval of rest before confinement. When there was no interval between cessation of the mother's work and her confinement, the death rate of infants under 1 month was nearly double that when there was an interval of 1 month or more. These same studies also showed that if the mothers went back to work before the baby was 2 months old the infant mortality rate was three times the average rate.

In the 30 years since these studies were made, the death rates of infants in the second to the twelfth months of life have been reduced greatly; death rates in the first month of life very much less. Today more than half of all infant deaths occur in the first month of life, and, of these, half are the result of premature birth. Much of our present day effort to lower infant mortality, therefore, must be directed toward overcoming any adverse conditions that are the cause of premature delivery.

It is the consensus of opinion among obstetricians that fatigue must be avoided in the last few weeks of pregnancy. Studies have been made showing that the duration of pregnancy depends upon the extent to which the patient can spare herself during the last months of pregnancy. One such study concludes that hard work in poorly nourished women predisposes to the premature ending of pregnancy. Other studies corroborate this, showing that women who can rest during the last 6 to 8 weeks of pregnancy are less likely to have a premature termination of pregnancy. As has been pointed out already, premature birth is one of the major causes of death of the baby in the neonatal period. Any factor which contributes to premature birth must be avoided if at all possible so that the baby will have a better chance of survival. Dr. Stewart Clifford, a leading pediatrician, of Boston, has made the statement that because of the rapid gain in weight of the fetus in these last weeks of pregnancy even a slight prolongation makes the outlook for the infant more favorable.

It is well known to obstetricians also that fatigue and anxiety can contribute to the pain and fatigue of labor itself, and that women who are relaxed and rested are more likely to have a short and easy labor and a satisfactory period of convalescence.

The pelvic organs require about 6 weeks to return to normal after the birth of a child. Although it is no longer the practice for women to be kept in bed for the long periods formerly considered necessary after childbirth, obstetricians recommend that normal activities be resumed gradually. It usually takes from 6 weeks to 2 months after childbirth for a woman to become as active as she was before. The demands on her for the care of her baby are particularly intensive during this time, and the emotional security of the young baby depends a great deal on the consistent attention and care of his mother. If a mother is breast-feeding her child she contributes both physically and emotionally to his well-being, and physicians have strongly urged that breast-feeding be continued for at least the first 2 months of the baby's life, even if, under special circumstances, it cannot be continued longer. Studies of the effect of a mother's employment on her ability to breast-feed her child indicate that employment during pregnancy has little effect on whether or not she will be able to breast-feed her child, but it is well known that mothers who must return to employment early tend to wean their babies early.

When a mother is wholly or partly dependent on her own earnings for her livelihood and that of her children she is apt to be anxious and upset when she must give up her work because of pregnancy or at the time of confinement. This is not conducive to normal childbirth; it may result in premature delivery or interfere with successful breast-feeding. If such a mother can be assured of a period of rest and financial security during the latter part of pregnancy and the first few weeks after the birth of her child the likelihood of a successful outcome in terms of a healthy baby and of her own health is greater.

During the recent war there was a very considerable increase in the number of women employed in industry and by Government. Many of these women were married, and inquiries came to the Children's Bureau and to the Women's Bureau of the Department of Labor concerning types of work suitable for pregnant women and the policy of these Bureaus with respect to maternity leave.

In July 1942, after consultation with representatives of labor and with obstetricians and an expert in industrial hygiene, the Children's Bureau and Women's Bureau together issued a statement of standards for maternity care and employment of mothers, including maternity leave. Though it was found impossible to lay down hard-and-fast rules that would fit every situation, a general policy was agreed upon. The standards included provision for prenatal care, limitation of hours of work, rest periods, and exclusion from employment involving certain hazardous occupations.

A period of 14 weeks (98 days) maternity leave was recommended, 6 weeks before delivery and 8 weeks after, with extension beyond these periods on presentation of a physician's certificate that complications of pregnancy or the postpartum period made continued employment prejudicial to the health of mother or child.

The bill that is before us provides for maternity leave with pay for 60 days within any period of 12 consecutive calendar months and does not require that an applicant for maternity leave shall use sick leave or annual leave for this purpose.

Except that the period of 60 days is shorter than the period recommended by the Children's Bureau and the Women's Bureau, the provisions of this bill would appear to be satisfactory from a health point of view. The continuation of full pay during the period of maternity leave would give assurance of financial security and relief from anxiety that is so important for mothers who find it necessary to work during pregnancy. The preservation of sick leave and annual leave to meet the needs of the mother if she is sick early in pregnancy or in case of prolonged incapacity after the expiration of the maternity leave would appear to be in the interests of returning the mother to good health before she must take up her work again.

Some difference of opinion may arise as to whether the period of maternity leave with pay for Government workers who are allowed 26 days of annual leave and 15 days of sick leave should be the same length as the period recommended for workers in industry. If the mother working for the Government is expected to use her sick and annual leave for maternity leave, she would have only 8 weeks in all for this purpose. This not only falls short of the recommended amount, but deprives her of any additional leave in case of other sickness, either her own or that of her child. It is our opinion that 60 days of maternity leave with pay for Government workers is a minimum provision; it would be preferable to allow 90 days if the health of both mother and child is to be assured.

Finally, in considering the length of maternity leave that should be available to women workers, I would like to bring to the attention of this committee the recommendations of a committee on the health of women in industry of the section on obstetrics and gynecology of the American Medical Association, appointed in 1942 to study these and other questions relating to the employment of women.[1] This committee was composed of leading obstetricians of the country. As a result of their study, some conclusions were reached which were presented to the Fifth Annual Congress on Industrial Health in 1943. The recommendations of this committee state, in part:

"Normal pregnant women need reasonable activity, but when employment is necessary, stresses and strains should be eliminated. Continuance of employment is common practice in the first half of pregnancy or perhaps longer, depending on the woman's physical tolerance to the type of work. * * *

"The pregnant employee should not be employed after the thirty-second week of pregnancy (that is, within 6 weeks of term). It is believed that the discontinuance of employment in the last trimester would benefit many prospective mothers, if economic circumstances permit. * * *

"The patient should not return to work until 6 weeks after delivery and then only when her physician notifies the employer that she may return. If her return to work at 6 weeks is inadvisable because of her own condition or because her baby actually needs her at home, she should request further extension of time."

[1] Journal of the American Medical Association.

Mr. LANGER. Mr. President, I was impelled to say what I have said this afternoon by reason of the almost unanimous testimony of the following persons in favor of the bill:

Rear Adm. Paul B. Niebecker, director of industrial relations for the Navy; Judge Fay Bentley; Miss Gehri, superintendent of the House of Mercy; Col. Charles I. Stengle, representative, American Federation of Government Employees; the United Public Workers of America; Dr. John W. Cronin, chief of Federal Employment Section, Public Health Service of Federal Security Agency; Miss Linda Woods, Columbia Hospital; Dr. J. Bay Jacobs, clinic director of obstetrics, Bureau of Maternal and Child Welfare, District Health Department; Dr. H. J. Davis, clinic director of pediatrics, Bureau of Maternal and Child Welfare, District Health Department; Mrs. R. M. Kendrick, executive secretary, National Association of Colored Women; Miss Plunkett, Women's Bureau, Department of Labor; Miss Fairchild, International Labor Organization; Dr. Martha Elliott, Children's Bureau, Federal Security Agency; Mr. Mason, American Federation of Labor; Mrs. Delia Maulding, Department of the Interior; Maj. Humber L. Rivas, chief of obstetrics, Office of the Surgeon General; Dr. Goldstein, group health.

I may say, Mr. President, that at quarter of 2 today, the President's personal physician at the White House, Dr. Graham, began testifying, and I understand that his testimony is in favor of the passage of the bill.

I repeat, Mr. President, that I am taking this rather unusual step so that all Members of the Senate may have an opportunity to familiarize themselves with the subject by reading the testimony of two witnesses who I consider are among the most able of those who have testified. Both pieces of testimony are very short.

EXECUTIVE SESSION

Mr. TAFT. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. TOBEY:

From the Committee on Banking and Currency:

M. S. Szymczak, of Illinois, to be a member of the Board of Governors of the Federal Reserve System for a term of 14 years from February 1, 1948 (reappointment).

From the Committee on Interstate and Foreign Commerce:

Isaac N. P. Stokes, of the District of Columbia, to the position of Solicitor, Department of Commerce.

The PRESIDENT pro tempore. If there be no further reports of committees, the clerk will state the nominations on the calendar.

UNITED NATIONS

The legislative clerk read the nomination of Maj. Gen. Hubert Reilly Harmon, Air Force of the United States, to be senior Air Force member of the Military and Naval Staff Committee of the United Nations, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

ADVISORY AND PLANNING GROUP IN GREECE

The legislative clerk read the nomination of Maj. Gen. James Alward Van Fleet, O3847, United States Army, to be Director, Joint United States Military Advisory and Planning Group in Greece, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

DEPARTMENT OF THE NAVY

The legislative clerk read the nomination of Rear Adm. Edwin D. Foster to be Paymaster General and Chief of the Bureau of Supplies and Accounts.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

THE ARMY

The legislative clerk proceeded to read sundry nominations in the Army.

Mr. TAFT. I ask that the Army nominations be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the Army nominations are confirmed en bloc.

THE AIR FORCE

The legislative clerk proceeded to read sundry nominations in the Air Force.

Mr. TAFT. I ask that the nominations in the Air Force be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the Air Force nominations are confirmed en bloc.

THE NAVY

The legislative clerk proceeded to read sundry nominations in the Navy.

Mr. TAFT. I ask that the nominations in the Navy be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations in the Navy are confirmed en bloc.

THE MARINE CORPS

The legislative clerk proceeded to read sundry nominations in the Marine Corps.

Mr. TAFT. I ask that the nominations in the Marine Corps be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the Marine Corps nominations are confirmed en bloc.

Mr. TAFT. I ask that the President be immediately notified of all nominations confirmed today.

The PRESIDENT pro tempore. Without objection, the President will be immediately notified.

RECESS TO FRIDAY

Mr. TAFT. Mr. President, as in legislative session, I move that the Senate take a recess until next Friday at noon.

The motion was agreed to; and (at 1 o'clock and 53 minutes p. m.) the Senate took a recess until Friday, February 20, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 18 (legislative day of February 2), 1948:

DIPLOMATIC AND FOREIGN SERVICE

R. Borden Reams, of Pennsylvania, for appointment as a Foreign Service officer of class 2, a consul, and a secretary in the diplomatic service of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 3, consuls, and secretaries in the diplomatic service of the United States of America:

Myron L. Black, of Pennsylvania.
Charles P. O'Donnell, of Illinois.
Thomas K. Wright, of Rhode Island.

The following-named persons for appointment as Foreign Service officers of class 4, consuls, and secretaries in the diplomatic service of the United States of America:

Frederick H. Awalt, of Maine.
Neill M. Coney, Jr., of Georgia.

The following-named persons for appointment as Foreign Service officers of class 6, vice consuls of career, and secretaries in the diplomatic service of the United States of America:

Ralph A. Jones, of Pennsylvania.
Robert J. MacQuaid, of Pennsylvania.

PUBLIC HOUSING COMMISSIONER

John Taylor Egan, of New York, to be Public Housing Commissioner.

UNITED STATES PUBLIC HEALTH SERVICE

The following-named candidates for promotion in the Regular Corps of the Public Health Service:

ASSISTANT SURGEONS TO BE TEMPORARY SENIOR ASSISTANT SURGEONS (EQUIVALENT TO THE ARMY RANK OF CAPTAIN)

Daniel Shapiro
Clyde H. Dabbs, Jr.
Edmund V. Cowdry, Jr.
Robert B. Neu
John P. Lombardi

IN THE MARINE CORPS

James J. Gorman, a citizen of Pennsylvania, to be a second lieutenant in the Marine Corps.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 18 (legislative day of February 2), 1948:

UNITED NATIONS

Maj. Gen. Hubert Reilly Harmon, Air Force of the United States, to be senior Air Force member of the Military and Naval Staff Committee of the United Nations, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947.

ADVISORY AND PLANNING GROUP IN GREECE

Maj. Gen. James Alward Van Fleet, O3847, United States Army, to be Director, Joint United States Military Advisory and Planning Group in Greece, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947.

DEPARTMENT OF THE NAVY

Rear Adm. Edwin D. Foster to be Paymaster General and Chief of the Bureau of Supplies and Accounts in the Department of the Navy, with the rank of rear admiral, for a term of 4 years.

IN THE ARMY

APPOINTMENTS IN THE NATIONAL GUARD OF THE UNITED STATES OF THE ARMY OF THE UNITED STATES

To be brigadier generals of the line

Frank Allen
George Griffin Finch
Leonard Ewing Thomas

AIR FORCE

APPOINTMENTS IN THE UNITED STATES AIR FORCE TO THE GRADES INDICATED, UNDER THE PROVISIONS OF TITLE V OF THE OFFICER PERSONNEL ACT OF 1947, WITH DATE OF RANK TO BE AS ESTABLISHED UNDER THE PROVISIONS OF THE AFORE-MENTIONED TITLE

To be major generals

William E. Kepner
St. Clair Streett
Muir Stephen Fairchild
Ennis Clement Whitehead
Nathan Farragut Twining
Idwal Hubert Edwards
Grandison Gardner
Franklin Otis Carroll
Charles Carl Chauncey
Kenneth Bonner Wolfe
Clements McMullen
Howard Arnold Craig
Hubert Reilly Harmon
Willis Henry Hale
James Pratt Hodges
Robert Morris Webster
Thomas Dresser White
Benjamin Wiley Chidlaw
Frederick William Evans
Paul Langdon Williams
Lauris Norstad
Curtis Emerson LeMay
Edward Michael Powers

To be brigadier generals

Edwin Bowman Lyon
Adlai Howard Gilkeson
Harold Mark McClelland
Thomas James Hanley, Jr.
Robert LeGrow Walsh
Eugene Lowry Eubank
Caleb Vance Haynes
Fred Sidney Borum
Frederick Mercer Hopkins, Jr.
Orvil Arson Anderson

Robert Merrill Lee

IN THE NAVY

Rear Adm. Oscar C. Badger, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as Commander, Naval Forces, Western Pacific.

Rear Adm. Cato D. Glover, Jr., for permanent appointment to the grade of rear admiral in the Navy.

Rear Adm. Henry R. Oster, for permanent appointment to the grade of rear admiral in the Navy.

IN THE MARINE CORPS

APPOINTMENTS TO THE PERMANENT GRADE IN THE MARINE CORPS

To be major generals

Alfred H. Noble
Graves B. Erskine

To be brigadier generals

Edward A. Craig
Thomas J. Cushman

HOUSE OF REPRESENTATIVES

THURSDAY, FEBRUARY 19, 1948

The House met at 12 o'clock noon.

Rev. Father Arthur J. Hagan, St. Cecilia's Church, Boston, Mass., offered the following prayer:

In the name of the Father, and of the Son, and of the Holy Ghost. Amen. Almighty and eternal God, we lift our hearts and minds to Thee in prayer. We believe in Thee; we hope in Thee; and we love Thee above all things, with our whole heart and soul. Because Thou art infinitely good and worthy of all love, have compassion on us all, Thy servants, and grant us wisdom and understanding that we may know Thy holy will, and grant us courage and fortitude to do Thy will. We beseech Thee to grant that we, as a nation and a people, will continue to help our less fortunate brothers and sisters in other lands; that we may ever keep in mind that the Eternal Father, our God, is the Creator of all men, regardless of race, creed, or color; that Jesus Christ, our Saviour, died upon the cross for the redemption of all mankind. Enkindle in our hearts, dear Jesus, a burning desire to love Thee more ardently, to serve Thee more faithfully, and to love our neighbor out of love for Thee; that we here in America, by our adherence to Thy law and our way of life, may be forever an inspiring ray of hope to a war-torn and confused world that is clouded in despair and fear. This we ask in the name of the Father, and of the Son, and of the Holy Ghost. Amen.

The Journal of the proceedings of Tuesday, February 17, 1948, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On February 18, 1948:

H. R. 422. An act for the relief of Francesco and Natalia Picchi;

H. R. 648. An act for the relief of Mrs. Elfreida Sakowsky Passant, alias Elfreida Sakowsky, alias Elfreida Pogue;

H. R. 650. An act for the relief of Ruston Jamsetji Patell;

H. P. 928. An act for the relief of Riyoko Patell;

H. R. 1078. An act for the relief of Mrs. Audrey Ellen Gooch;

H. R. 1408. An act for the relief of August W. Dietz;

H. R. 1650. An act for the relief of Maria Hedwig Feresz;

H. R. 1788. An act for the relief of the estate of John F. Hopperton, a minor, deceased;

H. R. 2350. An act for the relief of Mrs. Daisy Park Farrow;

H. R. 3168. An act for the relief of Antone G. Pina;

H. R. 3778. An act to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25); and

H. R. 4115. An act to quiet title and possession with respect to certain land in the town of Cheverly, Prince Georges County, Md.

On February 19, 1948:

H. R. 1634. An act to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 42. Concurrent resolution establishing the ceiling for expenditures for the fiscal year 1949 and for appropriations for the fiscal year 1949 to be expended in said fiscal year.

The message also announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 122. An act to authorize the sale of certain lands of the L'Anse Band of Chippewa Indians, Michigan; and

S. 1133. An act providing for the per capita payment of certain moneys appropriated in settlement of certain claims of the Indians of the Fort Berthold Indian Reservation in North Dakota.

EXTENSION OF REMARKS

Mr. HALLECK asked and was given permission to extend his remarks in the RECORD and include radio addresses by certain persons.

Mr. HARNESS of Indiana asked and was given permission to extend his remarks in the RECORD and include an address he delivered on February 12.

Mr. BOGGS of Delaware asked and was given permission to extend his remarks in the RECORD on the subject of volunteer firemen.

Mr. FOOTE asked and was given permission to extend his remarks in the RECORD in two instances and include in one a letter received from a resident of Meriden, Conn., and in the other a tabulation setting forth the cost of the foreign aid program to the 16 towns composing the Third Congressional District of Connecticut.

Mr. HESELTON asked and was given permission to extend his remarks in the RECORD and include certain tabulations.

Mr. BENNETT of Missouri asked and was given permission to extend his remarks in the RECORD and include a speech by Senator BALDWIN.

Mr. STEFAN asked and was given permission to extend his remarks in the RECORD and include a chapter from Mr. Hull's book.

Mr. CLASON asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. JAVITS asked and was given permission to extend his remarks in the RECORD and include a resolution.

Mr. MEYER asked and was given permission to extend his remarks in the RECORD and include an address by Senator MARTIN, of Pennsylvania, at a meeting of the Lincoln Day Club in his district on February 12.

Mr. BREHM (at the request of Mr. MCCOWEN) was given permission to extend his remarks in the RECORD and include a speech.

Mr. ANDREWS of New York asked and was given permission to extend his remarks in the RECORD and include a Lincoln's Day address.

Mr. SEELY-BROWN asked and was given permission to extend his remarks in the RECORD and include a speech by Hon. ELLSWORTH BISHOP FOOTE.

Mr. JUDD asked and was given permission to extend his remarks in the RECORD in three instances and include in each some printed material.

Mr. REED of New York asked and was given permission to extend his remarks in the RECORD in three instances and include extraneous matter.

Mr. PLOESER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an address delivered by our distinguished Speaker in Missouri recently.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. MCDONOUGH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a statement recently made by Mr. Joseph Scott before the Senate Foreign Relations Committee.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. JENISON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an address delivered by Miss Jessie Sumner. I am informed by the Public Printer that this will exceed two pages of the RECORD and will cost $213, but I ask that it be printed notwithstanding that fact.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

COMMITTEE ON MERCHANT MARINE AND FISHERIES

Mr. WEICHEL. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until midnight Saturday to file a report.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

SUPPLEMENTAL REPORTS

Mr. WELCH. Mr. Speaker, I ask unanimous consent to file supplemental reports on the bills H. R. 3628, H. R. 4272, and H. R. 4515.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that the special order granted me for today be transferred to Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

WHEN IS AN EMBARGO NOT AN EMBARGO?

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, yesterday morning most of you undoubtedly read the A. P. dispatch under the headline, "United States gas and oil exports halted."

If you read the body of the dispatch, it was immediately clear that it was not the exports which had been halted, but rather the issuance of all export licenses—a completely futile gesture, because the licenses already in existence could be used to drain off vitally needed fuel oil.

The worst of the situation was that our neighbors had indicated that they would be glad to accept an actual reduction in the amount of 50,256,544 gallons of all kinds of fuel oil and gasoline, including motor and aviation gas. This was 1,198,036 barrels.

Responsible witnesses have testified before the House Interstate and Foreign Commerce Committee that an export license is not used for a period of several days and sometimes for as much as 2 weeks. So this definitely was not the effective action taken on the east coast recently which resulted in turning an anticipated deficit into a substantial reserve by March 31.

It is impossible to justify this continually hesitating and inadequate action by the Department which is specifically charged by law with the wise exercise of those controls.

This morning testifying before the House Interstate and Foreign Commerce Committee, Mr. John Boatwright, one of the foremost economists in the oil industry, stated that if the Midwest could receive half of this amount of fuel oil and the North Atlantic ports the remaining half, barring a major catastrophe, he would guarantee that that would get us through the rest of the heating season in those shortage areas. When I inquired what his affiliated companies and others would do with this oil if shipments were halted for 48 hours, he said the answer was obvious, that they could not afford to tie up their tankers and tank cars, and would send them to domestic destinations. I then prepared a telegram addressed to Mr. Blaisdell, and having in mind that the Review Committee was undoubtedly in session, I asked Mr. Boatwright to pass upon it. He said that, if my figures were correct, it was a sound suggestion, and he approved of the telegram. I assured him that the figures were Department of Commerce figures. The full message was at once telephoned to Mr. Blaisdell's office with the request it be transmitted to him immediately. Then the telegram was sent.

During the course of the afternoon I received word that Mr. Blaisdell was sending me a telegram. The telegram arrived at the end of the afternoon. It is included herewith.

It is quite obvious to anyone that 599,000 multiplied by 2 equals 1,198,000. Therefore, if one disregards the odd amount of 36 gallons, what was done was to take one-half of the offered reduction and release for shipment the other half. Stated another way, 25,158,000 gallons were obtained and can now be loaded on tankers going overseas which cannot be retrieved. A T-2 carries approximately 130,000 gallons, which means a little over four voyages to carry 599,000 gallons. If those four voyages start from the Gulf and west coast for Asia, Africa, Europe, Australia, or New Zealand we can face the possibility of a 50-percent shortage at home, when these very countries have told our responsible authorities that they could get along without this fuel oil and would be perfectly willing for us to have it.

I therefore prepared another brief telegram calling for an embargo of shipments, not of issuing licenses, until Monday night. I do not know whether the Department has granted it, but I do know that the Department understands it is the practically unanimous demand of the New England House delegation that every New England Senator whom I could reach has joined, and that I confidently believe that the entire delegations of the Atlantic seaboard and Northwest States will join in that demand before tomorrow night. If the Department chooses to ignore this kind of a serious request, the responsibility is entirely its own, and it alone must be made to answer to anyone who suffers by such an inexplicable and unjustifiable act. I, also, sent a short wire to the port directors at Long Beach, Stockton, Los Angeles, and Vallejo, in California; Port Arthur, Beaumont, Corpus Christi, Brownsville, and Port Isabel, in Texas; Lake Charles and New Orleans, in Louisiana; Gulfport, in Mississippi; Mobile, in Alabama; and Tampa, Jacksonville, Pensacola, Panama City, Port St. Joe, and Carrabell, in Florida. I am informed that these are the shipping points on the Gulf and west coast. I hope to have full information here by Monday so I can submit it to the Department and so it can never state that it could not have done the one thing necessary—permit the domestic voyages of these loaded tankers in the face of assigned destinations overseas. It needs no powers of allocations or other form of control and no amount of shadow boxing or intellectual dishonesty can stand the test of the direct, practical, and sensible testimony of Mr. John Boatwright.

I also include, for the information of the Members, a tabulation of the reductions which were indicated as possible by these several countries and the full story of the gyrations of the Department of Commerce on February 17, as reported over the Associated Press teletype. You will note that the Associated Press very properly carried a bulletin to all editors, asking for the withholding of the publication of night lead oil A22WX, and stating the Commerce Department had withdrawn a stop order and a substitute story was being prepared. Anyone who reads the original dispatch will note that the identical order was entered within a very short time. One inference, of course, is that someone in the Commerce Department was attempting to use a responsible news service to attempt to sound out public opinion through publication in the first editions and perhaps to lull the public who read the first editions into believing shipments had been stopped to save fuel for American households. The description of the day's efforts of the Department as a "climatic step" might be better described as a "clown-matic step."

I submit that a very heavy responsibility for a worsening condition will rest squarely on the shoulders of those who could have prevented the condition but have not done so. In fact, I still think that the only safe course is for us to order an embargo by legislation, at least to the extent of reducing quotas that the countries themselves have stated were acceptable to them. Our failure to do this may well be considered by any impartial person that we, too, are then responsible for any unfortunate situation which may arise throughout the remainder of this heating season.

FEBRUARY 19, 1948.

THOMAS C. BLAISDELL, Jr.
Director of Office of International Trade,
Department of Commerce,
Washington, D. C.:

Text of Associated Press dispatch confirmed by telephone report from Department yesterday indicated 48-hour order related only to suspension of issuance of licenses and not prohibition of shipments during that period. As I indicated this was not my suggestion and is not in conformity with the existing embargo of any shipments from east coast ports. In view of news accounts that this form of relief has been one major factor in changing an estimated deficit March 31 on east coast of about 2,000,000 barrels to a surplus of 5,029,000 barrels, it seems to me most wise to use this practical method of building further reserves on east coast.

Mr. Boatwright has just endorsed this suggestion substantially.

Please advise at once whether you will do this now. Understand review committee was in session yesterday on quota revisions. Please advise them of this testimony.

JOHN W. HESELTON.

WASHINGTON, D. C., *February 19, 1948.*

Hon. JOHN W. HESELTON,
House of Representatives:

In reply to your telegram this date, Commerce Department has made no modification previously announced policy of issuing no licenses for export from east-coast ports. Only modification in operations is the reduction in amounts to be licensed to conform with advice from United States Embassies abroad, which is being announced today.

THOMAS C. BLAISDELL, Jr.,
Director, Office of International Trade.

WASHINGTON, D. C., *February 19, 1948.*

Mr. THOMAS C. BLAISDELL, *Director,*
Office of International Trade,
Department of Commerce,
Washington, D. C.:

Request embargo shipment petroleum and petroleum products from Gulf and west coast to Monday night pending receipt information.

CHARLES A. WOLVERTON, Chairman,
House Committee on Interstate and Foreign Commerce; WILSON D. GILLETTE; OREN HARRIS; JOSEPH P. O'HARA; J. PERRY PRIEST; MARION T. BENNETT; HARRIS ELLSWORTH; ROBERT HALE; WILLIAM J. MILLER; HUGH D. SCOTT, JR.; JAMES I. DOLLIVER; EDWARD J. ELSAESSER; DWIGHT L. ROGERS; JOHN B. BENNETT; FRED E. BUSBEY; HENDERSON H. CARSON.

WASHINGTON, D. C., *February 19, 1948.*
Mr. THOMAS C. BLAISDELL, *Director,*
Office of International Trade,
Department of Commerce,
Washington, D. C.:

Request embargo shipment petroleum and petroleum products from Gulf and west coast to Monday night pending receipt information.

JOSEPH W. MARTIN, JR., GEORGE G. SADOWSKI, ROBERT HALE, MARGARET CHASE SMITH, FRANK FELLOWS, CHESTER MERROW, NORRIS COTTON, CHARLES A. PLUMLEY, JOHN E. FOGARTY, ANTONI N. SADLAK, WILLIAM J. MILLER, ELLSWORTH B. FOOTE, JAMES T. PATTERSON, CHRISTIAN A. HERTER, CHARLES R. CLASON, JOHN F. KENNEDY, PHILIP J. PHILBIN, HAROLD D. DONOHUE, EDITH NOURSE ROGERS, GEORGE J. BATES, THOMAS J. LANE, ANGIER L. GOODWIN, DONALD W. NICHOLSON, RICHARD B. WIGGLESWORTH, JOHN LODGE, JOHN W. HESELTON, Members of Congress.

WASHINGTON, D. C., *February 19, 1948.*
Mr. THOMAS C. BLAISDELL,
Director, Office of International Trade, Department of Commerce, Washington, D. C.:

Request embargo shipment petroleum and petroleum products from Gulf and west coast to Monday night pending receipt information.

Senator STYLES BRIDGES,
New Hampshire.
Senator OWEN BREWSTER,
Maine.
Senator LEVERETT SALTONSTALL,
Massachusetts.
Senator RAYMOND E. BALDWIN,
Connecticut.
Senator HENRY CABOT LODGE,
Massachusetts.
JOHN DAVIS LODGE,
Member of Congress.

WASHINGTON D. C., *February 19, 1948.*
DIRECTOR OF PORT,
Houston, Tex.:

Please advise tankers with their capacity, name, and destinations, and type of petroleum and petroleum products loaded since Monday, or to be loaded by next Monday, inclusive.

JOHN W. HESELTON,
Member of Congress.

FEBRUARY 19, 1948.
THOMAS C. BLAISDELL, Jr.,
Director, Office of International Trade,
Washington, D. C.:

Received your reply to my telegram of this noon and from press release note total reduction of 599,000 barrels. Have not received country-by-country revised allocations. Shall appreciate having 30 as soon as possible. Several points crystal clear. That reduction does not conform with advice of United States Embassies abroad by 499,036 barrels. That advice of Mr. Boatwright is completely ignored when he said full 1,118,000 barrels minimum needed to avoid shortages for rest of heating season. That review committee and Department has again chosen to disregard the solemn offers of our neighboring countries to reduce their allotments after Secretary Marshall's request for consultations "to determine what further reductions in the revised first-quarter petroleum allocations can be achieved without probable serious economic disruption." That Office has again chosen to ignore not only my request but the requests of a substantial majority of the House Committee on Interstate and Foreign Commerce—all on that committee available today—of all but two, at least of the New England delegation in the House, of six New England Senators. I hope to forward similar requests to you tomorrow from other States. Please advise in detail by tomorrow night the full reasons for this 50-percent reduction in the face of carefully estimated replies to Secretary Marshall's cables whether another review and additional 50-percent reduction can be made by Saturday night; also, please forward minutes or attested copy of minutes of all meetings dealing with reductions since January. With reference to repeated statement that Department has no power to direct shipments, please reconcile with testimony of Mr. Boatwright today that if shipping embargo ordered today to oversea points major companies would not permit tankers to remain idle and would ship to east coast. I am canvassing Gulf and west coast loading points to locate tankers to carry additional 599,036 barrels to east coast. In view of Mr. Boatwright's assurance this would prevent any shortage east coast and Midwest for balance of heating season, will you permit shipping embargo to remain only until sufficient tankers sail for east coast to carry this amount of heating oil.

JOHN W. HESELTON,
Member of Congress.

Bulletin, night lead oil:

"WASHINGTON, February 17 (AP).—The Commerce Department tonight stopped granting export licenses for gasoline and fuel oil for 48 hours, effective at once."

Bulletin matter, Washington first add night lead oil at once:

"The embargo will permit officials to scan foreign oil needs. It may result in a further cut in export quotas, to save oil for fuel-starved American homes.

"The Department already has cut oil export quotas for this quarter by 27 percent. An embargo on shipments from the east coast, the worst shortage area, also is in effect."

Washington, second add night lead oil in effect:

"The new shut-down on licensing will apply to west coast and Gulf ports as well, a Department spokesman said. It probably will not halt shipments already at shipside or in transit, he reported, but this question has not been finally settled.

"The Department has asked United States Embassies overseas to find out if foreign countries can get along with less oil. The embargo on new export licenses will permit Commerce officials to study the replies and take action accordingly, the spokesman said.

"Representative HESELTON, Republican, Massachusetts, announced on the House floor that the foreign countries agreed to take less.

"This, he said, will mean several million more barrels of oil for American householders.

"The earlier cut in export quotas, announced January 30, reduced the planned foreign shipments by 3,700,000 barrels for the January-February-March quarter."

Bulletin. Editors:

"WASHINGTON.—Please withhold publication of night lead oil. The Commerce Department has withdrawn the stop order. A substitute story is being prepared.

"THE AP."

Bulletin, sub night lead oil:

"WASHINGTON, February 17 (AP).—The Commerce Department tonight announced that a new slash in oil export quotas may be announced tomorrow, to save fuel for American households."

Bulletin matter, Washington, first add sub night lead oil households:

"The Department yanked back, at the last moment, an order halting the issuance of all gasoline and fuel-oil export licenses for 48 hours.

"The embargo on licenses already had been released for publication by a Department spokesman when the contrary decision was made.

"The Department has queried United States embassies abroad to find out whether foreign countries can get along with less American oil.

"The licensing embargo was planned to give the Department time to study the replies, a spokesman said.

"Representative HESELTON, Republican, Massachusetts, announced on the House floor that the foreign countries agreed to reduced shipments.

"This, he said, will mean several million more barrels for householders on the oil-starved east coast and other sections.

"An earlier cut in the official export quota chopped the planned first-quarter shipments from 11,850,000 barrels to 9,650,000 barrels. A deep slash in shipments to Japan brought the total savings to 3,700,000 barrels."

Second night lead oil:

"WASHINGTON, February 17 (AP).—The Commerce Department tonight halted the issuance of all export licenses for gasoline and fuel oil for 48 hours.

"Before Friday a new cut in export quotas probably will be announced, a Department spokesman said, to save oil for chilly American homes.

"The decision was announced after two false starts. Shortly after 5 p. m., eastern standard time, the Department told reporters of the temporary license suspension.

"Within half an hour an information official notified reporters that the suspension had been called off. Instead, he said, an announcement of a cut in quotas was being prepared. Then—in another half hour—the Department officially announced that the suspension was in force.

"The cut-off of licensing will permit officials to scan foreign-oil needs. American embassies abroad have been queried and a good many replies have been received.

"They indicate, a spokesman said, that foreign governments can stand another cut in oil deliveries. Shipments to 30 or more countries were slashed by 3,700,000 barrels on January 30."

Washington, first add second night lead oil, January 30:

"The new order will not halt oil which is at shipside or already in transit.

"Before the Commerce Department had made up its mind, Representative HESELTON, Republican, of Massachusetts, announced on the House floor that the foreign countries had agreed to take less oil.

"Later, he told reporters that cables so far received from the embassies indicated a saving of 21,500,000 gallons of fuel oil and kerosene alone for American consumers, or about 500,000 barrels. Gasoline savings also may be possible, he said.

"HESELTON asked an outright embargo on all shipments, rather than the suspension of licenses. He said the Department would be derelict in its duty if it did not take immediate steps to save the 21,500,000 gallons.

"The license cut-off was a climactic step in the Department's effort to cope with vast oil demands growing out of an almost Nation-wide cold spell.

"A week ago all shipments were halted from the east coast, the worst shortage area. That order did not block shipments from west coast and Gulf ports, however.

"The new action bars licenses for shipment from any port. When it is lifted Friday morning, the spokesman said, the east-coast embargo will remain in force. It is due to run to March 31."

Washington, second add second night lead oil, March 31:

"Other developments came along to cheer chilly householders:

"An Italian decision to let this country use 10 tankers to bring in Caribbean oil was announced by the Maritime Commission.

"Italy has bought the United States-built vessels, but they are still in the Commission's laid-up fleet. Delivery of six other tankers to Italy will be delayed.

"Two oil-company presidents forecast improving supplies, in testimony before the House Interstate Commerce Committee.

"M. J. Rathbone, head of Esso Standard Oil Co., said it appears the oil industry will meet the fuel situation this winter without too much hardship. 'The surest way to get a greater supply of oil over the long term is to let the law of supply and demand and price work freely,' he said.

"Robert G. Dunlop, president of Sun Oil, testified that recent price boosts for crude oil will spur production. But he said there has been a vast increase in the number of oil burners in the Nation. 'Oil cannot heat all homes in the country,' he warned.

"He suggested that oil rapidly is becoming too valuable to be burned in furnaces and under boilers and that part of the load should be shifted to natural gas.

"A suggestion to prevent more oil worldwide shortages in future winters came from the House Committee on Foreign Aid. It proposed that foreign nations build fewer cargo ships and more tankers.

"The trans-Arabian pipe line should be finished quickly, the committee's report said. It urged speedy expansion of pipe lines in this country.

"Meanwhile, leaders of the soft-coal industry met here and agreed to set up an advisory council to help the Interior Department on fuel problems. The 16 producers will meet March 16 to organize formally.

"Secretary Krug urged the group to seek solutions to the shortage of coal cars and coal-mining equipment."

EXCISE TAX ON SHEEP OR LAMB PELTS

Mr. D'EWART. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. D'EWART. Mr. Speaker, the excise tax on furs at the present time is 20 percent, and there was collected last year by this tax $99,000,000. While the Treasury Department was not able to segregate what is commonly known as fur from products made from the hide or pelt of sheep or lambs, it is known that the hide of these animals is sold in the form of fur coats and other wearing apparel as mouton, karakul, sealskin, lambskin, and beaver. This is done even though the base product is the hide of a sheep or lamb.

The number of sheep in this country has decreased over the last 5 years from 49,000,000 to 33,000,000. Recently at Geneva the excise tax on sheep and lamb hides was drastically cut. All this adds up to the end of the sheep business, a basic industry of the West, if something is not done.

In a bill which I am introducing today I propose to eliminate the 20-percent excise tax from products made of the hide or pelt of sheep or lambs. I hope I can have the support of all who wish to save this industry in the passage of this legislation.

SERVICEMEN'S READJUSTMENT ACT

Mr. MILLER of Connecticut. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MILLER of Connecticut. Mr. Speaker, on February 3, I reluctantly cast my vote against passage under the suspension of the rules of two bills increasing the benefits to veterans under the Servicemen's Readjustment Act of 1944. There were several reasons for the conclusion I reached and I stated those reasons in the RECORD of February 4. For one thing, I wanted to register my opposition to passing bills of such far-reaching importance and involving hundreds of millions of dollars without ample debate and without having an opportunity to suggest amendments. It was my contention that the Servicemen's Readjustment Act could be so amended that certain abuses that have developed since these bills came out of committee would be eliminated and sufficient funds saved to pay an increased subsistence allowance to those continuing their training.

According to the Washington Star of February 17, the wording of the new law passed by Congress to increase subsistence allowances has brought about conflicting interpretations. Now, the Veterans' Administration declares that the new increases will not apply to those trainees taking farm training, even though part of it is in colleges. The Veterans' Administration also lists other groups of trainees that will be excluded from the increased allowances.

If there had been adequate debate and consideration given to these bills, we would not have today so many conflicting interpretations. The question of including the on-the-farm trainees was referred to by the gentleman from Kentucky [Mr. MEADE], author of the bill. He is quoted on page 1002 of the RECORD of February 3 as stating that, as far as he was concerned, the on-the-farm trainees were included in the bill. According to the author of the bill, that was the understanding of the subcommittee which approved the bill.

I hope in the future we can have ample time to consider all veterans' legislation and not permit our hearts to run away with our heads.

EXTENSION OF REMARKS

Mr. COLE of Missouri asked and was given permission to extend his remarks in the RECORD and include an editorial from the St. Joseph News-Press entitled "Timely Observations."

Mr. ROSS asked and was given permission to extend his remarks in the RECORD and include an article from the Christian Science Monitor, and in another instance to include an article from the Washington Post, and in another instance to include a resolution which he introduced today.

Mr. RICH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an article from Women's League of Americanism. Three women were in my office this morning, and they wanted me to insert that in the Appendix of the RECORD, which it gives me pleasure to do.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD in two instances and include certain excerpts.

OREGON'S EIGHTY-NINTH BIRTHDAY

Mr. ANGELL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. ANGELL. Mr. Speaker, on February 14 Oregon celebrated its eighty-ninth birthday, having been admitted to the Union on Valentine's Day, 1859.

Being a native-born Oregonian, I am deeply interested in the early history of the State and the old Oregon Trail, which has been the subject of discussion by historians and others interested in our early history. My father and mother traveled the old Oregon Trail by ox team from Iowa to Oregon in 1852 and I have inherited their deep interest in the development of the West.

The so-called Oregon country has been subject to much change, as to the area covered, from early times until its admission into the Union as a Territory. Originally the name was applied to the land extending north and south of the Columbia River and west of the Rocky Mountains. Later it was restricted to the land lying between 54°40'' and 42° west of the Rocky Mountains. In 1846 the forty-ninth parallel became the northern boundary, although during the Polk campaign the slogan was "Fifty-four forty or fight."

This territory was variously claimed by Spain, Russia, Great Britain, and the United States. Spanish explorers were the first to see the Oregon coast and the Russians occupied the Alaskan Territory and their explorations extended south into California. The English, through various expeditions and fur traders, explored the area and made settlements therein. By the Treaty of Ghent at the close of the War of 1812, Great Britain and the United States agreed to restore to each other all places and territory captured during the war, and the British released under this treaty Fort George, now known as Astoria, which was a recognition of the United States claim to the Oregon country. Later, by negotiation, the forty-ninth parallel was established as the boundary between the

United States and the British possessions from the Lake of the Woods to the Rocky Mountains. In 1819 Spain gave up her claim to all territory north of the forty-second parallel, which is the present southern boundary of Oregon, and in 1824–25 in a treaty with the United States and Great Britain, Russia relinquished any claim to the territory south of 54°40''. This left the territory to the United States and Great Britain, which later was divided by agreement in accordance with the present boundary lines.

The migrations of settlers into the Oregon country began in 1841 and continued intermittently until the big trek in 1852. On August 13, 1848, Congress passed a law creating the Territory of Oregon, embracing all the country between the forty-second and forty-ninth parallels from the Rocky Mountains to the Pacific. This definitely fixed the limits of Oregon. The following year the Territorial government was put into operation.

Too much credit cannot be given to the intrepid pioneers of a century ago who traversed the vast expanses of wild country separating the Oregon country from what was then the occupied United States. Their fortitude and courage and loyalty to the United States resulted in claiming and holding for us this great northwestern area which has become such an important part of continental United States and which has played such an important role in the preservation and security of our country. Fitting recognition should be given to these pioneers for this great service now that a century has passed and their place in history is firmly established.

Mr. Speaker, the State of Oregon is on the threshold of great industrial development. Up until about 2 years ago the industry of the west coast was only about one-fifteenth of the Nation's production, but today it is expanding at a rate three times greater than the rest of the Nation. The Pacific Coast States are increasing in population more rapidly than any other section of the country. California leads in first place, with Oregon second and Washington third.

The west-coast area enjoys a high standard of living, it being estimated that the average Pacific State family is living at a level 17 percent higher than that of the rest of the Nation, and more than 40 percent of the population has an income greater than $3,000 per year, which is 25 percent above the rest of the country. It is an area of home owners where a larger percentage of the population own their own homes than is enjoyed elsewhere. This section has one-fourth of the hydroelectric power of the Nation, and in the Columbia River Basin there is over 50 percent of the potential hydroelectric energy of the entire United States.

The eyes of industrial America are on the Pacific Northwest and its production record. Here in this northwest empire, rich in natural resources, lies the 1,200-mile stretch of the Columbia River Basin—source of one-half of the Nation's hydroelectric power; the only point on the west coast where trade to the land-locked States of the interior is carried, at a sea-level route, through Portland, the only fresh-water port on the Pacific coast, 100 miles inland at the confluence of the Willamette and Columbia.

The area's new population has increased by 486,199 customers, newcomers who came to work and of whom 80 percent have indicated their desire to stay and live. New Pacific Northwest industries have proven in wartime their unlimited future in peace. Since 1940 new plywood, chemical, and metallurgical industries have been established near Portland, on the Columbia and Willamette Rivers, with investment in excess of $157,550,000.

Oregon takes pride in its national leadership in lumber, its diversified agriculture, its food-processing plants, its important wool and livestock markets, and the unprecedented number of new industries which will spring from our low-cost electric power and unlimited natural resources. From Oregon's natural wealth will come the stability that has always marked the Columbia Empire since the first wagon train hit the Oregon Trail.

Oregon enjoys an ideal climate for year-round living. It is boasted that we have in Oregon an air-conditioned climate with no extremes of temperature, with a yearly average of 53°. Its mountains, streams, and lakes are favorite areas for tourists, sportsmen, and vacationists. Steelhead trout and Royal Chinook salmon lure many sportsmen to our State from all sections of the country.

Mr. Speaker, the city of Portland, in my congressional district, is the distributing point for the Pacific Northwest. It is located on the Willamette River near its confluence with the Columbia, a little over 100 miles from the Pacific Ocean. It is the commercial center for an area of 328,000 square miles.

As a part of these remarks, I include an editorial which appeared in the Portland Oregonian on February 14, 1948, commemorating Oregon's eighty-ninth birthday:

"STATE ARRIVED BY HORSEBACK"

Oregon's birthday as a State falls on St. Valentine's Day. The poetically minded have never succeeded in giving Oregon the nickname of Valentine State. It is still known far and wide as the Beaver State. This February 14 is the eighty-ninth anniversary of Oregon's taking its place among the sovereign States of the Union. And as is their annual custom the Sons and Daughters of Pioneers have honored the occasion with banquet and oratory, in this instance on the eve of St. Valentine's Day.

Commonly, we do our big hurrahing over memorable events on decade anniversaries, or on twenty-fifth, fiftieth, and seventy-fifth birthdays and go all out on a centennial observance. This eighty-ninth birthday of Oregon takes on a reflected importance from the fact that later in the year we shall widely observe and celebrate the centennial of the creation of Oregon Territory.

By contrast with this and other years in which Oregon's birthday brought forth popular admiration of the progress made since statehood and words of confidence of advancement yet to come, the news that Congress had finally admitted Oregon to statehood was received with apathy by the people of the newly born Commonwealth in 1859.

The word of it did not reach Portland until March 15. It had come by overland stage from St. Louis to San Francisco and thence by the steamer *Brother Jonathan* to Portland.

Perhaps the languid interest shown was due to a surfeit of the issue by the people. They had in 1857 voted for statehood, after failures of the proposal in several elections, had adopted a constitution, and had formally elected John Whiteaker as governor and had chosen other State officers and a legislature. But these officials had retired into the background for the time being and the Territorial body, headed by Governor Curry, held the reins of government.

There was also some apprehension felt over the costs of a State government for so sparsely settled a region. Oregon's population (1860 census) was 52,416. Portland was a town of about 1,500. The Weekly Oregonian reported that there was some talk of a public celebration of statehood, embellished with suitable oratory, but the promoters were unable to raise the necessary "monish." There was some mild speculation as to when the new State government would take over, and as there was no telegraph line to Salem, it was thought it might be a week before the capital got the news. Governor Whiteaker, moreover, had retired to his farm near Eugene, where it might be a month ere word of it reached him.

But a young man of Oregon City decided to become an unwarlike Paul Revere to speed to Salem the news that the State was coming. He mounted his horse, and slogged through mud and forded streams, and reached Salem in 30 hours. Subsequently a letter from Salem printed in the Weekly Oregonian opened with the anouncement that "the State arrived here by horseback last Wednesday afternoon." There was no word in the letter of bell-ringing or whistle-blowing.

The Weekly Oregonian in March 1859 had been in existence a little over 8 years. Its owner and editor, T. J. Dryer, was skeptical and critical of statehood. Henry L. Pittock, who was to become the paper's long-time publisher and principal owner, and was to make it a daily in 1861, was in 1859 working on the paper for wages as a printer. Early in 1859, Harvey W. Scott, who was to become editor of the Oregonian and rise to national fame in that capacity, was at Oregon City "grubbing for roots under a tutor, so I might read Horace and Homer, and supporting myself by chopping cordwood." And his chopping was done with a borrowed ax.

These two were typical of large groups of pioneers who with naught but eager hands and innate ability seized opportunity in the new-born State to build not alone for themselves but for their children and their children's children, a land of plenty and of prosperity. And it would be rash to surmise that had statehood come a decade or more later than it did, Oregon's destiny would have been that much delayed. It is not political forms, if they do not trench upon liberty or free enterprise, that make a great commonwealth, but more positively the industry and the vision of its people, and the natural resources at their command. These we had in abundance.

Thus Admission Day is not only an event in itself to celebrate, but provides a theme upon which the Sons and Daughters of the Pioneers may build deserved recollections of the deeds of these forebears, and an occasion to recite again the honors due them.

BONNEVILLE DAM PROJECT A SOUND INVESTMENT

Mr. ANGELL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. ANGELL. Mr. Speaker, the Bonneville Power Administration has just announced that a special advance payment of $2,100,000 has been made to the account of the Bonneville Dam project. This is good news. It shows that Uncle Sam has a sound investment in the Columbia River dam projects. I intend to call this to the attention of the Appropriations Committee with jurisdiction over these projects when requests for funds for further Northwest resource developments are being considered. I want them to know that funds invested in the Columbia River Basin are gilt-edged.

It is gratifying to know that these great multiple-purpose projects are paying out ahead of the dates which were originally fixed for reimbursing the Federal Government for the moneys invested.

The surplus earnings to date, if continued, will result in a full repayment of the Bonneville Dam project 5 years ahead of schedule. Payments on the Columbia Basin project, namely, Grand Coulee, are also ahead of schedule, thereby making possible pay-out according to schedule despite the increased construction cost of the Grand Coulee facilities.

The Bonneville Dam project, which includes the dam, power houses, and accessory facilities constructed and operated by the Corps of Engineers, has, through the fiscal year 1947, received repayment, interest, and operating-expense credit on the books of the Treasury in the amount of $18,562,150.

About February 10, 1948, an additional advance payment of $2,100,000 was made on the books of the Treasury toward amortizing the cost of the power facilities of the Bonneville Dam project. This was made possible by a request by the Secretary of the Interior to the Secretary of the Treasury in accordance with the agreement between the Army engineers operating the Bonneville Dam and the Bonneville Administration, which is marketing the power. This $2,100,000 special additional or advance payment to the account of the Bonneville Dam project was an additional payment over and above the regular pay-out schedule payment of $3,119,850 for the year ending June 30, 1948. This special additional or advance payment was made possible by the fact that the power revenues from the Columbia projects exceed the estimates and are so running as to produce an annual surplus. The payments made from the Bonneville Administration to the Bonneville Dam project exceeded the minimum repayment requirements to the extent that as of January 1, 1948, repayments are $2,252,282 ahead of schedule requirements.

The revenues derived from the sale of power by Bonneville Power Administration, according to statute, are to be used to pay the operating expenses of the Bonneville Power Administration, the Army engineers operating the Bonneville Dam, and the Bureau of Reclamation operating the Grand Coulee Dam. In addition, out of these revenues are to be paid the annual amortization of the Federal investment in these three agencies and the annual interest charges on the unamortized investment balance. The bookkeeping on these three projects is handled by the Bonneville Power Administration and it is audited annually by independent outside commercial auditors. Based on such an audit is the pay-out schedule showing annual payments to fully cover all the cost items of the Federal investment.

Through the fiscal year 1947 the revenues derived from the sale of power amounted to $101,165,847. These revenues have been and will be deposited with the United States Treasury, and are, and will be, distributed on the books of the Treasury so that the interest and amortization investment account of the power facilities will always show the annual and cumulative contributions toward full interest and capital repayment, as well as meeting annual operating, maintenance, and replacement costs.

Power from the Bonneville and Grand Coulee Dams is transmitted over the transmission grid system of the Bonneville Power Administration, which serves the major load centers of the States of Oregon and Washington. The power sales are presently running at an annual rate of about $22,100,000. The additional generators brought in at the Grand Coulee Dam between 1948 and 1952 will increase the annual power revenues to approximately $30,000,000, with total revenues in excess of $270,000,000 during the next 10 years.

These results show what can be accomplished if abundant, firm, and low-cost power is available for resource development.

I include as a part of these remarks the release made on February 12, 1948, by the Bonneville Power Administration, giving notice of this special advance payment of $2,100,000 to the account of the Bonneville Dam project, which, as stated therein, is in addition to the regularly scheduled payment of $3,119,850 for the year ending June 30, 1948, which will be made to cover the year's operating expenses, interest expense, and scheduled amortization of the project:

BONNEVILLE DAM REPAYMENT 5 YEARS AHEAD OF SCHEDULE

Complete repayment of the power costs of Bonneville Dam 5 years ahead of schedule was made possible today when the Bonneville Power Administration made an advance payment of $2,100,000 toward the cost of amortizing the investment in the power facilities of the project.

Paul J. Raver, Administrator, said that while the payment represented only approximately 2 years amortization of construction costs, interest savings and a continuation of the regularly scheduled payments over the remainder of the scheduled repayment period ending in 1994, actually made possible the liquidation of the debt by 1989.

The Administrator said that the Bonneville Dam payment, made through transfer of funds from power administration surplus as a result of a request by the Secretary of the Interior to the Treasury Department in accordance with an agreement with the Army engineers, operators of Bonneville Dam, placed the repayment programs of both Bonneville Dam project and the Bonneville Power Administration's transmission system, ahead of schedule. Payments on the Columbia Basin project—Grand Coulee Dam—have been made ahead of schedule, thereby making possible pay-out according to schedule despite increased construction costs of power facilities, Administrator Raver said.

The special payment of $2,100,000 to the account of the Bonneville Dam project was in addition to the regularly scheduled payment of $3,119,850 for the year ending June 30, 1948, which will be made to cover the year's operating expenses, interest expense, and scheduled amortization of the project.

The payment was made possible by the fact that the Administration's power receipts are showing an annual surplus.

"As a result of the advance payment of $2,100,000 and the fact that the payments made in prior years contained a slight excess over minimum repayment requirements, the Bonneville Dam project repayment as of January 1, 1948, is $2,252,282 ahead of requirements," he said.

"The important interest savings over the remainder of the repayment period, together with a continuation of the regularly scheduled annual payments, will result in completion of the pay-out of the project in fiscal year 1989, or 5 years ahead of schedule, and a surplus repayment of $6,108,895 at the end of the regular 50-year repayment period in 1994."

Sale of power from Bonneville and Grand Coulee Dams over the Bonneville transmission grid systems, which serves all of the major load centers of the Pacific Northwest, is running at an annual rate of approximately $22,082,000. The addition of generators at Grand Coulee Dam between the present and 1952 will bring the annual rate approximately to $30,000,000 with over-all revenues of more than $270,000,000 during the next 10-year period, Raver said.

COMPLETE THE ST. LAWRENCE SEAWAY PROJECT

Mr. DONDERO. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. KILBURN] may have permission to extend his own remarks in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. KILBURN. Mr. Speaker, while we enjoy the springlike weather which fortunately came to Washington this week, let us not forget the recent severe cold spell and the lessons which it should have taught us. The people in my district in northern New York, as well as in other regions, are suffering from one of the coldest winters in years. Their sufferings have been aggravated by shortages of power, oil, and heat. Let us now resolve to take such steps as we can to make sure that the fuel and power shortages will not occur again.

One step which we can take this session to alleviate such shortages is to vote for the completion of the Great Lakes-St. Lawrence seaway and power project. The St. Lawrence project will provide the New York and New England areas with a vast amount of cheap hydroelectric energy for heat, power, and light purposes. When completed, the St. Lawrence project will develop 2,200,000 horsepower, or 820,000 kilowatts, of electric

power, to be divided between the United States and Canada, and furnish 4,000,000 of our consumers with electricity at low rates. In view of our present and prospective shortages of oil and coal, we must now take steps to alleviate such conditions. The completion of the St. Lawrence project is an immediate and feasible step which can and must be taken now.

In addition to providing the vast amount of cheap electric power, the St. Lawrence project will greatly expand and improve our water transportation system to the advantage of the whole Great Lakes agricultural and industrial areas. Such action is particularly necessary in order that our great steel-producing industry can continue to get adequate supplies of iron ore. The St. Lawrence project will promote our national defense and provide thousands of jobs in the immediate years ahead.

We are watching with interest the debates in the Senate on the St. Lawrence project and are confident of its passage next week. Then we must lose no time in the House in completing action on this important and far-reaching project.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WILLIAMS. Mr. Speaker, the burlesque to be staged tonight under the guise of paying homage to the memories of Thomas Jefferson and Andrew Jackson will find real southern Democrats about as plentiful as three-dollar bills.

We cannot join in such a hypocritical gesture, and you will find most of us having our own Jefferson-Jackson day dinners in gatherings in which white supremacy is the order and segration is the rule.

The present leadership of the National Democratic Party has, through its recent actions, repudiated every political truth that Jefferson and Old Hickory held to be self-evident.

These two all-time champions of white supremacy, segregation, and States rights would roll over in their graves—and rightly so—if they could but see the motley checkerboard crowd of blacks, tans, pinks, and other off-color political misfits who will be so prominently in attendance at this desecration of their memory.

Democrats who still adhere to the faiths of Jefferson and Jackson will not be parties to such mockery.

LIFT THE EMBARGO

Mr. O'TOOLE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. O'TOOLE. Mr. Speaker, in the short time allotted to me, it is all but impossible for me to express my hatred of the discriminatory embargo imposed against the shipment of arms to the distressed people of Palestine.

During the 12 years that I have been in this House, I have repeatedly spoken in behalf of the Zionist question. Recognizing as all fair-minded Americans did, the necessity of establishing a Jewish homeland, I was vitally interested in the problem.

All Members of this House know that for thousands of years the Jewish people, despite the fact that they have longed for a land of their own, have been driven from land to land and continent to continent, feeling wherever they went the tyrants' yoke and the despots' heel.

The establishment of the United Nations after World War II and the willingness of the United States to participate was a great cause of joy not only to the followers of the Zionist movement, but to all peace-loving people. We felt that at last hatred, greed, and lust for power were to be swept aside and that the dignity of man and the rights of oppressed people were at last to be recognized. Mankind was sure of this when among its first acts the United Nations declared that Palestine should be partitioned and that there should be a definite understanding that the Jewish homeland was now a recognized entity and was entitled to all of the dignity of an established nation.

All over Europe, hundreds of thousands of people of the Jewish faith who had suffered deeply and grievously since the coming into power of Hitler and other dictators at last thought they could see a ray of hope. Such was not the case. Although this Government of ours is a member of the United Nations and voted for partition, to date it has done nothing to grant real security to the people of Palestine. You cannot establish a nation that is surrounded by hostile elements and then leave it alone to work out its own destiny. Modern civilization and government are too complex, especially when that government and civilization are threatened by barbarous hordes.

Ever since the partition, the Jewish people have been victims of terrible indignities. They have been subjected to boycott, bombs, rifle fire, and threats until today their very existence as a Nation is in danger. If we would but lift this embargo and make it possible for them to furnish their men with modern arms and ammunition, they would be perfectly willing to continue their fight. In fact, I believe that if we made it possible for them to have a supply of the implements of war, their transgressors would soon back down and no armed conflict would take place.

In every instance in the past where we have established nations, such as Cuba and the Philippines, we have made it possible for the new nations to work out their own security by furnishing them with the essential materials.

Gentlemen, we have an implied contract as a member of the United Nations to see that Palestine is secure. We have guaranteed them that they shall have security, but without the means of defense, these people are helpless. If this situation should continue, it would not only be a blot on civilization, it would also mean the absolute collapse of the United Nations as a working force.

I am in favor of the immediate lifting of the embargo. I have communicated my views to the President, the Secretary of State, and to the United States Delegates serving on the United Nations Council. Now, let this Congress show that it is interested in humanity and the cause of freedom by taking immediate action to lift the arms embargo on Palestine.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, on the eve of tonight's Jefferson-Jackson day dinners, I think it well that the attention of our Democratic leaders and colleagues be called to a significant but dark period of history in the party.

The Sixty-seventh Congress convened in the year 1921 with a party division in the House of Representatives as follows: Republicans, 300; Democrats, 131; minor party, 1, and 3 vacancies. Of the 131 Democrats, 111 were from the South; 33 States outside the South furnished only 20 Democratic Representatives. The party was so weak in 25 of these States that it could not elect a single Democrat.

Now, who held the line for the party? Who always holds the line for the Democratic Party in the lean years?

In the lean years party leaders praised the loyalty, the stickability, the tenacity, and the sincerity of the southern Democrats. They sang our praises and slapped us on the back. They knew that the party would have died as dead as a mackerel in 1921 had it not been for its front line of defense—the solid South—holding fast.

Bearing this in mind, it is rather strange that our Democratic President would now close his eyes to those who have remained steadfast throughout the lean as well as the fat years. When he recommended enactment of the so-called civil-rights proposals, he closed his eyes to the loyalty of southern Democrats. It is also rather strange that the chairman of the Democratic National Committee saw fit to cancel his Jefferson-Jackson day dinner engagement with Georgia Democrats in the city of Atlanta. It is exceedingly strange that Democratic Party leaders would brush aside with a light stroke southern opposition to the so-called civil-rights proposals with remarks such as, "The southern boys are just letting off steam; they have done this before; they have no place to go; they will come around; they will soon cool off." It is also rather strange that party leaders would make such an

all-out, direct appeal to the radical, left-wing, irresponsible minorities which support Henry Wallace as the national chairman did on yesterday and at the same time entirely ignore the party's front line of defense—the solid South—and even go so far as to refuse to attend a southern Democratic dinner.

I repeat, it is very strange that everyone in the Democratic Party, from the President down, seems to have forgotten the year 1921, when northern, eastern, midwestern, and far western Democrats could elect only 20 Representatives to this body. Why, had it not been for the solid South, you could have seated all the Democrats in one row.

Since I shall not attend one of the Jefferson-Jackson day dinners tonight, I thought it well that the memories of our Democratic leaders be now refreshed on a bit of important party history. We southerners will be tuned to our radios, listening for a renewal of just a wee bit of the praise that once was ours. After all, Thomas Jefferson and Andrew Jackson, whom the Democrats honor tonight, were distinguished southerners. So a little praise, belated though it may be, for those southern Democrats who have stuck it out through thick and thin would be most fitting.

May we hear your voices tonight.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. HÉBERT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. HÉBERT. Mr. Speaker, on last Monday the distinguished gentleman from Illinois [Mr. DIRKSEN] quoted from a hearing which was held by the subcommittee on Treasury of the Appropriations Committee, at which Mr. George J. Schoeneman, Commissioner of Internal Revenue, testified. The gentleman from Illinois made Mr. Schoeneman's testimony part of the basis for the introduction of a resolution purported to have for its purpose the investigation of the office of the collector of internal revenue at New Orleans, but admitted by the gentleman from Louisiana [Mr. DOMENGEAUX] really to be the instrument whereby the income-tax returns of Earl K. Long, candidate for Governor of Louisiana, would be examined by a select committee.

I have made a futile attempt, as well as have other members of the Louisiana delegation, to read that portion of the testimony of the subcommittee to which the gentleman from Illinois had access. The chairman of the subcommittee, the gentleman from New Jersey, refused to allow the hearings to be examined, and I personally called on the chairman of the committee, the gentleman from New York, who informed me he had no authority to allow me to see the records.

Mr. Speaker, this morning while testifying before the Rules Committee in connection with the gentleman from Illinois' resolution, I requested that the resolution be expanded to include an immediate perusal of the hearings of the Appropriations Committee relative to Mr. Schoeneman's testimony. Again without result. I am wondering, Mr. Speaker, why denial is being made to me and other interested Members of the Louisiana delegation to read these hearings which will be published next week, or immediately after the Treasury appropriation bill is reported. What is so secret in these hearings which will not be secret after the election is held for Governor of Louisiana next Tuesday? Could it be, Mr. Speaker, that the hearings would reveal that Mr. Schoeneman told the gentleman from Illinois when he questioned him relative to the gentleman from Louisiana's charges against this:

He, Mr. DOMENGEAUX, made those statements to me (George Schoeneman) and I assured him the things he was going to say were not true * * * that the description of the case as he gave it was not in accordance with the facts.

I would like to know whether this statement was made or not, Mr. Speaker, and I am sure you will agree it does not take a resolution of Congress to let one Member read the hearings of a subcommittee, especially since another Member has taken advantage of his position as a member of the subcommittee and discussed what he heard behind closed doors on the floor here.

I wonder also if a perusal of those hearings would not reveal that Mr. Schoeneman told the gentleman from Illinois [Mr. DIRKSEN] that although he could not discuss the matter in detail he was at liberty to say that there had been no irregularities in the investigation. It is all very queer to me, Mr. Speaker, and I am just wondering who is sitting on what records.

Now in further connection with this matter, Mr. Speaker, last Monday the gentleman from Louisiana [Mr. DOMENGEAUX] with much spirit and gusto, and with all the force at his command, and in dramatic voice challenged me to exhibit to him the photostatic copies of Earl K. Long's actual income-tax returns filed with the Bureau of Internal Revenue. In order that there may be no doubt as to what he said, Mr. Speaker, I quote that portion verbatim here of the colloquy between the gentleman from Louisiana and myself:

Mr. DOMENGEAUX. I thank the gentleman. Of course, I want to ask the gentleman to yield to me for the purpose of making a statement. He has kindly consented to allow me sufficient time within his hour to make that statement.

Now, I want to ask you a question, please.

Mr. HÉBERT. Well, do you want to ask the question or make a statement first?

Mr. DOMENGEAUX. Yes; I would like to ask you several.

Mr. HÉBERT. Certainly; anything.

Mr. DOMENGEAUX. You gave a prepared statement to the press, a copy of which you gave me, and which you rather carefully followed in your presentation before the House. I notice, however, that in your prepared speech you stated that, "I shall substantiate this refutation with photostatic copies of Earl K. Long's income-tax return." I notice, Mr. HÉBERT, that you did not present that income-tax return at this time.

Mr. HÉBERT. That particular income-tax return will be presented immediately. I did not think it was necessary to present that particular thing, since I presented the income-tax findings.

Mr. DOMENGEAUX. Will the gentleman kindly present the income-tax returns for 1937, 1938, and 1939?

Mr. HÉBERT. I shall be very happy to do so, because there is nothing to hide.

Mr. DOMENGEAUX. Well, present them.

Mr. HÉBERT. Well, I do not have them at the present time, because there are some three trunkfuls of checks. We did not photostat everything down there we had. We photostated the pertinent and concluding documents.

Mr. DOMENGEAUX. Will the gentleman yield?

Mr. HÉBERT. Yes; certainly.

Mr. DOMENGEAUX. The gentleman in his statement to the press, and in the copy of the paper that he gave to me, states that "I will substantiate what I have said in refutation of the Domengeaux charges by the presentation of the tax return in question."

Mr. HÉBERT. I am glad the gentleman from Louisiana has read on further. I said I would refute what he has said. He has said that Earl Long is charged with a $100,000 fraud, and has agreed to pay it, and the gentleman here read documents showing that that is not a true statement.

Mr. DOMENGEAUX. Will the gentleman present the income-tax return? He will not do it, and I will tell you why, because this income-tax return on the face of it, in red ink, shows the marking of fraud penalties. That is the reason why.

Mr. HÉBERT. Of course, I have only access to the legal ways of getting documents out of the Bureau of Internal Revenue. I have only legal means.

I direct your particular attention, Mr. Speaker, and gentleman of the House, to the gentleman from Louisiana's exact words in which he says, and I quote him:

Will the gentleman present the income-tax return? He will not do it, and I will tell you why, because his income-tax return on the face of it, in red ink, shows the marking of fraud penalties. That is the reason why.

Mr. Speaker, here are the photostatic copies of Earl Long's income-tax returns for the years 1937, 1938, 1939, taken from the files of the Bureau of Internal Revenue today, and nowhere, nowhere, nowhere, on any one of those three returns are there any such markings of fraud as the gentleman from Louisiana said would be found on them.

I think the record again speaks for itself. Again he has made a statement that is not substantiated by fact or documents. Again he has made a statement that he will have to back away from, and try to explain away as he has done previously when confronted with this absolute and positive proof. Again the records themselves, obtained in a legal and not underhand or clandestine manner, speak for themselves.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. LARCADE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. LARCADE. Mr. Speaker, several weeks ago when the Louisiana gubernatorial campaign in the first primary

was aired in the RECORD and on the floor of this House I stated that I regretted very much that this matter was injected into the deliberations of this body.

During the past week or 10 days we have seen the political battle resumed here for the second primary, and I reiterate that it is my opinion that political controversies have no place in the Congress of the United States.

The political battle now hinges upon charges of alleged income-tax violations of one or more of the candidates for Governor, and notwithstanding that the laws and statutes of the United States provide for the investigation, handling, and punishment of anyone guilty of violating income-tax laws, the Rules Committee of this House is being used for the purpose of authorizing the appointment of a committee to investigate income-tax matters in one State, the State of Louisiana, when there is presently, and always has been, ample authority and channels for the investigation and prosecution of alleged income-tax violators.

Mr. Speaker, I think it is a bad precedent for this Rules Committee and this House to lend itself to such controversies, either for the State of Louisiana or any other State, Territory, or for the benefit, or for or against any candidate for any State office in any State of the Union.

The surprising action on the part of the Rules Committee of this House is the very zealous manner in which they have considered and acted upon the resolution of the gentleman from Illinois [Mr. DIRKSEN] in regard to a political matter in a matter of a few days, and on the other hand since June 26, 1947, the Rules Committee has had "bottled up" the Towe bill, H. R. 4278, the universal military training bill, and refuses to report the bill out, even though in my opinion the very existence and security and defense and preservation of our great country may depend upon the enactment of this legislation.

LOUISIANA POLITICS

Mr. BROOKS. Mr. Speaker, I ask unanimous consent to extent my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BROOKS. Mr. Speaker, I attended the meeting of the Rules Committee this morning when the Dirksen resolution was presented to this committee. I heard the distinguished gentleman from New York [Mr. TABER], chairman of the Appropriations Committee, express the view that "the facts should out."

I am in accord with this view. And yet, Mr. Speaker, when I asked the chairman and some members of the Appropriation Committee for permission to inspect the testimony of Commissioner Schoeneman, Chief of the Bureau of Internal Revenue, which was taken under the promptings of my colleague the gentleman from Illinois [Mr. DIRKSEN], I was refused this permission. This testimony which is so important to the Dirksen resolution is denied to you and to me, to the public, and to everyone except members of the Appropriations Committee. This is unfair. It is not good public policy. It is wrong. The testimony should be published immediately. Its contents should not be covered up from the light of honest inquiry.

EXTENSION OF REMARKS

Mr. BRYSON asked and was given permission to extend his remarks in the RECORD and include a speech delivered by him the day before yesterday.

Mr. GOSSETT asked and was given permission to extend his remarks in the RECORD in two instances and include editorials.

Mr. BROOKS asked and was given permission to extend his remarks in the RECORD and include certain documents.

RECONSTRUCTION OF THE PHILIPPINES

Mr. BELL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. BELL. Mr. Speaker, I arise on this occasion to call your attention to the program of the present administration of the Republic of the Philippines to implement the actions taken by the last Congress and by this Congress to provide a stable, effective, and economically sound government during these days of reconstruction of the terrific damage done during the Japanese occupation of the Philippines.

When political independence of the Philippines became a reality on July 4, 1946, there were many who viewed the tremendous and widespread destruction of property who felt fearful that it would be impossible to recreate the stable economy needed to support a sound government. They had not reckoned with the vision and courage of Philippine people in making good their new-found freedom.

Leading in the spiritual revival of the Philippine people were such men as President Manuel Roxas and his immediate predecessor, President Sergio Osmeña, who served during those anxiety-filled days of actual occupation of his country and during those chaotic days following liberation. It was the leadership of these men and others in the Philippines which is making independence a reality in every sense.

Last January 26 President Roxas delivered his state-of-the-nation speech to a joint session of the Philippine Congress. It was a masterful message and contains a wealth of information which clearly indicates the soundness of the Roxas administration.

The real sense and the meat of his address was contained in the specific recommendations that he made. It will be noted that many of those recommendations were designed to enable the Philippine Government to coordinate its own workings with the provisions of the Philippine Trade Act of 1946, the Philippine Rehabilitation Act of 1946, and other enactments of the United States Congress.

So that you may have a clearer picture of what the Roxas government in seeking to accomplish, I wish to quote the following recommendations from the President's speech of January 26. They are as follows:

1. An act establishing the Central Bank, defining its powers in the administration of the monetary system, amending the corresponding provisions of the administrative code, and for other purposes.

2. A law granting to the President, under such conditions as the Congress may impose, authority to control imports and to increase or decrease from time to time the sales tax on luxuries, semiluxuries, and nonessential commodities up to 100 percent of the present rates, but in no case to be less than the rates now imposed. This measure is intended to raise revenue, conserve our dollar exchange resources, and to channel surplus purchasing power toward productive investments.

3. A law appropriating the proceeds of certain loans which the government may obtain, to finance the construction of specific hydroelectric power projects and a fertilizer plant.

4. A law providing for the redemption of:

(a) Philippine National Bank notes legally issued and now outstanding, and providing for the registration of Philippine National Bank notes issued illegally by the enemy;

(b) Emergency notes legally authorized by the Philippine Government at the beginning of the war; and

(c) Duly authorized guerrilla currency in circulation at a fixed percentage or fixed value, not to exceed a total outlay of $30,000,000.

5. A law authorizing the President of the Philippines to obtain from the central bank funds for certain purposes specifically authorized by law when in the opinion of the bank, the existing exchange reserves are in excess of foreseeable demands to cover the balance of payments of the nation.

6. A law fixing the site of the capitol and the offices of the National Government, authorizing the expropriation of private lands to be included in that site and appropriating the necessary funds for the payment of the value of such lands, the development of the site and the construction of the buildings thereon.

7. The enactment of the Civil Code prepared by the Code Commission.

8. A law to authorize the Bureau of Lands to subdivide United States military reservations returned to the Philippine Government and to sell the same in small lots, giving priority to present bona fide occupants of such lands and to war veterans at prices approved by the President, except such portions as may be reserved by the President for the use of the national or local government.

9. A law amending Republic Act No. 8 authorizing the Bureau of Lands, the National Abaca and Other Fibers Corp. or such other agencies of the Government as the President may designate, to subdivide agricultural and residential lands formerly belonging to enemy nationals and which have been transferred to the Philippine Government, except such portions as the President may reserve for the use of the national or local government, and to sell such lands in small lots at prices approved by the President giving priority to veterans, including members of the USAFFE, recognized guerillas, and unrecognized but deserving members of guerilla organizations.

10. A law appropriating the necessary funds for a new census.

11. A law authorizing the creation of a public corporation to administer the international airport as well as the other commercial airfields throughout the Philippines belonging to the Government.

12. A law requiring insurance companies to invest at least 50 percent of their reserves in loans, the proceeds of which will be used in the Philippines.

13. A law amending the administrative code to grant more autonomy and to enlarge the power of taxation of provinces and municipalities.

14. A law authorizing the President under certain conditions to guarantee loans granted by certain international or foreign credit institutions to government or private banks, companies, or private individuals.

15. A law authorizing the Government to guarantee a certain percentage of any loss which may be suffered by any private bank, insurance company, or any other credit institution, on account of loans it may grant to private individuals for home construction, the amount of each loan not to exceed ₱10,000 for each individual borrower, and fixing the aggregate amount of the loans for which such guarantee may be given.

16. A law amending the National Internal Revenue Code by providing for collection in advance of the sales tax on the basis of the declared cost of the merchandise upon withdrawal from the customhouse or factory; the amount collected in advance to be credited to the actual tax liability after the first sale has been made.

17. A law amending the National Internal Revenue Code by increasing the present tax rates on alcoholic beverages, beer, soft drinks, cigarettes, and other tobacco products.

18. The approval of other measures implementing the recommendations of the Joint Financial Commission.

19. A law lifting the moratorium subject to certain conditions.

20. A law establishing a social-security system for the benefit of wage earners and low salaried employees.

Mr. Speaker, many of the recommendations follow the patterns of laws already on the statute books of the United States. Others relate, as you will note, to specific projects designed to assist in rehabilitation. All may be said to have resulted from the fact that during the Japanese occupation all governmental changes of a permanent nature had to be suspended because the courageous and loyal Philippine people would never want to continue any actions of the Japanese puppet government as permanent laws of their Government. They wanted exactly the opposite. Their greatest desire apparently is for a continuation of the democratic processes taught them by the United States.

There still remain those both in the United States and the Philippines, as well as in some other parts of the world dominated by the world Communist influences, who make disparaging remarks about the efforts of the Government of the new Republic of the Philippines to solve its problems. These carpings are to be expected.

Yet it remains certain that all necessary things cannot be done at once any better in the Philippines than they can be done here and preserve our democratic forms of government. I have confidence that as time wears on the Roxas administration and the thinking people of the Philippines will surmount their obstacles, especially if they are sure they can continue to rely on the friendship and assistance of the mother country, the United States, to help them through the rehabilitation period. That means that this Government may be called upon again for further assistance to supplement what has already been done. Otherwise the job of rehabilitation which we have started might not be finished to guarantee that the beneficent action of these United States in granting independence to the Philippines shall remain a monument before the world to American fair dealing and honest respect for the rights and dignity of other peoples of the world.

I am happy to note among the Members of Congress a growing sentiment for working out a solution of the needs of the brave and heroic Filipinos who served under the flag of the United States in resistance of the Japanese aggressors, for I feel it indicates that when sound and clear-cut recommendations are made by the President adequate veterans' legislation will be enacted.

It indicates, too, that there is an awareness among Members of Congress and in the administration that the moral obligations of the United States Government can only be realized through treatment of Philippine problems separate and apart from those of other nations. The Philippines were under the American flag when the Japanese attacked. They resisted with all their might, providing that most valuable element for later victory—time. It is right that the new Republic should continue to have a special place in the hearts of all Americans.

It has been suggested that surveys should soon be started to determine just how far our present programs for Philippine rehabilitation will go toward reconstruction of businesses, private industry, and public properties. When those studies shall have been completed, it is my hope that Congress and the administration will continue to cast aside all partisan feeling in the enactment of the legislation necessary to complete the job of rehabilitation.

It would be unwise for the United States to consider that the mere granting of political independence was sufficient. Political independence without economic rehabilitation would be only a shell and a mockery.

I feel certain the American people want our Government to do those things for the Philippines necessary to keep alive in that new Republic the fires of liberty and democracy, in order that they may spread throughout Asia in direct counter attack against the efforts to spread Communist ideologies there.

EXTENSION OF REMARKS

Mr. MORRIS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a speech by a constituent of mine, a young lady who was one of the four coequal winners in the national contest on I Speak for Democracy.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MULTER asked and was given permission to extend his remarks in the Appendix of the RECORD.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. MULTER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MULTER. Mr. Speaker, on Thursday of last week I called the attention of this House to a telegram which the Honorable John Cashmore, president of the borough of Brooklyn, had sent to Hon. Harry S. Truman, President of the United States, urging him to do everything possible to reestablish law and order in Palestine, to lift the embargo against the shipment of arms to the Jews in Palestine, and to establish a national police force under the jurisdiction of the United Nations. At the same time I directed the attention of the House to a telegram sent to President Cashmore on behalf of the Brooklyn Jewish Community Council, thanking him for his efforts in connection with this all-important matter.

I knew then that Mr. Cashmore had made the necessary arrangements to call at the White House to see the President and to personally present to him the views of the people of Brooklyn.

Mr. Cashmore's duties as president of the borough, and as a member of the board of estimate of the city of New York, are most arduous and time-consuming. Despite the fact that they require his close attention from early day out, Mr. Cashmore came to Washmorning until late at night, day in and ington on Friday, February 13, and was received at the White House by the President for the sole purpose of listening to his views on these vital issues.

Mr. Cashmore was able to return and report to Brooklyn that the President would continue to do everything possible to correct a desperate situation.

We in Brooklyn know that we can always call on Mr. Cashmore, and no task is too great for him to undertake.

EXTENSION OF REMARKS

Mr. MILLER of California asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances and in each case to include an editorial.

Mr. HAYS (at the request of Mr. HARRIS) was given permission to extend his remarks in the RECORD in two instances and include extraneous matter.

SECONDARY RECOVERY OF OIL

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include an editorial.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HARRIS. Mr. Speaker, the action of the House a few days ago to provide an authorization for the secondary recovery program in connection with the extension of the experimental program on synthetic production of oil is far more important, I believe, than the average person is aware. Research on a secondary-recovery program to develop methods for obtaining oil that we know is available is one of the most important needs for our future welfare.

Much effort has been made in various depleted fields to increase the recoverable

oil in the reservoir. Much progress has been made in some fields, but it is believed additional methods could be developed that would make available tremendous quantities of oil from these known reserves. Because of the importance of this program and the potentialities it offers, I include in the RECORD an editorial from a recent issue of the Arkansas Gazette, which I think should be of interest to many people:

TO RECOVER MORE OIL

Legislation passed by the House and Senate authorizes an appropriation of $30,000,000 for a 3-year experimental project on synthetic production of oil. The House bill also would provide money for research on secondary recovery from oil reserves where production has declined.

Although it has not been publicized, as has synthetic production, secondary recovery already proceeds on a practical basis. It has gone a long way beyond the experimental stage, as can be seen in south Arkansas. Further research on methods for obtaining oil that is not now available in known reservoirs would lead to an enormous increase in national reserves.

Representative GAVIN, of Pennsylvania, in advocating an appropriation for secondary recovery investigations, said there were almost 100,000,000 barrels of oil in various fields which cannot be obtained with present methods. This is an exceedingly small estimate.

The El Dorado south field of Union County, under secondary recovery, could be made to produce from 20,000,000 to 25,000,000 additional barrels. The old Smackover field, according to a scientific study, contains the equivalent of three major oil fields. A reservoir has to produce 100,000,000 barrels to be ranked as a major producer, and few have been found during the last 10 years. Yet secondary recovery applied in "settled" fields in many of the oil States could make major producers.

This State enjoys the distinction of being a pioneer in secondary recovery. The fields which are being flushed by secondary methods are yielding higher profits. It is expected that in time these methods may be applied to all the important reservoirs of Arkansas. The oil and gas commission sponsored a survey that investigated the secondary recovery possibilities of every field. As each reservoir has its geological peculiarities, a detailed study is necessary to determine the most feasible methods of increasing production. The published report of the survey furnishes the fundamental information for the general secondary recovery program which the commission is now planning with the cooperative effort of companies, lease holders and landowners.

At best only from 40 to 60 percent of the oil in a reservoir can be taken out. Under primary methods as little as 20 percent may be drawn from the pool. Because secondary recovery has not been extensively applied, this country has been losing far more oil than it has obtained from the heavy investments in field development.

Arkansas, with its model conservation program, provides an example which could very profitably be followed on a national scale. On its own initiative Arkansas undertook secondary recovery for its own benefit. The other oil-producing States could do likewise. Secondary recovery could be encouraged simply by Congress making more technical services available to the respective agencies in the States.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. GRANT of Alabama. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. GRANT of Alabama. Mr. Speaker, recently one of the Republican leaders in Congress made a speech at Omaha, and in discussing the farm program which we have taken years to build up, is quoted as stating:

I think that if there is to be such a support program, it ought to be at a much less percentage than 90 percent.

This certainly appears to me to be an attack on the farm program as now existing, and I do not think the farmers of America read this statement with much enthusiasm.

What can this mean? Does it mean that the Republican Party has in mind doing away with our farm program? Is this an advance notice to the farmers of the country as to what will happen if a Republican administration is elected next fall? Is it not fair to believe that if we had a Republican President with a Republican Congress that an attempt would be made to do away with the just farm legislation passed by the Democratic administration, which has been of so much benefit to the farmers of America?

We only need to look back to last year to see what happened to conservation benefits. With a Republican President we can certainly figure what will happen, not only to conservation benefits but to other phases of our great farm program, which has helped not only the farmers of the Nation but the entire population, for we all know that when we have a prosperous agriculture that we in turn have a more prosperous industry and better living for everyone.

I do not believe that the farmers of America will so easily surrender the legislation that has been placed on the statute books to aid them. Next November they will remember this threat and also the beneficial farm legislation that has the backing of the Democratic President of the United States and the Democrats in Congress.

SPECIAL ORDER GRANTED

Mr. SABATH. Mr. Speaker, March 4 will be the two hundredth anniversary of the renowned Polish-American hero, Gen. Casimir Pulaski. I feel it would be proper and fitting in recognition of his service and in respect to his memory that we pay tribute to him in the House on his birthday anniversary. I therefore ask unanimous consent that immediately upon the conclusion of legislative business on March 4 that I may be recognized for 1 hour.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

NECESSITY OF OVER-ALL STUDY OF PETROLEUM SUPPLY AND DEMAND AND FORMULATION OF NATIONAL PETROLEUM POLICY

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include a short article from the Journal of Commerce.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. WOLVERTON. Mr. Speaker, as chairman of the Committee on Interstate and Foreign Commerce, and at the direction of the committee, I have introduced House Concurrent Resolution No. 134 to set up a joint committee of Senate and House Members to make an over-all study of petroleum with particular attention to the problems of supply and demand to the end that a national fuel policy may be adopted. The situation as developed by hearings before the Committee on Interstate and Foreign Commerce is so critical both present and future as to make the formulation of a national policy a matter of extreme importance.

In accordance with the consent granted to me, I include as part of my remarks, the following article entitled "Petroleum," appearing in the Monday, February 9, 1948, issue of Chicago Journal of Commerce:

PETROLEUM

OIL: THE INVESTIGATION MERRY-GO-ROUND

(By Keith Fanshier)

Faster and faster it spins—the congressional oil investigating merry-go-round.

Dizzier and dizzier grows the pace—dizzier too becomes the industry, riding the thing.

More and more confused the public well may be growing, as it supposedly watches with a greater or lesser degree of interest.

Wonder what about the Members of Congress themselves, who are running the contraption. Are they developing a body of basically constructive ideas that will be useful to the Nation?

Are we witnessing something that is forwarding the important cause of petroleum conservation and advancing the public interest in questions relating to this most significant element of our national affairs? Are we spectators to the laying of the groundwork for wise, far-seeing national policy as to petroleum?

Or are we forced to be onlookers at an exhibition, promoted to further motives for other than the worthy ones which ought to be present in determining answers to issues of such vast import as these?

This writer believes there are good, earnest, and capable men in the Congress, engaged in various phases of the oil investigations and trying to bring out and emphasize to the public the truth and evolve policy. Unfortunately, however, it appears there are the contrasting kind, too. The latter it appears are in this election year of 1948 using the petroleum industry as a means and the fuel oil supply emergency as an occasion to reap political advantage. They are playing display and exhibitionism for all they are worth, and they may be worth plenty.

It is the writer's view that honest congressional inquiry, intelligently designed and sincerely developed, can be of much good to all, by disclosing authoritative opinion and facts. But indiscriminate, repetitive and over-crowded inquir for the sake of inquiry can be burdensome and can bring the whole activity of congressional investigation into disrepute.

The great mass of the inquiry in recent times has come dangerously close to bringing about this latter effect, even though much factual material of real value has been adduced.

Some congressional investigators have contributed in no small way to solving oil questions. But sadly enough much of the great

energy expended in these activities in recent years has gone for naught, the wisdom contained therein unused and the whole activity in effect a waste. It is not odd that Washington encounters skepticism in the industry as the Congress deals its investigations off the cuff, dozen after dozen.

SYNTHETIC-LIQUID-FUEL BILL

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. WOLVERTON. Mr. Speaker, I have today introduced a bill to promote the production of synthetic liquid fuels. The full title of the bill is "a bill to aid in preventing shortages of petroleum and petroleum products in the United States by promoting the production of synthetic liquid fuels."

This bill is the outgrowth of the study that has been undertaken by the Committee on Interstate and Foreign Commerce, of the long-range fuel situation in the United States. On the basis of the testimony presented to the committee, I have come to the conclusion that an early start is imperative with respect to the construction of commercial-size synthetic-liquid-fuel plants.

The bill is what I would term a skeleton bill. It sets forth in six brief sections the basic pattern which I think might be followed in bringing about the early establishment of a privately owned synthetic-liquid-fuel industry.

Section 1 states that it is the policy of the United States, in order to supplement supplies of petroleum and petroleum products produced in the United States and imported from foreign countries, to promote the production of synthetic liquid fuels, and, to that end, to facilitate the construction and operation by private industry of synthetic-liquid-fuel plants.

Section 2 authorizes and directs the Reconstruction Finance Corporation to make to any person proposing to construct one or more commercial size synthetic-liquid-fuel plants, such advances, upon such terms and conditions, as it deems appropriate, to carry out the afore-mentioned policy.

Section 3 provides that if the Reconstruction Finance Corporation finds, upon the expiration of 120 days from the date of the enactment of this act, that no person is willing to undertake to construct any such commercial-size synthetic-fuel plants, the Reconstruction Finance Corporation shall immediately proceed to construct three such plants. Each of these plants is to have a capacity of not less than 10,000 barrels of liquid fuels per day. The first plant, referred to in the bill as plant type A, is to be for the hydrogenation of coal. The second, referred to as plant type B, is to be designed for the synthesis of liquid hydrocarbons from gases produced from coal. The third, or plant type C, is to be constructed for the production of shale oil from oil shale.

Each of these plants, upon completion of construction, is to be leased by the Reconstruction Finance Corporation to private industry, upon such terms and conditions as the Reconstruction Finance Corporation deems appropriate for carrying out the general policy of this act. The plants are to be constructed with the technical advice of the Bureau of Mines of the Department of the Interior.

The total cost of the three plants is estimated to be not in excess of $400,000,000, and section 6 of the bill authorizes the appropriation of not to exceed that sum.

The three types of plants, which I have described above, are the ones which the research of the Bureau of Mines and experience in foreign countries have demonstrated to be the most suitable for the production of a wide range of petroleum products. These plants supplement each other. For example, the plant for the production of shale oil is best suited for the production of heavy oils rather than light oils and gasoline. Vice versa, high-octane gasoline can best be obtained from type A plants, utilizing hydrogenation of coal. Type B plants, on the other hand, are best suited for the production of standard octane-rating gasoline and Diesel fuels.

From the testimony before the Interstate and Foreign Commerce Committee, I have become convinced that both the military and the economic security of the Nation require that we take prompt steps to bring into existence a synthetic-liquid-fuel industry. Such industry should not be designed to replace domestic crude production nor designed to eliminate foreign imports. We shall need to increase both the production at home and imports from foreign sources to meet the heavy rise in civilian and military demand in this country.

The construction of three basic commercial-size plants will aid us in perfecting processes that have been developed in research laboratories and have been utilized so far only in research-size rather than commercial-size plants. As has been stated by the Secretary of Defense, James Forrestal:

> The United States Government should not only support pilot plant operations in the synthetic-liquid-fuel industry but also should support a few large-scale plants sufficient to provide the engineering know-how and to advance technical developments.

Our experience during World War II with respect to rubber should be a warning to us that we should not neglect to prepare in times of peace for the production in times of war of the necessary raw materials with which to win a victory. The requirements for a synthetic-liquid-fuel industry, in terms of steel, manpower, and financing, are tremendous. To produce 2,000,000 barrels of liquid fuels per day would require, according to preliminary estimates, about 16,000,000 tons of steel and the expenditure of approximately $9,000,000,000. To suggest to Congress at this time to approve such expenditures would be pure foolishness and would merely serve to deteriorate, as far as the next 3 to 5 years are concerned, our petroleum situation since it would consume the steel which is so urgently needed at home and abroad to supply us with domestic and imported crude. On the other hand, it is wisdom to set aside a small portion of the steel which will generally be available during the next 3 years, to construct the three basic plants which will advance immeasurably our ability to increase the domestic production of liquid fuels should the need therefor increase.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. NORBLAD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include a letter on national security.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. NORBLAD. Mr. Speaker, under leave to extend my remarks in the body of the RECORD, I include therein a letter from Harlan A. Judd, president of the Reserve Officers Association, Chapter of Marion County, Oreg. As we observe Security Week, it would be well for every Member of this body to read Mr. Judd's letter in full. It is an excellent statement by an outstanding Oregon citizen and Reserve officer on the aims of the association and their views on the necessity for strong national security.

RESERVE OFFICERS ASSOCIATION
OF THE UNITED STATES,
February 6, 1948.

Hon. WALTER NORBLAD,
House Office Building,
Washington, D. C.

DEAR MR. NORBLAD: As for the past 25 years, the Reserve Officers Association is taking the lead in observing National Security Week for the period between February 12 and 22, and including those historically significant dates.

As you may know, there are more than 500,000 Reserve officers in our Nation who have gone back to civilian life after furnishing 98 percent of the leadership in our greatest of all armed forces which achieved victory for our Nation and her allies in World War II.

The ROA believes that National Security Week is its most important patriotic activity, because our Nation traditionally and constitutionally relies upon her civilians to furnish manpower and leadership in time of national emergency. We believe that our citizenry needs to be reminded, at least once a year, of its duties insofar as national security is concerned, and that there is a responsibility of our leaders, both professional and citizen soldiers, to bring in an annual report, so to speak, which every citizen can understand.

General Marshall said at the outbreak of World War II that but for the nucleus of Reserve officers who were trained—some 100,000—our chances of victory would have been considerably diminished. We believe that is true today more than ever before. If we are to survive in this uncertain world, with its unrest and its atomic and biological warfare threats, we must have a powerful, highly trained civilian Reserve which must be on a broader base among our civilians.

So National Security Week means something to you and to every citizen. In the ROA we have many goals. We make this week the time for an appeal to our own members to remain active and keep our rolls up to full strength. During this week we wish to call your attention to the legislation we are convinced is necessary to give us national security in actuality.

As an organization, we are supporting universal military training, just as we supported unification of the armed forces. We are urging Congress to pass laws which will remove some of the discriminatory practices against the civilian components, in favor of the professional career military personnel, which has served to discourage and drive away many of our citizen-soldier leaders. We are asking, generally speaking, that our citizen soldiers

be given the same consideration, in proportion and in keeping with the extent and degree of service, to which our Regulars are entitled. We are emphatically not anti-Regular. To the contrary, many of the Regulars are 100 percent for us, and we for them. We are fighting an insidious menace that is engrained in a system and which cannot be justified as a real American system.

But our principal aim during National Security Week is to arouse the interest of our fellow citizens in fulfilling our citizenship responsibilities as we see it. We want our citizens to be informed about national security; we want to incite interest and to prompt informed action in accordance with the finest traditions of our country.

We feel sure that you will perceive the part you can play in this important observance and that during National Security Week you will be with us.

Sincerely yours,

HARLAN A. JUDD,
President, Marion Chapter.

EXTENSION OF REMARKS

Mr. VORYS asked and was granted permission to extend his remarks in the Appendix and include a résumé of Ohio laws for veterans compiled by the adjutant of the DAV.

Mr. MACKINNON asked and was granted permission to extend his remarks in the Appendix and include a newspaper editorial.

Mr. MACKINNON. Mr. Speaker, I ask unanimous consent that notwithstanding the cost of $159.79, a matter which I was granted permission heretofore to include in the Appendix, may be included.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. TEAGUE asked and was granted permission to extend his remarks in the RECORD and include extraneous matter.

Mr. COOPER asked and was granted permission to extend his remarks in the Appendix and include a letter and a statement.

SELECT COMMITTEE TO INVESTIGATE INCOME-TAX RETURNS IN LOUISIANA

Mr. ALLEN of Illinois, from the Committee on Rules, submitted the following resolution (H. Res. 462), which was referred to the House Calendar and ordered to be printed:

Resolved, That a select committee of seven Members of the House of Representatives be appointed by the Speaker of the House to investigate possible fraudulent income-tax returns filed with the collector of internal revenue for the district of Louisiana, by individuals, corporations, copartnerships, and others charged by law with the duty of filing such returns with said collector of internal revenue.

The select committee shall make an interim report to the House (or to the Clerk if the House is not in session) as soon as practicable during the present session of Congress of the results of its investigation and study, together with such recommendations for legislation or other action as it deems desirable and shall file a final report not later than January 3, 1949.

For the purposes of this resolution the select committee, or any subcommittee thereof, is authorized to sit and act during the present Congress at such times and places within the United States, whether or not the House is sitting, has recessed, or has adjourned, to hold such hearings, to require the attendance of such witnesses and the production of such books, papers, documents, and income-tax returns of individuals, corporations, copartnerships, or other persons or concerns, filed with said collector of internal revenue for the district of Louisiana, and to take such testimony as it deems necessary. Subpenas may be issued over the signature of the chairman of the select committee, the chairman of any subcommittee thereof, or over the signature of any member designated, and may be served by any person designated by such chairman or member. The chairman of the select committee or any member thereof may administer oaths to witnesses. Every person who, having been summoned as a witness by authority of said select committee or any subcommittee thereof, willfully makes default, or who, having appeared, refuses to answer any questions pertinent to the matter herein authorized, shall be held to the penalties provided by sections 102, 103, and 104 of the Revised Statutes, title 2, sections 192, 193, and 194, United States Code.

Amend the title so as to read: "To appoint a select committee of the House of Representatives to investigate possible fraudulent income-tax returns filed with the collector of internal revenue for the district of Louisiana."

CONTINUING CERTAIN POWERS AND AUTHORITY GRANTED BY THE SECOND DECONTROL ACT OF 1947

Mr. ALLEN of Illinois, from the Committee on Rules, submitted the following resolution (H. Res. 472), which was referred to the House Calendar and ordered printed:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 5391) to continue for a temporary period certain powers, authority, and discretion conferred on the President by the Second Decontrol Act of 1947, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

CONTINUING CERTAIN PROVISIONS OF THE HOUSING AND RENT ACT OF 1947

Mr. ALLEN of Illinois, from the Committee on Rules, submitted the following resolution (H. Res. 471), which was referred to the House Calendar and ordered printed:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 5390) to continue for a temporary period certain provisions of the Housing and Rent Act of 1947, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

LEGISLATIVE PROGRAM FOR NEXT WEEK

Mr. HALLECK. Mr. Speaker, for the purpose of announcing the program for next week, I ask unanimous consent to proceed for 1 minute.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. HALLECK. Mr. Speaker, as I indicated in submitting this request, I desire merely to announce next week's program and, in so doing, I am sure the Members agree that granting my request is no departure from the ruling which the Speaker has just announced with respect to 1-minute speeches today.

The Rules Committee reported House Resolution 462, introduced by the gentleman from Illinois [Mr. DIRKSEN]. It had been my thought that this might be taken up this week, but existing circumstances prevent that being done.

Mr. DOMENGEAUX. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. Yes; I yield.

Mr. DOMENGEAUX. I want to thank the gentleman, as well as the members of the Rules Committee, for reporting this resolution. However, it was my understanding it would be taken up today under suspension of the rules. I was informed by my colleague the gentleman from Louisiana [Mr. HÉBERT] that he would demand a roll call on this matter. Is that the reason why the resolution is not being considered—in that it is controversial?

Mr. HALLECK. Of course, as to whether a matter is controversial necessarily enters into the decision on the program. But, aside from that, as we know, one of our Members has passed away, and this circumstance also enters into the situation with respect to proceedings for today.

Mr. HÉBERT. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. HÉBERT. I just want to make this statement in order to keep the record straight: That I did tell the gentleman from Indiana that I would ask for a roll call, because I wanted every Member on record to see how they stood on such a resolution. I stated to the gentleman from Indiana if I were not from Louisiana I would oppose such a wide resolution, but being from Louisiana and involved in it, I welcomed any opportunity to investigate the facts in the case.

Mr. DOMENGEAUX. Mr. Speaker, will the gentleman yield further for one question?

Mr. HALLECK. I yield for one question only.

Mr. DOMENGEAUX. It is a fact therefore that it was the statement of the gentleman from Louisiana that he would insist upon a roll call which prevented largely the taking up of this resolution at this time.

Mr. HEBERT. Wait a minute; will the gentleman yield?

Mr. HALLECK. I believe I have responded sufficiently.

Mr. HÉBERT. The gentleman has, but I do not want the last word of the gentleman from Indiana to put a stigma on me because there is no stigma attached.

Mr. HALLECK. I do not think there is a stigma on anybody.

Mr. Speaker, according to an order of the House heretofore entered, Washington's Farewell Address will be read on Monday. I have examined the precedents, and I find that on previous such occasions the House has transacted business after the reading of Washington's Address. At this time, however, I am not prepared to say definitely whether there will be any business on Monday.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. RANKIN. Did I understand the gentleman to say that Washington's Farewell Address will be read?

Mr. HALLECK. It will be read on Monday.

There are two bills from the Committee on Banking and Currency that will require action before the end of the month. One is H. R. 1590, by the gentleman from Michigan [Mr. WOLCOTT], to continue for a temporary period certain provisions of the Housing and Rent Act of 1947, and the other is H. R. 5391, also by the gentleman from Michigan [Mr. WOLCOTT], to continue for a temporary period certain powers, authority, and discretion conferred on the President by the Second Decontrol Act of 1947. Rules have been granted on these two measures and we will proceed with their consideration as quickly as possible the forepart of the week.

It is also expected that Senate Joint Resolution 173, or a similar bill, will be reported this week by the Committee on Merchant Marine and Fisheries. This bill pertains to certain authorities of the United States Maritime Commission which expire by operation of law that it is proposed be extended. If this bill is reported by the committee, as I believe it will be, and a rule is granted on it, then there should be action on the bill early in the week.

We also have for action next week House Concurrent Resolution 131 by the gentleman from Michigan [Mr. HOFFMAN], which has been reported from the Committee on Expenditures in the Executive Departments against adoption of Reorganization Plan No. 1 of January 19, 1948.

Our program also includes a resolution from the Committee on Ways and Means, House Resolution 296, by the gentleman from California [Mr. GEARHART], to maintain the status quo in respect to certain employment taxes in connection with social-security benefits, pending action by the Congress on extended social-security coverage. That may be reached next week, I am not sure about it, though, but if it is reached it will be later in the week.

We also have House Concurrent Resolution 147, with respect to the budget determinations for the fiscal year 1949, on which we hope to take action next week.

We also hope we can begin the consideration of and conclude action on the War Department civil functions appropriation bill, which, I understand, will be ready for action next week.

In addition, I should point out that during next week conference reports will be in order at any time for action by the House.

With this program before us I think it is apparent that we shall likely need to work early and late, and possibly through Saturday of next week, in order to dispose of these matters.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Can the majority leader indicate a little more specifically the day on which certain of these bills will come up?

Mr. HALLECK. I shall be glad to try to do that, but I believe the gentleman understands, having himself occupied the position I now occupy, that when a considerable number of things have to be fitted into a given week, of necessity we must have some leeway.

Mr. McCORMACK. I do not want the gentleman to be specific and there is flexibility in my inquiry. I was just trying to give to the Members of the House as much information as possible. I always did give specific information, as the gentleman knows. Of course, I realize there are times when that is impossible and next week is such a time due to the fact we have had very little business during the past 2 weeks, as we know.

Mr. HALLECK. I might indicate to the gentleman and to the House that there are two bills from the Banking and Currency Committee, having to do with rent control and war powers, that will come up early in the week, I would say perhaps on Tuesday.

Mr. McCORMACK. I was particularly interested in Monday.

Mr. HALLECK. As I previously stated, we will have the reading of Washington's Farewell Address on Monday. It is sometimes suggested that that is all we ought to do on that day, but in view of the fact that heretofore there have been occasions when other business has been transacted we might find it necessary to dispose of some of these other matters on Monday. Of course, the matter from the Merchant Marine and Fisheries Committee is of importance and must be acted on next week if there is to be an extension of that authority. That bill has passed the Senate and we want to expedite consideration of it in the House.

I think I can say that consideration of the appropriation bill will not likely come up before Thursday. As to when we can work in the resolution pertaining to Reorganization Plan No. 1 and the budget resolution I am not quite sure, but we will try to consider them on Tuesday or Wednesday of next week.

Mr. FORAND. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Rhode Island.

Mr. FORAND. Has the majority leader any idea when the conference report on the retirement bill will be up for consideration?

Mr. HALLECK. That is one of the conference reports I have in mind. I cannot say definitely at this time. I do not know whether I referred to the resolution, House Resolution 462, from the Rules Committee in connection with next week's program, but that is one of the matters on which we expect to act next week.

Mr. FORAND. I may say to the majority leader there are several Members who are vitally interested in that conference report and they have informed me they cannot be here Monday. I am hoping it will be called up Tuesday.

Mr. HALLECK. I may say to the gentleman it will not come up Monday in view of those circumstances.

ADJOURNMENT OVER

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

CALENDAR WEDNESDAY BUSINESS DISPENSED WITH

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the call of the committees in order on Calendar Wednesday next be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

EXTENSION OF REMARKS

Mr. JENSEN asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. TOLLEFSON asked and was given permission to extend his remarks in the Appendix of the RECORD and include a radio address.

SPECIAL ORDERS GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that on Tuesday next and on all days on which the House is in session next week, after disposition of matters on the Speaker's desk and at the conclusion of any special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted as follows:

To Mr. LARCADE, for 1 week, on account of visit to Louisiana to vote in the gubernatorial election and on official business.

To Mr. MANASCO, indefinitely, on account of important business.

To Mr. LANE (at the request of Mr. McCORMACK), for an indefinite period, on account of illness.

AID TO CHINA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES—(H. DOC. NO. 536)

The SPEAKER laid before the House the following message from the President of the United States, which was read and

referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

On several occasions I have stated that a primary objective of the United States is to bring about, throughout the world, the conditions of a just and lasting peace. This is a cause to which the American people are deeply devoted.

Since VJ-day we have expended great effort and large sums of money on the relief and rehabilitation of war-torn countries to aid in restoring workable economic systems which are essential to the maintenance of peace. A principle which has guided our efforts to assist these war-torn countries has been that of helping their peoples to help themselves. The Congress is now giving careful consideration to a most vital and far-reaching proposal to further this purpose—the program for aid to European recovery.

I now request the Congress to consider the type of further assistance which this country should provide to China.

A genuine friendship has existed between the American people and the people of China over many years. This friendship has been accompanied by a long record of commercial and cultural association and close cooperation between our two countries. Americans have developed a deep respect for the Chinese people and sympathy for the many trials and difficulties which they have endured.

The United States has long recognized the importance of a stable Chinese Nation to lasting peace in the Pacific and the entire world. The vast size and population of China make her an important factor in world affairs. China is a land with rich tradition and culture and a large and energetic population. It has always been our desire to see a strong progressive China making a full contribution to the strength of the family of nations.

With this end in view, we have supported the National Government of China since it first came to power, 20 years ago. China and the United States were allies in the war against Japan, and as an ally we supported China's valiant war efforts against the Japanese. Since the Japanese surrender, we have provided a great deal of additional assistance. Miliary aid was given the Chinese Government not only to help defeat the Japanese invaders but also to assist in reoccupying Japanese-held areas. The United States contributed the major share of the extensive aid received by China under the program of the United Nations Relief and Rehabilitation Administration. We made available to the Chinese Government at minimum cost large quantities of surplus goods and equipment of value to China's economy. We are currently extending further aid to China under our foreign relief program.

Nevertheless, the Chinese Government and people are still laboring under the double and interrelated burden of civil war and a rapidly deteriorating economy. The strains placed upon the country by 8 years of war and the Japanese occupation and blockade have been increased by internal strife at the very time that reconstruction efforts should be under way. The wartime damage to transport and productive facilities has been greatly accentuated by the continued obstruction and destruction of vital communications by the Communist forces.

The civil warfare has further impeded recovery by forcing upon the Government heavy expenditures which greatly exceed revenues. Continual issuances of currency to meet these expenditures have produced drastic inflation with its attendant disruption of normal commercial operations. Under these circumstances, China's foreign exchange holdings have been so reduced that it will soon be impossible for China to meet the cost of essential imports. Without such imports, industrial activity would diminish and the rate of economic deterioration would be sharply increased.

The continued deterioration of the Chinese economy is a source of deep concern to the United States. Ever since the return of General Marshall from China, the problem of assistance to the Chinese has been under continuous study. We have hoped for conditions in China that would make possible the effective and constructive use of American assistance in reconstruction and rehabilitation. Conditions have not developed as we had hoped, and we can only do what is feasible under circumstances as they exist.

We can assist in retarding the current economic deterioration and thus give the Chinese Government a further opportunity to initiate the measures necessary to the establishment of more stable economic conditions. But it is and has been clear that only the Chinese Government itself can undertake the vital measures necessary to provide the framework within which efforts toward peace and true economic recovery may be effective.

In determining the character and dimensions of the program which might be suited to this purpose, we have had to take into account a number of diverse and conflicting factors, including the other demands on our national resources at this time, the availability of specific commodities, the dimensions and complexities of the problems facing the Chinese Government, and the extent to which these problems could be promptly and effectively alleviated by foreign aid. United States assistance to China, like that provided to any other nation, must be adapted to its particular requirements and capacities.

In the light of these factors, I recommend that the Congress authorize a program for aid to China in the amount of $570,000,000 to provide assistance until June 30, 1949.

The program should make provision for the financing, through loans or grants, of essential imports into China in the amount of $510,000,000. This estimate is based upon prices as of January 1, 1948, since it is impossible at present to predict what effect current price changes may have on the program. Revised dollar estimates can be presented in connection with the request for appropriations if necessary. The essential imports include cereals, cotton, petroleum, fertilizer, tobacco, pharmaceuticals, coal and repair parts for existing capital equipment. The quantities provided for under this program are within the limits of available supplies. The financing of these essential commodity imports by the United States would permit the Chinese Government to devote its limited dollar resources to the most urgent of its other needs.

The program should also provide $60,000,000 for a few selected reconstruction projects to be initiated prior to June 30, 1949. There is an urgent need for the restoration of essential transportation facilities, fuel and power operations, and export industries. This work could be undertaken in areas sheltered from military operations and could help in improving the supply and distribution of essential commodities.

As in the case of aid to European recovery, the conduct of this program of aid should be made subject to an agreement between China and the United States setting forth the conditions and procedures for administering the aid. The agreement should include assurances that the Chinese Government will take such economic, financial, and other measures as are practicable, looking toward the ultimate goal of economic stability and recovery. The United States would, of course, reserve the right to terminate aid if it is determined that the assistance provided is not being handled in accordance with the agreement or that the policies of the Chinese Government are inconsistent with the objective of using the aid to help achieve a self-supporting economy.

Pending establishment of the agency which is to be set up for the administration of the European recovery program, the assistance to China should be carried forward under the existing machinery now administering the foreign-relief programs. Legislation authorizing the Chinese program should make possible transfer of the administration of the Chinese program to the agency administering our aid to European recovery. The need for authority in the administering agency to make adjustments in the program from time to time will be as great here as in the European recovery program.

The proposed program of aid to China represents what I believe to be the best course this Government can follow in the light of all the circumstances. Nothing which this country provides by way of assistance can, even in a small measure, be a substitute for the necessary action that can be taken only by the Chinese Government. Yet this program can accomplish the important purpose of giving the Chinese Government a respite from rapid economic deterioration during which it can move to establish more stable economic conditions. Without this respite the ability of the Chinese Government to establish such conditions at all would be doubtful. The achievement of even this limited objective is of such importance as to justify the proposed program of aid.

I recommend, therefore, that this program be given prompt and favorable consideration by the Congress.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 18, 1948.*

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. RANKIN. Mr. Speaker, since we are not permitted to comment on this kind of waste, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, I am surprised at the President's message asking us to give China $570,000,000 to be wrung from the overburdened taxpayers of the United States.

If we keep on following this program of giving to foreign countries, we will soon find our own country bankrupt and our own people suffering as the result.

The American people fought, financed, and won the recent war.

We have our own veterans and their widows and orphans to look after.

We have our own aged and infirm, who have spent the best days of their lives struggling to upbuild this Nation; who are now entitled to our first consideration—certainly before we start pouring money by the hundreds of millions, yes, by the billions, into the sink holes of Europe and Asia.

If we follow that policy of wasteful extravagance in giving away the wealth of the American people, burdening them with taxes that it will take generations to pay, we may find our country bankrupt and dragged down to the economic level of the poorest nations on earth.

We had better look after our own people, develop our own resources, build the strongest air force on earth, and let the world know that we are prepared to defend America against all comers at all times instead of bankrupting the Nation, impoverishing our people, and inviting disaster.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 257. An act for the relief of Yoneo Sakai;

S. 305. An act for the relief of Mrs. Hilda Margaret McGrew;

S. 310. An act authorizing the issuance of a patent in fee to Jonah Williams;

S. 311. An act authorizing the issuance of a patent in fee to Charles Ghost Bear, Sr.;

S. 312. An act authorizing the issuance of a patent in fee to Charles Kills the Enemy;

S. 313. An act authorizing the issuance of a patent in fee to Calvin W. Clincher;

S. 409. An act for the relief of Milan Jandrich;

S. 457. An act for the relief of Anna Kong Mei;

S. 499. An act authorizing the issuance of a patent in fee to Mrs. Bessie Two Elk-Poor Bear;

S. 522. An act to authorize the sale of certain lands of the L'Anse Band of Chippewa Indians, Mich.;

S. 542. An act authorizing the issuance of a patent in fee to Mrs. Ella White Bull;

S. 1133. An act providing for the per capita payment of certain moneys appropriated in settlement of certain claims of the Indians of the Fort Berthold Indian Reservation in North Dakota;

S. 1454. An act to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes;

S. 1485. An act to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, New Mexico;

S. 1507. An act authorizing the sale of undisposed of lots in Michel addition to the town of Polson, Mont.; and

S. 1591. An act to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills of the House of the following titles:

On February 13, 1948:

H. R. 1366. An act to facilitate procurement of supplies and services by the Departments of the Army, the Navy, and the Air Force, the Coast Guard, and the National Advisory Committee for Aeronautics, and for other purposes; and

H. R. 1634. An act to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto.

On February 18, 1948:

H. R. 422. An act for the relief of Francesco and Natalia Picchi;

H. R. 648. An act for the relief of Mrs. Elfreida Sakowsky Passant, alias Elfreida Sakowsky, alias Elfreida Pogue;

H. R. 650. An act for the relief of Ruston Jamsetji Patell;

H. R. 928. An act for the relief of Riyoko Patell;

H. R. 1078. An act for relief of Mrs. Audrey Ellen Gooch;

H. R. 1408. An act for the relief of August W. Dietz;

H. R. 1650. An act for the relief of Maria Hedwig Feresz;

H. R. 1788. An act for the relief of the estate of John F. Hopperton, a minor, deceased;

H. R. 2029. An act to provide for the free importation of synthetic-rubber scrap;

H. R. 2350. An act for the relief of Mrs. Daisy Park Farrow;

H. R. 3168. An act for the relief of Antone G. Pina;

H. R. 3503. An act to permit the issuance of unrestricted deeds for town-site lands held by Alaska natives, and for other purposes;

H. R. 3778. An act to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25); and

H. R. 4115. An act to quiet title and possession with respect to certain land in the town of Cheverly, Prince Georges County, Md.

THE LATE JOHN MARSHALL ROBSION

The SPEAKER. The Chair recognizes the gentleman from Kentucky [Mr. MORTON].

Mr. MORTON. Mr. Speaker, on Tuesday last at 6:30 p. m., death came to our good friend and distinguished colleague, JOHN MARSHALL ROBSION.

His was a long and distinguished career of public service. That career was a great enrichment of the political heritage of the Commonwealth of Kentucky.

To me his sudden passing was a great personal shock. In my short time here he had been both friend and father. I share with those thousands of Kentuckians and hundreds here in Washington who knew and loved him a deep feeling of loss. He will be missed. He will be missed for his keen judicial mind, he will be missed for his ready good humor, for his graciousness, his friendliness, and the stalwart human qualities which he so well portrayed and which made him the epitome of the fine character of the mountain folks whom he so ably represented.

He was first elected to the Congress in November of 1918. At that time with the exception of one or two city streets, there was not 1 mile of paved road in the entire district. An automobile was a useless luxury. He campaigned on foot and on horseback. His familiar figure with his long stride up and down the creek beds and in the hollows of that section of Kentucky became a symbol which will always live in the memory of those, his people. I have enjoyed the warm hospitality of JOHN ROBSION'S home, both here in Washington and in Barbourville. My sympathy goes out to the members of his family, his wife, who for so many years has shared in the heartaches and happiness of his long political career, his daughter who lives here in Washington and who inherited from her father his genuine, gracious friendliness, and his son, now a distinguished member of the bar in my own home city, who also had an outstanding military career, and his grandson, who is this year completing his secondary education here in the city of Washington. I hope that their sorrow, and the pain of their sorrow, can be to some degree lessened by the knowledge that his was a life of service, and by the further knowledge that their grief will be shared by the thousands who knew and loved him.

I now yield to the distinguished Speaker of the House.

(Mr. ARENDS assumed the chair as Speaker pro tempore.)

Mr. MARTIN of Massachusetts. Mr. Speaker, the death of JOHN ROBSION deprives the Nation of a wise and able statesman, the Congress of one of its oldest and best informed Members. To me his death means the loss of one of my closest and most valued friends and counselors.

JOHN ROBSION was a picturesque personality. With all his great heart and soul he was devoted to his country. He upheld the fine traditions of an American statesman.

Kentucky has contributed many great men to the Nation, and well up on the list must be inscribed the name of our beloved colleague.

His untimely death comes as a great shock. He will ever linger in the memories of those of us who were privileged to call him friend.

To his family in their hour of grief goes the sympathy and condolences of every Member of Congress.

(The SPEAKER resumed the chair.)

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, the death of JOHN ROBSION is a very sad loss to the House. I feel his loss keenly because I was always deeply impressed not only by his outstanding record of

service but his noble character as well. He was a man of great capacity and of sincere devotion to the principles that he believed in; a man devoted to his duty. It was with the greatest of sorrow that I learned of his passing. His passing is a great loss to this House, his home State of Kentucky, and to the Nation.

I join with the Kentucky delegation and his countless friends in expressing deep sympathy to his widow, his son, and daughter in their great loss. I know that we who served with and knew JOHN ROBSION will miss him very much in the years to come.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, JOHN ROBSION was one of my very best friends. I have always looked upon him as the embodiment of the American way of life. He was a man of the people. He understood people. He was one of them.

John was born and raised on a farm in Kentucky. He attended the common schools there. Fired with ambition and determination, he went to college. They were small colleges, but there he obtained training in the fundamentals of arts, sciences, and the law that kept him on sound ground in all his thinking and work.

He also taught school in Kentucky, and in that work, as here in Congress, in his quiet but effective way, he has left "footprints on the sands of time" to guide all who come after him.

John served with me on the Republican congressional committee. He was loyal to his party and strived to put his party's principles into effect. But he always placed his country above his party. That is why he is a truly great American.

I shall miss him. He will be particularly missed for the outstanding work he has done as a member of the Committee on the Judiciary. He was loved by all. How highly he was regarded by the people of his district is shown by the fact that he was elected to this Congress without opposition and received 60,000 complimentary votes. I hope his people know that we, here in Congress, regard him as highly.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Speaker, a great and good man, a true patriot, a Christian gentleman, and a great statesman has been taken from our midst. I refer to Hon. JOHN M. ROBSION, of Kentucky. I deeply mourn his loss. The Nation has lost a patriotic and a constructive legislator. Hon. JOHN M. ROBSION has served his Nation, his State, and the good and loyal people of his congressional district with extraordinary ability and perfect fidelity.

It is now more than a quarter of a century since our good friend entered the Congress of the United States as a Representative from the State of his birth. My friend John, as he was affectionately known, entered Congress at the same time I did in 1918. We became great personal friends. It was only a few years ago that I asked him to address a large crowd in my district. The people who then heard him still speak of him with admiration and affection.

I know that from the day he crossed the threshold of this great legislative body he was recognized as a man of noble character. Few men who have served in this Congress were better grounded in the law and especially the fundamental principles of the Federal Constitution.

It was well known to the men in this House that John never lost an opportunity to fight for the preservation and integrity of the fundamental principles of individual liberty upon which this Republic is grounded and which have made it the leading nation on earth.

The patriotic record, the legislative record, and the kindly service rendered by this great colleague of ours are all a part of a monument of achievement of which his constituents and all liberty-loving people in this country may well be proud.

Whenever we think of our departed friend—

Let us lift up our hearts in gratitude for the wise and good who have gone before us, who have striven even unto death to establish equity, justice, and good will upon earth, into the fruit of whose labor we have entered. Let us give thanks for fathers and elder brothers who have beheld the vision of a righteous nation, into whose goodly heritage we have come.

And let us be worthy to stand in their place in the time allotted to us, that with steadfast courage and unwavering hope we may fulfill the tasks put into our hands to do.

I wish to take this occasion to extend to Mrs. Robsion and the other members of Judge ROBSION'S family the heartfelt sympathy of Mrs. Reed and me in this time of their great bereavement.

Mr. MORTON. I thank the gentleman from New York and yield to the gentleman from Kentucky [Mr. SPENCE].

Mr. SPENCE. Mr. Speaker, I know I speak for the entire delegation from Kentucky when I say we were deeply shocked and grieved to hear of the sudden death of our distinguished colleague, JOHN MARSHALL ROBSION.

Death came to him without casting its shadow before, it came as a thief in the night. After visiting a friend's home and having dinner with him he lay down to the sleep from which he never awoke.

JOHN MARSHALL ROBSION had a remarkable career. He came here first in the Sixty-sixth Congress, and he has been a Member of this body ever since, except a short interlude in which he was appointed United States Senator by the Governor of Kentucky. He was a man of fine ability and an able laywer; but his personal characteristics endeared him to his friends. He was a sociable man. He loved his fellow men and liked to be with them. I have been entertained in his home and it breathed a spirit of hospitality and welcome. He was the chieftain of his party in the mountains of Kentucky and there were none to challenge him. He had a remarkable strength amongst his people which was not evident so much in the final elections where any member of his party would have no difficulty in carrying that district, but was shown in the primary elections where for years he utterly overwhelmed his adversaries. He had to a peculiar degree the affection of the people whom he represented; and on Saturday there will be a great outpouring of those people from the hills of his district to pay their last tribute of respect and admiration to our friend, JOHN ROBSION. May his soul rest in peace, and may he receive the eternal reward that comes to the faithful and the just.

I wish to extend to his devoted wife and son and daughter my deepest sympathy in their hour of sorrow.

Mr. MORTON. Mr. Speaker, I thank the gentleman from Kentucky and I yield to the gentleman from Vermont [Mr. PLUMLEY].

Mr. PLUMLEY. Mr. Speaker, JOHN MARSHALL ROBSION, one of Kentucky's most distinguished sons, is dead.

He was born, lived, and died in that State he so dearly loved and served with such distinction.

Like Lincoln—

He went down
As when a lordly cedar, green with boughs,
Goes down with a great shout upon the hills,
And leaves a lonesome place against the sky.

No warning foreshadowed his going. In a moment, in the twinkling of an eye, and in his sleep he passed out of the turmoil of this world into that peace perpetual where go the souls of just men made perfect.

His judgment was profound, his vision clear and unclouded; he understood his people and they understood and honored him. He left behind him no great accumulation of worldly possessions, but bequeathed to his family and his friends that greatest of all earthly legacies, "an honored name, the memory of earnest deeds well done."

In the words of the poet Malloch:

Time brings not death, it brings but changes;
I know he rides, but rides afar,
Today some other planet ranges
And camps tonight upon a star
Where all his other comrades are.

For there were those who rode before him,
As there are those he leaves behind;
Although from us time's changes bore him,
Out there our comrade still will find
The kinship of the comrade mind.

Time brings us change and leaves us fretting;
We weep when every comrade goes—
Perhaps too much, perhaps forgetting
That over yonder there are those
To whom he comes and whom he knows.

I could not hold our loss too lightly;
God knows, and he, how deep the pain;
But, friends, I see still shining brightly
The brightest link in all our chain
That links us with a new domain.

Time breaks no circle such as this.
For this I swear, because believing;
However hurt, however grieving,
However much a friend we miss
Between the worlds is no abyss.

For friendship binds the worlds together—
World over there, world over here.
From earth to heaven is the tether
That brings the earth and heaven near
And makes them both a bit more dear.

Not weaker now our chain, but stronger;
In all our loss and all our ill
We now shall look a little longer
At ev'ry star above the hill
And think of him, and have him still.

Whatever vales we yet may wander,
What sorrow come, what tempest blow,
We have a friend, a friend out yonder,
To greet us when we have to go—
Out yonder someone that we know.

To all eternity he binds us;
He links the planet and the star;
He rides ahead, the trail he finds us
And where he is and where we are
Will never seem again so far.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Mississippi [Mr. RANKIN].

Mr. RANKIN. Mr. Speaker, it was a sad shock to me when I learned of the sudden death of our distinguished friend, Hon. JOHN M. ROBSION, who had been a member of the "loyal opposition" in this House practically ever since I came here at the beginning of the Harding administration.

I agree with the statement that he was a Christian gentleman, a true patriot, and a real American who always stood by his convictions.

As I said he was a Member of the House when I came here in 1921. When I think of him and reflect upon those receding days, there seems to come trooping before me those splendid men who served with us in the Sixty-seventh Congress.

I can see Speaker Fred Gillett, one of the fairest, finest, and most capable men who ever presided over the Congress of the United States.

I can see the figure of James R. Mann, of Illinois, the ablest parliamentarian with whom I have ever served, and next to him on our side I see the figure of Charles R. Crisp, also one of the ablest parliamentarians who ever served in either House of Congress. I can hear the eloquence of Will Rodenberg, of Illinois, and the manly voice of Claude Kitchen, of North Carolina, one of the ablest debaters our country has ever produced. I can see the stalwart figures of Joseph W. Byrns, of Tennessee; Will Bankhead, of Alabama; Ben Humphreys, of Mississippi, and a large number of other notable figures who have passed to the Great Beyond.

Now my friend, JOHN ROBSION has joined them in their eternal voyage to that undiscovered country from whose bourne no traveler returns.

I am reminded of Thomas Moore's immortal lines:

When I remember all
The friends so linked together,
I've seen around me fall,
Like leaves in wintry weather,
I feel like one
Who treads alone
Some banquet hall deserted,
Whose lights are fled,
Whose garlands dead,
And all but he departed.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. RIZLEY].

Mr. RIZLEY. Mr. Speaker, I was terribly shocked and sorely grieved when I picked up a newspaper at the airport at midnight Tuesday, when I returned from Oklahoma, to note the death of my good friend, JOHN ROBSION. When I came here a short 8 years ago he was one of the first Members of this House to welcome me. He came over and sat down by me, introduced himself, and told me something of the House of Representatives. He loved the House of Representatives. At that time there were only four of us on this side of the aisle from south of the Mason and Dixon's line, and we sometimes referred jokingly to ourselves as "the Republicans from Little Dixie." He was a great lawyer. I have talked with him by the hour about his many experiences as a lawyer. He was a sound legislator. But, over and above his ability as a lawyer and his great ability as a legislator and a statesman, he was a good man. That is why the people of Kentucky loved him. That is why, after all, we in the House of Representatives loved him. He was a sturdy American. He believed in the things that made America. He was tolerant. He was honest. I do not think there has been a day hardly since I have been here from the first day that JOHN ROBSION and I have not visited together some time during the day. His sudden passing is a terrific loss to me personally, because I had learned to lean heavily on him for counsel and advice.

JOHN ROBSION was absolutely fearless. He belonged to that section of the country that produces God-fearing and courageous men. He could not be bought. He could not be intimidated. He believed that one man speaking the truth today, would tomorrow be the majority. He loved his family, he loved his neighbors. He loved Kentucky and he loved America. Indeed a sturdy oak in the forest of genuine Americanism has fallen. My love and sympathy in this trying hour go to his wife and all the members of his family. It seems to me to be almost providential that he was called from his labor to rest while at his home in Kentucky during a brief respite from his duties in Washington. He would have had it that way. His life fully exemplifies that Scriptural injunction that "A good name is rather to be chosen than great riches." His memory will be long cherished by those of us who knew him and loved him.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. GRAHAM].

Mr. GRAHAM. Mr. Speaker, for 10 years it was my privilege to serve with JOHN MARSHALL ROBSION on the Committee on the Judiciary, and in those 10 years, in the close intimacy of that committee, particularly that of subcommittees, I came to know and love this man. In writing the history of the Committee on the Judiciary not long ago, I frequently consulted with him about some of the great men that had come out of the State of Kentucky, and these things were evident in the character of Mr. ROBSION. First was his intense pride in his own community and in his own great State. He would sit literally by the hour and tell me of the great characters that had contributed to that State and its progress and its standing in the Union. Next was his deep humility and pride; the fact that he was born in Kentucky; that he came out of its rock-ribbed mountains; that his had been a hard struggle. He had no apologies to offer to any man. At heart he was an intense American. I never knew a better one. The thing that both pleased and surprised me, being a fellow lawyer, was his deep interest in the law. It fell to his duty to preside over the revision of the codes that are now passing through our hands, and to these he brought a most intelligent supervision. His wide grasp of the law and his intimate knowledge of the problems involved can hardly be overemphasized here today. Some day the great legal profession of America will thank JOHN MARSHALL ROBSION for his contribution to the revision of the Code of the United States.

The next thing I came to know about him was in the intimacy of the Committee on Immigration and Naturalization. Probably no more difficult problem confronts us in this day. Here again you could see the genuine Americanism of this man, his desire to keep America American, as we say, in the American way. I often listened to him give his homely anecdotes and stories of the Kentucky mountains, and I thought of the great Lincoln and the manner of his illustration, and how well that mantle had fallen on this man who was to carry forward the work that will help keep us a great people. Of course, we welcome the best of all the countries of Europe, but there was ingrained in him, whose forebears had fought to defend the Union of the States, a positive realization that the strains of this country must be kept clean and pure.

So today we bow to the divine will. His spirit has gone to meet its maker. The wheel is broken at the cistern. As his tall figure recedes down the corridors of time, the things that will stand out in the memory of us who knew him and loved him are his gentleness, his kindness, his sociability, his Americanism, his love of his Maker, and his desire to live as his God would have him live.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from South Carolina [Mr. BRYSON].

Mr. BRYSON. Mr. Speaker, I join others of my colleagues in an humble expression of my personal loss in the going of Congressman JOHN MARSHALL ROBSION.

Upon coming to Congress, now a decade ago, I expressed the desire for a seat on the House Judiciary Committee. It had been my privilege to serve on similar committees in both branches of my State general assembly, and, as a lawyer, I knew of the opportunities on this distinguished committee. After a lapse of some years, my request was granted. Senator-Congressman ROBSION greeted me as did other members of the committee, and soon I learned of the strong bond of friendship and respect prevailing in our committee's deliberation, regardless of politics.

Like others, I was attracted to Congressman ROBSION by reason of his magnetic personality, his tall and erect body, which in many respects reminded me of President Lincoln. I soon learned that Congressman ROBSION, who bore the name of John Marshall, our greatest Chief Justice, was a profound student of the law. At times when our committee seemed unanimous in some of its decisions, the distinguished lawyer from Kentucky would raise some pertinent

question as to the constitutionality of the measure.

Kentucky has furnished many great men who have made impressive contributions upon our country's history. Congressman ROBSION'S name is properly added to these illustrious sons.

As you know, under the act reorganizing Congress, our committee absorbed several other important committees. Congressman ROBSION was appointed chairman of our subcommittee No. 1 which had jurisdiction of revision and recodification of the law. He enjoyed this important work. On the very day of his passing the first volume of the United States Code, beautifully bound, was placed upon your desk. At the beginning of this important publication you will see the facsimile signature of Chairman ROBSION. Judges and lawyers through the years to come will continue to express admiration and respect for the work done by this student of law.

In addition to the attractive personality of Congressman ROBSION, there were other unusual facts about his history which attracted my attention. It is unusual to find a Republican Member of Congress representing a district south of the Mason and Dixon's line and east of the Mississippi River. He was the first one I ever knew. This fact attests to his worthiness since, generally, Members from the South are Democrats. The fact that our colleague had the high privilege of serving in both branches of the Congress further attests to his greatness. We, as Members of the House, shall miss our colleague, especially those of us who serve on the Judiciary Committee.

The time and manner of the passing of this great man was all that could be desired. I personally express the hope that when my days are done, I shall be permitted to approach my grave, "Like one who wraps the drapery of his couch about him, and lies down to pleasant dreams." Recalling his active and energetic life, I know that he would not have desired to linger long in illness, a burden to anyone.

It has been an honor, a privilege, and an opportunity for me personally to have known this devoted husband, father and statesman. In this humble impromptu personal manner, I express my great loss in the going of this great man.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Ohio [Mr. JENKINS].

Mr. JENKINS of Ohio. Mr. Speaker, I should like to add a few words to what has been said about the distinguished gentleman from Kentucky who has gone from us forever. I knew him not only as a fellow Member of the House, but as a strong personal friend. In our activities here in Congress, our friendships are sometimes made closer by reason of the fact that there is a kinship of purpose between us in our efforts to represent our constituency. In our deceased friend, JOHN ROBSION, I found companionship that helped me in my work. He and I were Members here when the membership of our party was rather slim.

There was a companionship developed at that time between Mr. ROBSION, Mr. Will Taylor, of Tennessee, and myself that held us closely together through the years. We three came from what we call the hill country. Mr. ROBSION was a typical mountain man. Mr. Will Taylor was a mountain man. I, too, am a hill-country man. My district is a hill-country district. We stuck together with remarkable tenacity and fidelity. The records will disclose that we voted together on many important matters. I served with him nearly 24 years. He was my friend and I was his friend. I shall miss my friend JOHN ROBSION very much. My most profound sympathy goes out to his family. He will for generations be the idol of the mountain men of old Kentucky.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. HESELTON].

Mr. HESELTON. Mr. Speaker, while I did not know our colleague so intimately as others who have spoken of him today so eloquently, I did have the privilege and opportunity of meeting him frequently as he came to the floor and went back to his office; particularly this year when we were on the same floor of the Old House Office Building. I, too, learned to admire and respect his judgment, to ask for his advice as a senior Member of this House and a man whom I knew to be well trained as a fine lawyer.

It is a coincidence that only 2 years ago next Saturday we held memorial services for another of his kind, my predecessor, the late Mr. Treadway. As I listened to the gentleman from Ohio [Mr. JENKINS] speak I think I understand better why I was led to lean on Mr. ROBSION so frequently, since Mr. Treadway and I, too, come from a hill district, and we have among our constituents that fine rugged type of individuals who make up the best there is in this country of ours.

Then again I thought of another man whom we had lost within the last 12 months. I think he, too, typifies to each of us the kind of fine characteristics which are lost when one of these men goes. I refer to the late Charles Gifford.

Although others have spoken of the giants of the other Congresses, to us who are left here as newcomers, I cannot help but feel that Allen Treadway, Charles Gifford, and John Robsion represented to us who saw them, listened to them, knew them, and who were greeted with their friendly advice and their suggestions, the very finest type of great Americans of this generation.

I hope and I believe that JOHN ROBSION is this very afternoon in the company of those two great Americans as well as others of whom the older Members have spoken, and I hope they can find it in their souls to commend what their successors may try to do here during the coming trying days and months.

When I learned late Tuesday night of Mr. ROBSION'S death, in talking with one of his constituents, I felt a great sense of personal loss. The next morning many of our employees in the House Buildings and on the floor told me that they, too, shared that feeling of loss. As one of his friends expressed it, "Men of his kind are disappearing all too rapidly from among us." To these eloquent tributes, I do want to add my brief personal one and to express my deepest sympathy to his widow, whom I do not have the privilege of knowing personally, and to his daughter whom I have had the pleasure of meeting.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from Kentucky [Mr. BATES].

Mr. BATES of Kentucky. Mr. Speaker, JOHN MARSHALL ROBSION is dead. Saturday at 2:30 in the afternoon thousands of his friends will gather in the little town of Barbourville, Ky., to take one last look at their leader, and he was their leader in a true sense. He was a power that had to be reckoned with and stood high in his party's councils in the State of Kentucky. He has represented the Ninth Kentucky District in Congress since March 4, 1919, with the exception of a few years in the Senate. He was a courageous legislator, a hard and untiring worker, a capable and conscientious public servant who will be missed by his friends in and out of Congress. I deeply sympathize with his family and join them in this hour of grief.

Mr. MORTON. Mr. Speaker, I ask unanimous consent that all Members may have five legislative days in which to extend their remarks in the RECORD at this point on the life and character of the late JOHN M. ROBSION.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. GWYNNE of Iowa. Mr. Speaker, the sudden death of JOHN M. ROBSION comes as a shock to the many who knew him so well.

Congressman ROBSION was the ranking member of the House Judiciary Committee and chairman of Subcommittee No. 1. He was faithful in his attendance and took an active part both in the committee sessions and in the debate on the floor.

Under the Congressional Reorganization Act, the work of the former Committee on the Revision of the Laws was turned over to the Judiciary Committee. It was in turn made the special responsibility of Subcommittee No. 1. Under the leadership of Mr. ROBSION important bills providing for much-needed codification have already passed the House.

JOHN ROBSION was a good lawyer in the broadest sense of that word. He knew the rules as laid down over the years by legislatures and courts. He also understood the reasons for those rules—the great fundamental principles of fair play upon which those rules are based. He had considerable experience as a trial lawyer and knew the law also on the practical side and in its application to concrete problems and to human beings.

If required to describe JOHN ROBSION in a single sentence, I would say he was an American of the old school. He believed in the Constitution and accepted it as the basic philosophy of our Government. He had the rugged honesty and the adherence to great fundamentals that we always associate with the American pioneer. Personally, he was always friendly and helpful to all. While firm in his own convictions, he had charity for those who disagreed with him. He

was an understanding man, with the understanding that comes not from colleges but from years of friendly association with people.

Mr. RICH. Mr. Speaker, JOHN M. ROBSION was the kind of American we take pleasure in paying tribute to—the kind of Republican we could count on to uphold our Republican principles and policies as he saw them. He was the hardest-working Member of Congress I have known—always interesting himself in the things that he considered to be best for our country. He never feared to express himself when he thought he was fighting for a principle. I know of no one in Congress since I have been a Member that I have had greater admiration and respect for than JOHN M. ROBSION. He will not only be missed by his colleagues but by the people in the Ninth Congressional District which he was so proud to represent. May his soul be carried on to greater heights.

Mr. GILLIE. Mr. Speaker, we pause here today to pay tribute to a grand and noble character and to pay a just and loving acknowledgment to the memory of JOHN M. ROBSION.

Mr. ROBSION was, in all respects, a grand old man. Always generous in wise counsel, he was a constant inspiration to me. His loyal friendship and unselfish interest were a never-failing source of strength in the House of Representatives.

In a wider, less personal sense, JOHN ROBSION's life was rich in contributions to the welfare of his fellow man. He was loved and honored by all who knew him. No man in our time has been more devoted to the advancement of human welfare. His accomplishments will be an eternal shrine to his memory.

I shall always remember him as the embodiment of those stalwart characteristics that have gone into the building of a great nation.

Mr. SMITH of Ohio. Mr. Speaker, Mr. ROBSION's passing came to me as a shock as it did to all those who knew him. I shall not forget the kindness with which he greeted me when I first came to Congress 9 years ago. I considered him one of my best friends since that time. He was always an inspiration. We have lost a man of sterling character and shall greatly miss him.

Mr. GREGORY. Mr. Speaker, I was shocked and grieved to hear of the passing of my long-time friend, JOHN M. ROBSION. It is hard to believe that this rugged Kentuckian has passed from the stage of action.

He was a man on whom the ravages of time seemed to have no effect. We in Kentucky throughout the years have regarded him as an ageless institution inasmuch as his alert intellect, his physical vigor and appearance had not changed throughout the passing years.

JOHN M. ROBSION was a great American, always a true Kentuckian, and a stanch Republican. Our political views were naturally at variance. He believed in the principles of his party and had the courage of his convictions always, but when the interests of Kentucky were involved all political differences were dissolved and he became first a Kentuckian and was always ready to cooperate in anything for the betterment of the State he loved so well.

In his passing a sincere Christian gentleman has put aside the mantle of public service to go to a well-deserved reward. As a tower of wisdom, as a moral and political leader of Kentucky and the Nation, he will be missed; as a true friend of thousands, he will be missed; and above all as a devoted and indulgent husband and father, his place cannot be filled.

To his wife, who has always stood faithfully by his side and has helped him share disappointment gracefully and countless honors modestly, to his devoted son and daughter, and to his multitude of stanch and admiring friends, I extend my deepest sympathy.

Mr. DEVITT. Mr. Speaker, I join with my colleagues of the House in expressing profound sorrow upon the passing of JOHN MARSHALL ROBSION. I knew him well and enjoyed the great privilege of serving with him on the House Committee on the Judiciary.

Judge ROBSION was a great character. He possessed a splendid mind, a great wealth of knowledge, and a wonderful sense of humor. He was most cordial and friendly, especially to us newer Members of Congress. He was an indefatigable worker for the things in which he believed. He devoted himself with special diligence and application to the revision of our laws. As chairman of Subcommittee No. 1 of the House Committee on the Judiciary, and formerly as a member of the Committee on the Revision of the Laws, he devoted so much of his valuable time and ability in the promotion of this worth-while effort.

Another of his great interests was the equal rights amendment to the Constitution. For years he was the recognized champion for the adoption of this amendment. He believed in it, and worked prodigiously for its adoption. It is lamentable that his efforts looking toward the adoption of this amendment should have been frustrated just the day before his subcommittee was to open hearings on the proposal.

JOHN MARSHALL ROBSION was a great lawyer, a great jurist, a great Senator, and a great Congressman, but, above all this, he was a man of good character and integrity. He loved and respected his fellow men and in turn was loved so deeply by all of them. We of the Congress shall miss our genial friend, JOHN MARSHALL ROBSION.

Mr. MORTON. Mr. Speaker, I yield to the gentleman from New York [Mr. EDWIN ARTHUR HALL].

Mr. EDWIN ARTHUR HALL. Mr. Speaker, many times the older Members of the House, preoccupied as they are by the ever-increasing duties piling upon them, are wont to ignore the status of neophytes and greenhorn new Members.

When I came here in that capacity in the Seventy-sixth Congress no man in the entire House put forth a more friendly hand to me than did Senator ROBSION. He was always ready with constructive suggestions and sound advice. He steered me right more than once in the early days of my service.

JOHN ROBSION was a great Republican. But before this he was a great American. He was loyal to his party, to his country, and to his conscience. His long distinguished public career was one which younger men could look to and emulate. He was one of the men I have admired consistently throughout the five terms I have served in this House.

His public career is ended. We can look back over the long years of his service and say that while the ermine mantle of public responsibility rested upon his shoulders it touched nothing less spotless than itself. We will miss him, the country will miss him. When a man of his stature passes it leaves a great vacancy not only in the hearts of the people he represented but in the places of the noble as well.

Mr. MORTON. Mr. Speaker, I thank the gentleman from New York, and yield to the gentleman from Pennsylvania [Mr. CHADWICK].

Mr. CHADWICK. Mr. Speaker, varying from what I have made the prescribed course for myself in this Congress, I welcome this opportunity to say a few words here in the well of the House in recognition of a man whom I regarded as a really great character.

When I came to the House the first of last year, experiencing the novelties just spoken about by the gentleman from New York, I found myself honored by membership on the Judiciary Committee, and particularly the distinction of serving under Congressman ROBSION on its traditionally great Subcommittee No. 1. I was then making new acquaintances, just as my friend had made them in an earlier Congress. Nowhere did I find a more sympathetic, a more understanding, a more friendly welcome than I received from this kindly gentleman from Kentucky.

He was one of those who seemed to realize that when we come into the House as newcomers we do not come entirely out of a vacuum; he did not hesitate to assume that we could grasp the problems which he imposed upon us as an incident of service on his committee; but he did not assume that we had the knowledge of legislative procedures that would carry those problems through to conclusion. On the contrary, helping me in my inexperience, he gave me, out of his wide experience, a background of information to make that service more useful.

I want to pay a tribute, therefore, not to his greatness of character—because you gentlemen can do that so much better who have known him so much longer—but here on the floor of the House to acknowledge my personal debt of gratitude to him for the kindly encouragement I received from our now departed colleague.

May I also remind you that his death came at a sad and inopportune time, sad because I know it deprived him of an opportunity to which he had looked forward not only this year, but over the years. The Members of the House know of his devoted sponsorship of a program built around a proposed amendment to the Constitution to recognize the equal

rights of women. That was with Mr. ROBSION what my Quaker friends of Delaware County call a deep concern. He was just ready to hear, in his subcommittee, testimony in support of that amendment and related bills.

Although I am sure he would have accepted without cavil any call to duty, whether it came of this world or from above, it must have been a great disappointment to JOHN ROBSION to know, if he did know, that he was to be deprived of the opportunity to make a further contribution to a cause to which he was so completely and devotedly attached.

Mr. McCORMACK. Mr. Speaker, will the gentleman from Kentucky yield?

Mr. MORTON. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Georgia [Mr. CAMP] may extend his remarks at this point in the RECORD to join the gentleman from Kentucky and others in their eulogy of our deceased colleague.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CAMP. Mr. Speaker, I was indeed grieved to learn that my friend, JOHN M. ROBSION, of Kentucky, has passed on to his eternal reward. This body and the Nation generally has sustained a distinct loss, for there was no finer patriot nor more conscientious worker than he.

I feel in his passing a personal loss. We served together on the Judiciary Committee for a while. We occupied adjoining offices for the past few years in the Old House Office Building and I saw him almost daily.

Judge ROBSION possessed a keen conception of his duty and responsibility as a citizen and as a representative of his people. His faith in them and in our institutions was both beautiful and inspiring, for he always took the optimistic view that the people were right and that truth would prevail.

In physique and in demeanor he typified the sturdy mountain stock from whence he sprung, and which he represented so long and so loyally.

I have lost in him a friend and a neighbor, and my heart goes out to his family and loved ones in their sad hour of bereavement. His people may take pride in his record of faithful, honest, and distinguished service.

Mr. MORTON. Mr. Speaker, I yield now to the gentleman from Kentucky [Mr. MEADE].

Mr. MEADE of Kentucky. Mr. Speaker, it is with a deep sense of sorrow and loss that I join here today with my colleagues in paying tribute to my distinguished colleague from Kentucky, JOHN M. ROBSION, a great American and a great Kentuckian, whose death came with such surprising suddenness night before last.

It is my privilege to represent a district adjoining the one represented by Mr. ROBSION in the State of Kentucky, and it is my privilege to represent the same type of people he has represented for these many years.

During the last few months I have been with him in his district, in the small towns and in the rural counties that comprised his district. I saw then the great devotion with which the people of the Ninth Congressional District of Kentucky held for him. They loved Mr. ROBSION, they loved Mr. John, they loved Cousin John, Mr. John M.—they loved the "tall sycamore from the Cumberlands."

He represented his people in a way that they had never before been represented, and I doubt seriously if they will be so ably represented again. It is reported that his mail here in the Congress was the heaviest of any other Member. I know the reason for that. It is because they wrote him not only to give him their advice on legislative matters, but they wrote seeking his advice on their own personal affairs, on all matters concerning their home life. They knew that in his wisdom he would tell them the right thing to do, the right way to proceed to straighten out whatever problems they were confronted with.

The passing of Mr. ROBSION is to me a great personal loss. He had served in the Congress from my State for more than 25 years and for 2 years in the other body of this Legislature. It was to him I turned upon my election to the Eightieth Congress. With his usual graciousness, he aided and advised me on the duties of the office and pointed out to me the best way to serve Kentucky and America.

He was one of the most respected Members of this body. He was one of the best loved Members of this body. Members from both sides of the aisle, even when in disagreement with him, respected his faithfulness, his loyalty, and his courage to stand with his convictions.

I am sure that I express the sentiments of all who are present today and those Members who are not here, when I say that we will cherish the virtues of JOHN M. ROBSION in our minds henceforth with kindest appreciation of his thoughtfulness.

He was the embodiment of those stalwart characteristics that have gone into the building of a great Nation. He was a son of the soil, and though orphaned at an early age he took his own career by the boot straps and lifted himself into the hearts of all real Americans and gained an everlasting place for himself in the Halls of this Congress through his long and faithful and outstanding service. He was a great servant of the people, a true American, a fine friend, and we will all miss him greatly.

To his family we wish to express our sincerest condolences and deepest sympathy.

Mr. MORTON. Mr. Speaker, the comments by his colleagues have certainly borne testimony to the stature of JOHN MARSHALL ROBSION.

Mr. Speaker, I ask unanimous consent that all Members who have spoken on the passing of our late colleague JOHN MARSHALL ROBSION may revise and extend their remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. MORTON. Mr. Speaker, I offer a resolution (H. Res. 470).

The Clerk read as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. JOHN M. ROBSION, a Representative from the State of Kentucky.

Resolved, That a committee of five Members of the House with such Members of the Senate as may be joined be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provision of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The SPEAKER. The Chair appoints as Members of the House to attend the funeral of our late departed colleague the gentleman from Kentucky [Mr. MORTON], the gentleman from Kentucky [Mr. MEADE], the gentleman from Tennessee [Mr. JENNINGS], the gentleman from Iowa [Mr. GWYNNE], and the gentleman from South Carolina [Mr. BRYSON].

ADJOURNMENT

The SPEAKER. The Clerk will report the balance of the resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect the House do now adjourn.

The resolution was agreed to; accordingly (at 1 o'clock and 32 minutes p. m.) the House, under its previous order, adjourned until Monday, February 23, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1306. A letter from the chairman, Atlantic States Marine Fisheries Commission, transmitting the sixth annual report of the Atlantic States Marine Fisheries Commission; to the Committee on Merchant Marine and Fisheries.

1307. A letter from the Secretary of the Interior, transmitting a draft of a proposed bill to extend the provisions of title VI of the Public Health Service Act to the Virgin Islands; to the Committee on Interstate and Foreign Commerce.

1308. A letter from the Secretary of State, transmitting a copy of the proposed China aid bill; to the Committee on Foreign Affairs.

1309. A letter from the Acting Secretary of the Navy, transmitting a list of eligible institutions and organizations which have requested donations or loans from the Navy Department; to the Committee on Armed Services.

1310. A letter from the Acting Secretary of the Army, transmitting a report of action taken to date by the Department of the Army on allotted positions in said Department; to the Committee on Post Office and Civil Service.

1311. A letter from the Secretary of the Treasury, transmitting the annual report for the fiscal year ending June 30, 1947, of the Exchange Stabilization Fund, including a summary of operations of the fund from its establishment to June 30, 1947; to the Committee on Banking and Currency.

1312. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1948 in the amount of $60,000 for the District of Columbia (H. Doc. No. 535); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WELCH: Committee on Public Lands. House Report No. 1297 (pt. II). Supplemental report to accompany H. R. 3628. A bill to revise the method of issuing patents for public lands; without amendment. Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. House Report No. 1304 (pt. II). Supplemental report to accompany H. R. 4515. A bill to provide for selection of superintendents of national cemeteries from meritorious and trustworthy male members of the armed forces who have been disabled in line of duty for active field service; without amendment. Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. House Report No. 1349 (pt. II). Supplemental report to accompany H. R. 4272. A bill to provide for the procurement and supply of Government headstones or markers for unmarked graves of members of the armed forces dying in the service or after honorable discharge therefrom, and other persons, and for other purposes; without amendment. Referred to the Committee of the Whole House on the State of the Union.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 462. Resolution to appoint a select committee of the House of Representaties to investigate possible fraudulent income-tax returns filed with the collector of internal revenue at New Orleans, La.; with an amendment (Rept. No. 1404). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 471. Resolution providing for consideration of H. R. 5390, a bill to continue for a temporary period certain provisions of the Housing and Rent Act of 1947; without amendment (Rept. No. 1405). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 472. Resolution providing for consideration of H. R. 5391, a bill to continue for a temporary period certain powers, authority, and discretion conferred on the President by the Second Decontrol Act of 1947; without amendment (Rept. No. 1406). Referred to the House Calendar.

Mr. GOSSETT: Committee on the Judiciary. H. R. 5119. A bill to amend the immigration laws relating to stowaways, and for other purposes; with amendments (Rept. No. 1407). Referred to the Committee of the Whole House on the State of the Union.

Mr. FELLOWS: Committee on the Judiciary. H. R. 5193. A bill to amend the Nationality Act of 1940; with amendments (Rept. No. 1408). Referred to the Committee of the Whole House on the State of the Union.

Mr. SHAFER: Committee on Armed Services. H. R. 5314. A bill to strengthen national security and the common defense by providing for the maintenance of an adequate domestic rubber-producing industry, and for other purposes; with amendments (Rept. No. 1409). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1368. By Mr. FORAND: Petition of Leo H. Leary, Jr., and seven others, in favor of universal military training; to the Committee on Armed Services.

1369. Also, petition of the City Council of the city of Providence in the State of Rhode Island and Providence Plantations, to memorialize the National Congress to the end that the inequities and inequalities in the present tax law be eliminated through the immediate amendment of the Internal Revenue Code so as to permit husband and wife to file a joint return and to pay a tax which shall be twice the tax computed on one-half of the aggregate net income shown on the joint return; to the Committee on Ways and Means.

1370. Also, petition of the City Council of the city of Providence in the State of Rhode Island and Providence Plantations, to memorialize and request the National Congress to give immediate relief to the people of the United States by amending the Internal Revenue Code so that the personal exemption under the Federal income-tax law be immediately increased to $700 per person; to the Committee on Ways and Means.

1371. By Mr. JENISON: Petition of American Legion Post No. 85, of Kankakee, Ill., bearing the signatures of 21 persons, petitioning the Congress to enact legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1372. Also, petition of 54 residents of Olivet, Ill., petitioning the Congress to enact legislation (S. 265) to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1373. By Mr. KEARNEY: Petition containing the signatures of 19 citizens of Otego, N. Y., in the Thirty-first Congressional District, advocating the passage of S. 265, a bill to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1374. By Mr. KILDAY: Petitions of Harold E. Mueller and 36 other citizens of San Antonio, Tex., and Romilda M. Vail and 10 other citizens of San Antonio, Tex., urging passage of legislation to establish a system of universal military training; to the Committee on Armed Services.

1375. By Mr. LEWIS: Petition of 63 residents of Leetonia, Ohio, and vicinity, in support of legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1376. By Mr. LUDLOW: Petitions of residents of Indianapolis, Ind., urging passage of universal military training legislation; to the Committee on Armed Services.

1377. By Mr. SMITH of Wisconsin: Petition of residents of Burlington, Wis., urging passage of legislation to establish a system of universal military training; to the Committee on Armed Services.

1378. Also, petition of members of the American Legion Auxiliary, Stuessy Kuenzi Unit, No. 141, New Glarus, Wis., urging passage of legislation to establish a system of universal military training; to the Committee on Armed Services.

1379. By the SPEAKER: Petition of Jefferson Democratic League of California, petitioning consideration of their resolution with reference to opposition for extension of control of food fats; to the Committee on Banking and Currency.

1380. Also, petition of William L. Batt and others, petitioning consideration of their resolution with reference to a national act against discrimination in employment; to the Committee on Education and Labor.

1381. Also, petition of A. A. Ashley, Lake Worth, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1382. Also, petition of South Miami Townsend Club, No. 1, South Miami, Fla., petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1383. Also, petition of Coconut Grove Townsend Club, No. 2, Coconut Grove, Fla., petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1384. Also, petition of J. C. Michael, Orlando, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1385. Also, petition of Miss Lydia J. Bomers, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1386. Also, petition of Edward E. Rorem, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1387. Also, petition of General Supplies Administration, Government of Puerto Rico, petitioning consideration of their resolution with reference to the control of prices of basic commodities; to the Committee on Banking and Currency.

1388. Also, petition of Mrs. Tennie Alspaugh and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

1389. Also, petition of A. Swanson and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

1390. Also, petition of Mrs. Eva Daughirtal and others, petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.
